Mr. Cole,

The fuel leak case for 712 Lewelling Blvd. in San Leandro (ACEH case RO0000309) remains an open case. The case is being considered for case closure and is currently in a public comment period regarding potential case closure. See the attached Invitation to Comment. Due to residual contamination, the site would be closed with site management requirements that require further evaluation if the site is to be redeveloped or land use changes in the future.

Mr. Wickham,

My name is Coach Rob, I am a realtor working with buyers for the property located at 712 Lewelling Blvd. San Leandro. We have looked on the site for contamination, GEOTRACKER.com and found your contact. I am going to confess that I do not know much about this site but would like to know if and when this is schedule for closure and if there contamination associated with this location?

*Thank You,
COACH ROB
