Hi Mr. Nowell,

Thank you for discussing our permit application for advancing 24 soil borings at the UPRR Oakland Yard. Attached is a site plan showing the 24 proposed boring locations.

For reference, county case number RO3169 is a separate case associated with clean-up of a diesel spill on Track 58 in the center of the Switching Yard.

Please let me know if you need additional information for your approval of our soil boring permit application.

-Scott-

Dear Ms. Mancuso,

Alameda County Department of Environmental Health (ACDEH) staff has received notification for drilling permit application for the subject site as the site remains an open case with our agency. As presented, the permit request is for twenty four (24) direct-push soil bores to a depth of ten (10) feet for an environmental investigation.

Please elaborate on the purpose of the investigation and include a site map showing the locations of the proposed borings. Additionally, please verify that a soils management plan (SMP) and health and safety plan (HSP) have been prepared for the proposed work.

ACDEH requests this information, including confirmation of the preparation of the SMP and HSP, in your response prior to our release of the permit. Thank you for your cooperation in this matter.

Should you have any questions regarding this correspondence or your case, please call me at (510) 567-6764 or send an electronic mail message at keith.nowell@acgov.org.

Respectfully,
Keith Nowell
