Jerry,

We will get the final lab reports in the ftp upload and Geotracker upload and upload the previous reports to Geotracker. When you say previous reports, do you mean the Phase I Environmental Site Assessment as well or just the previous subsurface assessment we previously conducted? Please let me know and I will make sure everything is uploaded. Thank you very much for reviewing this so quickly.

Ryan,

Please include the final results with the report that you upload to the Alameda County ftp site and Geotracker (Geotracker Global ID SLT19701216). Also please upload the previous reports to the Geotracker website. I have reviewed your report and will be presenting my case summary and recommendations to Donna Drogos this week.

Regards,
Jerry Wickham

Jerry,

Attached are the final laboratory results for the soil, soil vapor, and groundwater sampling activities completed at the Site. The final results are the same as the preliminary results, so it won't change the findings presented in our report. We will include the final results in the appendix when we complete the upload to your FTP site and to Geotracker. Please call me with any questions. Thanks.
