Re: Fourth quarter 1995 groundwater monitoring program results, ARCO service station 2185, Oakland, California

Dear Mr. Whelan:

This letter presents the results of the fourth quarter 1995 groundwater monitoring program at ARCO Products Company (ARCO) service station 2185, 9800 East 14th Street, Oakland, California (Figure 1). The quarterly monitoring program complies with Alameda County Health Care Services Agency (ACHCSA) requirements regarding underground tank investigations.

MONITORING PROGRAM FIELD PROCEDURES

A program of quarterly groundwater monitoring was initiated during the third quarter of 1992 to provide information concerning water quality, flow direction, and gradient consistent with ACHCSA and Regional Water Quality Control Board (RWQCB) requirements for underground fuel tank investigations. Water levels are measured quarterly in wells MW-1 through MW-10. Wells MW-1 and MW-4 are sampled annually, during the first quarter of the year. Wells MW-2, MW-3, and MW-5 through MW-10 are sampled quarterly.

Beginning in the first quarter of 1996, wells MW-1 and MW-4 will be sampled annually, during the first quarter of the year. Wells MW-5 and MW-6 will be sampled semiannually, during the first and third quarter of the year. Wells MW-2, MW-3, MW-7, MW-8, MW-9, and MW-10 will be sampled quarterly. Water levels will be measured in all wells quarterly.

EMCON performed the fourth quarter 1995 groundwater monitoring event on November 7, 1995. Field work this quarter included (1) measuring depths to groundwater and subjectively analyzing groundwater for the presence of floating product in wells MW-1 through MW-10, (2) purging and subsequently sampling groundwater monitoring wells MW-2, MW-3, and MW-5 through MW-10 for laboratory analysis, and (3) directing a state-certified laboratory to analyze the groundwater samples. Copies of all

field data sheets from the fourth quarter 1995 groundwater monitoring event are included in Appendix A.

MONITORING PROGRAM RESULTS

Results of the fourth quarter 1995 groundwater monitoring event are summarized in Table 1 and illustrated in Figure 2. Historical groundwater elevation data are summarized in Table 2. Table 3 summarizes historical analytical data for analysis of petroleum hydrocarbons and their constituents. Copies of the fourth quarter 1995 analytical results and chain-of-custody documentation are included in Appendix B.

Groundwater elevation data collected on November 20, 1995, indicate that groundwater beneath the site flows west-southwest with an approximate hydraulic gradient of 0.004 foot per foot. Figure 2 illustrates groundwater contours and analytical data for the fourth quarter of 1995.

LIMITATIONS

No monitoring event is thorough enough to describe all geologic and hydrogeologic conditions of interest at a given site. If conditions have not been identified during the monitoring event, such a finding should not therefore be construed as a guarantee of the absence of such conditions at the site, but rather as the result of the scope, limitations, and cost of work performed during the monitoring event.

SITE STATUS UPDATE

This update reports the site activities performed during the fourth quarter of 1995 and those anticipated for the first quarter of 1996.

Fourth Quarter 1995 Activities

- Prepared and submitted *Third Quarter 1995 Groundwater Monitoring Program Results and Intrinsic Bioremediation Study, ARCO Service Station 2185, Oakland, California* (EMCON, December 14, 1995).
- Performed quarterly groundwater monitoring for fourth quarter 1995.
- Prepared and submitted *Off-site Well Installation Report, ARCO Service Station 2185, Oakland, California* (EMCON, January 8, 1996).

Work Anticipated for First Quarter 1996

- Prepare and submit quarterly groundwater monitoring report for fourth quarter 1995.
- Perform quarterly groundwater monitoring for first quarter 1996.

Please call if you have questions.

Sincerely,

EMCON

Re: 0805-130.03 / TO# 17075.00 / 2185 Oakland

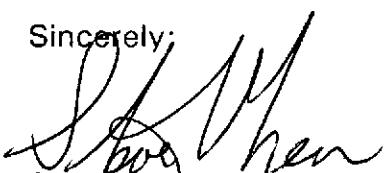

Dear Mr. Young:

The following pages contain analytical results for sample(s) received by the laboratory on November 08, 1995. Results of sample analyses are followed by Appendix A which contains sample custody documentation and quality assurance deliverables requested for this project. The work requested has been assigned the Service Request No. listed above -to help expedite our service please refer to this number when contacting the laboratory.

Analytical results were produced by procedures consistent with Columbia Analytical Services' (CAS) Quality Assurance Manual (with any deviations noted). Signature of this CAS Analytical Report below confirms that pages 2 through 14, following, have been thoroughly reviewed and approved for release in accord with CAS Standard Operating Procedure ADM-DatRev3.

Please feel welcome to contact me should you have questions or further needs.

Sincerely:

Steven L. Green
Project Chemist
