Jan,

Your extension request for submittal of the Soil and Groundwater Investigation report for the subject fuel leak case by February 28, 2016 is approved.

Regards,
Keith Nowell

Hi Keith,
Happy Holidays! I might have sent this previous letter to the wrong email. My apology!
Thank you,
Jan Schutze

Hi Keith,

RE: RO0003170 - GeoTracker Global ID T10000006756, Second Avenue UST, 1607 2nd Avenue, Oakland, CA 94606

SCHUTZE & Associates, Inc. has been working on assembling various environmental records for this site and we are in the process of obtaining the necessary permits for the soil boring project at the former UST location. As you know, the Planning and Building Department of the City of Oakland has an annual Holiday Restriction for building permits from November 1st to January 1st. The city informed us that they will accept the permit application after January 1st and then will need time to process it. Taking into account this permitting process after January 1st, plus the time needed for the field work, laboratory analyses and report writing, we expect to be able to complete the proposed work by mid- to late February.

Therefore, we are kindly requesting a two-month extension for the approved soil boring project/report from 12/28/2015 to 2/28/2015. That should be enough time to address the permitting delay.

Thank you,
Jan Schutze
