Hi Jerry,

Our intention is to conduct the ozone sparge pilot test on the T-Bear Ranch property as soon as the ground dries out. I just received the email below from Helyn, the co-owner of the T-Bear Ranch. I will contact again her by May 4 to talk about logistics of the pilot test well installation. We completed the first quarter groundwater monitoring on 4/3/12 and will submit the QMR within two weeks. The UST Fund recently listed the site as RS/IRA, which reflects they understand the site needs an interim remedial action. Hopefully, they will approve a budget to complete this action by 7/1/12. Please call or email if you have questions or comments.

Regards,

Tim Cook, P.E.

Subject: Hi Jim

Hi Jim

Roy called last night & wanted me to listen to a message you left. His hearing impairment is so severe that listening to messages is difficult.

We have had such severe storms lately & the ground is saturated. We have had to dig trenches everywhere & bring in sand to prevent flooding. Good thing we didn't go ahead with the clean up thinking the rain was over!

Our health is to a point that he can't do physical work much anymore & just keeping the stress level down is a challenge!

I'm spending much time at therapy during the week & down at the barn on weekends. We can work a time out in a couple weeks, but need to wait till we get into warm weather so the ground won't be muddy.

We've spent way too much time & money redoing the area involved to have it destroyed with trucks & digging

It is also understood that we don't want trees damaged as they cover up some of the garbage in Obaid's backyard! HA

My number is 415 387 1632
e mail Alphacat2000@aol.com

Give a call or e mail me

Thanks

Helyn
