Cherie and Chandra,

It has come to my attention today that the public notice of closure consideration for the referenced case was not sent to you as a matter of standard course. As stated in the notice and letter, the public comment period started July 23rd, and was to end September 22nd. Should this be insufficient time to provide comments relative to the potential closure, please let me know prior to September 22nd and ACEH can extend the comment period appropriately. Pesticide contamination at this site is considered to be "soils only".
