Mr. Wickham,

Stantec has completed the first phase of the current investigation associated with the above site (Fuel Leak Case #RO0002999). The soil borings and water well search activities have been completed, and we are scheduled to begin the well installation this Wednesday, July 18. Your letter dated March 26, 2012 indicated that the results should be submitted prior to implementing the well installation. Would you prefer to see a full site assessment report, or will an email description and associated tables be sufficient?

Sincerely,

**Amanda Magee, PG**
