Re: 1233 Bockman Road
San Lorenzo, California
ACEH Case No: RO00003217

Dear Ms. Roe:

PaulsCorp, LLC, has retained Pangea Environmental Services, Inc. (Pangea) for environmental consulting services for the project referenced above. Pangea is submitting the attached report on my behalf.

I declare, under penalty of perjury, that the information and/or recommendations contained in the attached report are true and correct to the best of my knowledge.

Sincerely,

A handwritten signature in blue ink, appearing to read "AJL".

Re: Interim Remediation Report

Bockman Road Property
1233 Bockman Road
San Lorenzo, California 94577
ACDEH Case # RO00003217

Dear Mr. Lavaux:

On behalf of PAULS Corporation, LLC, PANGEA Environmental Services, Inc. (PANGEA) prepared this *Interim Remediation Report* for the subject property. This report documents soil excavation activities and post-excavation compliance sampling in the area of the former auto repair facility of the subject site. The work was conducted in accordance with the *Site Management Plan* (SMP). The SMP provided procedures and to address potential soil impacts that might be encountered during site grading work at the western portion of the Site.

If you have any questions or comments, please call me at (510) 435-8664 or email briddell@pangeaenv.com.
Sincerely,

PANGEA Environmental Services, Inc.

Bob Clark-Riddell, P.E.
Principal Engineer

INTRODUCTION

On behalf of PAULS Corporation, LLC (PaulsCorp, LLC), PANGEA Environmental Services, Inc. (PANGEA) has prepared this *Interim Remediation Report* (IRR) for the subject property located at 1233 Bockman Road in San Lorenzo, California (Site) (Figure 1). This IRR documents soil excavation activities in the area of the former auto repair facility. The work was conducted in accordance with a *Site Management Plan* (SMP) prepared by ENGEO dated May 16, 2016 and a *SMP Supplement* prepared by PANGEA dated August 17, 2016. The SMP and SMP Supplement provided procedures and protocols to address potential soil impacts that might be encountered while developing the Site and to facilitate grading work at the western portion of the Site.

Upon encountering soil impact, PANGEA further characterized and managed Site soil in August and September 2016 consistent with SMP procedures. PANGEA notified the Alameda County Department of Environmental Health (ACDEH) and assisted with the excavation of impacted soil and associated confirmation sampling. SMP implementation involved the following activities:

- Hoist area exploratory excavation and confirmation sampling on August 30, 2016.
- Additional soil gas characterization in the hoist area on September 1, 2016.
- Exploratory excavation and sampling on September 2, 2016, followed by extensive soil excavation and confirmation soil sampling on September 7 and 8, 2016.
- Groundwater characterization on September 7 and 8, 2106.
- Post-excavation confirmation soil gas assessment on September 19 and October 20, 2016.

These activities, the Site background, and our conclusions and recommendations are described below.

SITE BACKGROUND

Site Description and History

The Site consists of an approximately 3.87-acre lot along Bockman road in San Lorenzo, California (Figure 2). The property is owned and being redeveloped by PaulsCorp, LLC into 53 two-story residential units. The assessor parcel number (APN) for the Site is 411-63-17. The subject property is relatively flat and lies at an elevation of about 20 feet (ft) above mean sea level. There are currently no buildings onsite but historically the Site consisted of a strip mall and associated parking lot and an automotive repair facility in the west portion of the Site (Figure 3). The Site is surrounded in all directions by single and multi-family residences.

Previous Environmental Work

Previous environmental work included two Phase I Environmental Site Assessments performed in 2004 and 2015 and several subsurface investigations in 2015 and 2016. Details of the previous work conducted at the Site is documented in Engeo's *Phase II Environmental Site Assessment* dated July 2, 2015, Engeo's *Revised Phase II Environmental Site Assessment* dated August 2, 2016, PANGEA's *Site Assessment Report* (SAR) dated August 26, 2016 and PANGEA's *Draft Corrective Action Plan* (Draft CAP) dated October 7, 2016 (Revised October 14, 2016). All sampling locations at the Site are shown on Figure 2. Soil, groundwater and soil gas sampling data is summarized in Tables 1, 2, and 3, respectively.

In the area of the former auto repair facility specifically, six soil samples from two initial soil borings (S-1 and S-2) were collected by Engeo in June 2015. An additional soil sample from a third soil boring (SV-28) was collected by PANGEA in August 2016. Two grab groundwater samples (GW-1) were collected by Engeo in June 2015 and July 2016, and three subsequent grab groundwater samples (SB-7, SB-13 and Pit) were collected by PANGEA in August and September 2016. One initial soil gas sample (SG-1) was collected by Engeo in August 2015, and two additional soil gas samples (SV-28 and SV-29) were collected by PANGEA in August and September, 2016. As indicated above, these sampling activities are described in Engeo's Phase II SAR, and PANGEA's SAR and Draft CAP. The apparent primary condition of concern was the detection of tetrachloroethylene (PCE) in soil gas in SV-28 near the 2016 Tier 1 Environmental Screening Level (ESL) established by the San Francisco Bay Regional Water Quality Control Board. Subsequent assessment performed in conjunction with the SMP implementation is documented below.

Site Geology and Hydrogeology

The Site property is located within the East Bay Plain subbasin, which is part of the larger Santa Clara Valley Groundwater Basin. The East Bay Plain subbasin is a northwest trending alluvial plain bounded to the north by San Pablo bay, to the east by the contact with Franciscan Basement rock, and to the south by the Niles Cone Groundwater basin. The basin extends beneath San Francisco Bay to the west. Groundwater is generally found very near the surface throughout the basin.

The East Bay Plain subbasin aquifer system consists of unconsolidated sediments of Quaternary age. The Early Holocene Temescal Formation is the most recently deposited and consists of primarily silts and clays with some gravel layers.

The relatively flat Site lies at an elevation of approximately 20 feet above mean sea level to the east of San Francisco Bay (Figure 1). Soil beneath the Site consists of sandy gravel fill to approximately 1 ft below grade surface (bgs) underlain by 2 to 3 ft of moderately plastic clay. The clay layer is underlain by silt to 9 ft bgs and clay to a total explored depth of 10 ft bgs. In portions of the Site, a discontinuous, one-foot thick sand lens is intermittently observed between 6 and 10 feet bgs. PANGEA observed groundwater between 7 and 9 feet bgs. Based on data from neighboring sites, static groundwater is approximately 8 ft bgs (1201 Bockman) and groundwater flows to the northwest. Further lithologic and groundwater data including a geologic cross-section can be found in PANGEA's SAR and Draft CAP.

HOIST AREA EXPLORATORY EXCAVATION

During initial Site grading activities, PANGEA was notified of potential VOC-impacted soil in the vicinity of the former auto repair facility and the hoist area. PANGEA responded to the Site on August 30, 2016.

PANGEA worked with Site construction contractor DCI Construction Inc. (DCI) of Walnut Creek, California, to perform the exploratory soil excavation and associated sampling. Prior to excavation, the Site was marked for Underground Service Alert (USA) and a subsurface utility contractor was used to clear the planned excavation area. A site safety plan was prepared to protect human health and minimize nuisance to nearby residences. The area was secured by a chain-link fence.

On August 30, 2016, PANGEA supervised the removal of approximately 90 cubic yards (CY) of soil from the vicinity of two former two hydraulic hoists located within the footprint of the former auto repair building. Soil was excavated to a depth of 8 ft bgs surrounding soil gas probe SV-32. The exploratory excavation was conducted to search for potential hoists and for potential source material contributing to the PCE impact reported in soil gas well SV-28. The excavation extent is shown on Figure 3. Three confirmation soil samples (H-1, H-2, and H-3) were collected at 8 ft from the bottom of the excavation within the footprint of

the former auto repair building. Soil samples were analyzed for total petroleum hydrocarbons as diesel (TPHd) and TPH as motor oil (TPHmo) by EPA Method 8015B volatile organic compounds (VOC) by EPA Method 8260B, semi-volatile organic compounds (SVOC) by EPA Method 8270, and polychlorinated biphenyls (PCB) by EPA Method 8082.

Low levels of diesel- and motor-range hydrocarbons were detected in samples H-1 and H-3 from the hydraulic hoist area. No PCBs or VOCs were detected, except for a trace levels of naphthalene (0.0084 mg/kg) and acetone (maximum of 0.059 mg/kg). The laboratory analytical reports are presented in Appendix D. Soil analytical results from excavation soil sampling are summarized in Table 1. TPH concentrations after excavation are presented on Figure 4. VOC concentrations in soil after excavation are presented on Figure 5.

ADDITIONAL SOIL GAS CHARACTERIZATION IN HOIST AREA

To further characterize PCE impact in soil gas previously detected in well SV-28, three soil gas wells were installed on August 30, 2016. Soil gas wells SV-30 and SV-31 were installed west of well SV-28 and well SV-32 was installed adjacent to former well SV-28 in accordance with Alameda County Public Works Agency (ACPWA) permit #W2016-0636. A copy of the permit is provided in Appendix A. Soil gas probe locations are shown on Figure 3.

The soil gas wells were installed by Penecore to a depth of 7 ft . All soil vapor probes were constructed by setting a vapor implant attached to ¼-inch Teflon™ tubing at 6 or 6.5 feet bgs and backfilling the annular space with Monterey #3 sand pack up to 5 feet bgs. A ½ foot of dry bentonite crumbles was poured on top of the sand and the remaining annular space was backfilled with hydrated bentonite. The Teflon™ tubing was set in a 2-inch PVC riser and capped to prevent moisture from entering.

On September 1, 2016, PANGEA sampled wells SV-30 through SV-32. Due to the naturally tight formation, the soil vapor probes were purged upon install between 24 and 48 hours prior to sampling. Samples were collected by connecting a 1-liter Summa™ canister to the tubing through a flow rate regulator calibrated to a rate of approximately 100-200 milliliters per minute (mL/min). To further evaluate potential leakage within the sampling system, a leak-check enclosure/shroud was placed over the sample train and isopropyl alcohol was introduced into the shroud. A PID was used to monitor and maintain a minimum 10% concentration of isopropyl alcohol within the shroud during sample collection. Soil vapor probe field forms are provided in Appendix B. Soil gas samples were transported to Curtis and Tompkins (C&T) following chain-of-custody protocol. Samples were analyzed for VOCs by EPA Method TO-15. Following soil gas sampling, soil vapor probes SV-30, SV-31, and SV-32 were destroyed per permit requirements.

VOCs including PCE, benzene, toluene, ethylbenzene, xylenes, and chloroform were detected in various soil gas samples. No VOCs were detected above their respective residential ESLs for soil gas. Soil gas sample

results for PCE, benzene and ethylbenzene are shown on Figures 7 through 9 and summarized in Table 3. Soil gas analytical reports are presented in Appendix D.

IMPACTED SOIL DELINEATION AND EXCAVATION

During grading close to Bockman Road, DCI encountered stained hydrocarbon-impacted soil in shallow soil. To further assess the presence of impacted soil, PANGEA assisted with shallow soil sampling and exploratory pit excavation sampling.

On September 2, 2016, PANGEA collected five shallow soil samples (SS-1 through SS-5) south and southeast of the former auto repair building at a depth of 2.5 ft bgs. Initial hydrocarbon screening of the top 2.5 ft of shallow soil with a PID detected reading of 0.5 ppm in soil sample SS-3 located southeast of the former building. Fill material including pea gravel, wood and piping was encountered while collecting soil sample SS-3. The fill material could represent a former underground storage (UST) tank pit with old piping leading back to the auto repair building, so four deeper pits (Pit-1 through Pit-4) were excavated to 8 to 10 ft bgs. Additional soil samples (SS-6 through SS-9) were collected from these four pits. Pit-1 was dug in the area where the fill material was initially identified; hydrocarbon odors and staining soil were observed between 3 and 6 ft bgs in Pit-1. Hydrocarbon screening of the soil showed PID readings of 7.8 ppm in Pit-1 (SS-6 at 8 ft bgs) and **110 ppm** in Pit-4 (SS-9 at 8 ft bgs). No PID readings were detected in soil samples from Pit-2 (S-7 at 8 ft) and Pit-3 (SS-8 at 8 ft bgs).

Based on the elevated PID readings (a maximum of 110 ppm), lab data, and apparent historic hydrocarbon release in this area, extensive excavation was conducted to remove any obviously impacted material based on field observations. Excavation was performed to help remove VOCs that would otherwise represent a potential vapor intrusion concern beneath the future residences.

On September 7 and 8, 2016, approximately 600 CY of impacted soil was excavated around and between Pit-1 and Pit-4 to depths ranging from 8 to 12 ft, respectively. The excavation extent and depth is shown on Figure 3. TPH-impacted soil previously detected at 2.5 ft in SS-2 (**1,400 mg/kg** TPHd) and at 8.0 ft in SS-9 (**650 mg/kg** TPHd) were over-excavated, along with VOC-impacted soil at 8.0 ft in SS-6 (**0.0084 mg/kg** naphthalene).

Following soil excavation activities, confirmation soil samples were collected from the sidewalls (SW-1 through SW-6) and bottom of the excavation (BS-1 through BS-7). Soil samples were analyzed for total petroleum hydrocarbons as gasoline (TPHg) by EPA Method 8015B and VOCs by EPA Method 8260B.

No TPH or VOC were detected in any of the 13 confirmation soil samples. TPH concentrations in soil after excavation are presented on Figure 4 and VOC concentrations in soil after excavation are presented on

Figure 5. Soil sample results are summarized in Table 1. The laboratory analytical reports are presented in Appendix D.

After confirmation sampling, DCI backfilled and compacted the excavation areas using graded material available at the Site, in preparation for their building construction. PANGEA did not supervise backfilling/compaction activities.

Soil excavated from the former auto repair area was stockpiled onsite for soil profiling for disposal. Five 4-pt composite samples were analyzed for TPHg/TPHd/TPHmo by EPA Method 8015B, VOC by EPA Method 8260B, PCB by EPA Method 8082, and CAM-17 Metals by EPA Method 6010B/7471A. PANGEA is assisting with soil profiling for disposal at an appropriate facility.

GROUNDWATER CHARACTERIZATION

During the soil excavation, groundwater was observed at 8 ft bgs. On September 7, 2016, PANGEA collected a grab groundwater sample (Pit) from the center of the open excavation. On September 8, 2016, PANGEA coordinated the drilling of three soil borings (SB-11 through SB-13) by Penecore Drilling of Woodland, California to characterize groundwater in the vicinity of the hydrocarbon impact found in soil. Soil borings were drilled in accordance with ACPWA permit # W2016-0637 and a copy of the permit is provided in Appendix A. Of the three borings advanced, only SB-13 produced sufficient water for sample collection when left open overnight.

Groundwater was sampled by setting 1-inch slotted PVC in the open boring and using a peristaltic pump to pull water through Teflon™ tubing. Water was collected into 40 milliliter vials preserved with hydrochloric acid. The vials were stored on ice and transported to Curtis & Tompkins (C&T) following chain-of-custody protocol. Samples were analyzed for VOCs by EPA Method 8260B and TPHg/TPHd/TPHmo by EPA Method 8015B. The laboratory analytical reports are presented in Appendix D. The borings were destroyed by tremie grouting Portland cement under the supervision of an ACPWA inspector and per permit guidelines.

Low levels of hydrocarbons were detected in the grab groundwater samples. No VOCs were detected except for a trace detection of N-butylbenzene (0.64 ug/L) and 1,2,4-trimethylbenzene (1.6 ug/L) in the Pit sample. Grab groundwater analytical results are summarized in Table 2 and PCE, benzene and ethylbenzene concentrations are presented on Figure 6.

POST-EXCAVATION SOIL GAS CONFIRMATION SAMPLING

In September and October 2016, ten (10) temporary soil vapor probes (SV-41 through SV-50) were installed to evaluate soil gas conditions following interim soil remediation. The probe locations are shown on Figure 3. The soil vapor probes were installed by Penecore following the procedures described above and in

accordance with ACPWA permit #'s W2016-0651 and W2016-0762. A copy of the permit is provided in Appendix A. The soil vapor probes have the same well specifications as previous probes.

On September 19, 2016, PANGEA coordinated the installation of soil vapor probes SV-41 through SV-45. A soil gas sample could not be collected from SV-44 due the present of water in the probe's tubing. Benzene was detected in probe SV-41 in excess of 2016 Tier 1 ESLs. To provide additional data as required by ACDEH, PANGEA subsequently coordinate the installation of soil vapor probes SV-46 through SV-50. Sampling techniques were consistent with the aforementioned protocol. Soil vapor probe field forms are provided in Appendix B. Soil gas samples were transported to Curtis and Tompkins (C&T) following chain-of-custody protocol. Samples were analyzed for VOCs by EPA Method TO-15. Following soil gas sampling, soil vapor probes SV-41 through SV-45 were drilled out and destroyed per permit requirements.

VOCs including PCE, benzene, toluene, ethylbenzene, xylenes, and chloroform were detected in various samples. No VOCs were detected above their respective residential ESLs for soil gas except for benzene in SV-41. Soil gas sample results for PCE, benzene and ethylbenzene are shown on Figures 7 through 9 and summarized in Table 3. Soil gas analytical reports are presented in Appendix D.

Following the removal of SV-28, PCE was detected in 3 soil gas samples and at a maximum concentration of 20 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$) (SV-45). All soil gas samples were below the residential ESL for PCE in soil gas of $250 \mu\text{g}/\text{m}^3$. Benzene was detected in 11 samples and at a maximum concentration of $49 \mu\text{g}/\text{m}^3$ in SV-41. All soil gas samples were below the residential ESL for benzene in soil gas of $48 \mu\text{g}/\text{m}^3$ except for SV-41. Adjacent soil vapor probes within the footprint of building #2 (SV-42, SV-49 and SV-50) were all be the benzene ESL. Ethylbenzene was detected in 7 samples and at a maximum concentration of $9.4 \mu\text{g}/\text{m}^3$ in SV-45. All soil gas samples were below the residential ESL for ethylbenzene in soil gas of $560 \mu\text{g}/\text{m}^3$.

95UCL Calculations

To better estimate representative soil gas concentrations at the Site for evaluation of human health risk, GSI Environmental of Oakland, California calculated the 95 percent upper confidence limit (95UCL) of the arithmetic mean of applicable data for comparison to 2016 Tier I ESLs. Consistent with U.S.EPA¹, the exposure point concentration used to estimate human health risks are represented by the 95UCL. According to U.S. EPA², although the 95UCL "does not reflect the maximum concentration that could be contacted at

¹ U.S. EPA. 2002. Calculating Upper Confidence Limits for Exposure Point Concentrations at Hazardous Waste Sites. U.S. Environmental Protection Agency, Office of Emergency and Remedial Response, Washington, D.C. December.

² U.S. EPA. 1989. Risk Assessment Guidance for Superfund. Volume 1: Human Health Evaluation Manual (Part A). Interim Final. EPA-540/1-89/002. U.S. Environmental Protection Agency, Office of Emergency and Remedial Response, Washington, D.C. December.

Interim Remediation Report
1233 Bockman Road
San Lorenzo, California
October 26, 2016

any one time, it is regarded as a reasonable estimate of the concentration likely to be contacted over time. This is because in most situations, assuming long-term contact with the maximum concentration is not reasonable.” To evaluate the concentrations of benzene and PCE reported in soil vapor at the Site, the average and UCL concentrations were calculated using Version 5.0 of the ProUCL software recommended by U.S. EPA³.

Soil gas data for benzene and PCE used in the 95UCL calculation are summarized on Tables 1 and 2 in Appendix C. Table 1 uses a smaller data set in the vicinity of the former auto repair area/hoist. Table 2 uses a larger data set within planned Buildings 1 and 2. Each table evaluated soil gas data 1) prior to soil removal at SV-28 (where elevated PCE had been reported), and 2) after soil removal at SV-28. A short description from GSI is also provided in Appendix C.

As shown in Tables 1 and 2 in Appendix C, the average and 95UCL concentrations for benzene and PCE are below their respective residential ESLs. For planned Buildings 1 and 2, the 95UCL of 23.4 ug/m³ benzene is below the ESL of 48 ug/m³, and the 95UCL of 10.5 ug/m³ PCE is well below the ESL of 240 ug/m³.

³ U.S. EPA. 2013. ProUCL Version 5.0. September.

CONCLUSIONS AND RECOMMENDATIONS

Based on the above information, PANGEA offers the following conclusions and recommendations:

- Approximately 690 CY of impacted soil was excavated from the vicinity of the former auto repair facility. The soil excavation removed soil with TPHd concentrations above Tier 1 ESLs. Based on the 110 ppm PID reading, the excavation also removed hydrocarbon/VOC impact that could have represented a potential vapor intrusion risk for future occupants.
- Confirmation soil sampling data indicates that residual impact is well below ESLs.
- Confirmation soil gas sampling indicates that soil excavation has removed PCE-impacted soil that was likely contributing to the small PCE “hotspot” in soil gas located beneath the former auto repair building.
- The calculated average and 95UCL concentrations for VOCs in soil gas (benzene and PCE) are below their respective residential ESLs.
- No significant chemical impact has been identified in Site groundwater.
- Available data suggests that conditions near the former auto repair area do not pose a significant risk to human health and/or the environment. PANGEA recommends no further action at this portion of the Site.

Explanation:

TPHd and TPHmo analyzed by EPA Method 8015, TPHg and VOC's analyzed by EPA Method 8260

Benzene, Toluene, Ethylbenzene and Xylenes by EPA Method 8021.

TPHg = Total Petroleum Hydrocarbons as gasoline

TPHd = Total Petroleum Hydrocarbons as diesel

TPHmo = Total Petroleum Hydrocarbons as motor oil

MTBE = Methyl tert-butyl ether

1,2-DCA = 1,2-Dichloroethane

PCE = Tetrachloroethene

TCE = Trichloroethene

cis-1,2-DCE = cis-1,2-Dichloroethene

VOCs = Volatile organic compounds by EPA Method 8260.

SVOCs = Semi-volatile organic compounds by EPA Method 8270.

PCB = Total polychlorinated biphenyls including Aroclors 1016, 1221, 1232, 1242, 1248, 1254, and 1260

mg/Kg = Milligrams per kilogram

ft bgs = Depth below ground surface (bgs) in feet.

ESL = Environmental Screening Level, from California Regional Water Quality Control Board - San Francisco Bay Region, Screening for Environmental Concerns at Sites with Contaminated Soil and Groundwater, Interim Revised February 2016 (Revision 3).

< n = Chemical not present at a concentration in excess of detection limit shown.

a = All chemicals below show reporting limit (except benzoic acid reporting level was 1.7 mg/kg). See laboratory report for lower reporting limits for other chemicals.

ND = not detected

contaminant detections highlighted in gray

Explanation:

TPH_g = Gasoline range Total Petroleum Hydrocarbons by EPA Method SW8021B/8015Bm.

TPH_d = Diesel Range Total Petroleum Hydrocarbons by EPA Method SW8015B.

TPH_{mo} = Motor Oil Range Total Petroleum Hydrocarbons by EPA Method SW8015B.

VOCs = Volatile Organic Compounds by EPA Method 8260B.

1,2-DCA = 1,2-Dichloroethane

PCE = Tetrachloroethene

TCE = Trichloroethene

µg/L = micrograms per Liter

ft bgs = feet below grade surface.

ESL = Environmental screening level established by the SFB-RWQCB, Interim Final - November 2007 and amended in February 2016, (Rev. 3)

--- = Not analyzed or not available.

a = ENGEO report dated 07/02/2015 states samples were taken at first encountered groundwater which ranged between 15-25 ft bgs

b = ENGEO report dated 08/02/2016 states samples were taken at first encountered groundwater which ranged between 12-17 ft bgs

c = N-butylbenzene (0.64 µg/L) and 1,2,4-trimethylbenzene (1.6 µg/L)

d7 = strongly aged gasoline or diesel range compounds are significant in the TPH(g) chromatogram

e2 = diesel range compounds are significant; no recognizable pattern

e7 = oil range compounds are significant

Pangea

Table 2. Groundwater Analytical Data - 1233 Bockman Road, San Lorenzo, California

Table 3. Soil Gas Analytical Data - 1233 Bockman Road, San Lorenzo, California

Boring/ Sample ID	Date Sampled	Sample Depth (ft bgs)	Benzene	Toluene	Ethylbenzene	Xylenes	Naphthalene	1,2-DCA	PCE	TCE	Chloroform	Other VOCs	Isopropyl Alcohol (Leak Check Compound)	Carbon Dioxide	Oxygen	Methane	Notes
Residential ESL - Soil/Subslab Gas:			48	160,000	560	52,000	41	54	240	240	61	Varies	NA	NA	NA	NA	

Abbreviations:

DCA = 1,2-dichloroethane

PCE = Tetrachloroethene

TCE = Trichloroethene

1,1,1-TCA = 1,1,1-Trichloroethane

VOCs by EPA Method TO-15.

See lab report for trace concentrations of other VOCs

ug/m³ = Micrograms per cubic meter of air.

ft bgs = Feet below ground surface

ESL = Environmental Screening Level for Shallow Soil Gas for Evaluation of Potential Vapor Intrusion (Table E-2). Established by the SFBRWQCB, Interim Final - November 2007; Feb 2016 (Rev. 3)

ND = not detected above laboratory reporting limits.

-- = Not analyzed

< n = Chemical not present at a concentration in excess of laboratory detection limit shown.

Bold concentrations exceed residential ESL.

* = Represents an estimated concentration (j-flag value) below the reporting limit, or indicates that there was no detection above the method detection limit.

= other VOCs detected below screening level thresholds. See lab report for details.

contaminant detections highlighted in gray

Receipt Number: WR2016-0427	Total Due:	\$530.00
Payer Name : Robert Clark-Riddell	Total Amount Paid:	\$530.00
	Paid By: VISA	PAID IN FULL

Works Requesting Permits:

Borehole(s) for Investigation-Vapor Sampling 24 to 48 hours only - 11 Boreholes

Driller: Penecore Drilling - Lic #: 906899 - Method: DP

Work Total: \$265.00

Specifications

Permit Number	Issued Dt	Expire Dt	#	Hole Diam	Max Depth
W2016-0636	08/29/2016	11/28/2016	11	2.25 in.	7.00 ft

Specific Work Permit Conditions

1. Boreholes shall not be left open for a period of more than 24 hours. All boreholes left open more than 24 hours will need approval from Alameda County Public Works Agency, Water Resources Section. All boreholes shall be backfilled according to permit destruction requirements and all concrete material and asphalt material shall be to Caltrans Spec or County/City Codes. No borehole(s) shall be left in a manner to act as a conduit at any time.
2. Permittee shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend and save the Alameda County Public Works Agency, its officers, agents, and employees free and harmless from any and all expense, cost, liability in connection with or resulting from the exercise of this Permit including, but not limited to, properly damage, personal injury and wrongful death.
3. Prior to any drilling activities, it shall be the applicant's responsibility to contact and coordinate an Underground Service Alert (USA), obtain encroachment permit(s), excavation permit(s) or any other permits or agreements required for that Federal, State, County or City, and follow all City or County Ordinances. No work shall begin until all the permits and requirements have been approved or obtained. It shall also be the applicants responsibilities to provide to the Cities or to Alameda County an Traffic Safety Plan for any lane closures or detours planned. No work shall begin until all the permits and requirements have been approved or obtained.
4. Permittee shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend and save the Alameda County Public Works Agency, its officers, agents, and employees free and harmless from any and all expense, cost and liability in connection with or resulting from the exercise of this Permit including, but not limited to,

Alameda County Public Works Agency - Water Resources Well Permit

property damage, personal injury and wrongful death.

5. Applicant shall contact assigned inspector listed on the top of the permit at least five (5) working days prior to starting, once the permit has been approved. Confirm the scheduled date(s) at least 24 hours prior to drilling.

6. Permittee, permittee's contractors, consultants or agents shall be responsible to assure that all material or waters generated during drilling, boring destruction, and/or other activities associated with this Permit will be safely handled, properly managed, and disposed of according to all applicable federal, state, and local statutes regulating such. In no case shall these materials and/or waters be allowed to enter, or potentially enter, on or off-site storm sewers, dry wells, or waterways or be allowed to move off the property where work is being completed.

7. Copy of approved drilling permit must be on site at all times. Failure to present or show proof of the approved permit application on site shall result in a fine of \$500.00.

8. Electronic Reporting Regulations (Chapter 30, Division 3 of Title 23 & Division 3 of Title 27, CCR) require electronic submission of any report or data required by a regulatory agency from a cleanup site. Submission dates are set by a Regional Water Board or by a regulatory agency. Once a report/data is successfully uploaded, as required, you have met the reporting requirement (i.e. the compliance measure for electronic submittals is the actual upload itself). The upload date should be on or prior to the regulatory due date.

9. NOTE:

Under California laws, the owner/operator are responsible for reporting the contamination to the governmental regulatory agencies under Section 25295(a). The owner/operator is liable for civil penalties under Section 25299(a)(4) and criminal penalties under Section 25299(d) for failure to report a leak. The owner/operator is liable for civil penalties under Section 25299(b)(4) for knowing failure to ensure compliance with the law by the operator. These penalty provisions do not apply to a potential buyer.

10. Permit is valid only for the purpose specified herein. No changes in construction procedures, as described on this permit application. Temp Vapor wells shall not be converted to monitoring Vapor wells, without a separate permit application process.

11. Vapor monitoring wells constructed with tubing shall be decommissioned by complete removal of tubing, grout seal, and fill material of sand or bentonite. Fill material may be removed by hand auger if material can be removed completely.

Vapor monitoring wells constructed with pvc pipe less than 2" shall be overdrilled to total depth.

Vapor monitoring wells constructed with 2" pvc pipe or larger may be grouted by tremie pipe (any depth) or pressure grouted (less than 30', 25 psi for 5 min).

Borehole(s) for Investigation-Environmental/Monitoring Study - 4 Boreholes

2. Boreholes shall not be left open for a period of more than 24 hours. All boreholes left open more than 24 hours will need approval from Alameda County Public Works Agency, Water Resources Section. All boreholes shall be backfilled according to permit destruction requirements and all concrete material and asphalt material shall be to Caltrans Spec or County/City Codes. No borehole(s) shall be left in a manner to act as a conduit at any time.
3. Permittee shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend and save the Alameda County Public Works Agency, its officers, agents, and employees free and harmless from any and all expense, cost, liability in connection with or resulting from the exercise of this Permit including, but not limited to, properly damage, personal injury and wrongful death.

Alameda County Public Works Agency - Water Resources Well Permit

4. Applicant shall contact assigned inspector listed on the top of the permit at least five (5) working days prior to starting, once the permit has been approved. Confirm the scheduled date(s) at least 24 hours prior to drilling.
 5. Copy of approved drilling permit must be on site at all times. Failure to present or show proof of the approved permit application on site shall result in a fine of \$500.00.
 6. Electronic Reporting Regulations (Chapter 30, Division 3 of Title 23 & Division 3 of Title 27, CCR) require electronic submission of any report or data required by a regulatory agency from a cleanup site. Submission dates are set by a Regional Water Board or by a regulatory agency. Once a report/data is successfully uploaded, as required, you have met the reporting requirement (i.e. the compliance measure for electronic submittals is the actual upload itself). The upload date should be on or prior to the regulatory due date.
7. NOTE:
- Under California laws, the owner/operator are responsible for reporting the contamination to the governmental regulatory agencies under Section 25295(a). The owner/operator is liable for civil penalties under Section 25299(a)(4) and criminal penalties under Section 25299(d) for failure to report a leak. The owner/operator is liable for civil penalties under Section 25299(b)(4) for knowing failure to ensure compliance with the law by the operator. These penalty provisions do not apply to a potential buyer.
8. Prior to any drilling activities onto any public right-of-ways, it shall be the applicants responsibilities to contact and coordinate a Underground Service Alert (USA), obtain encroachment permit(s), excavation permit(s) or any other permits required for that City or to the County and follow all City or County Ordinances. It shall also be the applicants responsibilities to provide to the Cities or to Alameda County a Traffic Safety Plan for any lane closures or detours planned. No work shall begin until all the permits and requirements have been approved or obtained.
 9. Permit is valid only for the purpose specified herein. No changes in construction procedures, as described on this permit application. Boreholes shall not be converted to monitoring wells, without a permit application process.
-

APPENDIX C

95% UCL

Summary statistics for benzene and tetrachloroethane (PCE) reported in soil vapor samples collected prior to and following soil removal activities at boring location SV-28 are presented in Tables 1 and 2. Table 1 presents the average and 95 percent upper confidence limit (95UCL) of the arithmetic mean of benzene and PCE concentrations reported in the vicinity of the former auto repair building prior to and following the removal of soil at SV-28. The average and UCL concentrations for benzene and PCE reported near buildings 1 and 2 prior to a following soil removal at SV-28 are presented in Table 2.

Consistent with U.S.EPA¹, the exposure point concentration used to estimate human health risks are represented by the 95UCL. According to U.S. EPA², although the 95UCL “does not reflect the maximum concentration that could be contacted at any one time, it is regarded as a reasonable estimate of the concentration likely to be contacted over time. This is because in most situations, assuming long-term contact with the maximum concentration is not reasonable.”

To evaluate the concentrations of benzene and PCE reported in soil vapor at the Site, the average and UCL concentrations were calculated using Version 5.0 of the ProUCL software recommended by U.S. EPA³. As shown in Tables 1 and 2, the average and UCL concentrations for benzene and PCE are below their respective residential ESLs.

This data package has been reviewed for technical correctness and completeness. Release of this data has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signature. The results contained in this report meet all requirements of NELAC and pertain only to those samples which were submitted for analysis. This report may be reproduced only in its entirety.

CASE NARRATIVE

Laboratory number: **280375**
Client: **Pangea Environmental**
Location: **1233 Bockman**
Request Date: **08/31/16**
Samples Received: **08/31/16**

This data package contains sample and QC results for three soil samples, requested for the above referenced project on 08/31/16. The samples were received cold and intact.

TPH-Extractables by GC (EPA 8015B):

No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):

No analytical problems were encountered.

PCBs (EPA 8082):

All samples underwent sulfuric acid cleanup using EPA Method 3665A. All samples underwent sulfur cleanup using the copper option in EPA Method 3660B. No analytical problems were encountered.

COOLER RECEIPT CHECKLIST

Curtis & Tompkins, Ltd.

Login # 280375 Date Received 8/31/16 Number of coolers 1
 Client PANGEA Project 1233 Beckman

Date Opened 8/31 By (print) SL (sign) JL
 Date Logged in + By (print) ↓ (sign) JL
 Date Labelled ↓ By (print) CB (sign) Chunyan

1. Did cooler come with a shipping slip (airbill, etc) _____ YES NO
 Shipping info _____

2A. Were custody seals present? YES (circle) on cooler on samples NO
 How many _____ Name _____ Date _____

2B. Were custody seals intact upon arrival? _____ YES NO N/A

3. Were custody papers dry and intact when received? _____ YES NO N/A

4. Were custody papers filled out properly (ink, signed, etc)? _____ YES NO

5. Is the project identifiable from custody papers? (If so fill out top of form) _____ YES NO

6. Indicate the packing in cooler: (if other, describe) _____

Bubble Wrap Foam blocks Bags None
 Cloth material Cardboard Styrofoam Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: Wet Blue/Gel None Temp(°C) 5.4'

Temperature blank(s) included? Thermometer# _____ IR Gun# A

Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? _____ YES
 If YES, what time were they transferred to freezer? _____

9. Did all bottles arrive unbroken/unopened? _____ YES NO

10. Are there any missing / extra samples? _____ YES NO

11. Are samples in the appropriate containers for indicated tests? _____ YES NO

12. Are sample labels present, in good condition and complete? _____ YES NO

13. Do the sample labels agree with custody papers? _____ YES NO

14. Was sufficient amount of sample sent for tests requested? _____ YES NO

15. Are the samples appropriately preserved? _____ YES NO N/A

16. Did you check preservatives for all bottles for each sample? _____ YES NO N/A

17. Did you document your preservative check? (pH strip lot# _____) YES NO N/A

18. Did you change the hold time in LIMS for unpreserved VOAs? _____ YES NO N/A

19. Did you change the hold time in LIMS for preserved terracores? _____ YES NO N/A

20. Are bubbles > 6mm absent in VOA samples? _____ YES NO N/A

21. Was the client contacted concerning this sample delivery? _____ YES NO N/A

If YES, Who was called? _____ By _____ Date: _____

COMMENTS _____

CASE NARRATIVE

Laboratory number: **282355**
Client: **Pangea Environmental**
Project: **1233 BOCKMAN**
Location: **1233 Bockman**
Request Date: **10/19/16**
Samples Received: **08/31/16, 09/02/16**

This data package contains sample and QC results for two soil samples, requested for the above referenced project on 10/19/16. The samples were received cold and intact.

Semivolatile Organics by GC/MS (EPA 8270C):

282355-001 and 282355-002 were prepared outside of hold time; affected data was qualified with "b". No other analytical problems were encountered.

Detections Summary for 282355

Results for any subcontracted analyses are not included in this summary.

This data package has been reviewed for technical correctness and completeness. Release of this data has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signature. The results contained in this report meet all requirements of NELAC and pertain only to those samples which were submitted for analysis. This report may be reproduced only in its entirety.

CASE NARRATIVE

Laboratory number: **280466**
Client: **Pangea Environmental**
Project: **2030.001**
Location: **1233 Bockman**
Request Date: **09/01/16**
Samples Received: **09/01/16**

This data package contains sample and QC results for fifteen air samples, requested for the above referenced project on 09/01/16. The samples were received cold and intact.

Volatile Organics in Air by MS (EPA TO-15):

Low response was observed for carbon tetrachloride in the ICV analyzed 08/24/16 02:30; affected data was qualified with "b". High response was observed for 4-methyl-2-pentanone in the CCV analyzed 09/04/16 13:39; affected data was qualified with "b". High recovery was observed for 4-methyl-2-pentanone in the BS for batch 238783; the associated RPD was within limits, and this analyte was not detected at or above the RL in the associated sample. No other analytical problems were encountered.

COOLER RECEIPT CHECKLIST

Login # 280466 Date Received 9/1/16 Number of coolers 0
 Client Pangea Project 1233 Bockman

Date Opened 9/1/16 By (print) CAR (sign) CB
 Date Logged in ↓ By (print) ↓ (sign) ↓

1. Did cooler come with a shipping slip (airbill, etc) _____ YES NO
 Shipping info _____
- 2A. Were custody seals present? YES (circle) on cooler on samples NO
 How many _____ Name _____ Date _____
- 2B. Were custody seals intact upon arrival? _____ YES NO N/A
3. Were custody papers dry and intact when received? _____ YES NO
4. Were custody papers filled out properly (ink, signed, etc)? _____ YES NO
5. Is the project identifiable from custody papers? (If so fill out top of form) _____ YES NO
6. Indicate the packing in cooler: (if other, describe) _____
 Bubble Wrap Foam blocks Bags None
 Cloth material Cardboard Styrofoam Paper towels
7. Temperature documentation: * Notify PM if temperature exceeds 6°C
 Type of ice used: Wet Blue/Gel None Temp(°C) _____
 Samples Received on ice & cold without a temperature blank
 Samples received on ice directly from the field. Cooling process had begun
8. Were Method 5035 sampling containers present? _____ YES NO
 If YES, what time were they transferred to freezer? _____
9. Did all bottles arrive unbroken/unopened? _____ YES NO
10. Are there any missing / extra samples? _____ YES NO
11. Are samples in the appropriate containers for indicated tests? _____ YES NO
12. Are sample labels present, in good condition and complete? _____ YES NO
13. Do the sample labels agree with custody papers? _____ YES NO
14. Was sufficient amount of sample sent for tests requested? _____ YES NO
15. Are the samples appropriately preserved? _____ YES NO N/A
16. Did you check preservatives for all bottles for each sample? _____ YES NO N/A
17. Did you document your preservative check? _____ YES NO N/A
18. Did you change the hold time in LIMS for unpreserved VOAs? _____ YES NO N/A
19. Did you change the hold time in LIMS for preserved terracores? _____ YES NO N/A
20. Are bubbles > 6mm absent in VOA samples? _____ YES NO N/A
21. Was the client contacted concerning this sample delivery? _____ YES NO
 If YES, Who was called? _____ By _____ Date: _____

CASE NARRATIVE

Laboratory number: **280504**
Client: **Pangea Environmental**
Project: **2030.001.003**
Location: **1233 Bockman**
Request Date: **09/02/16**
Samples Received: **09/02/16**

This data package contains sample and QC results for six soil samples, requested for the above referenced project on 09/02/16. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):

No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):

SS-9-8' (lab # 280504-005) was diluted due to the dark and viscous nature of the sample extract. No other analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):

No analytical problems were encountered.

CASE NARRATIVE

Laboratory number: **280505**
Client: **Pangea Environmental**
Project: **2030.001.003**
Location: **1233 Bockman**
Request Date: **09/02/16**
Samples Received: **09/02/16**

This data package contains sample and QC results for five soil samples, requested for the above referenced project on 09/02/16. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):

No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):

No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):

No analytical problems were encountered.

|--|---|--|---|
| 1. Did cooler come with a shipping slip (airbill, etc) _____ | YES | <input checked="" type="checkbox"/> NO | |
| Shipping info _____ | | | |
| 2A. Were custody seals present? <input type="checkbox"/> YES (circle) | on cooler | on samples | <input checked="" type="checkbox"/> NO |
| How many _____ | Name _____ | Date _____ | |
| 2B. Were custody seals intact upon arrival? | YES | NO | <input checked="" type="checkbox"/> N/A |
| 3. Were custody papers dry and intact when received? | <input checked="" type="checkbox"/> YES | NO | |
| 4. Were custody papers filled out properly (ink, signed, etc)? | <input checked="" type="checkbox"/> YES | NO | |
| 5. Is the project identifiable from custody papers? (If so fill out top of form) | <input checked="" type="checkbox"/> YES | NO | |
| 6. Indicate the packing in cooler: (if other, describe) | | | |

Bubble Wrap Foam blocks Bags None
 Cloth material Cardboard Styrofoam Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: Wet Blue/Gel None Temp(°C) _____

Temperature blank(s) included? Thermometer# _____ IR Gun# _____

Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? _____ YES NO

If YES, what time were they transferred to freezer? _____

9. Did all bottles arrive unbroken/unopened? _____ YES NO

10. Are there any missing / extra samples? _____ YES NO

11. Are samples in the appropriate containers for indicated tests? _____ YES NO

12. Are sample labels present, in good condition and complete? _____ YES NO

13. Do the sample labels agree with custody papers? _____ YES NO

14. Was sufficient amount of sample sent for tests requested? _____ YES NO

15. Are the samples appropriately preserved? _____ YES NO N/A

16. Did you check preservatives for all bottles for each sample? _____ YES NO N/A

17. Did you document your preservative check? (pH strip lot# _____) YES NO N/A

18. Did you change the hold time in LIMS for unpreserved VOAs? _____ YES NO N/A

19. Did you change the hold time in LIMS for preserved terracores? _____ YES NO N/A

20. Are bubbles > 6mm absent in VOA samples? _____ YES NO N/A

21. Was the client contacted concerning this sample delivery? _____ YES NO

If YES, Who was called? _____ By _____ Date: _____

COMMENTS

CASE NARRATIVE

Laboratory number: **280614**
Client: **Pangea Environmental**
Project: **1233 BOCKMAN**
Location: **1233 Bockman**
Request Date: **09/07/16**
Samples Received: **09/02/16**

This data package contains sample and QC results for four soil samples, requested for the above referenced project on 09/07/16. The samples were received cold and intact.

TPH-Extractables by GC (EPA 8015B):

No analytical problems were encountered.

Client: **Pangea Environmental**
Project: **2030.001**
Location: **1233 Bockman**
Request Date: **09/07/16**
Samples Received: **09/07/16**

This data package contains sample and QC results for twelve soil samples, requested for the above referenced project on 09/07/16. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):

No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):

No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):

Low surrogate recovery was observed for bromofluorobenzene in the MS of SW-4-8' (lab # 280624-010). No other analytical problems were encountered.

Date Opened 9/7 By (print) SC (sign) SL JT
 Date Logged in 1 By (print) 1 (sign) SL JT
 Date Labeled 1 By (print) 1 (sign) SL JT

1. Did cooler come with a shipping slip (airbill, etc) _____ YES NO
 Shipping info _____

2A. Were custody seals present? YES (circle) on cooler on samples NO
 How many _____ Name _____ Date _____

2B. Were custody seals intact upon arrival? _____ YES NO N/A

3. Were custody papers dry and intact when received? _____ YES NO N/A

4. Were custody papers filled out properly (ink, signed, etc)? _____ YES NO N/A

5. Is the project identifiable from custody papers? (If so fill out top of form) _____ YES NO N/A

6. Indicate the packing in cooler: (if other, describe) _____

<input type="checkbox"/> Bubble Wrap	<input type="checkbox"/> Foam blocks	<input checked="" type="checkbox"/> Bags	<input type="checkbox"/> None
<input type="checkbox"/> Cloth material	<input type="checkbox"/> Cardboard	<input type="checkbox"/> Styrofoam	<input type="checkbox"/> Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: Wet Blue/Gel None Temp(°C) 3.4

Temperature blank(s) included? Thermometer# _____ IR Gun# A

Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? _____ YES NO
 If YES, what time were they transferred to freezer? _____

9. Did all bottles arrive unbroken/unopened? _____ YES NO N/A

10. Are there any missing / extra samples? _____ YES NO N/A

11. Are samples in the appropriate containers for indicated tests? _____ YES NO N/A

12. Are sample labels present, in good condition and complete? _____ YES NO N/A

13. Do the sample labels agree with custody papers? _____ SC YES NO N/A

14. Was sufficient amount of sample sent for tests requested? _____ YES NO N/A

15. Are the samples appropriately preserved? _____ YES NO N/A

16. Did you check preservatives for all bottles for each sample? _____ YES NO N/A

17. Did you document your preservative check? (pH strip lot# _____) YES NO N/A

18. Did you change the hold time in LIMS for unpreserved VOAs? _____ YES NO N/A

19. Did you change the hold time in LIMS for preserved terracores? _____ YES NO N/A

20. Are bubbles > 6mm absent in VOA samples? _____ YES NO N/A

21. Was the client contacted concerning this sample delivery? _____ YES NO N/A

If YES, Who was called? _____ By _____ Date: _____

COMMENTS

13.) Sample 6 is marked on the coc as "BS-G-10" but labeled as "SW-G-10" on the container; Sample 12 is marked on the coc as "SW-G-8" but labeled as "BS-G-8" on the container. Samples were identified based on their sample time.

CASE NARRATIVE

Laboratory number: **280694**
Client: **Pangea Environmental**
Project: **1233 BOCKMAN**
Location: **1233 Bockman**
Request Date: **09/08/16**
Samples Received: **09/08/16**

This data package contains sample and QC results for one soil sample, requested for the above referenced project on 09/08/16. The sample was received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):

No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):

No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):

No analytical problems were encountered.

COOLER RECEIPT CHECKLIST

Curtis & Tompkins, Ltd.

Login # 280694 Date Received 7/8/16 Number of coolers 1
 Client Pangea Env. Project 1233 Backman
 Date Opened 9/8 By (print) CB (sign) Chad Meltz
 Date Logged in By (print) S (sign)
 Date Labeled By (print) (sign)

1. Did cooler come with a shipping slip (airbill, etc) _____ YES NO
 Shipping info _____
- 2A. Were custody seals present? YES (circle) on cooler on samples NO
 How many _____ Name _____ Date _____
- 2B. Were custody seals intact upon arrival? _____ YES NO N/A
3. Were custody papers dry and intact when received? _____ YES NO
4. Were custody papers filled out properly (ink, signed, etc)? _____ YES NO
5. Is the project identifiable from custody papers? (If so fill out top of form) _____ YES NO
6. Indicate the packing in cooler: (if other, describe) _____
- Bubble Wrap Foam blocks Bags None
 Cloth material Cardboard Styrofoam Paper towels
7. Temperature documentation: * Notify PM if temperature exceeds 6°C
 Type of ice used: Wet Blue/Gel None Temp(°C) 9.8
 Temperature blank(s) included? Thermometer# _____ IR Gun# B
 Samples received on ice directly from the field. Cooling process had begun
8. Were Method 5035 sampling containers present? _____ YES
 If YES, what time were they transferred to freezer? _____
9. Did all bottles arrive unbroken/unopened? _____ YES NO
 10. Are there any missing / extra samples? _____ YES NO
 11. Are samples in the appropriate containers for indicated tests? _____ YES NO
 12. Are sample labels present, in good condition and complete? _____ YES NO
 13. Do the sample labels agree with custody papers? _____ YES NO
 14. Was sufficient amount of sample sent for tests requested? _____ YES NO
 15. Are the samples appropriately preserved? _____ YES NO
 16. Did you check preservatives for all bottles for each sample? _____ YES NO
 17. Did you document your preservative check? (pH strip lot# _____) YES NO
 18. Did you change the hold time in LIMS for unpreserved VOAs? _____ YES NO
 19. Did you change the hold time in LIMS for preserved terracores? _____ YES NO
 20. Are bubbles > 6mm absent in VOA samples? _____ YES NO
 21. Was the client contacted concerning this sample delivery? _____ YES
 If YES, Who was called? _____ By _____ Date: _____

COMMENTS

Detections Summary for 280694

Results for any subcontracted analyses are not included in this summary.

This data package has been reviewed for technical correctness and completeness. Release of this data has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signature. The results contained in this report meet all requirements of NELAC and pertain only to those samples which were submitted for analysis. This report may be reproduced only in its entirety.

CASE NARRATIVE

Laboratory number: **281165**
Client: **Pangea Environmental**
Project: **1233 BOCKMAN**
Location: **1233 Bockman**
Request Date: **09/19/16**
Samples Received: **09/19/16**

This data package contains sample and QC results for four air samples, requested for the above referenced project on 09/19/16. The samples were received cold and intact.

Volatile Organics in Air by MS (EPA TO-15):

Low response was observed for carbon tetrachloride in the ICV analyzed 08/24/16 02:30; affected data was qualified with "b". No other analytical problems were encountered.

Volatile Organics in Air GC (ASTM D1946):

No analytical problems were encountered.

COOLER RECEIPT CHECKLIST

Login # 281165 Date Received 9/19/16 Number of coolers 0
 Client Pangea Project 1233 Bockman

Date Opened 9/19/16 By (print) CAR (sign) Chall P
 Date Logged in ↓ By (print) ↓ (sign) ↓

1. Did cooler come with a shipping slip (airbill, etc) _____ YES NO
 Shipping info _____
- 2A. Were custody seals present? YES (circle) on cooler on samples NO
 How many _____ Name _____ Date _____
- 2B. Were custody seals intact upon arrival? _____ YES NO N/A
3. Were custody papers dry and intact when received? _____ YES NO
4. Were custody papers filled out properly (ink, signed, etc)? _____ YES NO
5. Is the project identifiable from custody papers? (If so fill out top of form) _____ YES NO
6. Indicate the packing in cooler: (if other, describe) _____

Bubble Wrap Foam blocks Bags None
 Cloth material Cardboard Styrofoam Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: Wet Blue/Gel None Temp(°C) _____

Samples Received on ice & cold without a temperature blank

Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? _____ YES NO
 If YES, what time were they transferred to freezer? _____
9. Did all bottles arrive unbroken/unopened? _____ YES NO
10. Are there any missing / extra samples? _____ YES NO
11. Are samples in the appropriate containers for indicated tests? _____ YES NO
12. Are sample labels present, in good condition and complete? _____ YES NO
13. Do the sample labels agree with custody papers? _____ YES NO
14. Was sufficient amount of sample sent for tests requested? _____ YES NO
15. Are the samples appropriately preserved? _____ YES NO N/A
16. Did you check preservatives for all bottles for each sample? _____ YES NO N/A
17. Did you document your preservative check? _____ YES NO N/A
18. Did you change the hold time in LIMS for unpreserved VOAs? _____ YES NO N/A
19. Did you change the hold time in LIMS for preserved terracores? _____ YES NO N/A
20. Are bubbles > 6mm absent in VOA samples? _____ YES NO N/A
21. Was the client contacted concerning this sample delivery? _____ YES NO
 If YES, Who was called? _____ By _____ Date: _____

COMMENTS

CASE NARRATIVE

Laboratory number: **282480**
Client: **Pangea Environmental**
Project: **2030.001**
Location: **Bockman**
Request Date: **10/21/16**
Samples Received: **10/21/16**

This data package contains sample and QC results for twelve air samples, requested for the above referenced project on 10/21/16. The samples were received cold and intact.

Volatile Organics in Air by MS (EPA TO-15):

High response was observed for vinyl acetate in the CCV analyzed 10/21/16 13:41; affected data was qualified with "b". High recovery was observed for vinyl acetate in the BS for batch 240422; the associated RPD was within limits, and this analyte was not detected at or above the RL in the associated samples. High surrogate recoveries were observed for bromofluorobenzene in SV-47 (lab # 282480-002) and SV-48 (lab # 282480-003). No other analytical problems were encountered.

Volatile Organics in Air GC (ASTM D1946):

No analytical problems were encountered.

COOLER RECEIPT CHECKLIST

Login # 242480 Date Received 10/21/16 Number of coolers 0
 Client Pangea Project Buckman

Date Opened 10/21/16 By (print) EWA (sign) EWA
 Date Logged in ↓ By (print) ↓ (sign) ↓
 Date Labeled ↓ By (print) ↓ (sign) ↓

1. Did cooler come with a shipping slip (airbill, etc) _____ YES NO
 Shipping info _____

2A. Were custody seals present? YES (circle) on cooler on samples NO
 How many _____ Name _____ Date _____

2B. Were custody seals intact upon arrival? _____ YES NO N/A

3. Were custody papers dry and intact when received? _____ YES NO YES

4. Were custody papers filled out properly (ink, signed, etc)? _____ YES NO YES

5. Is the project identifiable from custody papers? (If so fill out top of form) _____ YES NO YES

6. Indicate the packing in cooler: (if other, describe) _____

Bubble Wrap Foam blocks Bags None
 Cloth material Cardboard Styrofoam Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: Wet Blue/Gel None Temp(°C) _____

Temperature blank(s) included? Thermometer# _____ IR Gun# _____

Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? _____ YES NO
 If YES, what time were they transferred to freezer? _____

9. Did all bottles arrive unbroken/unopened? _____ YES NO YES

10. Are there any missing / extra samples? _____ YES NO NO

11. Are samples in the appropriate containers for indicated tests? _____ YES NO YES

12. Are sample labels present, in good condition and complete? _____ YES NO YES

13. Do the sample labels agree with custody papers? _____ YES NO YES

14. Was sufficient amount of sample sent for tests requested? _____ YES NO YES

15. Are the samples appropriately preserved? _____ YES NO N/A

16. Did you check preservatives for all bottles for each sample? _____ YES NO N/A

17. Did you document your preservative check? (pH strip lot# _____) YES NO N/A

18. Did you change the hold time in LIMS for unpreserved VOAs? _____ YES NO N/A

19. Did you change the hold time in LIMS for preserved terracores? _____ YES NO N/A

20. Are bubbles > 6mm absent in VOA samples? _____ YES NO N/A

21. Was the client contacted concerning this sample delivery? _____ YES NO NO

If YES, Who was called? _____ By _____ Date: _____

COMMENTS

"When Quality Counts"

Analytical Report

WorkOrder: 1609301

Report Created for: Pangea Environmental Svcs., Inc.

1710 Franklin Street, Ste. 200
Oakland, CA 94612

Project Contact: Ron Scheele

Project P.O.:

Project Name: 2030.001; 1233 Bockman

Project Received: 09/08/2016

Analytical Report reviewed & approved for release on 09/13/2016 by:

Angela Rydelius,
Laboratory Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current NELAP standards, where applicable, unless otherwise stated in the case narrative.

Glossary of Terms & Qualifier Definitions

Client: Pangea Environmental Svcs., Inc.
Project: 2030.001; 1233 Bockman
WorkOrder: 1609301

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Analytical Qualifiers

d7 strongly aged gasoline or diesel range compounds are significant in the TPH(g) chromatogram
e4/e11 gasoline range compounds are significant.; and/or stoddard solvent/mineral spirit (?)

Analytical Report

Client: Pangea Environmental Svcs., Inc.
Date Received: 9/8/16 16:30
Date Prepared: 9/9/16

- NOTES:**
- STLIC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).
 - MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

Sample Receipt Checklist

Client Name: **Pangea Environmental Svcs., Inc.**
Project Name: **2030.001; 1233 Bockman**
WorkOrder №: **1609301** Matrix: Water
Carrier: Bernie Cummins (MAI Courier)

Date and Time Received: **9/8/2016 16:30**
Date Logged: **9/8/2016**
Received by: **Alexandra Iniguez**
Logged by: **Alexandra Iniguez**

Chain of Custody (COC) Information

- Chain of custody present? Yes No
Chain of custody signed when relinquished and received? Yes No
Chain of custody agrees with sample labels? Yes No
Sample IDs noted by Client on COC? Yes No
Date and Time of collection noted by Client on COC? Yes No
Sampler's name noted on COC? Yes No

Sample Receipt Information

- Custody seals intact on shipping container/cooler? Yes No NA
Shipping container/cooler in good condition? Yes No
Samples in proper containers/bottles? Yes No
Sample containers intact? Yes No
Sufficient sample volume for indicated test? Yes No

Sample Preservation and Hold Time (HT) Information

- All samples received within holding time? Yes No
Sample/Temp Blank temperature Temp: 2.9°C NA
Water - VOA vials have zero headspace / no bubbles? Yes No NA
Sample labels checked for correct preservation? Yes No
pH acceptable upon receipt (Metal: <2; 522: <4; 218.7: >8)? Yes No NA
Samples Received on Ice? Yes No
(Ice Type: WET ICE)

UCMR3 Samples:

- Total Chlorine tested and acceptable upon receipt for EPA 522? Yes No NA
Free Chlorine tested and acceptable upon receipt for EPA 218.7, 300.1, 537, 539? Yes No NA

Analytical Report

WorkOrder: 1609334

Report Created for: Pangea Environmental Svcs., Inc.

1710 Franklin Street, Ste. 200
Oakland, CA 94612

Project Contact: Ron Scheele

Project P.O.:

Project Name: 2030.001

Project Received: 09/08/2016

Analytical Report reviewed & approved for release on 09/15/2016 by:

Angela Rydelius,
Laboratory Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current NELAP standards, where applicable, unless otherwise stated in the case narrative.

Glossary of Terms & Qualifier Definitions

Client: Pangea Environmental Svcs., Inc.
Project: 2030.001
WorkOrder: 1609334

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Analytical Qualifiers

e2 diesel range compounds are significant; no recognizable pattern
e7 oil range compounds are significant

NOTES: - **STLC and TCLP extractions require 2 days to complete;** therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

Chain of Custody (COC) Information

- Chain of custody present? Yes No
Chain of custody signed when relinquished and received? Yes No
Chain of custody agrees with sample labels? Yes No
Sample IDs noted by Client on COC? Yes No
Date and Time of collection noted by Client on COC? Yes No
Sampler's name noted on COC? Yes No

Sample Receipt Information

- Custody seals intact on shipping container/coolier? Yes No NA
Shipping container/coolier in good condition? Yes No
Samples in proper containers/bottles? Yes No
Sample containers intact? Yes No
Sufficient sample volume for indicated test? Yes No

Sample Preservation and Hold Time (HT) Information

- All samples received within holding time? Yes No
Sample/Temp Blank temperature Temp: 6.8°C NA
Water - VOA vials have zero headspace / no bubbles? Yes No NA
Sample labels checked for correct preservation? Yes No
pH acceptable upon receipt (Metal: <2; 522: <4; 218.7: >8)? Yes No NA
Samples Received on Ice? Yes No
(Ice Type: WET ICE)

UCMR3 Samples:

- Total Chlorine tested and acceptable upon receipt for EPA 522? Yes No NA
Free Chlorine tested and acceptable upon receipt for EPA 218.7, 300.1, 537, 539? Yes No NA
