Mr. Wickham.

As stated in the email chain below, we had scheduled to install the two wells (MW-4 and MW-5) last week. Unfortunately, due to a misplaced utility locate by the City of Livermore, we were delayed by a few days and were only able to install MW-4. Two attempts made this week to install MW-5 were unsuccessful, due to utilities marked in the sidewalk on the west side of Vasco Road and unmarked utilities encountered at 6.5 feet bgs in Vasco Road near the western sidewalk. In order to move the well further east into Vasco Road, we will need to create a new traffic control plan and obtain a new encroachment permit. Before moving forward with the re-permitting of MW-5, Stantec would like to develop and sample MW-4 and include the groundwater analytical results in the forthcoming assessment report. We can sample the well next week, but we will need to delay the report to October 5. Please let me know if this is acceptable.

Thank you,

Amanda Magee, PG

Mr. Wickham,

As you may have heard, the driller that we had originally scheduled the job with (WDC) is no longer in business. Our other drillers do not have availability until the first week of September. Stantec is committed to satisfying ACEH requirements and will work to complete this project in a timely manner. We plan on installing the wells September 4-7, 2012, and will submit the report by September 28, 2012. Please let me know if this is acceptable.

Thank you,

Amanda Magee, PG

Ms. Magee,

The locations of the two monitoring wells as proposed in the Additional Site Assessment Report dated July 20, 2012 are acceptable. The wells may be installed as proposed.

Mr. Wickham,

I hope you have had a chance to look at the Site Assessment Report submitted for 7-Eleven #32266. We are awaiting your response and approval to move forward with the second phase of investigation (installation of two monitoring wells). Please let me know if you have any questions or comments.
