Subject: RE: 1607 2nd Ave., Oakland Case No. (RO0003170)

Kevin,

Thank you for the update. Please insure the investigation will be conducted in general accordance with document *Advisory- Active Soil Gas Investigations* prepared by Cal/EPA, Los Angeles RWQCB, and San Francisco RWQCB, dated July 2015. Should the outdoor location be sampled, please document the integrity of the pavement in addition to the fact that there was no precipitation during the course of the outdoor sampling event.

Good luck,
Keith Nowell

Subject: 1607 2nd Ave., Oakland Case No. (RO0003170)

Hello Keith,

We have scheduled the soil vapor re-sampling event at 1607 2nd Ave., in Oakland, for Friday (1/13). However, the weather forecast currently shows rain for this day. Thus, we plan on re-sampling the two indoor locations first. If the weather then clears up, we will drill the outdoor boring and assess the soils to make sure they are dry and acceptable for soil vapor sampling. Work is expected to begin at approximately 8:00 am. Please call or email me with any questions or concerns. Thank you.

Regards,
Kevin P. Loeb, GIT
