Keith,

I presume that PGE will employ standard health and safety protocols during the work to protect its workers. While there is no documentation of contamination in 105th at this time, there is a potential on the three parcels (most likely hydrocarbon and potentially surficial lead from paint). ACDEH requests notification of the discovery of any contamination on the three parcels.

Reference Case:
ALAMEDA COUNTY LOP (LEAD) CASE #: RO0003195
10550 INTERNATIONAL BLVD.
OAKLAND, CA 94603
ALAMEDA COUNTY
CLEANUP PROGRAM SITE

Dear Mr. Detterman,

PG&E will be deactivating (4) services by a cut-off at the gas main line due to building demo. (Figure 1). A search performed in Geotracker in advance of the project shows that the service locations are on or near the 10550 INTERNATIONAL BOULEVARD (T10000008195) cleanup program sites. Onsite trenching should not exceed 3 feet bgs and trenching in the road should not exceed 5 feet bgs.

Please indicate if additional information is needed; or, if you have any requirements or additional information.

PG&E appreciates your consideration and assistance in this matter.

Thank you,

Keith Baker
