**Subject:** RE: 2896 Castro Valley Blvd Well Closures

Stu,  
I'm not sure where the voice mail went, but I've not received one.

Regardless, thanks for the update and good news. To accommodate your estimated schedule, I have extended the due date until October 17, 2016 on Geotracker. I have found that it can sometimes take a long while to schedule drillers and the removal of any contaminated soil or groundwater. Understood that you plan on abandoning the wells in place and that there is limited likelihood of generating contaminated material; however, as you know, things happen and extra time is needed sometimes. Feel free to submit early!  
Thanks,

**Subject:** 2896 Castro Valley Blvd Well Closures

Hi Mark,

I left a VM for you about this. James Jiang is hiring us to close the three wells at the Subject site. I noticed that your Directive letter of May 16<sup>th</sup> requested the Technical Report for Well Destruction by August 19, 2016. We won't be able to meet this, as he is just now engaging us for the work. We went to the site and found all three wells - intact. We plan to close them in place. It will take a week or two to get permits, and probably another two to get the work scheduled, done, and the report out. Please advise if you can accept this schedule, and what you need from us to apply for an extension and keep our client out of jail. Thanks Mark! Stu
