

1-22-93

Spoke to Gary Fleming of USDA and informed him of the following concerning Draft report dated 12-3-92

- ① A summary of the soil ~~and~~ analysis should be in the soil boring and soil sample collection in sec. 4.1. (I should not have to look it up in appendix B)
- ② Identify in report when the monitoring wells were installed
- ③ Wells needs to be monitored on a $\frac{1}{4}$ basis for a minimum of 1 year.

2/11/92 Ques. to ask Humphrey

- 1) Why is it that the operational life of the well is not to exceed three years?
- 2) Proposal should include site map drawn to scale identifying former u.o.t. locations, and proposed monitoring well locations.
- 3) Identification of contaminants that will be tested for
- 4) Proposed estimated time schedule for the proposed work.

Left message for Humphrey so that I can ask him the above questions. He called back and said after a contractor is ~~selected~~ selected, he will send me a copy of the workplan.

Larry, 7/31/91

Received call from
David Dixon w/ HLA re:
USDA Fac. Albany.
wants to in place close 2
35,000 gal UST's. I lined him
out on submitting a proposal
on making a case as to reasons
for in place closure. Also
requested engineers stamp.
He will prepare the plan &
submit for your review

FYI

Paul

3/28/91

Meet with Alvin Humphrey, Gary Fleming and Wilford? of USDR. I informed them they need to get an environmental consultant to put together an investigation plan. In addition I informed them RWACB require a monitoring well within 10' of each former tank location where there was a release. Humphrey request I send him a letter informing him they have to perform an investigation / remediation so that he can present it to his supervisor.

10/29/91

Alvin Humphrey called & was having excavations at the site backfilled I told him the two excavations that were clean can be backfilled, but the excavations that had contamination
