RE: **Former Thrifty Oil Co. Station #049**  
3400 San Pablo Avenue  
Oakland, CA 94612  
*4th Quarter 2005, Status Report*

Dear Mr. Gholami:

Presented herein is the 4th Quarter 2005, Status Report prepared for former Thrifty Oil Co. (Thrifty) Station #049 located at 3400 San Pablo Avenue, Oakland, California (**Figure 1**). This report presents the results of the site monitoring and remedial activities conducted during the fourth quarter of 2005. Thrifty has retained the services of Earth Management Company (EMC) to conduct quarterly monitoring and sampling, and remediation system monitoring activities at this site.

### Groundwater Monitoring

Depth to groundwater is measured in each monitoring well on a quarterly basis. In general, groundwater occurs beneath the station at depths ranging from 3.86 feet below top of casing (btc) in monitoring/extraction well MW-6 to 7.26 feet btc in monitoring well MW-3 (**Appendix A**). A groundwater elevation contour map based on the October 19, 2005, monitoring data is presented in **Figure 2**. Groundwater elevation data indicates that groundwater flow to the southwest under an approximate gradient of 0.0247 feet/foot.

### Quarterly Groundwater Sampling

As part of the ongoing groundwater-monitoring program, EMC obtained groundwater samples from monitoring wells MW-1, MW-2R, MW-3, MW-4R, MW-5, MW-6, MW-7, and RW-1R on October 19, 2005. Groundwater wells MW-2 and MW-4 and recovery well RW-1 were abandoned by Advanced GeoEnvironmental (AGE) in January 2004, and replacement wells MW-2R, MW-4R, and RW-1R were installed as part of an upgrade to the groundwater recovery system. Groundwater samples were delivered by EMC in a chilled state following strict Chain-of-Custody procedures to a state-certified laboratory and analyzed for total petroleum hydrocarbons as gasoline (TPHg) by EPA Method 8015M. Volatile organic compounds of benzene, toluene, ethylbenzene, xylenes (BTEX), methyl tert butyl ether (MTBE), and other oxygenates were analyzed by EPA Method 8260B. A summary of historical analytical sampling results for TPHg, BTEX, and MTBE is provided in **Table 1**. Copies of the EMC Field Data Groundwater Sampling Forms are provided in **Appendix A**, and copies of the laboratory analytical reports are contained in **Appendix B**.

TPHg, benzene, and MTBE isoconcentration maps in micrograms per liter (ug/L) were prepared using data from the October 19, 2005, sampling event and are presented in **Figures 3, 4, and 5**, respectively. Laboratory results indicate the highest concentrations of TPHg and MTBE were detected in well MW-4R (1,310 ug/L and 1,160 ug/L, respectively). Benzene was not detected above 0.32 ug/L.

13116 Imperial Highway, Santa Fe Springs, CA 90670 • (562) 921-3581

Concentrations of TPHg, benzene, and MTBE have decreased in well MW-3 since October 20, 2003. However, elevated concentrations of TPHg and MTBE were detected in upgradient well MW-5 since April 2004. The groundwater flow direction and TPHg, benzene, and MTBE contour maps suggest that an upgradient offsite source may be possible.

### **Remediation Status**

Site remedial activities were initiated in April 1991. The remediation system consists of a Groundwater Treatment System using activated carbon, with groundwater extraction from recovery well RW-1. System operational data is included in **Table 2**. On April 4, 2003, the system was shut off for upgrading activities. As of April 4, 2003, the system treated approximately 1,445,088 gallons of groundwater since start up (April 1991).

Thrifty selected AGE to conduct remedial system upgrade activities including installation of a new treatment compound, installation of new piping, connection of piping to the replacement well network, and the operation and maintenance of the upgraded groundwater pump and treat system. In January 2004, AGE abandoned wells MW-2, MW-4, and RW-1 and replaced them with wells MW-2R, MW-4R, and RW-1R.

The upgraded remediation system was restarted by Advance GeoEnvironmental (AGE) for continuous operation on June 21, 2004. The primary components of the upgraded system within the treatment compound consist of an air compressor, 500 gallon Poly settling tank, control panel, and three 200 pound granular activated carbon canisters (**Figures 6 and 7**). The upgraded system is removing groundwater from extraction wells MW-2R, MW-4R, and RW-1R that are each equipped with downhole submersible pumps.

On November 2, 2004, AGE reported that the pump had been stolen from well MW-4R. Due to the fact that well MW-4R produced more water than well MW-2R, the pump from well MW-2R was removed and installed in well MW-4R. On February 25, 2005, a new pump was installed in well MW-4R and the pump was replaced in well MW-2R.

On January 12, 2005, system operations and maintenance duties were assumed by EMC from AGE. During the current reporting period, as of December 14, 2005, the upgraded system produced and treated 3,660 gallons of water for a cumulative system total of 1,548,904 gallons (**Table 2**). A quarterly effluent water sample from the PSP-1 sampling port was collected on October 8, 2005, and analyzed for benzene, toluene, ethylbenzene, and xylenes (BTEX) by EPA Method 8021B and for total petroleum hydrocarbons (TPHg) by EPA Method 8015M. TPHg and BTEX were not detected above their respective detection limits. The system was shutdown for quarterly groundwater sampling on October 17, 2005 and restarted on October 21, 2005. Copies of the Field Reports prepared by EMC are provided in **Appendix C** and the system effluent analytical results collected by EMC are provided in **Appendix D**.

### **Recent Site Investigation**

In a transmittal letter dated March 11, 2004, Thrifty submitted preliminary soil and groundwater data from the four offsite soil borings and onsite well replacement activities performed by AGE. On March 18, 2004, Thrifty, AGE, and the Alameda County Health Care Agency (ACHCA) met at the site to discuss the location of offsite well MW-8 and the soil and groundwater data provided by Thrifty. In a letter dated March 19, 2004, the ACHCA requested that Thrifty prepare a workplan to address the offsite contamination detected during the January 2004 site assessment conducted by AGE. After further discussing the scope of work with the ACHCA in e-mail dated April 27, 2004, Thrifty submitted a workplan to install one onsite and two offsite wells downgradient of the site. The ACHCA responded in an e-mail dated May 4, 2004, requesting additional borings to delineate the plume to the west and southwest of the site. Thrifty submitted a revised Workplan for Additional Offsite Assessment dated May 7, 2004 that included two additional borings to the southwest of the site. In a letter dated May 17, 2004, the ACHCA approved the May 7, 2004, workplan with the request that additional borings be considered if soil and groundwater samples indicate significant hydrocarbon contamination. The ACHCA also suggested moving the location of onsite well MW-10 slightly to the west or installing a second boring along the northern boundary of the site. Thrifty has selected GeoHydrologic Consultants, Inc. (GHC) to conduct site assessment activities. GHC has obtained well permits and is in the process of obtaining an encroachment permit from the City of Oakland Public Works Department (COPWD).

### **Planned Activities**

The encroachment permit is still being reviewed by the COPWD following comments by Thrifty. Thrifty expects to complete field activities and submit a site assessment report within 75 days following approval of the encroachment permit.

The groundwater monitoring wells will be monitored and sampled during the next quarter. All site monitoring/sampling data generated during the next quarter will be reported in the First Quarter 2006 monitoring report.

### **Closing Comments**

All interpretations expressed in this report are based solely upon data collected by EMC and laboratory analyses conducted by Associated Laboratories.

Sincerely,

  
Michael H. Bowery, P. G.  
Project Manager

**NOTE:** \* MTBE 8020 / 8260

ND = Nondetectable

NP = No free hydrocarbon product

" - " = Not analyzed / Not available

Benzene, toluene, ethylbenzene, and xylene analyzed by EPA method 8020.

Total petroleum hydrocarbons (TPH) analyzed by EPA method 8015 modified for gasoline

Methyl-tert Butyl Ether (MTBE) analyzed by EPA method 8020 or 8260

On 7/21/04, 4/08/04, 7/10/03 & 11/14/02, BTEX and MTBE done by 8260B

WD PERMIT LIMITS:	NE	5.0	5.0	5.0	5.0	NE
-------------------	----	-----	-----	-----	-----	----

Note:

< = less than laboratory detection level indicated

- = no sample / not analyzed

NE = Permit Limit not established

TPH is analyzed by EPA Method 8015 M

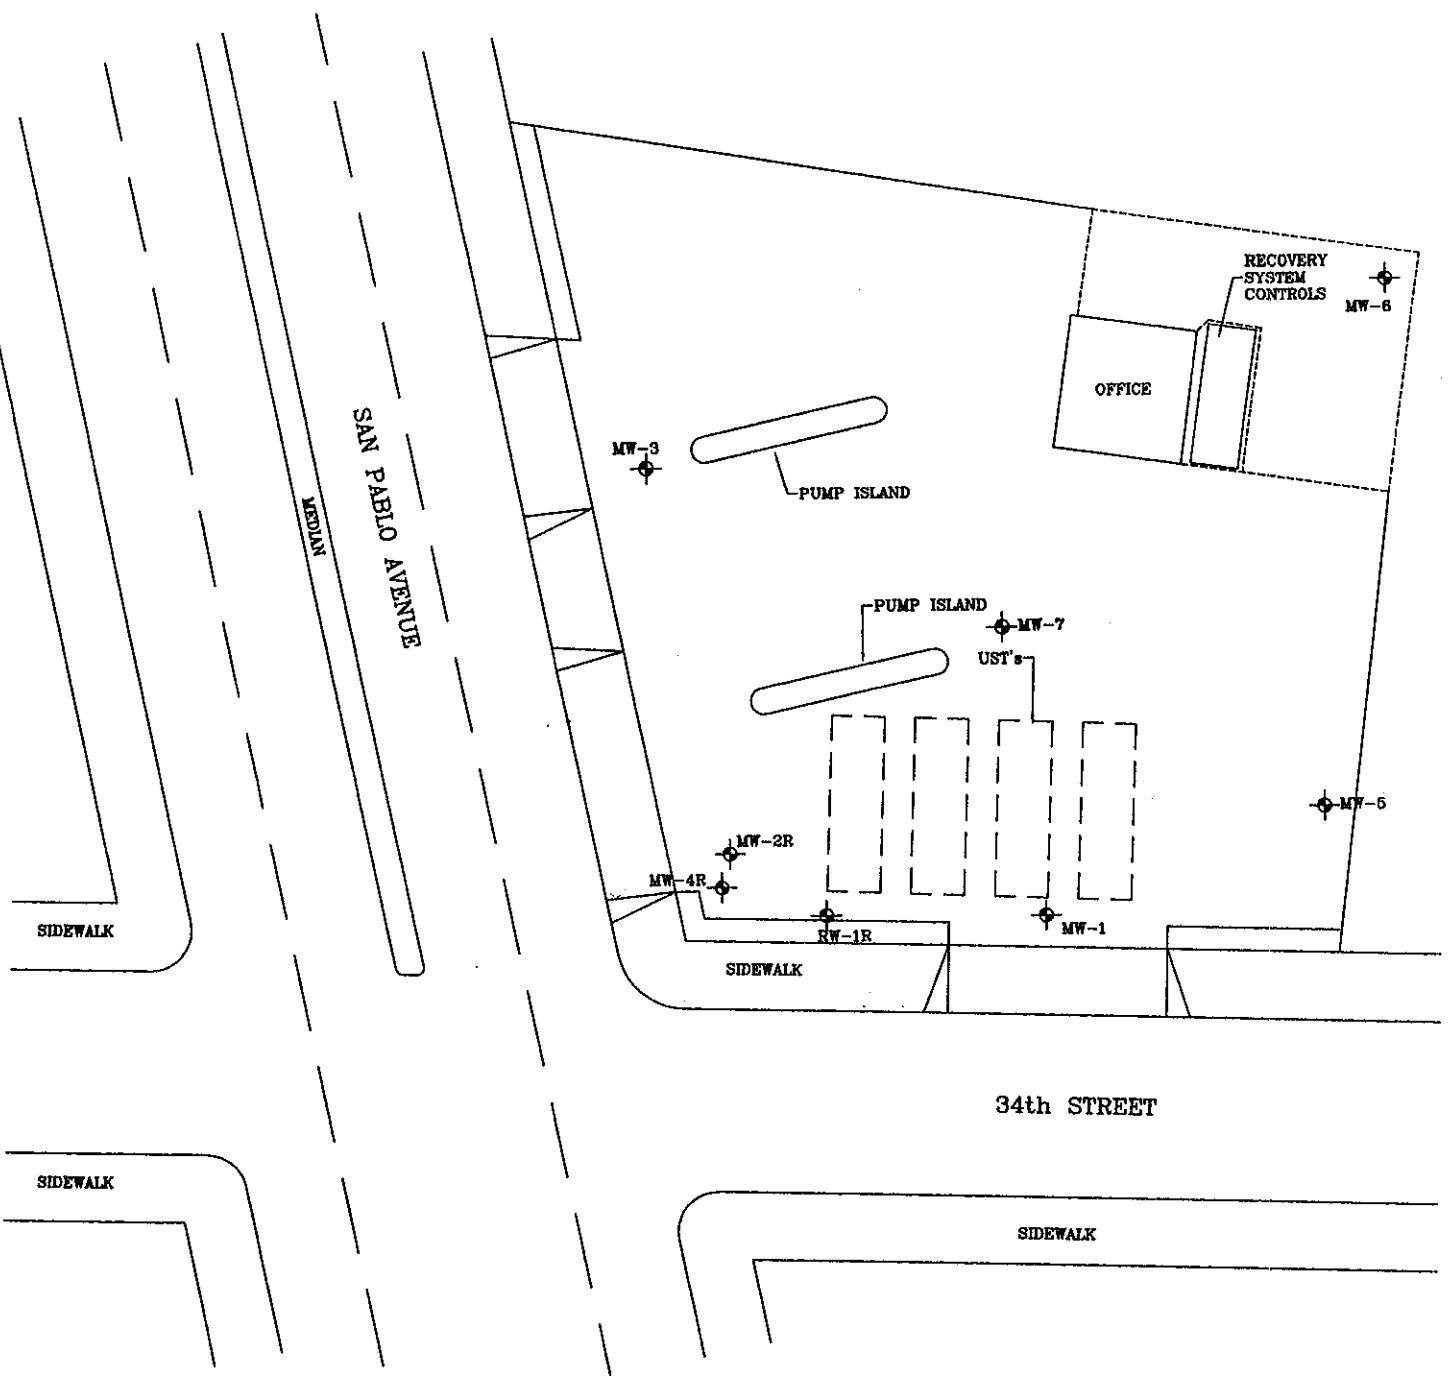

BTEX is analyzed by EPA Method 602/8020 or 8021

\*MTBE 8021/8260

Total Hydrocarbons Removed = From 4/8/91 to 2/10/92, the influent TPHg is assumed to be 47,000 (3/9/92)

In February 2000, the total cumulative discharge amount was corrected to reflect all system maintenance and flowmeter changeouts since the startup of the system. The total number may be different from previous versions of this table.

### SAMPLE ACCEPTANCE CHECKLIST

#### Section 1

Client: T.O.C.

Project: Q.L.S.

Date Received: 10/20/05

Sample(s) received in cooler: Yes

No (Skip Section 2)

#### Section 2

Was the cooler packed with:  Ice  Ice Packs  Bubble Wrap  Styrofoam  
 Paper  None  Other

Cooler or box temperature: 32°

(Acceptance range is 2 to 6 Deg. C.)

#### Section 3

	YES	NO	N/A
Was a COC received?	✓		
Were custody seals present?			✓
If Yes - were they intact?			
Were all samples sealed in plastic bags?	✓		
Did all samples arrive intact? If no, indicate below.	✓		
Did all bottle labels agree with COC? (ID, dates and times)	✓		
Were correct containers used for the tests required?	✓		
Was a sufficient amount of sample sent for tests indicated?	✓	✓	
No head space in VOA vials?		✓	
Were the correct preservatives used?			✓
Were the samples scanned for presence of radioactivity?			✓

#### Section 4

Explanations/Comments

[Four blank lines for comments]

#### Section 5

Was Project Manager notified of discrepancies: Y / N N/A

Completed By: John M. Taylor

Date: 10/20/05

# WHERE DO YOUR TAX DOLLARS GO?

## OAKLAND, CALIFORNIA

April 2005

The average household in Oakland paid \$6,538 in federal income taxes in 2004. Here is how that amount was spent:

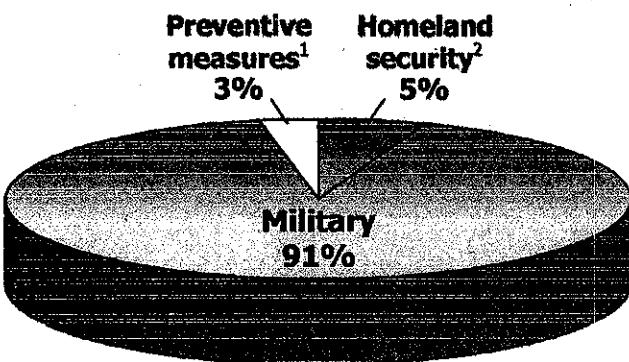

Military and Defense:	\$1,959
Health:	\$1,325
Interest on the Debt (Military):	\$577
Interest on the Debt (Non-military):	\$639
Income Security:	\$430
Education:	\$240
Veterans' Benefits:	\$225
Nutrition:	\$176
Housing:	\$140
Natural Resources:	\$113
Job Training:	\$26
Other:	\$687

Notes: \*The breakdown of the individual income-tax dollar refers to the Federal funds budget outlays and does not include trust fund outlays (such as Social Security). The breakdown is based on fiscal year 2004 actual outlays extracted from the *Budget of the U.S. Government, FY2006, Appendix*. Numbers may not add up to totals due to rounding. *Military and defense* includes the government definition of national defense, other military programs, and the Department of Homeland Security (DHS). *Income security* includes Supplemental Security Income (aimed at elderly, disabled and blind with low income), tax credit programs, TANF, child care spending and other programs aimed at families. *Other* includes the following function and sub-function areas: general science, space and technology; international affairs other than military assistance; energy; agriculture; commerce and housing credit; transportation; community and regional development; labor and social services other than job training; justice; general government; and undistributed offsetting receipts. For more information on the analysis, go to *Where do Your Tax Dollars Go? Notes and Sources* available at [www.nationalpriorities.org/TaxDay2005/sources.pdf](http://www.nationalpriorities.org/TaxDay2005/sources.pdf).

# MILITARY DOMINATES SECURITY SPENDING

Close to one-third of the income-tax dollar is spent on national security. This money is divided into military spending, homeland security, and preventive measures such as diplomacy, peacekeeping and development aid. Less than a penny goes to preventive measures that help mitigate conflict and alleviate many of the conditions that produce breeding grounds for terrorists.

Distribution of Security Dollars

## MORE ON YOUR TAX DOLLAR...

Only *half* of a penny is spent on energy conservation. Safe, reliable and affordable energy alternatives will insure our country against future instability and conflict by reducing our dependence upon fossil fuels.

Housing assistance accounts for about *2¢* of every tax dollar and made up \$36.6 billion in federal outlays last year. By contrast, homeowners with mortgages claimed \$70 billion in reduced taxes. Two-thirds of that amount went to those with incomes more than \$100,000 a year.<sup>3</sup>

Interest payments on the national debt consume *18.6¢* of every income-tax dollar. While interest rates have remained low, stemming the impact of growing debt, large deficits this year and to come may demand a larger portion of income-tax dollars in the future.

Veterans' benefits account for about *3.4¢* of the income-tax dollar and include health, education, retirement and other benefits for veterans. Veterans organizations have put forth an alternative budget which indicates that \$4.3 billion more is needed in funding. Other changes are required to address rapidly-rising health care costs, special needs of disabled veterans, and other promised benefits for veterans.<sup>4</sup>

Notes: <sup>1</sup> Preventive measures refer to all non-military forms of international assistance, conduct of foreign affairs, foreign information and exchange activities and international financial programs. <sup>2</sup> Total homeland security outlays in 2004 are not possible to estimate given the presentation of the budget materials by OMB. However, OMB, *Mid-session Review, FY2005* cites discretionary outlays as \$29 billion; mandatory outlays as published in the *Public Database, FY2006* add another \$434 million. <sup>3</sup> Joint Committee on Taxation. <sup>4</sup>Independent Budget, FY2006. For more information and links to sources, go to *Where do Your Tax Dollars go? Notes and Sources* available on the NPP website at [www.nationalpriorities.org/TaxDay2005/sources.pdf](http://www.nationalpriorities.org/TaxDay2005/sources.pdf).
