Site: TESORO STATION # 67107 (former Beacon # 3721), 44 Lewelling Blvd, San Lorenzo, CA

Dear Ms. Chu and Ms. Keach:

Please find enclosed herewith a copy of the following technical report prepared by RDM, Roseville, CA: *Quarterly Groundwater Monitoring and Remediation Status Report Second Quarter 2002* dated August 5, 2002.

As an authorized representative of Tesoro Petroleum and Refining Company (Tesoro), I have reviewed the enclosed report and declare under penalty of perjury that to the best of my knowledge the information contained in the report is true and correct except that it appears that RDM might not have accurately reported cumulative totals for the amount of groundwater historically extracted at the site, or the amount of vapor-equivalent gasoline that has historically been removed by the soil-vapor-extraction system. We will have RDM make any appropriate corrections on the next report.

The report covers the groundwater-monitoring event Doulas Environmental conducted on June 3, 2002 during which they sounded twelve monitoring wells, purged and sampled eight wells, and provided for certified analyses of total petroleum hydrocarbon constituents, BTEX, and MTBE using EPA Method 8260B. The next quarterly monitoring event is scheduled for September 2002.

The report also covers operation of remedial processes for groundwater extraction/treatment (GET) and sparging-enhanced soil vapor extraction (SESVE) during the second quarter 2002. During this period the GET system extracted 341,410 gallons of groundwater and the SESVE system extracted 16.3 pounds of gasoline vapors. Tesoro has contracted RDM to continue operations through the end of the calendar year.

Please note that Tesoro purchased the business interests in this site in April 2002 and that future lead-agency correspondence in connection with the site should be sent to Tesoro with copies to Ultramar and Kelleher & Associates (*see above address*). Please call me at (408) 528-7719 if you have any questions or need additional information.

Sincerely,

Brian T. Kelleher
Project Coordinator

Subject: *Quarterly Ground Water Monitoring and Remediation System Status Report, Second Quarter 2002*
 Tesoro Station No. 67107
 (Former Beacon Station No. 3721)
 44 Lewelling Boulevard
 San Lorenzo, California
 RDM Project No. 00-3721

Dear Mr. Donovan:

On Behalf of Tesoro Refining and Marketing Company, RDM Environmental (RDM) is submitting the following quarterly monitoring report to the Alameda County Environmental Health Department. This report describes quarterly ground water monitoring and remediation system status for the Second Quarter 2002.

Work Performed During the Second Quarter 2002:

- Doulos Environmental Inc. performed ground water sampling on June 3, 2002.
- RDM conducted operation and maintenance on the remediation system.

STATUS OF GROUND WATER MONITORING

Cumulative ground water sampling information is summarized in Table 1. A site location map, site detail map, ground water elevation map and concentration map are shown on Figures 1 through 4, respectively. The site history is included in Enclosure A, the quarterly monitoring data sheets are included in Enclosure B and the ground water analytical results are included in Enclosure C.

- Local ground water flows towards recovery well RW-1 and historical ground water flow direction is to the southwest.

STATUS OF REMEDIATION SYSTEM

Operation and maintenance is performed bi-monthly by RDM on a remediation system consisting of ground water treatment, soil vapor extraction (SVE) and air sparging components. Details of system performance and cumulative totals are tabulated in Tables 2 through 4. A process flow diagram showing details of the system is shown as Figure 5.

Mr. Rob Donovan
Tesoro Petroleum Companies, Inc.
August 5, 2002
Page 2

Operation & Maintenance Site Visits:

- Operation and maintenance site visits were conducted for the **Second Quarter 2002** on:
 - April 12 and 18, 2002
 - May 13 and 24, 2002
 - June 12 and 20, 2002

Ground Water Extraction System Performance:

- The ground water treatment system operated intermittently during the **Second Quarter 2002**.
- During the **Second Quarter 2002**, the ground water system processed 341,410 gallons.
- As of **June 20, 2002**, the ground water system has processed approximately 1,121,890 gallons.
- The ground water system performance data is included in Table 2 and the remediation system analytical results are included in Enclosure D.
- Ground water is extracted from recovery well RW-1.

Soil Vapor Extraction System Performance:

- The SVE system operated continuously during the **Second Quarter 2002**.
- During the **Second Quarter 2002**, the SVE system removed 16.3 pounds of vapor equivalent gasoline.
- As of **June 12, 2002**, the SVE system has removed approximately 114.3 pounds (18.7 gallons) of vapor equivalent gasoline.
- The SVE analytical results are summarized in Table 3 and the SVE system performance data is included in Table 4. The remediation system analytical results are included in Enclosure D.
- Soil vapor extraction is currently being conducted on wells MW-2, MW-3 and RW-1.

Air Sparging System Performance:

- The air sparging system operated continuously during the **Second Quarter 2002**.
- Air sparging is currently being conducted on monitoring wells MW-2 and MW-4 and air sparging wells AS-1, AS-2 and AS-3.
- The air compressor is on a 50/50 duty cycle.

CONCLUSIONS/RECOMMENDATIONS

RDM recommends continued operation of the remediation system and quarterly ground water monitoring.

The interpretations contained in this report represent our professional opinions and are based, in part, on information supplied by the client. These opinions are based on currently available information and are arrived at in accordance with currently accepted hydrogeologic and engineering practices at this time and location. Other than this, no warranty is implied or intended.

^a Product is not typical gasoline.

^b MTBE by EPA Method 8020/EPA Method 8260.

^c Constituents by EPA Method 8260.

^d Oxygenates = diisopropyl ether, ethyl-t-butyl ether, tert-amyl methyl ether, tert-butanol, methanol, and ethanol.

^e Tert-Butanol

^f Tert-amyl methyl ether

Top of Riser Elevations = Elevations surveyed by Aegis Environmental and are assumed relative to mean sea level.

TPH = Total petroleum hydrocarbons.

MTBE = Methyl tertiary butyl ether.

µg/L = Micrograms per liter.

NS = Not sampled.

NM = Not measured.

NC = Not calculated.

NA = Not analyzed.

ND = Not detected at or above the laboratory detection limits

Note: Aegis Environmental, Inc. collected data prior to June 23, 1993.

HISTORICAL BACKGROUND INFORMATION

Tesoro Station No. 67107
(Former Beacon Station No. 3721)
44 Lewelling Boulevard
San Lorenzo, California

PRE - ULTRAMAR INC.

- April 1987 - Three underground gasoline storage tanks were excavated and removed. Samples collected from beneath the former tanks indicated that hydrocarbons were present in the soil.
- May 1987 - Conoco installed three monitoring wells (MW-1 through MW-3). Hydrocarbons were detected in soil and ground-water samples collected from the wells. The site has been on a monitoring program since May 1987.
- December 1988 - Four additional wells (MW-4 through MW-7) were installed. Dissolved-phase hydrocarbons were detected in the new wells.
- September 1989 - Two additional wells (MW-8 and MW-9) were installed.

ULTRAMAR INC.

- July 1990 – Ultramar Inc purchased the site from Conoco.
- March 14, 1991 – Work Plan for additional assessment submitted.
- October 1991 - Drilled two additional offsite wells (MW-10 and MW-11) southwest of the site and one onsite recovery well (RW-1).
- November 1991 - Performed ground-water pump test and vapor extraction test.
- April 1992 - Ultramar submitted an Interim Remediation Plan.
- June 1992 – Interim Remediation Plan was approved.
- March 1993 - Installed the subsurface piping for the remediation system.
- April 1993 - Completed installation of ground-water remediation system.
- June 1993 - Began operation.
- April 1993 - The ground-water extraction system began operation.
- March 1994 - The vapor extraction system began operation.
- June 8, 1994 - Obtained the Permit to Operate for the vapor extraction system.
- December 1995 - Installed an air sparging system.
- January 1997 - Discontinued to operate the remediation system. Approximately 1,184,392 gallons of ground water have been removed, treated, and discharged. Approximately 103 gallons of hydrocarbons have been removed by the vapor extraction system.

CONTINUED NEXT PAGE

HISTORICAL BACKGROUND INFORMATION

Tesoro Station No. 67107
(Former Beacon Station No. 3721)
44 Lewelling Boulevard
San Lorenzo, California

ULTRAMAR INC. (continued)

- October 1997 - Drilled confirmation borings. Results indicate soil clean.
- June 1998 - The air sparging system was restarted.
- July 1999 - The ground water system was restarted.
- April 3, 2000 – The soil vapor extraction system was restarted.
- During early July 2001, the station piping, dispensers, and tank top were upgraded. Details of the line sampling and over-excavation activities are included in the Doulas report entitled *Product Line and Excavation Sampling Results Report*, dated October 1, 2001.
- On May 17, 2002, Tesoro Petroleum purchased the facility from Ultramar Inc.

ENCLOSURE C

Ground Water Monitoring
Analytical Results

Report Number : 26802

Date : 6/18/02

Richard Munsch
RDM Environmental
1704 Via Riata
Roseville, CA 95747

Subject : 8 Water Samples
Project Name : SAN LORENZO
Project Number : 3721
P.O. Number : 3721-71

Dear Mr. Munsch,

Chemical analysis of the samples referenced above has been completed. Summaries of the data are contained on the following pages. Sample(s) were received under documented chain-of-custody. US EPA protocols for sample storage and preservation were followed.

Kiff Analytical is certified by the State of California (# 2236). If you have any questions regarding procedures or results, please call me at 530-297-4800.

Sincerely,

A handwritten signature in black ink that reads "Joel Kiff". Below the signature, the name "Joel Kiff" is printed in a smaller, black, sans-serif font.

Case Narrative

Matrix Spike/Matrix Spike Duplicate Results associated with samples MW-9, RW-1, MW-4, MW-3, MW-2, MW-11, MW-10 for the analyte Methyl-t-butyl ether were affected by the analyte concentrations already present in the un-spiked sample.

Dear Mr. Munsch,

Chemical analysis of the samples referenced above has been completed. Summaries of the data are contained on the following pages. Sample(s) were received under documented chain-of-custody. US EPA protocols for sample storage and preservation were followed.

Kiff Analytical is certified by the State of California (# 2236). If you have any questions regarding procedures or results, please call me at 530-297-4800.

Sincerely,

A handwritten signature in black ink that reads "Joel Kiff".

Joel Kiff

Dear Client:

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received 5/16/02 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

Dear Mr. Munsch,

Chemical analysis of the samples referenced above has been completed. Summaries of the data are contained on the following pages. Sample(s) were received under documented chain-of-custody. US EPA protocols for sample storage and preservation were followed.

Kiff Analytical is certified by the State of California (# 2236). If you have any questions regarding procedures or results, please call me at 530-297-4800.

Sincerely,

A handwritten signature in black ink that reads "Joel Kiff".

Dear Mr. Munsch,

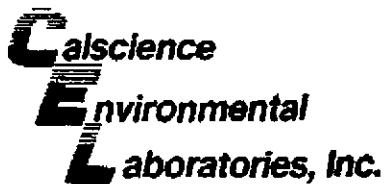

Chemical analysis of the samples referenced above has been completed. Summaries of the data are contained on the following pages. Sample(s) were received under documented chain-of-custody. US EPA protocols for sample storage and preservation were followed.

Kiff Analytical is certified by the State of California (# 2236). If you have any questions regarding procedures or results, please call me at 530-297-4800.

Sincerely,

A handwritten signature in black ink that reads "Joel Kiff".

Dear Client:

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received 6/18/02 and analyzed in accordance with the attached chain-of-custody.

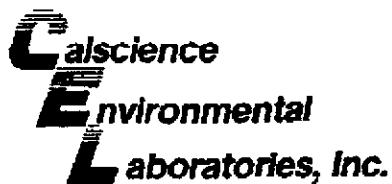

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

Stephen Nowak

Subject : 4 Air Samples
Project Name : Former Beacon 3721
Project Number : 3721
P.O. Number : 67107

Dear Mr. Munsch,

Chemical analysis of the samples referenced above has been completed. Summaries of the data are contained on the following pages. Sample(s) were received under documented chain-of-custody. US EPA protocols for sample storage and preservation were followed.

Kiff Analytical is certified by the State of California (# 2236). If you have any questions regarding procedures or results, please call me at 530-297-4800.

Sincerely,

A handwritten signature in black ink that reads "Joel Kiff". Below the signature, the name "Joel Kiff" is printed in a small, black, sans-serif font.
