RE: **Former Thrifty Oil Co. Station #063**  
**ARCO Products Company Station #9542**  
6125 Telegraph Avenue  
Oakland, CA  
**3rd Quarter 2004, Status Report**

Alameda County  
OCT 22 2004  
EMC

Dear Ms. Hugo:

Presented herein is the Third Quarter 2004, Status Report prepared for former Thrifty Oil Co. (Thrifty) Station #063 located at 6125 Telegraph Avenue, Oakland, California (**Figure 1**). This report presents the results of the site monitoring and remedial activities in the third quarter of 2004. Thrifty has retained the services of Earth Management Company (EMC) to conduct quarterly monitoring and sampling and remedial system monitoring activities at this site.

## **Groundwater Monitoring**

Depth to groundwater is measured in each monitoring well on a quarterly basis. In general, groundwater occurred beneath the station at depths ranging from 13.12 feet below top of casing (btc) in monitoring well MW-6 to 15.94 feet btc in monitoring well MW-3 on July 29, 2004. A groundwater elevation contour map based on the July 29, 2004, data is presented in **Figure 2**. The groundwater flow direction is to the southwest at an approximate gradient of 0.0453 feet/foot.

## **Quarterly Groundwater Sampling**

As part of the ongoing groundwater-monitoring program, groundwater samples were obtained from monitoring wells MW-1, MW-4, MW-5, and MW-6 on July 29, 2004. Groundwater from recovery well MW-3 was also sampled on July 29, 2004, because the system was shut down. Groundwater samples were obtained by EMC and delivered in a chilled state following strict Chain-of-Custody procedure to a state-certified laboratory. The samples were analyzed for total petroleum hydrocarbons as gasoline (TPHg) by EPA Method 8015M, and for benzene, toluene, ethylbenzene, xylenes (BTEX) and methyl tert-butyl ether (MTBE) by EPA Method 8260B. Laboratory analytical sampling results are provided in **Table 1** and **Table 2** (other oxygenates). Copies of the EMC Field Status Reports for groundwater sampling are presented in **Appendix A**, and copies of the laboratory analytical reports are contained in **Appendix B**.

TPHg, benzene, and MTBE isoconcentration maps results are presented in **Figures 3, 4, and 5**, respectively. Laboratory results indicate the highest concentrations of TPHg and MTBE were in monitoring well MW-4, with concentrations of 5,400 micrograms per liter (ug/L) and 6,730 ug/L, respectively. The highest benzene concentration (74 ug/L) was detected in well MW-3. The isoconcentration maps incorporated data from the treatment system influent well MW-3.

### **Remediation Status**

Site remedial activities were initiated in April 1991. Presently, the remediation system consists of a Groundwater Treatment System that extracts groundwater from monitoring well MW-3 with treatment utilizing activated carbon. System operational data is included in **Table 3** and **Appendix C**. During this reporting period from June 22 through September 29, 2004, the groundwater treatment system processed approximately 24,910 gallons of groundwater and has treated approximately 2,624,359 gallons of groundwater since start-up (April 1991). The system was shut down for quarterly groundwater sampling and carbon replacement from July 28 through August 5, 2004 and was also off for operator vacation from September 8 through September 29, 2004. The system operated throughout the remainder of the quarter.

Inlet, intermediate 3, intermediate 2, intermediate 1, and outlet water samples were collected on July 8, 2004. The system water samples collected by EMC were sent to a state certified laboratory for analysis. The samples were analyzed for TPHg by EPA Method 8015M and for BTEX and MTBE by EPA Method 8021B. All outlet sample constituents were below the laboratory method detection limit (MDL). Inlet water sample results indicate maximum concentrations of 652 ug/L TPHg, 31 benzene, and 383 ug/L MTBE. Copies of the laboratory analytical reports are included in **Appendix D**.

### **Other Activities**

In the 2nd Quarter 2004 Status Report, Thrifty indicated that because more than 60 days had elapsed since the initial request to the ACHCA to connect well MW-4 to the existing remediation system, Thrifty was going to proceed with connecting well MW-4 to the system. Thrifty has submitted a request for proposal to qualified contractors to connect well MW-4 to the system and will notify the ACHCA when field work is scheduled.

Thrifty #063  
3rd Quarter Status Report  
October 19, 2004  
Page 3

**Closing Comments**

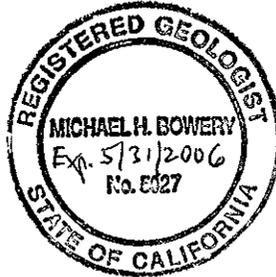

The groundwater monitoring wells and the treatment unit will be monitored and sampled during the next quarter. All site monitoring/sampling data generated during the next quarter will be reported in the 4th Quarter 2004 monitoring report.

All interpretations expressed in this report are based solely upon the review of data collected by EMC and Associated Laboratories.

Sincerely,

Michael H. Bowery, R.G.  
Project Manager

Chris Panaitescu  
General Manager  
Environmental Affairs

### Cooler Receipt Form

Client: Thrifty oil Project: TOC 063

Date Cooler Received: 7-30 Date Cooler Opened: 7-30

Was cooler scanned for presence of radioactivity? Yes/No  
If yes was radioactivity results above 25 cpm? Yes/No

Was a shipper's packing slip attached to the cooler? Yes/No

If the cooler had custody seal(s), were they signed and intact? Yes/No/Na

Was the cooler packed with: Ice  Ice Packs  Bubble wrap   
Styrofoam  Paper  None  Other

Cooler Temperature: 4.0°C \*

\*cooler needs to be received @ 4°C with an acceptable range of 2°- 6 °C

If samples were hand delivered do they meet the temp. criteria, which should be @ 4°C with an acceptable range of 2°- 6 °C? Yes/No

If no explain: \_\_\_\_\_

Were all samples sealed in plastic bags? Yes/No

Did all samples arrive intact? If no, indicate below. Yes/No

Were all samples labeled correctly? (ID's Dates, Times) If no, indicate below. Yes/No

Can the tests required be ran with the provided containers, If no indicate below. Yes/No

Was sufficient sample volume sent for all containers? Yes/No

Were any VOA vials received with head space? Yes/No/Na

Was the correct preservatives used? Yes/No/Na

If no, see the pH log for a list of samples containers regarding pH

Any other important information: \_\_\_\_\_

Receiving Department: W Date: 7-30

**Cooler Receipt Form**

Client: Thurby Oil Project: FOC 063

Date Cooler Received: 7/9 Date Cooler Opened: 7/9

Was cooler scanned for presence of radioactivity? Yes/No  
If yes was radioactivity results above 25-cpm? Yes/No

Was a shipper's packing slip attached to the cooler? Yes/No

If the cooler had custody seal(s), were they signed and intact? Yes/No/Na

Was the cooler packed with: Ice  Ice Packs  Bubble wrap   
Styrofoam  Paper  None  Other

Cooler Temperature: 4.3°C\*

\*cooler needs to be received @ 4°C with an acceptable range of 2° - 6 °C

If samples were hand delivered do they meet the temp. criteria, which should be @ 4°C with an acceptable range of 2° - 6 °C? Yes/No

If no explain: \_\_\_\_\_

Were all samples sealed in plastic bags? Yes/No

Did all samples arrive intact? If no, indicate below. Yes/No

Were all samples labeled correctly? (ID's Dates, Times) If no, indicate below. Yes/No

Can the tests required be ran with the provided containers, If no indicate below. Yes/No

Was sufficient sample volume sent for all containers? Yes/No

Were any VOA vials received with head space? Yes/No/Na

Was the correct preservatives used? Yes/No/Na

If no, see the pH log for a list of samples containers regarding pH

Any other important information: \_\_\_\_\_
