Subject: RO3206 Notification of Underground Structure Discovery_1708 Wood Street

Keith:

West environmental Services & technology, Inc. (WEST), on behalf of TRI Pointe Homes, Inc. is providing notification of an underground structure discovered during joint utility trench excavation activities within 17th Street City of Oakland right-of-way and adjacent to the 1708 Wood Street project in Oakland, California. Stained soil was initially discovered in the trench along the east side of 17th Street near the intersection of 17th Street and Willow Street.on Friday June 28, 2018. On Monday July 1, 2018, an underground structure was discovered associated with the stained soil. The dimensions of the underground structure have not been confirmed; however it appears to be 2-foot wide by 3-foot long and present at approximately 4-feet below ground surface.

TRI Pointe Homes has contacted Pacific States Environmental Contractors to coordinate permitting and removal of the structure with Alameda County Environmental Health. The stained soil removed from the trench has been placed on concrete and covered with plastic and the area fenced.

Please contact me at 415/271-0366 if you have any questions or wish to discuss further.
