

5/10/2016 Phone Log- RO2981 Red Hanger Kleaners, 6235-6239 College Ave., Oakland

Duration: Approximately 5 minutes

Received a phone call from P&D Environmental regarding additional soil vapor extraction wells. Caller stated James Yoo at Alameda County Public Works Agency (ACPWA) would not approve the permit without Alameda County Environmental Health (ACEH) authorizing the work. I asked if the proposed wells were part of an existing work plan. The answer was no. The radius of influence based on a pilot vapor extraction test (approved by ACEH) was smaller than anticipated. Therefore, additional wells need to be installed. I said I could not approved the work until I knew where the proposed wells would be installed.

I requested submittal of a brief work plan addendum for my review.
