Hi James,

Thanks for checking. I had just spoken with Stuart and he had let me know about the intended well destruction. It is fine to destroy the well. The gw concentrations were non-detect and most of the contamination at the site appears to be soil only. They just need to use PW requirements. He mentioned you wanted the casing cut at 5 feet, per state requirements, and that is appropriate due to the pending redevelopment.

Thanks,

**Subject:** FW: 1510 Supply Well

Hi Mark,

I have a domestic well destruction at 1510-1520 105<sup>th</sup> Ave, Oakland. I believe this address maybe also related to 10550 International Blvd. It stated 9 other parcels.  
The well completion report on file states that this well is 74 ft. in depth. The applicant stated that the well was tagged at 63 ft.

Hopefully they have informed you if this is also related or not. Let me know if you see any concerns.

Thanks.  
James

Hi James.

Here is an application for the well destruction that we discussed at 1510 105<sup>th</sup> Ave. in Oakland along with some sampling details performed by Levine Fricke in 2001 . The client has signed the app, and we have a check prepared for the fees. I can drop the check off tomorrow at your office. Please call me to discuss details. Thank you, James! Stuart
