Report 0553.R3

Mr. Benny Kwong

EAH Housing

2169 East Francisco Blvd, Suite EAH

San Rafael, CA 94901

SUBJECT: SOIL DISPOSAL DOCUMENTATION REPORT

Cathedral Gardens

2100 Martin Luther King Jr. Way, and

616-634 21st Street, and

635 22nd Street

Oakland, CA

Dear Mr. Kwong:

P&D Environmental, Inc. (P&D) has prepared this report documenting the removal of lead- and organochlorine pesticide (OCP)-impacted soil from the subject site. A Site Plan Detail showing area designations and sample collection locations associated with pesticide-impacted soil in Area A is attached as Figure 1, and a Site Plan aerial photograph showing area designations and sample collection locations associated with lead-impacted soil in Areas B and C is attached as Figure 2.

The following documents prepared by P&D summarize soil sample collection and characterization at the site:

- Soil Characterization Information Summary Letter (Letter 0553.L1) dated August 16, 2012
- Area A and C Lead-Impacted Soil Characterization Letter (Letter 0553.L2) dated August 15, 2012
- OCP-Impacted Soil TCLP Characterization Certification Letter (Letter 0553.L3) dated August 16, 2012

Soil was managed in accordance with the following documents prepared by P&D:

- Soil and Water Management Plan (document 0553.W1) dated June 20, 2012,
- Soil Excavation, Transportation, and Disposal Specification (Work Plan 0553.W2) dated August 17, 2012 for removal and disposal of the soil.

Documentation of air monitoring performed during initial loading of soil is documented in the following document prepared by P&D:

- Air Monitoring Results (document 0553.L5) dated August 30, 2012.

Removal of 1,319.6 tons of OCP-impacted soil as non-RCRA hazardous waste was performed on August 29 and 30, 2012 and removal of 547.9 tons of lead-impacted soil as non-RCRA hazardous waste was performed on September 10, 2012. All of this soil was removed to the ECDC disposal facility in East Carbon, Utah with uniform hazardous waste manifests. A summary table of the number of tons for each truck load of soil and the associated manifest number is provided in Table 1. Copies of the Uniform hazardous waste manifests and weight tickets are attached as Appendix A of this report.

A total of 3,057.25 tons of OCP- and arsenic-impacted soil was removed as non-hazardous waste to the Potrero Hills Landfill in Suisun, California between September 7 and November 8, 2012. Appendix B provides a summary of the weight of soil for each truck load for each day of disposal and the weight tickets. No manifests were used for transportation of any of the soil.

Removal of 3057.25 tons of OCP- and arsenic-impacted soil as non-RCRA non-hazardous waste was performed on September 7, September 11, September 12, September 13, September 14, September 24, September 26, November 7 and November 8, 2012.

On September 25, 2012 a total of 53.94 tons of oil-impacted soil associated with an underground storage tank (UST) that was discovered during excavation was transported as non-hazardous waste to the Potrero Hills Landfill in Suisun, California. The weight for each truck load of soil is included in the summary table in Appendix B, and copies of the weight tickets for each load of soil are also included in Appendix B.

The total tons of soil reported in the summary table in Appendix B is 3117.78. This total includes 6.59 tons that are not relevant to disposal activities at the site and also includes the total for the removal of 53.94 tons of oil-impacted soil disposal that was performed on September 25, 2012.

An additional unknown volume of soil that was not classified as requiring disposal as either hazardous waste or non-hazardous waste was disposed of at the Oyster Bay East Bay Regional Park facility in accordance with facility approval requirements.

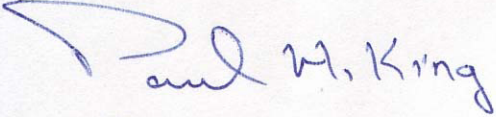

December 20, 2012

Report 0553.R3
