RE: **Former Thrifty Oil Co. Station #063**
ARCO Products Company Station #9542
6125 Telegraph Avenue
Oakland, CA
Second Quarter 2008, Status Report

Dear Mr. Plunkett:

Presented herein is the Second Quarter 2008, Status Report prepared for former Thrifty Oil Co. (Thrifty) Station #063 located at 6125 Telegraph Avenue, Oakland, California (**Figure 1**). Presented in this report are the results of the quarterly groundwater-monitoring program and ongoing remediation conducted during the Second Quarter 2008. Thrifty has retained the services of Earth Management Company (EMC) to conduct quarterly monitoring and sampling, and remediation system operation and maintenance activities at this site.

Current and historical groundwater analytical data indicates a general decrease overall in dissolved-phase petroleum hydrocarbons at the site which Thrifty believes are a result of the operation of the groundwater remediation system and natural attenuation. In order to reduce the remaining residual petroleum hydrocarbon contamination in the soil and groundwater beneath the site and to move the site towards closure, Thrifty proposes conducting a continuous 5-day high vacuum dual-phase extraction (DPE) event (with possible additional events to be performed based upon results). Upon your approval, Thrifty will submit a workplan detailing the above proposed Interim Remedial Action.

13116 Imperial Hwy, Santa Fe Springs, CA 90670-0138 • Ph: (562)921-3581

Should you have any questions regarding this report, please contact Simon Tregurtha (562) 921-3581 Ext. 260 or the undersigned at Ext 390.

Respectfully submitted,

Chris Panaitescu
General Manager
Environmental Affairs

Summary of Monitoring and Sampling Activities

Thrifty Oil Co. Station #063
Second Quarter 2008
Reporting Period: 03/2/2008 to 07/01/2008

Site Information:

Site address:	TOC SS #063 (ARCO #9542) 6125 Telegraph Avenue Oakland, CA
Global ID No.:	T0600101366
EDF Confirmation No.:	2764490664
Lead Agency No.:	Local #RO0000005
Lead Agency:	Alameda County Health Care Services
Agency Contact:	Mr. Steven Plunkett / 510 383-1767
Project Manager:	Simon Tregurtha / 562-921-3581 ext. 260

Field Activity:

Groundwater wells onsite:	5
Groundwater wells offsite:	2
Date(s) monitored:	April 29, 2008
Date(s) sampled:	April 29, 2008
Groundwater wells gauged:	7
Groundwater wells sampled:	7
Purging method:	Bailer / Pump
Treatment / disposal method during sampling event:	Existing groundwater treatment system
Groundwater wells with free product:	0
Free product thickness (feet):	NA
Free product bailouts other than sampling event:	NA
Treatment / disposal method/free product bailouts:	NA

Site Hydrogeology:

Depth to groundwater (feet bgs):	11.43 to 17.58
Groundwater elevation (feet above mean sea level):	131.30 to 136.95
Groundwater gradient and flow direction:	West-southwest at approximately 0.06 ft./ft.
Consistent with previous quarter:	Similar to previous quarter

Groundwater Conditions:

TPHg concentration (ug/L):	ND<6.6 to 4,340
Benzene concentration (ug/L):	ND<0.18 to 76
Toluene concentration (ug/L):	ND<0.24 to 498
Ethyl benzene concentration (ug/L):	ND<0.21 to 138
Total Xylenes concentration (ug/L):	ND<0.45 to 817
MTBE concentration (ug/L):	ND<0.19 to 11
DIPE concentration (ug/L):	ND<0.20 to ND<2.0
ETBE concentration (ug/L):	ND<0.23 to ND<2.3
TAME concentration (ug/L):	ND<0.19 to ND<1.9
TBA concentration (ug/L):	ND<10 to ND<100

Remediation Activity:

System type:	GWPT
System start-up:	4/8/1991
Operation this quarter (hrs.):	NA
Cumulative Operation (hrs.):	NA
GW discharge this quarter (gal.):	64,990 (03/06/08 to 06/25/08)
Total GW discharge (gal.):	3,065,029 (through June 25, 2008)
Hydrocarbons extracted this quarter (lbs.):	NA
Total hydrocarbons extracted (lbs.):	NA
Hydrocarbon removal rate (lbs/hour) from startup	NA
Hydrocarbon removal rate (lbs/hour) this quarter	NA

Groundwater Monitoring

Depth to groundwater is measured in each monitoring well on a quarterly basis. Groundwater monitoring well locations are presented in **Figure 1**. A groundwater elevation contour map based on the April 29, 2008, groundwater monitoring data is presented in **Figure 2**. The groundwater flow direction is to the west-southwest at an approximate gradient of 0.06 feet/foot.

Quarterly Groundwater Sampling

As part of the ongoing groundwater-monitoring program, groundwater samples were obtained from monitoring wells MW-1, MW-3, MW-4, MW-5, MW-6, MW-7, and MW-8 on April 29, 2008. Groundwater samples were collected by Earth Management Company (EMC) and delivered in a chilled state following strict Chain-of-Custody procedure to a state-certified laboratory. The samples were analyzed for total petroleum hydrocarbons as gasoline (TPHg) by

EPA Method 8015B, and for benzene, toluene, ethylbenzene, xylenes (BTEX) and methyl tert-butyl ether (MTBE) and other oxygenates by EPA Method 8260B. Laboratory analytical results are provided in **Table 1** and **Table 2**. Copies of the Field Status Reports for groundwater sampling are presented in **Appendix A**, and copies of the laboratory analytical reports are contained in **Appendix B**.

TPHg, benzene, MTBE, and TBA concentration results are presented in **Figures 3, 4, 5, and 6**, respectively. Laboratory results indicate that the highest concentrations of TPHg and benzene were detected in well MW-4 at 4,340 micrograms per liter (ug/L) and 76 ug/L, respectively. MTBE was only detected in one well (MW-3) at 11 ug/l, and TBA and the other oxygenated compounds were not detected at or above laboratory detection limits in any of the wells.

Remediation Status

Site remedial activities were initiated in April 1991. Currently, the remediation system consists of a Groundwater Treatment System that extracts groundwater from monitoring wells MW-3 and MW-4 with treatment utilizing activated carbon. System operational data is included in **Table 3** and **Appendix C**. System inlet and outlet laboratory analytical data is presented in **Appendix D**. During the current reporting period (from March 6, 2008 through June 25, 2008), the groundwater treatment system processed approximately 64,990 gallons of groundwater and has treated approximately 3,065,029 gallons of groundwater since start-up (April 1991). The system was upgraded in the 2nd Quarter 2005, when a pump was replaced in well MW-3 and MW-4 was added to the extraction well array.

Other Activities

In a letter received by Thrifty dated December 7, 2005, the Alameda County Health Care Services (ACHCS) requested site information including depth to water, groundwater flow direction, dissolved constituents concentrations, well screen levels, plume stability, and if active remediation was occurring onsite. Thrifty provided the requested information on January 10, 2006. The ACHCS also requested that a site conceptual model (SCM) be prepared for the site; Thrifty uploaded the SCM to the ACHCS FTP website and to Geotracker on April 26, 2006. In a letter received by Thrifty dated October 24, 2006, the ACHCS requested a Revised SCM (RSCM) and an offsite investigation workplan (Workplan). On behalf of Thrifty, Equipoise Corporation uploaded the RSCM and Workplan to the California Geotracker website and the ACHCS FTP website on November 29, 2006. Subsequently, the ACHCS sent a letter to Thrifty dated December 21, 2006 approving the Workplan for down-gradient off-site assessment.

On February 22, 2007, two downgradient groundwater monitoring wells (MW-7 and MW-8) were installed on the adjacent property located to the south of the Site by Test America of Rancho Cordova, California under the supervision of Equipoise Corporation. Results of the additional site assessment were presented in a *Site Assessment/Well Installation Report*, submitted to ACHCS on April 5, 2007.

Proposed Interim Remedial Action

Current and historical groundwater analytical data indicates an overall general decrease in dissolved-phase petroleum hydrocarbons at the site which Thrifty believes are a result of the operation of the groundwater remediation system and natural attenuation. In order to reduce the remaining residual dissolved-phase petroleum hydrocarbon contamination in the soil and groundwater beneath the site and to move the site towards closure, Thrifty proposes to conduct a continuous 5-day high vacuum dual-phase extraction (DPE) event (with possible additional events to be performed based upon results). Upon your approval, Thrifty will submit a workplan detailing the proposed Interim Remedial Action.

Activities Planned for Third Quarter 2008

The following activities are planned for next reporting period (Third Quarter 2008):

- Continue groundwater monitoring and sampling;
- Continue operations of the groundwater remediation system; and
- Upon approval, submit a workplan detailing the proposed DPE event(s).

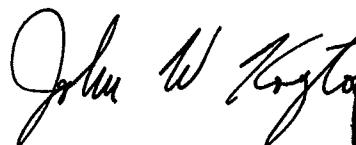

Closing Comments

Interpretations expressed herein are based solely upon data collected and provided by EMC and Associated Laboratories. Should you have any questions regarding this report or require any additional information, please contact Simon Tregurtha at 562-921-3581, Ext. 260.

Sincerely:

Simon Tregurtha
Project Manager

John W. Kosztowny
Registered Geologist

NOTE:

Monitoring wells MW-1 through MW-8 were surveyed on 3/5/2007

^ Top of casing elevation estimated to be 6 inches below well rim

NP = N free hydrocarbon product

" - " = Not analyzed / Not available

* MTBE 8020 / 8260

Benzene, toluene, ethlybenzene, and xylene analyzed by EPA method 8020/8021B.

Total petroleum hydrocarbons (TPH) analyzed by EPA method 8015 modified for gasoline

Methyl-tert Butyl Ether (MTBE) analyzed by EPA method 8020/8021B

On 10/8/03 & 7/14/2003, BTEX and MTBE analyzed by 8260B

Beginning 4/14/2004, BTEX and MTBE analyzed by 8260B

WD PERMIT LIMITS:	NE	5.0	5.0	5.0	5.0	NE
-------------------	----	-----	-----	-----	-----	----

Note:

< = less than laboratory detection level indicated

- = no sample / not analyzed

NE = Permit Limit not established

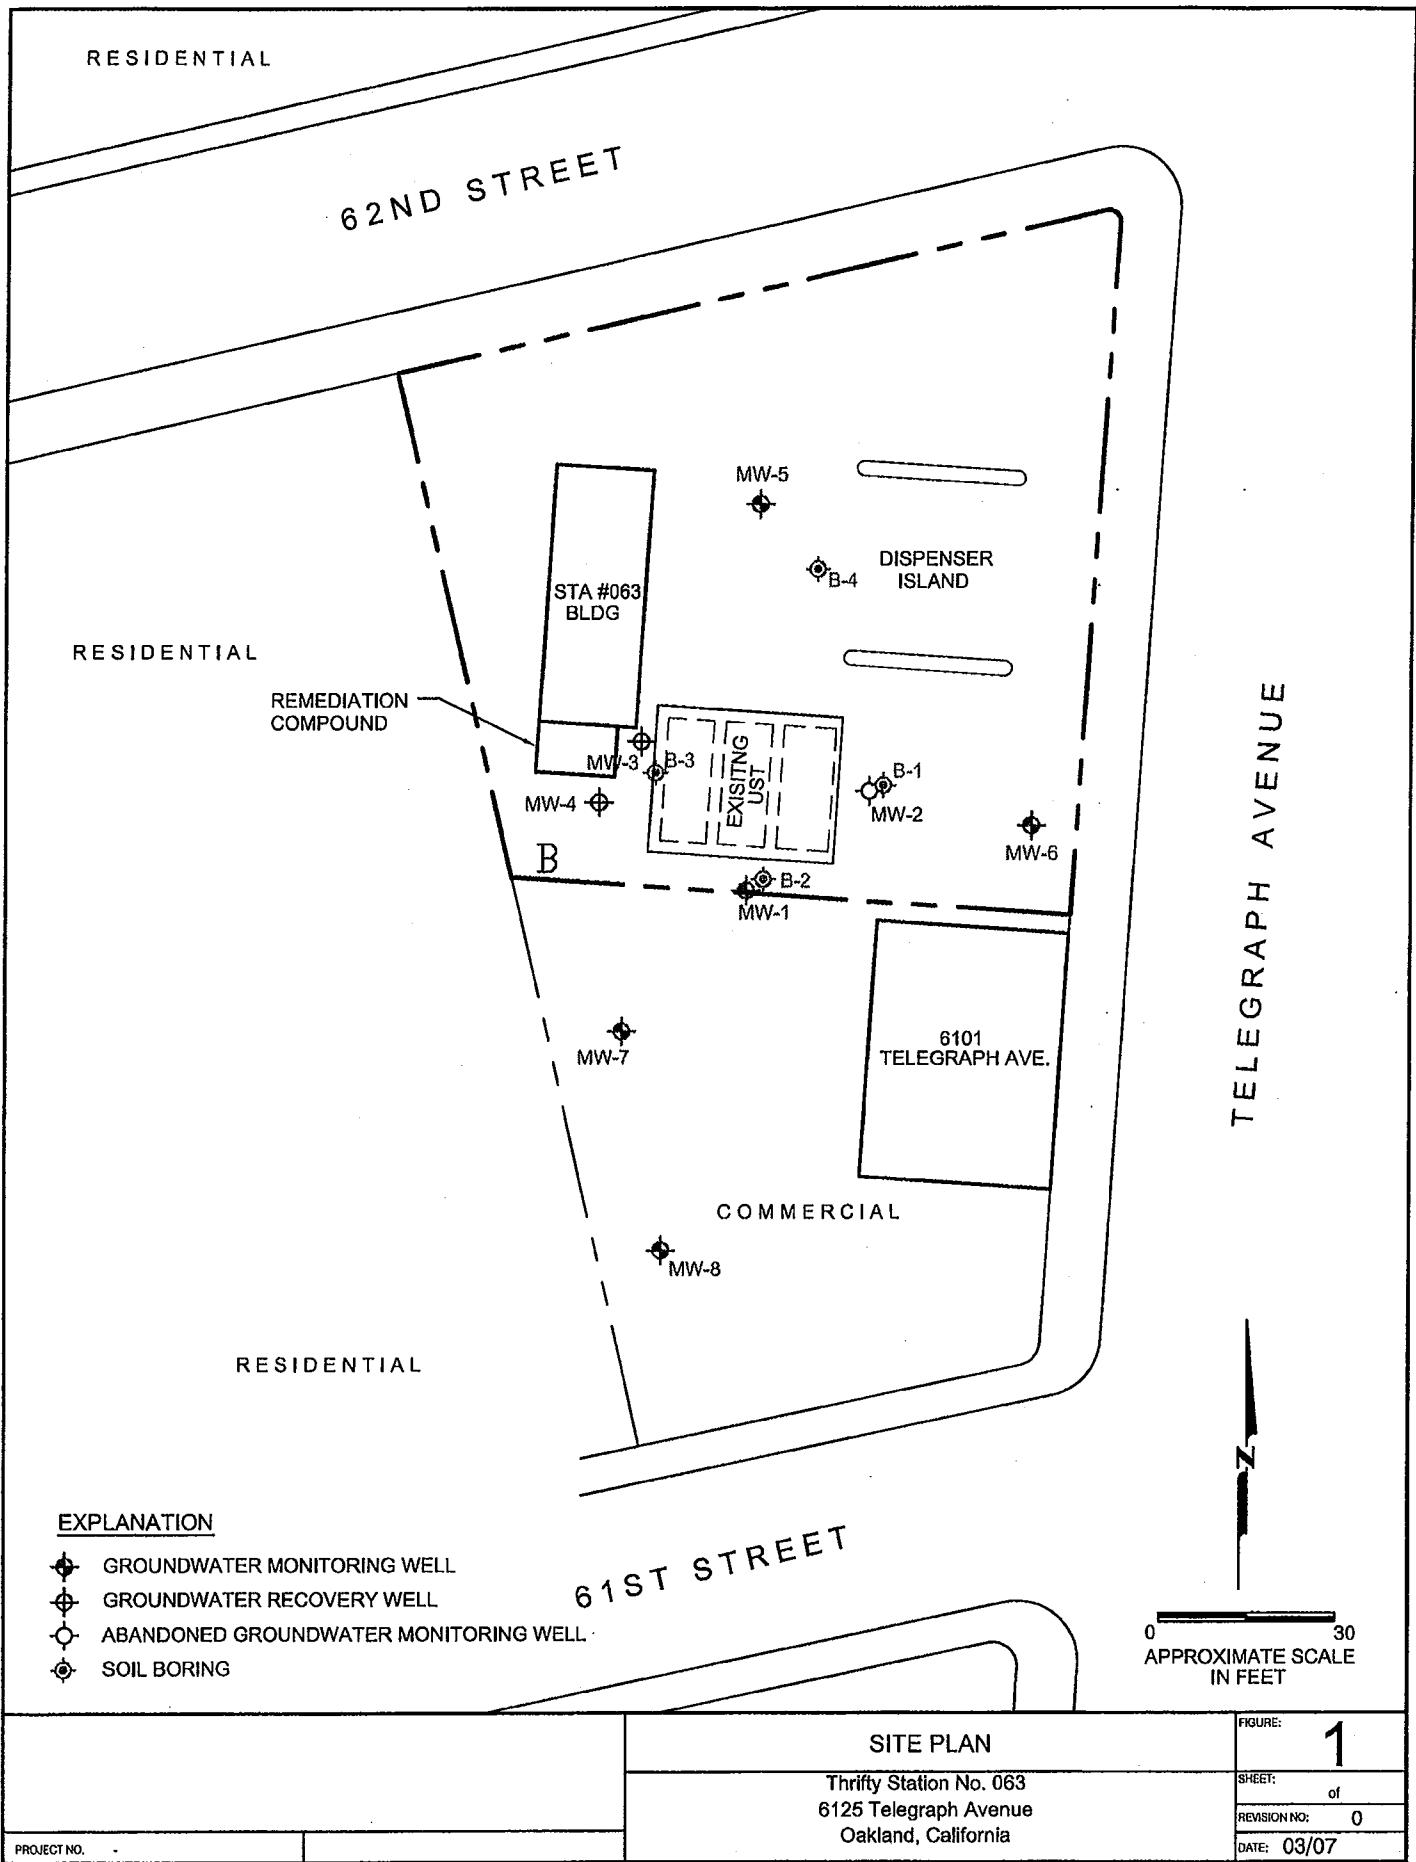

TPH is analyzed by EPA Method 8015 M

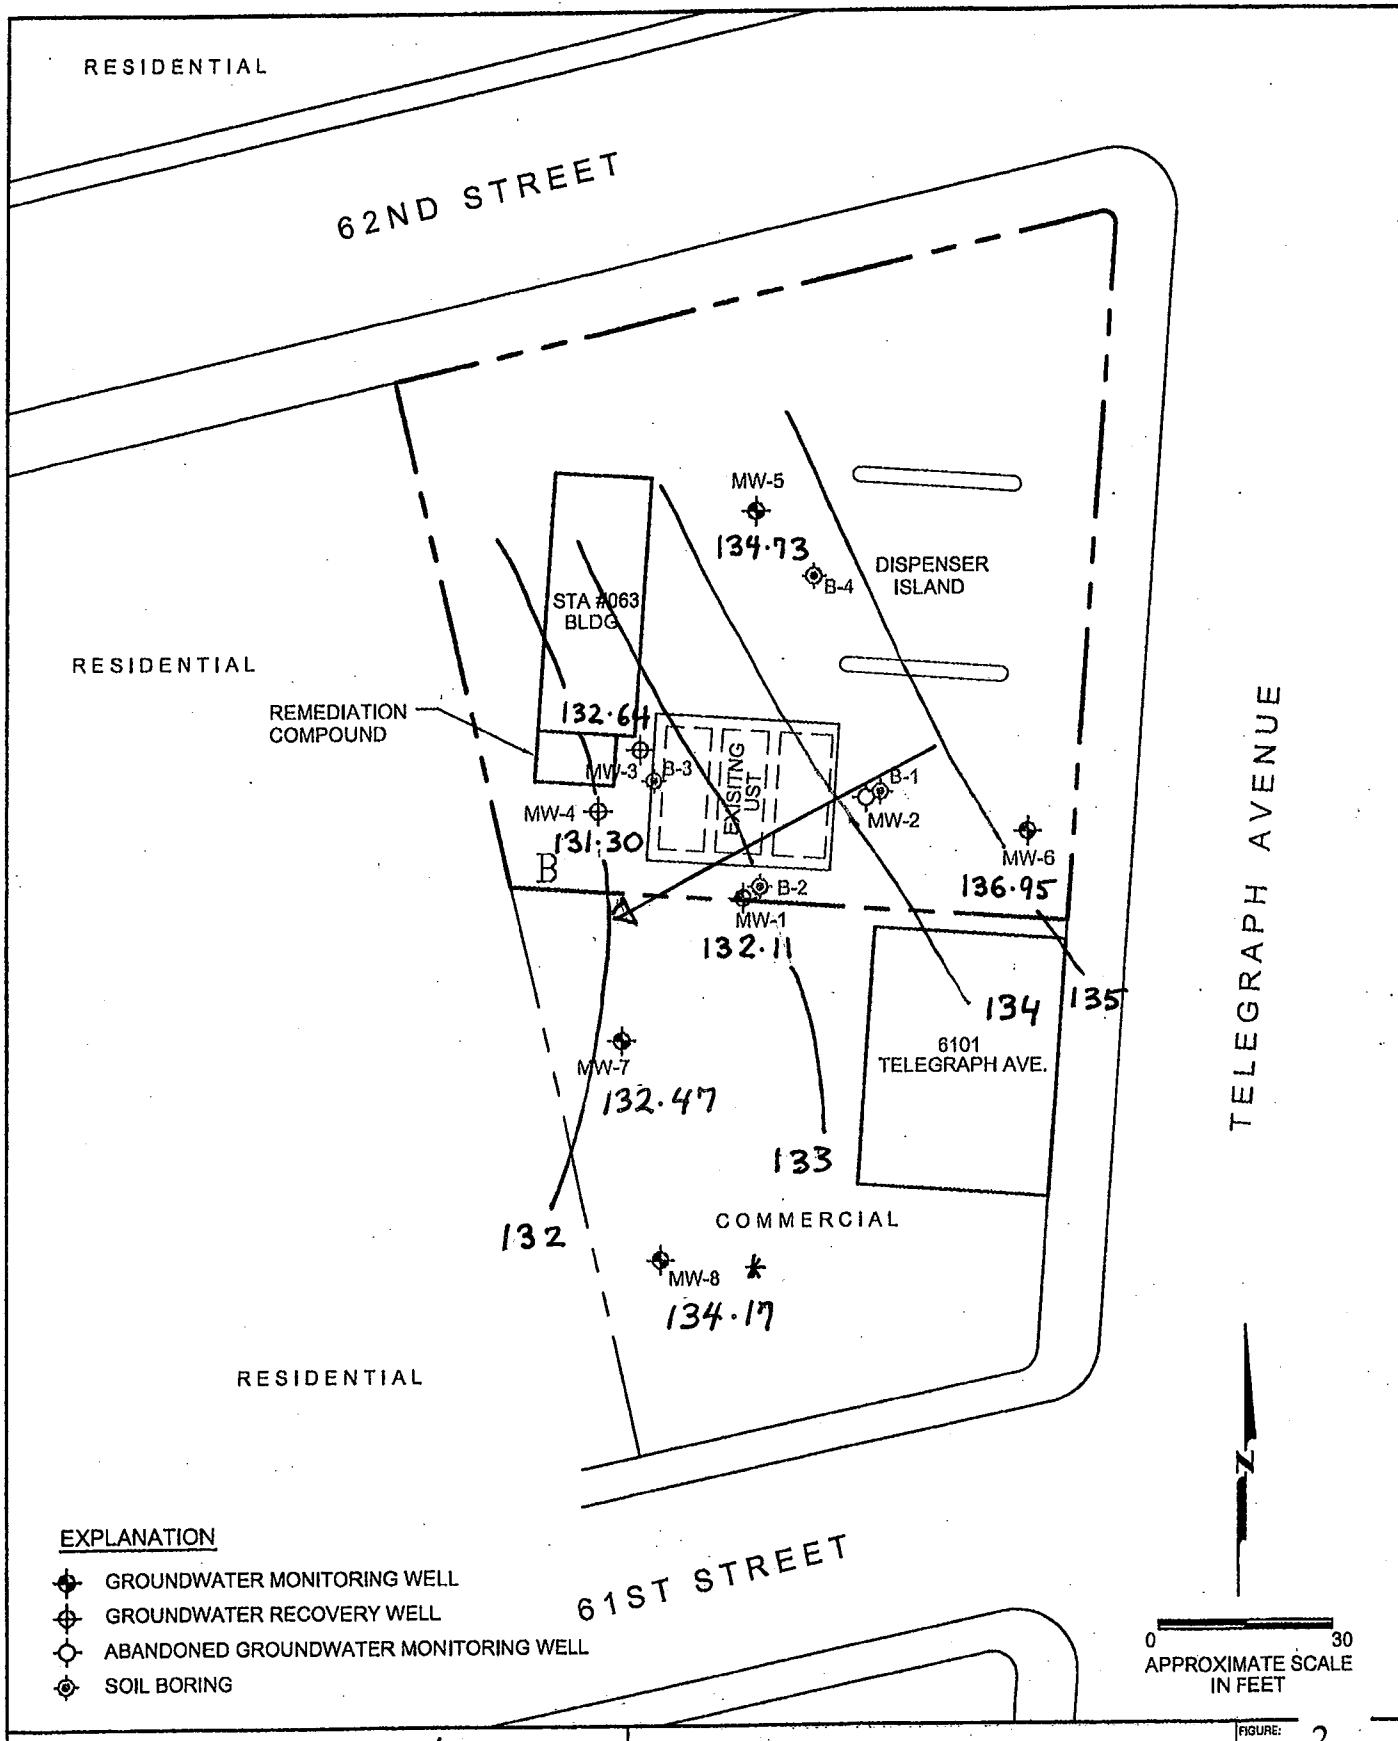

BTEX is analyzed by EPA Method 8021 or 8260

*MTBE by 8020 / 8260

In February 2000, the total cumulative discharge amount was corrected to reflect all system maintenance and flowmeter changeouts since the startup of the system. The total number may be different from previous versions of this table.

SAMPLE ACCEPTANCE CHECKLIST

Section 1

Client: TOC

Project: _____

Date Received: 5-1-08

Sample(s) received in cooler: Yes No (Skip Section 2)

Section 2

Was the cooler packed with: Ice Ice Packs Bubble Wrap Styrofoam
 Paper None Other _____

Cooler or box temperature: 40 °F

(Acceptance range is 2 to 6 Deg. C.)

Section 3

	YES	NO	N/A
Was a COC received?	✓		
Were custody seals present?		✓	✓
If Yes - were they intact?		✓	✓
Were all samples sealed in plastic bags?		✓	
Did all samples arrive intact? If no, indicate below.	✓		
Did all bottle labels agree with COC? (ID, dates and times)	✓		
Were correct containers used for the tests required?	✓		
Was a sufficient amount of sample sent for tests indicated?	✓		
Was there head space in VOA vials?		✓	
Were the correct preservatives used?	✓		
Were the samples scanned for presence of radioactivity?			✓
Was total residual chlorine measured (Fish Bioassay samples only)? *			✓

*: If the answer is no, please inform Fish Bioassay Dept. immediately.

COMMENTS

This laboratory request covers the following listed samples which were analyzed for the parameters indicated on the attached Analytical Result Report. All analyses were conducted using the appropriate methods as indicated on the report. This cover letter is an integral part of the final report.

<u>Order No.</u>	<u>Client Sample Identification</u>
881916	TOC# 063 Int-1
881917	TOC# 063 Int-2
881918	TOC# 063 Inlet
881919	Laboratory Method Blank

Thank you for the opportunity to be of service to your company. Please feel free to call if there are any questions regarding this report or if we can be of further service.

	YES	NO	N/A
Was a COC received?			
Were custody seals present?			
If Yes - were they intact?			
Were all samples sealed in plastic bags?			
Did all samples arrive intact? If no, indicate below.			
Did all bottle labels agree with COC? (ID, dates and times)			
Were correct containers used for the tests required?			
Was a sufficient amount of sample sent for tests indicated?			
No head space in VOA vials?			
Were the correct preservatives used?			
Were the samples scanned for presence of radioactivity?			
Was total residual chlorine measured (Fish Bioassay samples only)? *			

*: If the answer is no, please inform Fish Bioassay Dept. immediately.
