Reviewed DPE & RFC Report. Thrifty concluded that system reach asymptotic levels and requested site closure. ACEH recently approved down-gradient site assessment. I called RP to verify the status of the pending work in light of the closure request. RP stated that now that they have the DPE data, they wish to modify the approved scope of work and instead of installing a well off-site and borings onsite, they would like borings off-site and conduct confirmation sampling onsite. I concurred with their proposal and requested that they submit a work plan to modify the approved scope of work.
