Subject: Chevron Reorganization

Good Afternoon Shelby:

As discussed today in our meeting I would like to set up a portfolio meeting with the new Chevron Project Managers to discuss the path forward on each site. I request that you coordinate with the other project managers and send a list of all projects being overseen by Alameda County Department of Environmental Health and the corresponding project manager and consultant. I think it would be beneficial if the meeting included both the old and new project managers to help with the transition. I understand this may not be possible as chevron has significantly downsized its northern California environmental group however I believe that Natasha Molla, James Kiernan and possibly Catalina Espino Devine are still with Chevron and could help make this a smoother transition. Also, several projects have had involvement of Chevron legal counsel and it would be helpful if they attended the portfolio meeting on cases where they have been involved.

Additionally, based on our discussion in the meeting I understand that Arcadis will be taking over the bulk of these site. Therefore, please provide information on when this transition will be occurring.

Also, please provide a new Chevron org chart identifying the supervisors of each of the new project managers.

I look forward to meeting with you in the near future to go over your case portfolio.

Dilan Roe, PE, C73703

Chief – Land Water Division
