---

Mr. Winet and Mr. Savage,

Upon initial review of the two submitted reports, we have opened a fuel leak case (RO0003162; GeoTracker Global ID T10000006533) to deal with contamination related to the former underground storage tanks at the site. The fuel leak case is in the Alameda County Environmental Health Local Oversight Program and the case worker is Matthew Soby. Mr. Soby can be contacted at 510-567-6725 or [matthew.soby@acgov.org](mailto:matthew.soby@acgov.org). I have also forwarded the reports to the ACEH Certified Unified Public Agency (CUPA) to deal with the other environmental issues related to storage of hazardous materials at the site. The CUPA has a large case load and will address your site as their case load and priorities allow.

Regards,  
Jerry Wickham

Mr. Wickham,  
Our client received a letter from the City of Oakland regarding the environmental issues at APN 19-55-11 on Calcot Place in Oakland. According to the letter this site was referred to you for recommendations. Attached is the Phase 1 ESA prepared by ERAS. I will send our Phase 2 Subsurface Investigation as a second email.
