## Mtg Notes (Summary)

Western Forge + Flange

### Albany Site

#### I. Problem

- Adjacent properties also contaminated
  - SPRR agreeable for excavation + paving but will not OK paving/excavation if Curroco cleanup not concurrent.

#### II RWQCB Position

- Philosophy - longterm view - future property uses
- Assess contamination wrt background levels
- STLC & CAM apply to landfill disposal (ie determine appropriate disposal) don't define cleanup levels
- If <sup>consultant</sup> ~~company~~ feels that cleanup to background is unreasonable, need to document why & it will be brought to Bd. for review.

#### III DOTHS Position

- Proceed w/ excavation + filling - SPRR probably won't have problem w/ this. - hold off on paving

#### IV. Agreements

- Proceed w/ curbe, sump, drainage - hold paving
- RWQCB to write letter summarizing ~~it~~ required cleanup - Or have another mtg to do this.
