Ryan,
Thanks for the information, especially the bore locations. Provided standard health and safety procedures for contamination are utilized during drilling, and the soil is kept containerized as you have indicated, it appears appropriate proceed with the investigation. I'll let Public Works know to proceed with permitting the bores in a bit (next).

Mark,

As discussed, please see attached letter regarding the actions on site. Please do not hesitate to call if you have any questions. We plan to drill on Thursday March 3,2016, please let me know if you think you will have a problem issuing the permit in time for that.

Thanks,

Overaa
