ALAMEDA COUNTY HEALTH CARE SERVICES AGENCY

DEPARTMENT OF ENVIRONMENTAL HEALTH LOCAL OVERSIGHT PROGRAM (LOP) FOR HAZARDOUS MATERIALS RELEASES 1131 HARBOR BAY PARKWAY, SUITE 250 ALAMEDA, CA 94502 (510) 567-6700 FAX (510) 337-9335

COLLEEN CHAWLA, Director

August 2, 2018

David DiGenova, Trustee Anthony DiGenova Trust 251 Orange Blossom Lane San Rafael, CA, 94903

Subject: Request for Interim Remedial Action Work Plan for Leaking Underground Fuel Tank Case No.

RO0003293 and GeoTracker Global ID T10000011255, 2510 Central Avenue located at 2510

Central Avenue (APN: 70-171-3), Alameda, CA 94501

Dear Mr. DiGenova:

Alameda County Department of Environmental Health (ACDEH) has reviewed the case file for the subject site in conjunction with the *Subsurface Environmental Investigation Report* (the Report) dated May 4, 2018, prepared by Green Environment Inc. (Green) on your behalf. The report documents results from additional site characterization activities that were conducted in March 2018 to address data gaps discussed during a meeting with ACDEH and Green on January 9, 2018.

Additional characterization activities documented in the Report include results of soil, grab groundwater sump water, and, soil vapor samples collected within the vicinity of the former waste oil underground storage tank (UST), within the sump in the interior of the underground garage, and adjacent to the subject site (the Site) to assess potential preferential pathway vapor intrusion from subsurface utilities entering the building. The Report documents the results of the soil and groundwater samples to further delineate the nature and extent of Total Petroleum Hydrocarbons as gasoline (TPH-g), diesel (TPH-d), and motor oil (TPH-mo) in the subsurface initially identified during tank removal activities in June 2017 and to characterize soil vapor in order to evaluate if soil vapor poses an unacceptable risk to the nearby residential receptors. Results from soil samples indicate TPH-d was detected in soil boring EB-1 advanced within the former UST excavation area. TPH-d was reported up to 3,000 milligrams per kilogram (mg/kg) in sample EB-1 at a depth of 10 to 10.5 feet below ground surface (bgs) below the reported bottom of the former UST area. Trace TPH-d was also detected in soil borings EB-2 and EB-5 at shallow depths (approximately 4 feet bgs). Grab groundwater results indicate TPH-d up to 4,100 micrograms per liter (ug/l) was reported in EB-1 located in the former tank excavation area and up 280 ug/l in EB-3 located adjacent (southeast) to the former UST excavation area. No detections of any petroleum hydrocarbon constituents were reported from the garage sump water sample. Chloroform was reported at a concentration of 8.0 micrograms per cubic meter (ug/m³) in the soil vapor probe located adjacent to the onsite building and underground utility (fuel oil pipeline) penetrating the building.

Based on results presented in the report, Green recommends the following activities; destruction of existing vapor probe; development of a work plan for removal of secondary source materials; and implementation of the approved work plan and request for case closure upon completion and documentation of the work.

ACDEH has evaluated the data and recommendations presented in the Report, in conjunction with the case files, to determine if the site is eligible for closure as a low risk site under the State Water Resources Control Board's Low Threat Underground Storage Tank Case Closure Policy (LTCP). Based on ACDEH staff review, we have determined that the site fails to meet the LTCP General Criteria, f (Secondary Source Removal), please refer to the LTCP Checklist on GeoTracker.

Mr. David DiGenova RO0003293 August 2, 2018, Page 2

Therefore, at this juncture ACDEH requests that you prepare an *Interim Remedial Action Work Plan* (*Work Plan*) to address the *Technical Comments* provided below and decommission the existing vapor probe. ACDEH also requests that you submit the requested *Deliverables* below to the State Water Resources Control Board's GeoTracker website in accordance with the compliance schedule provided and the *Responsible Party (ies) Legal Requirement/Obligations Instructions* and *File Naming Conventions* which are included as Attachments 1 and 2 respectively. ACDEH requests email notification verifying the requested deliverables have been uploaded to Geotracker (e-mail preferred to: andrew.york@acgov.org).

TECHNICIAL COMMENTS

1. General Criteria f – Secondary Source Has Been Removed to the Extent Practicable – "Secondary source" is defined as petroleum-impacted soil or groundwater located at or immediately beneath the point of release from the primary source. Unless site attributes prevent secondary source removal (e.g. physical or infrastructural constraints exist whose removal or relocation would be technically or economically infeasible), petroleum-release sites are required to undergo secondary source removal to the extent practicable as described in the policy. "To the extent practicable" means implementing a cost-effective corrective action which removes or destroys-in-place the most readily recoverable fraction of source-area mass. It is expected that most secondary mass removal efforts will be completed in one year or less. Following removal or destruction of the secondary source, additional removal or active remedial actions shall not be required by regulatory agencies unless (1) necessary to abate a demonstrated threat to human health or (2) the groundwater plume does not meet the definition of low threat as described in this policy.

ACDEH requests that you present a strategy in the Work Plan which includes a comprehensive and detailed plan for implementing the soil excavation including but not limited to the following items:

- Scaled figures (plan views and cross-sections) showing sampling locations and extents of excavation, volume of soil excavated and final disposition;
- Description of proposed soil excavation activities including but not limited to excavation phasing
 and other measures to minimize volatilization of constituents in soil to outdoor air and exposure to
 receptors (e.g. phased demolition of pavement, dewatering, use of containerized bins for
 excavated soil, direct load of excavated soil into trucks for immediate off-haul, etc);
- Shoring and/or other stabilization measures;
- Proposed confirmation sample locations and density, including in-situ soil samples for precharacterization for offsite disposal at a permitted facility;
- Protocols for characterizing, segregating, and stockpiling and/or direct loading of excavated soil based on visual and olfactory observations, PID readings and analytical results for TPH-g, and TPH-d;
- Estimated quantities of soil to be excavated and transported offsite for disposal;
- Groundwater dewatering plan; and
- Information regarding proposed soil import sources.

Mr. David DiGenova RO0003293 August 2, 2018, Page 3

DELIVERIBLES

Please perform the requested work and submit the technical report to the GeoTracker website and ACDEH via email (Attention: Drew York) according to the following schedule:

• **Monday, October 1, 2018** – *Interim Remedial Action Work Plan* File to be named: IRAWP 2018-10-01

UNDERGROUND STORAGE TANK CLEANUP FUND

Please be aware that site investigation/site cleanup costs may be reimbursable from the California Underground Storage Tank Cleanup Fund. The application and additional information is available at the State Water Resources Control Board's website at http://www.waterboards.ca.gov/water_issues/programs/ustcf. Please be aware that reimbursement monies are contingent upon maintaining compliance with directives from ACDEH.

Thank you for your cooperation. ACDEH looks forward to working with you and your environmental consultants to advance the case toward closure. If you have any questions, please call me at (510) 639-1276 or send me an email message at andrew.york@acgov.org.

Sincerely,

Drew J. York

SUBJECT: Responsible Party(ies) Legal

Requirements / Obligations

REPORT & DELIVERABLE REQUESTS

SECTION: ACDEH Procedures

Alameda County Department of Environmental Health (ACDEH) Cleanup Oversight Programs, Local Oversight Program (LOP) and Site Cleanup Program (SCP) require submission of all reports in electronic form to the State Water Board's (SWB) GeoTracker website in accordance with California Code of Regulations, Chapter 30, Division3, Title 23 and Division 3, Title 27.

<u>Leaking Underground Fuel Tank (LUFT) Cases</u>

Reports and deliverable requests are pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party (RP) in conjunction with an unauthorized release from a petroleum underground storage tank (UST) system.

Site Cleanup Program (SCP) Cases

For non-petroleum UST cases, reports and deliverables requests are pursuant to California Health and Safety Code Section 101480.

ELECTRONIC SUBMITTAL OF REPORTS

A complete report submittal includes the PDF report and all associated electronic data files, including but not limited to GEO_MAP, GEO_XY, GEO_Z, GEO_BORE, GEO_WELL, and laboratory analytical data in Electronic Deliverable Format™ (EDF). Additional information on these requirements is available on the State Water Board's website (http://www.waterboards.ca.gov/water_issues/programs/ust/electronic_submittal/)

- Do not upload draft reports to GeoTracker
- Rotate each page in the PDF document in the direction that will make it easiest to read on a computer monitor.

GEOTRACKER UPLOAD CERTIFICATION

Each report submittal is to include a GeoTracker Upload Summary Table with GeoTracker valid values¹ as illustrated in the example below to facilitate ACDEH review and verify compliance with GeoTracker requirements.

GeoTracker Upload Table Example

SUBJECT: Responsible Party(ies) Legal

Requirements / Obligations

ACKNOWLEDGEMENT STATEMENT

SECTION: ACDEH Procedures

All work plans, technical reports, or technical documents submitted to ACDEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I have read and acknowledge the content, recommendations and/or conclusions contained in the attached document or report submitted on my behalf to the State Water Board's GeoTracker website." This letter must be signed by the Responsible Party, or legally authorized representative of the Responsible Party.

PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS

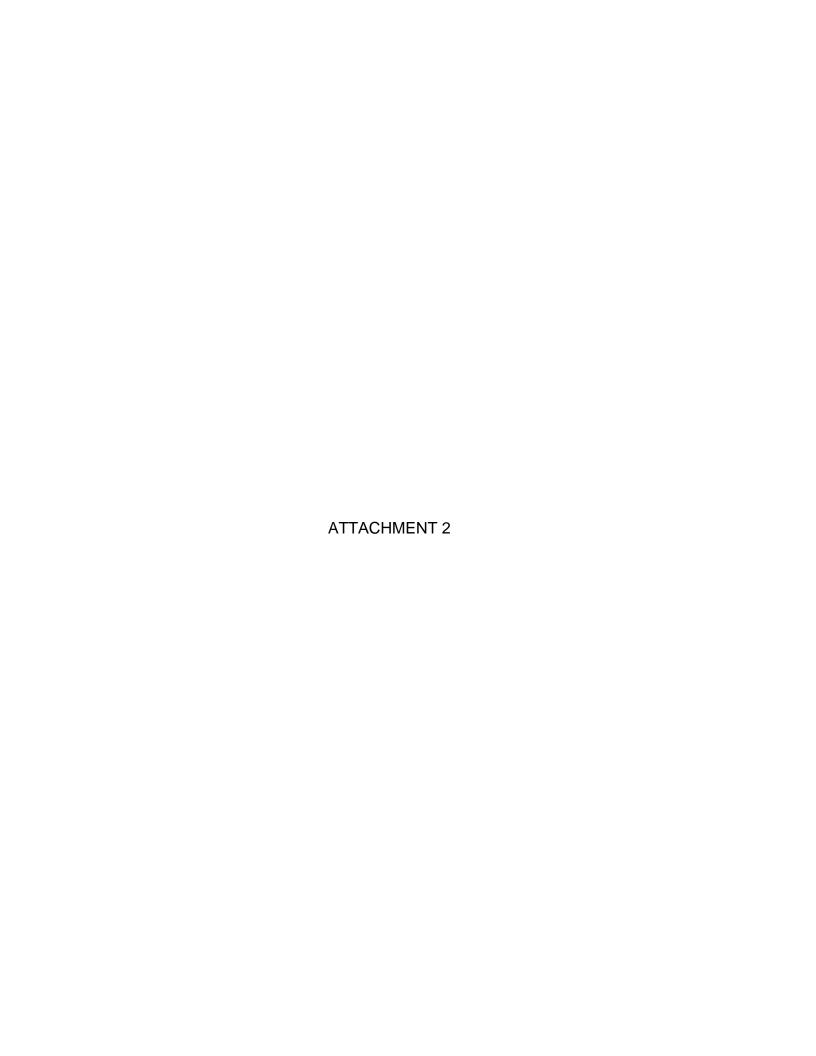

The California Business and Professions Code (Sections 6731, 6735, and 7835) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately licensed or certified professional and include the professional registration stamp, signature, and statement of professional certification. Additional information is available on the Board of Professional Engineers, Land Surveyors, and Geologists website at: http://www.bpelsg.ca.gov/laws/index.shtml.

UNDERGROUND STORAGE TANK CLEANUP FUND

For LUFT cases, RP's non-compliance with these regulations may result in ineligibility to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse the cost of cleanup. Additional information is available on the internet at: https://www.waterboards.ca.gov/water_issues/programs/ustcf/

AGENCY OVERSIGHT

Significant delays in conducting site assessment/cleanup or report submittals may result in referral of the case to the Regional Water Board or other appropriate agency, including the County District Attorney, for possible enforcement actions. California Health and Safety Code, Section 25299.76 authorizes enforcement including administrative action or monetary penalties of up to \$10,000 per day for each day of violation.
