Subject: RE: UST removal at 925

Sue,

Thank you for contacting me about this site. The process starts with me reviewing the case and creating Notice of Responsibility form for the site to notify the responsible party(ies). I also send out a letter requesting additional work if required. Since I have not reviewed the case yet, I cannot say what I will be requesting but since you asked what the process involves, I'm trying to be as general as possible. The work could include sampling groundwater to determine if it has been impacted or additional source area characterization, as deemed necessary. Should we decide that work is needed at the site, you can apply to the UST Fund for reimbursement for the funds that you expend to do the required work. This information will be included in the first letter that I send to you and your consultant may be able to help you with this request.

I hope to complete this review before the end of the year.

If you have any other questions, please feel free to contact me.

Regards,

Barbara Jakub, P.G.

PDF version of UST removal report

RO2983 - 925 Stanford Ave

Hello Barbara,

My name is Sue Rosenberg and I am the manager of the Willbett Corporation, owner of the property at 925 Stanford Avenue in Oakland. I received an email from Donna Drogos on October 21st, noting that our case was being classified as a fuel leak case of ACEH.

Can you let me know how things are progressing on this case? Is there any additional information that either myself, or the GRIBI Corporation can provide you with?

I understand that your department is very busy with a large workload, but if you can, I would really like to know where we stand and what the process is. This is my first experience with UST removal, so any information you could provide me with would be really appreciated.

Thanks for your help.

Sincerely,

Sue Rosenberg, Willbett Corporation
