Jerry,

Good morning. Roya Kambin (Union Oil of California) and I would like to have a call to discuss the boring locations requested in the directive dated October 20, 2011. As stated in the Site Assessment Report, locations GP-1, GP-4, and GP-8 have too many utilities to safely advance a geoprobe for collection of data. GP-9 and GP-10 will be attempted on the park property to help minimize the number of utilities and safety concerns that were noted during the previous field event.

Please let me know your available this week for a quick phone conversation.

Thank you

Kathy
