---

Hi,

I will put together the package sometime this afternoon. Since I have never had a case like this before, how will this work with the construction of the new site? I believe the area in question is right where the footings for the new canopy are supposed to be.

-Isaac

Good morning Isaac,

Due to the elevated concentrations of contaminants initially detected, as well as naphthalene detected above the Regional Water Board's Environmental Screening Level (ESL) following the over-excavation, please refer the case to Alameda County's LOP and include all documentation you may have.

Thank you,

Paresh C Khatri

**Subject:** 4707 First St, Livermore - Over Excavation

Hi Paresh,

Could you please let me know your opinion? Should we refer this to you as a case, or is it low enough to call it good until the tanks are pulled?

Thanks,

Isaac Mendel

**Subject:** Fwd: Analytical Report for Project: Chevron-Livermore [MAI WO#: 1707B94]

The very low hits here are way below the EsIs now and no further excavation should be needed.

Joel,

Attached is your final, certified analytical report. If an EDD (EDF for GeoTracker, "WriteOn", Excel format, etc.) has been requested, this file will follow as an attachment in a separate email within one week. Thank you for choosing MAI for your analytical needs.

Best regards,

*Heidi Fruhlinger*
