Re:     **Former Chevron Service Station #9-0020**  
          1633 Harrison Street  
          Oakland, California

Dear Ms. Eberle:

Enclosed is the First Quarter Groundwater Monitoring report for 1997, prepared by our consultant Blaine Tech Services, Inc. for the above noted facility. As noted in the report, ground water samples were analyzed for TPH-g, BTEX, and MtBE constituents. Only monitoring wells MW-7, MW-9, MW-13, MW-15, and MW-16 are sampled and analyzed quarterly per previous agreement with your office.

The benzene concentration of benzene decreased in monitoring well MW-7 1.7 ppb, while well MW-9 showed an increase in the benzene constituent from the previous sampling event. Monitoring well MW-13 showed an increase in the benzene constituent to 1.6 ppb, while well MW-15 was below method detection limits for all constituents.

Monitoring well MW-16 detected concentrations of constituents that are similar to the previous sampling event and what was detected in the second quarter, prior to purging the well by 15 gallons in the third quarter. Since this well continues to show these concentrations, it could indicate that the well may not be properly sealed and is receiving runoff from the gasoline's/oils, caused by gas tanks overspills or oils from crankcases drips. As noted in my last cover letter, it may be appropriate to bail this well again, which was done in the third quarter, than introduce an oxygen releasing compound to see if the dissolved hydrocarbons will be reduced.

Ground water depth varied from 18.95 feet to 19.90 feet below grade with a direction of flow easterly.

In the last cover letter Chevron noted that we would bail monitoring well MW-16 as noted above, but this was not done. However, we will make arrangements to bail this well 15 gallons in the next sampling event. Chevron will continue to monitor the site quarterly. I would appreciate receiving your viewpoint on the introduction of an oxygen releasing compound into well MW-16. I can be reached at (510) 842-9136.

Sincerely,  
**CHEVRON PRODUCTS COMPANY**

### 1st Quarter 1997 Monitoring at 9-0020

First Quarter 1997 Groundwater Monitoring at  
Chevron Service Station Number 9-0020  
1633 Harrison Street  
Oakland, CA

Monitoring Performed on March 20, 1997

---

### Groundwater Sampling Report 970320-W-1

This report covers the routine quarterly monitoring of groundwater wells at this Chevron facility. Blaine Tech Services, Inc.'s work at the site includes inspection, gauging, evacuation, purgewater containment, sample collection and sample handling in accordance with standard procedures that conform to Regional Water Quality Control Board requirements.

Routine field data collection includes depth to water, total well depth, thickness of any separate immiscible layer, water column volume, calculated volume of a three-case volume purge, elapsed evacuation time, total volume of water removed, and standard water parameter instrument readings. Sample material is collected, contained, stored, and transported to the laboratory in conformance with EPA standards. Purgewater is, likewise, collected and transported to McKittrick Waste Treatment Site for disposal.

Basic field information is presented alongside analytical values excerpted from the laboratory report in the cumulative table of **WELL DATA AND ANALYTICAL RESULTS**. The full analytical report for the most recent samples is located in the **Analytical Appendix**. The table

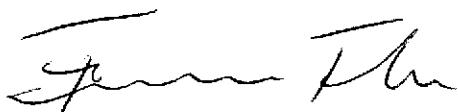

also contains new groundwater elevation calculations taken from the computer plotted gradient map which is located in the **Professional Engineering Appendix**.

At a minimum, Blaine Tech Services, Inc. field personnel are certified upon completion of a forty-hour Hazardous Materials and Emergency Response training course per 29 CFR 1910.120. Field personnel are also enrolled in annual eight hour refresher courses.

Blaine Tech Services, Inc. conducts sampling and documentation assignments of this type as an independent third party. In order to avoid compromising the objectivity necessary for the proper and disinterested performance of this work, Blaine Tech Services, Inc. concentrates on objective data collection and does not participate in the interpretation of analytical results, the definition of geological or hydrological conditions, the formulation of recommendations, or the marketing of remedial systems.

Please call if you have any questions.

Yours truly,

Francis Thie  
Vice President

FPT/cg

## Cumulative Table of Well Data and Analytical Results

### **TABLE 2 OF ADDITIONAL ANALYSES**

Vertical Measurements are in feet.

Analytical values are in parts per billion (ppb)

DATE	2-butanone	Acetone	1, 1-DCE	1, 1-DCA	Chlorobenzene	Chlorobenzene
<b>MW-3</b> 08/27/91	--	--	1.3	0.5	0.7	0.7
<b>MW-7</b> 04/24/89	160	5.0	--	--	--	--
<b>MW-13</b> 11/15/91	--	--	--	0.6	--	--

Note: Blaine Tech Services, Inc. began routine monitoring of the groundwater wells at this site on November 1, 1994.

Earlier field data and analytical results are drawn from the September 27, 1994 Groundwater Technology, Inc. report.

#### ABBREVIATIONS:

TPH = Total Petroleum Hydrocarbons  
 TOG = Total Oil and Grease  
 Carbon Tet = Carbon Tetrachloride  
 PCE = Tetrachloroethene  
 TCE = Trichloroethene  
 1,2-DCE = 1,2-Dichloroethene  
 t-1,2-DCE = trans-1,2-Dichloroethene  
 c-1,2-DCE = cis-1,2-Dichloroethene  
 1,1,1-TCA = 1,1,1-Trichloroethane  
 1,2-DCA = 1,2-Dichloroethane  
 1,2-DCP = 1,2-Dichloropropane  
 1,1-DCE = 1,1-Dichloroethene  
 MC = Methylene chloride

Peggy Penner  
Project Manager

Please Note:

The LCS is a control sample of known, interferent-free matrix that is analyzed using the same reagents, preparation, and analytical methods employed for the samples. The matrix spike is an aliquot of sample fortified with known quantities of specific compounds and subjected to the entire analytical procedure. If the recovery of analytes from the matrix spike does not fall within specified control limits due to matrix interference, the LCS recovery is to be used to validate the batch.

\*\* MS = Matrix Spike, MSD = MS Duplicate, RPD = Relative % Difference
