Subject: **Correction Addendum to the Work Plan for Soil-Gas Sampling**
4550 San Pablo Avenue, Emeryville, California
SLIC Case No. RO0002929; Document Date: November 7, 2006

Dear Mr. McKeithen:

As per our telephone discussion today, a copy of this *Correction Addendum* to the November 7, 2006, *Work Plan for Soil-Gas Sampling* will be submitted to Alameda County Environmental Health Services (ACEHS). Page one, section 1.2 of the work plan states "The ground level floor of the building is currently unoccupied and the second level is currently occupied by a yoga / fitness studio." We understand that the northern half of the ground level is currently occupied and that the southern half of the ground level is currently unoccupied.

Figure 2 has been revised (enclosed) with a modified location for sampling point SG-10 due to the consideration that a portion of the ground floor is currently occupied. All the final sampling locations will be adjusted as necessary in accordance with actual site specific field conditions including above-ground and subsurface obstructions, traffic and other safety considerations, and minimizing the blocking of access to and disruption of businesses activities within occupied building spaces.

If you have any questions or require additional information, please do not hesitate to call us at (408) 327-5700.

Sincerely,

Benjamin Berman, REA
Senior Project Manager

Enclosure: Revised Figure 2
