Hi Keith,

We just received notice that the 0.75-inch Class II AB from the Cemex Quarry will be used for the remaining backfill. Per the report provided to you yesterday, this material did not contain any exceedance of the screening levels presented in the SIMP. The final surface is planned to be a larger gravel.

Thanks,

John Lucio  
Program Director

Hi Keith,

Per our conversation, attached are the gradations for the two potential fill materials from the Cemex Clayton Quarry. I am still awaiting confirmation on how the surface will be finished.

Thanks,

John Lucio
