

3/4/93

STID 392

5903 - Christie Ave. Emeryville 94608

Talked to Roberto Cuppe (PES)

re. case closed -

Site: new owner Tom Gross

Previous owner: Peggy Weatherford

scheduled a meeting for March 24, 1993 (2 PM)

1/12/93

Need to talk to Dennis

② Check at Scott or Tom
if soil contamination
is present highest
1500 ppm TOG
what do we require them?
deed restriction before
closing?

per Dennis - never tested
ft

1/5/93

STID 392

BMW Weatherford

Christie

Phone conversation w/ Rick Hiett (9:50 AM)

4 years ago waste oil tanks removed
not sure whether it's diesel or waste oil

*analysis very inadequate.

1 MW - different testing method being
conducted

area is an old fill - 600 east of the bay
old asphalt, paraffin-roofing shingle found
in the fill

screened next to tar material, differentiate
between diesel / oil

↓
no diesel

↓
1600 ppm W.O.

RWG eb wants to close the case using a
new paragraph in their form letter
"area not utilize as a groundwater
recharge zone".

contractor - Crosby & Overton
