Subject: SS# 5781 - 3535 Pierson Street, Oakland - Extension Request

Ms Jakub

This is to respectfully request an extension to January 31, 2011 for the submission of a Soil and Water Investigation (SWI) Report for ConocoPhillips service station 5781 located at 3535 Pierson in Oakland.

This is an extension to the December 5th due date established in Alameda County Health Care Services Agency (ACHCSA) letter to ConocoPhillips dated October 5, 2010. This extension will allow for the inclusion in the SWI report of groundwater analytical results from the initial sampling (fourth quarter 2010) of the newly installed wells.

Delta installed the four new on-site groundwater monitoring wells on November 5, 2010. The development of these wells is scheduled for early December. The delay in well development from November 5th was due to a nation-wide ConocoPhillips field work safety stand down. TRC is scheduled to perform the fourth quarter 2010 groundwater monitoring and sampling at this site on December 20th. Delta will review the analytical results from this sampling event and include them in the SWI report, providing conclusions and recommendations based on this groundwater data.

Please advise if you have any questions or concerns regarding this extension request.

Thank you
