Phase I Environmental Site Assessment – ASTM 05
3037, 3101, and 3115 Adeline Street
Oakland, California

Dear Ms. Pena:

This report presents the findings of a Phase I Environmental Site Assessment (ESA) completed by Rincon Consultants, Inc. for the subject property located at 3037, 3101, and 3115 Adeline Street in Oakland, California. The Phase I ESA was performed in accordance with our proposal dated October 31, 2013 and contract dated November 1, 2013.

The accompanying report presents our findings and provides an opinion regarding the potential presence of environmental site conditions. Our work program for this project, as referenced in our contract, is intended to meet the guidelines outlined in the American Society for Testing and Materials (ASTM), Standard Practice for Environmental Site Assessments: *Phase I Environmental Site Assessment Process* (ASTM Standard E-1527-05). Our scope of services, pursuant to ASTM practice, did not include any inquiries with respect to asbestos, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, vapor intrusion or other indoor air quality, mold, or high voltage power lines.

Thank you for selecting Rincon for this project. If you have any questions, or if we can be of any future assistance, please contact us.

Sincerely,
RINCON CONSULTANTS, INC.

Jake Lippman, GIT
Staff Geologist

Reliance Letter - Phase I Environmental Site Assessment
3037, 3101, and 3115 Adeline Street
Oakland, California

Ms. Pena:

Pursuant to Reco Investors LLC approval, we hereby authorize Mechanics Bank to rely on the Phase I Environmental Site Assessment prepared by Rincon Consultants, November 15, 2013, for the subject property located at 3037, 3101, and 3115 Adeline Street in Oakland, California to the same extent as if Mechanics Bank were the original addressee thereof.

This reliance is based solely upon the scope of work that we were authorized to perform and is subject to the limitations set forth in the report and our existing contract for professional services with Reco Investors, LLC for this project.

Sincerely,
RINCON CONSULTANTS, INC.

Jake Lippman, GIT
Staff Geologist

Walt Hamann, PG, CHG, CEG
Vice President

EXECUTIVE SUMMARY

This report presents the findings of a Phase I Environmental Site Assessment (ESA) for the subject property located at 3037, 3101, and 3115 Adeline Street in Oakland, California. The subject property is currently comprised of an unoccupied warehouse with office space and a paved parking lot. The subject property is located in an area comprised of residential, commercial, and industrial site use.

Historical sources reviewed as part of the Phase I ESA include aerial photographs, topographic maps, fire insurance maps, and city directory listings. The historical sources reviewed indicate that the subject property has been used for commercial and industrial purposes since at least 1912. Historic uses of the subject property have included a mattress factory, bronze foundry, candy warehouse, and as a stoneworks company.

Rincon Consultants performed a site reconnaissance on November 5, 2013. The purpose of the reconnaissance was to observe existing site conditions and to obtain information indicating the possible presence of recognized environmental conditions (RECs) in connection with the property. During the site reconnaissance, the use, storage or disposal of hazardous materials on the subject property was not observed.

Environmental Data Resources, Inc. (EDR) was contracted to provide a database search of public lists of sites that generate, store, treat or dispose of hazardous materials or sites for which a release or incident has occurred. The EDR search was conducted for the subject property and included data from surrounding sites within a specified radius of the subject property. In addition, we reviewed the State Water Resources Control Board's online GeoTracker database to identify properties in the vicinity of the subject property with unauthorized releases impacting soil or groundwater and the California Department of Toxic Substances Control online EnviroStor database to identify hazardous waste permitted facilities or cleanup sites in the vicinity of the subject property. The subject property and adjacent properties were not listed in these databases.

Upon completion of this Phase I ESA, the following environmental conditions were reported for the subject property:

- Historic presence of machine shops and bronze foundry
- Nearby historic auto stations

A bronze foundry existed at 3037 and 3101 Adeline Street from at least 1928 to 1962. Bronze foundry operations can involve the use of heavy metals including copper, lead, nickel, and zinc. Machine shops existed at 3101 and 3115 Adeline Street from at least 1951 to 1959. Machine shop operations can involve the use of cutting oils and degreasing solvents. There is a potential that metal and solvent-impacted soil exists on the subject property, therefore, the historic presence of machine shops and a bronze foundry is considered a potential REC.

Six nearby historic auto stations were listed by EDR. Potential petroleum hydrocarbon releases from these sites could have impacted groundwater below these sites. These sites are located hydrologically up-gradient from the subject property, therefore, there is a potential that contaminated groundwater exists below the subject property. The nearby historic auto stations are considered potential RECs.

Rincon recommends that a shallow soil vapor and soil assessment be conducted on the subject property to determine if the historic presence of machine shops and bronze foundry have impacted the subject property.

INTRODUCTION

This report presents the findings of a Phase I Environmental Site Assessment (ESA) conducted for the subject property located at 3037, 3101, and 3115 Adeline Street in Oakland, California. This Phase I ESA was performed by Rincon Consultants, Inc. for Reco Investors, LLC in general conformance with ASTM E 1527-05 and our proposal dated October 31, 2013. The following sections present our findings and provide our opinion as to the potential presence of environmental site conditions.

PURPOSE

The purpose of this Phase I ESA was to assess the environmental conditions of a property, taking into account commonly and reasonably ascertainable information and to qualify for Landowner Liability Protections under the Brownfields Amendments to CERCLA Liability.

A recognized environmental condition (REC) is defined pursuant to ASTM E 1527-05 as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

SCOPE OF SERVICES

The scope of services conducted for this study is outlined below:

- Perform an on-site reconnaissance to identify obvious indicators of the existence of hazardous materials.
- Observe adjacent or nearby properties from public thoroughfares in an attempt to see if such properties are likely to use, store, generate, or dispose of hazardous materials.
- Obtain and review an environmental records database search from Environmental Data Resources Inc. (EDR) to obtain information about the potential for hazardous materials to exist at the site or at properties located in the vicinity of the site.
- Review the current U.S. Geological Survey (USGS) topographic map to obtain information about the site's topography and uses of the site and properties in the vicinity of the site.
- Review historic aerial photographs and topographic maps to obtain information about historic uses of the subject property and adjacent properties.
- Review California Division of Oil and Gas records to obtain information about historic oil and gas activity in the vicinity of the site.

- Provide an interview questionnaire to the property owner or a designated site representative identified to Rincon by Reco Investors, LLC.
- Provide an interview questionnaire to the user of the Phase I ESA.

Our scope of services, pursuant to ASTM E 1527 practice, did not include any inquiries with respect to asbestos containing building materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, vapor intrusion or other indoor air quality, biological agents, mold or high voltage power lines.

SIGNIFICANT ASSUMPTIONS, LIMITATIONS, EXCEPTIONS, SPECIAL TERMS AND CONDITIONS

Reco Investors, LLC has requested this assessment for the purpose of refinancing. Also, this report is issued with the understanding that it is to be used only in its entirety. It is intended for use only by the client, and no other person or entity may rely upon the report without the express written consent of Rincon.

We have endeavored to perform this work in accordance with good commercial, customary, and generally accepted environmental investigation practices for similar investigations conducted at this time and in this geographic area. No guarantee or warranties, expressed or implied are provided.

The findings and opinions conveyed in this report are based on findings derived from a site reconnaissance, review of an environmental database report, specified regulatory records and historical sources, and comments made by interviewees. This report is not intended as a comprehensive site characterization and should not be construed as such. Standard data sources relied upon during the completion of Phase I ESAs may vary with regard to accuracy and completeness. Although Rincon believes the data sources are reasonably reliable, Rincon cannot and does not guarantee the authenticity or reliability of the data sources it has used. Additionally, pursuant to our contract, the data sources reviewed included only those that are practically reviewable without the need for extraordinary analysis.

Rincon has not found evidence that hazardous materials or petroleum products exist at the site at levels likely to warrant mitigation. Rincon does not under any circumstances warrant or guarantee that not finding evidence of hazardous materials or petroleum products means that hazardous materials or petroleum products do not exist on the site. Additional research, including surface or subsurface sampling and analysis, can reduce Reco Investors, LLC, but no techniques commonly employed can eliminate these risks altogether.

In addition, in accordance with our authorized work scope and contract, no attempt was made to check for the presence of asbestos, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, vapor intrusion or other indoor air quality, or high voltage power lines.

USER RELIANCE

This Phase I ESA was prepared for use solely and exclusively by Reco Investors, LLC. This report shall not be relied upon by or transferred to any other party without the express written authorization of Rincon Consultants.

SITE DESCRIPTION

LOCATION AND LEGAL DESCRIPTION

The subject property is located at 3037, 3101, and 3115 Adeline Street in Oakland, California. The subject property is located west of Adeline Street between 30th Street and 32nd Street (Figures 1 and 2).

SITE AND VICINITY GENERAL CHARACTERISTICS

The subject property is located in a primarily residential and commercial area.

CURRENT USE OF THE PROPERTY

The subject property is currently comprised of an unoccupied warehouse, office space, and parking lot.

DESCRIPTIONS OF STRUCTURES, ROADS, OTHER IMPROVEMENTS ON THE SITE

The northern portion of the subject property is improved with an unoccupied warehouse and the southern portion is improved with a paved parking lot.

CURRENT USES OF THE ADJOINING PROPERTIES

Current adjacent land uses are described in Table 1 and depicted on Figure 3, Adjacent Land Use Map.

Table 1 - Current Uses of Adjacent Properties

Area	Use
Northern Properties	Residential
Western Properties	Residential
Southern Properties	Vacant commercial buildings. Formerly Champion Scaffold and California Electric Company.
Eastern Properties	Adeline Street followed by residential

USER PROVIDED INFORMATION

As described in ASTM E 1527-05 Section 6, Lloyd Meltzer, Project Manager for Reco Investors, LLC was interviewed for actual knowledge pertaining to the subject property to help identify the possibility of RECs in connection with the subject property. Mr. Meltzer completed the User Questionnaire as provided by ASTM-05 Appendix X3. A copy of the completed questionnaire is included in Appendix 1. The following information is based on our review of the completed questionnaire.

ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

Mr. Meltzer is unaware of any information pertaining to environmental liens or activity and use limitations for the subject property.

SPECIALIZED KNOWLEDGE

Mr. Meltzer did not provide Rincon with any specialized knowledge related to the subject property.

COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Mr. Meltzer indicated that the subject property was previously occupied by a stone fabrication shop.

VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Mr. Meltzer did not provide Rincon with any information pertaining to a valuation reduction for the subject property relative to any known environmental issues.

REASON FOR PERFORMING PHASE I ESA

The purpose of this Phase I ESA was to assess the environmental conditions of the subject property, taking into account commonly and reasonably ascertainable information and to qualify for Landowner Liability Protections under the Brownfields Amendments to CERCLA Liability.

OTHER

Mr. Meltzer indicated that based on his knowledge and experience related to the subject property, that there are no obvious indicators that point to the presence or likely presence of contamination at the subject property. Mr. Meltzer indicated that he is not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property. In addition, Mr. Meltzer is not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products in connection with the subject property.

OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

A Property Owner Questionnaire regarding the current and former uses of the subject property was completed by Lloyd Meltzer, Project Manager for Reco Investors, LLC. Our summary of the completed questionnaire is included in the Interviews section of this report.

RECORDS REVIEW

PHYSICAL SETTING SOURCES

Topography

The current USGS topographic map (Oakland West Quadrangle, 1993) indicates that the subject property is situated at an elevation of approximately 15 to 20 feet above mean sea level and is flat.

Geology and Hydrogeology

The subject property is located in the Coast Ranges Geomorphic Province. This province is characterized by northwest-southeast trending mountains and fault zones.

Site Geology

The geologic map of the Oakland West Quadrangle (Radbruch, D.H., 1957) indicates that the subject property is underlain by alluvial fan deposits (clayey gravel, sandy silty clay, and loam) of the Temescal Formation. The subject property is not located within an Alquist-Priolo Fault Zone.

Regional Groundwater Occurrence and Quality

Based on information obtained from the online State Water Resources Control Board (SWRCB) GeoTracker database, groundwater in the vicinity of the subject property generally flows west toward San Francisco Bay and has been encountered around 3 to 10 feet below grade.

STANDARD ENVIRONMENTAL RECORD SOURCES

Environmental Data Resources, Inc. (EDR) was contracted to provide a database search of public lists of sites that generate, store, treat or dispose of hazardous materials or sites for which a release or incident has occurred. The EDR search was conducted for the subject property and included data from surrounding sites within a one-mile radius of the property. A copy of the EDR report, which specifies the ASTM 05 search distance for each public list, is included as Appendix 2. As shown on the attached EDR report, Federal, State and County lists were reviewed as part of the research effort.

Site listings with inadequate address information are listed in the EDR report as Orphan sites. We reviewed the Orphan site listings and determined that none of the orphan sites are expected to impact the subject property.

Sites that were identified within one-eighth mile of the subject property are listed in Table 2 (see Appendix 2 for the complete EDR report) and include sites that appear in the following databases:

Alameda County CS: A listing of contaminated sites overseen by the Toxic Release Program (oil and groundwater contamination from chemical releases and spills) and the Leaking Underground Storage Tank Program (soil and ground water contamination from leaking petroleum USTs).

EDR US Historic Auto Station: EDR searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDRs review was limited to those categories of sources that might include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to, gas, gas station, gasoline station, filing station, auto, automobile repair, auto service station, service station, etc.

EDR US Historic Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about

past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

ENVIROSTOR: EnviroStor Database The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

FID UST: The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

FINDS: Facility Index System/Facility Registry System. Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

HAZNET: Facility and Manifest Data. Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

HIST CORTESE: Hazardous Waste & Substance Site List. The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency

HIST UST: Hazardous Substance Storage Container Database. The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

LUST: Geotracker's Leaking Underground Fuel Tank Report. Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground

storage tank incidents. Not all states maintain these records, and the information stored varies by state. For more information on a particular leaking underground storage tank sites, please contact the appropriate regulatory agency.

RCRA-SQG: RCRA - Small Quantity Generators. CRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

SWEEPS UST: SWEEPS UST Listing. Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list. TRIS: Toxic Chemical Release Inventory System Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

*Databases in bold indicate that an unauthorized hazardous material release has occurred

Subject Property

The subject property was not listed in the EDR report.

Nearby Properties

Historic Auto Stations – 3023, 3100, 3108, 3114, and 3116 Adeline Street and 3125 Chestnut Street

These sites were listed in the EDR report as having been occupied by auto stations, which can include gasoline service stations and auto repair facilities. Potential petroleum hydrocarbon releases from these sites could have impacted groundwater below the sites. These sites are located hydrologically up-gradient from the subject property, therefore, there is a potential that contaminated groundwater exists below the subject property.

Based on the anticipated direction of groundwater flow and nature of the listings, none of the other sites listed in the EDR report are expected to impact the subject property.

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

Review of Agency Files

During the preparation of this Phase I ESA, we reviewed the SWRCB online GeoTracker database to identify properties in the vicinity of the subject property with unauthorized releases impacting soil or groundwater and the California Department of Toxic Substances Control (DTSC) online EnviroStor database to identify hazardous waste permitted facilities or cleanup sites in the vicinity of the subject property. There were no additional sites listed in these databases that are expected to impact the subject property.

Review of State of California Division of Oil and Gas Records

A review of the District 6 Oil and Gas Map located on the Department of Conservation, Division of Oil, Gas & Geothermal Resources website indicates that no oil or gas wells are located within one mile of the subject property.

Local Land Records

Local land records were not reviewed as part of this Phase I ESA.

HISTORICAL USE INFORMATION ON THE PROPERTY AND THE ADJOINING PROPERTIES

The historic records review completed for this Phase I ESA includes aerial photographs, topographic maps, city directory listings, and fire insurance maps as detailed in the following sections. Table 3 provides a summary of the historical use information available for the subject property dating back to 1895.

Review of Historic Aerial Photographs

Aerial photographs from EDR's aerial photograph collection were obtained and reviewed. The date and source of each photograph and the observations noted during the review are summarized in Table 3. Copies of the aerial photographs are included in Appendix 3 (Historical Documents).

Review of Historic Topographic Maps

Historic topographic maps from EDR's map collection were reviewed. Copies of the historic topographic maps are included in Appendix 3. Table 3 lists the historical uses of the site based on our review of the available topographic maps.

Review of City Directory Listings

EDR was contracted to provide copies of city directory listings for the subject property. Copies of the city directory listings are included in Appendix 3. Table 3 lists the historical uses of the site based on our review of the available city directory listings.

Review of Fire Insurance Maps

EDR was contracted to provide copies of fire insurance maps for the subject property. Copies of the fire insurance maps are included in Appendix 3. Table 3 lists the historical uses of the site based on our review of the available fire insurance maps.

Summary of Historic Uses of the Site

The historical sources reviewed indicate that the subject property has been used for commercial and industrial purposes since at least 1912. Historic uses of the subject property have included a mattress factory, bronze foundry, machine shop, candy warehouse, and as a stoneworks company.

Gaps in Historical Sources

Several gaps of greater than 5 years were identified in the historical records reviewed, however these gaps are considered insignificant because the site uses prior to and following the gaps are similar.

SITE RECONNAISSANCE AND INTERVIEWS

Rincon Consultants performed a site reconnaissance on November 5, 2013. The purpose of the reconnaissance was to observe existing site conditions and to obtain information indicating the possible presence of recognized environmental conditions in connection with the subject property.

INTERVIEWS

Interview with Owner

A Property Owner Questionnaire regarding the current and former uses of the subject property was completed by Lloyd Meltzer, Project Manager for Reco Investors, LLC. The following is a summary of the Property Owner Questionnaire.

Mr. Meltzer indicated that Reco Investors, LLC gained ownership of the subject property on August 8, 2013 from Creative Stone Works. Mr. Meltzer indicated that the subject property was previously occupied by a stone fabrication shop. Mr. Meltzer indicated that he is not aware of any 55-gallon drums, underground storage tanks, hazardous materials or waste, fill dirt, pits, ponds, lagoons, stained soil, vent pipes, fill pipes, or access ways on the subject property. Mr. Meltzer indicated that he is not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property. Mr. Meltzer indicated that he is not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products in connection with the subject property. There were no additional sites listed in these databases that are expected to impact the subject property.

Interview with Site Manager

Rincon's interview with Mr. Meltzer is summarized in the previous Interview with Owner section of this report.

Interviews with Occupants

There were no occupants interviewed as part of this Phase I ESA.

Interviews with Local Government Officials

During the preparation of this Phase I ESA, we reviewed the SWRCB online GeoTracker database to identify properties in the vicinity of the subject property with unauthorized releases impacting soil or groundwater and the DTSC online Envirostor database to identify hazardous

waste permitted facilities or cleanup sites in the vicinity of the subject property. There were no additional sites listed in these databases that are expected to impact the subject property.

SITE RECONNAISSANCE

Methodology and Limiting Conditions

The site reconnaissance was conducted by 1) observing the subject property from public thoroughfares, 2) observing the adjoining properties from public thoroughfares, 3) observing the interior of the onsite structures, 4) observing the exterior of the structures, and 5) backtracking to correlate exterior features with interior features, as necessary.

Current Use of the Property and Adjoining Properties

The subject property is currently an unoccupied warehouse and adjoining office space with a gated parking lot. The warehouse is being renovated for new tenants who will occupy the space. The adjoining properties are occupied by both vacant commercial and residential uses.

Past Use of the Property and Adjoining Properties

Based on our site reconnaissance, the site was previously used as the workshop and offices of Creative Stone Works.

Current or Past Uses in the Surrounding Area

Past uses of the surrounding area are not readily apparent based on the site reconnaissance.

Geologic, Hydrogeologic, Hydrologic and Topographic Conditions

Geologic, hydrogeologic, hydrologic and topographic information are as previously stated in the Physical Settings Section of this report.

General Description of Structures

The subject property is improved with a large warehouse and office space. The area to the south of the warehouse is a paved parking lot.

INTERIOR AND EXTERIOR OBSERVATIONS

Storage Tanks

During the site reconnaissance, Rincon did not observe evidence of storage tanks onsite.

Drums

During the site reconnaissance, Rincon did not observe evidence of drums onsite.

Hazardous Substances and Petroleum Products

There were no hazardous substances or petroleum products identified at the subject property.

Unidentified Substance Containers

Unidentified substance containers or unidentified containers that might contain hazardous substances were not observed during the site reconnaissance

Odors

During the site reconnaissance, Rincon did not identify any strong, pungent, or noxious odors.

Pools of Liquid

During the site reconnaissance, water was being sprayed to keep dust down inside the building during renovations.

Pits, Ponds, Lagoons

Several drains are present within the northern section of the warehouse. Mr. Meltzer indicated that the drains did not lead anywhere and were used to collect stone dust created during the previous owner's activities. Water would be sprayed on the floor and swept into the drains where it would evaporate and leave behind dust to be cleaned.

Indications of Polychlorinated Biphenyls (PCBs)

Mr. Meltzer indicated in the Property Owner Questionnaire that there is an electrical transformer on the subject property. No stains or leaks near this transformer were observed during the site reconnaissance.

Other Conditions of Concern

During the site reconnaissance, Rincon did not note any of the following observations:

- *stains or corrosion*
- *clarifiers or sumps*
- *stained soil or stained pavement*
- *stressed vegetation*
- *waste water*
- *wells*
- *septic systems/effluent disposal system*

FINDINGS

The following environmental conditions were reported for the subject property:

- Historic presence of machine shops and bronze foundry
- Nearby historic auto stations

OPINIONS

A bronze foundry existed at 3037 and 3101 Adeline Street from at least 1928 to 1962. Bronze foundry operations can involve the use of heavy metals including copper, lead, nickel, and zinc. Machine shops existed at 3101 and 3115 Adeline Street from at least 1951 to 1959. Machine shop operations can involve the use of cutting oils and degreasing solvents. There is a potential that metal and solvent-impacted soil exists on the subject property, therefore, the historic presence of machine shops and a bronze foundry is considered a potential REC.

Six nearby historic auto stations were listed by EDR. Potential petroleum hydrocarbon releases from these sites could have impacted groundwater below these sites. These sites are located hydrologically up-gradient from the subject property, therefore, there is a potential that contaminated groundwater exists below the subject property. The nearby historic auto stations are considered potential RECs.

CONCLUSIONS

Rincon has performed this Phase I ESA in general conformance with the scope and limitations of ASTM Practice E 1527-05 for the subject property located at 3037, 3101, and 3115 in Oakland, California. This Phase I ESA has revealed evidence of potential RECs in connection with the subject property: historic presence of machine shops and bronze foundry and nearby historic auto stations.

RECOMMENDATIONS

Rincon recommends that a shallow soil vapor and soil assessment be conducted on the subject property to determine if the historic presence of machine shops and bronze foundry have impacted the subject property.

DEVIATIONS

Several gaps of greater than 5 years were identified in the historical records reviewed, however these gaps are considered insignificant because the site uses prior to and following the gaps are similar.

SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

The qualified environmental professional that is responsible for preparing the report is Walt Hamann. His qualifications are summarized in the following section.

"We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

The environmental professional responsible for conducting this Phase I ESA and preparing the report is Walt Hamann. His qualifications are summarized below.

Environmental Professional Qualifications	**X2.1.1 (2) (i) -** Professional Engineer or Professional Geologist License or Registration, and 3 years of full-time relevant experience	**X2.1.1 (2) (ii) -** Licensed or certified by the Federal Government, State, Tribe, or U.S. Territory to perform environmental inquiries	**X2.1.1 (2) (iii) –** Baccalaureate or Higher Degree from and accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience	**X2.1.1 (2) (iii) –** Equivalent of 10 years of full-time relevant experience
Walt Hamann	PG		MS Geology	23 years

Walt Hamann, PG, CEG, CHG, is a Principal and Senior Geologist with Rincon Consultants. He holds a Bachelor of Arts degree in geology from the University of California, Santa Barbara and a Master of Science degree in geology from the University of California, Los Angeles. He has over 20 years of experience conducting assessment and remediation projects and has prepared or overseen the preparation of hundreds of Phase I and Phase II Environmental Site Assessments throughout California. Mr. Hamann is a Professional Geologist (#4742), Certified Engineering Geologist (#1635), Certified Hydrogeologist (#208) and Registered Environmental Assessor II (#20063) with the State of California.

Jake Lippman is a Staff Geologist with Rincon Consultants. He holds a Bachelor of Science degree in Geology from the University of California, Davis and a Master of Arts degree in Climate and Society from Columbia University. Mr. Lippman's responsibilities include implementation of Phase I and Phase II Environmental Site Assessments as well as Storm Water Pollution Prevention Plans within the Environmental Site Assessment and Remediation Group. Mr. Lippman is a Geologist-In-Training (#376) with the State of California.

Ryan Gardner is an Environmental Scientist with Rincon Consultants. He holds a Masters of Environmental Science from the University of California, Santa Barbara. Mr. Gardner's responsibilities at Rincon include preparation of Phase I Environmental Site Assessments as well as specializing in sustainability.

Property Owner Questionnaire
Rincon Project 13-01512 – 3037, 3101, 3115 Adeline Street, Oakland, California

This questionnaire should be completed by the current subject property owner or a designated representative of the current subject property owner. We respectfully request that you fill out and return this form (via fax 760-918-9449 or email jlippman@rinconconsultants.com) to us within one week from the date of this transmittal.

1)a	**Was the subject property ever used as:** ☐ a gasoline or other fueling station ☐ a motor vehicle repair facility ☐ a commercial printing facility ☐ a dry cleaners ☐ a photo developing laboratory ☐ a metal plating facility ☐ a farm (please check all that apply and describe) Stone Fabrication Shop	☐ a junkyard or landfill ☐ a waste treatment, storage, disposal, processing or recycling facility ☐ a machine shop ☒ a manufacturing facility ☐ an oil production facility (including oil wells) ☒ any other industrial use
1)b	**Was the adjoining properties ever used as:** ☐ a gasoline or other fueling station ☐ a motor vehicle repair facility ☐ a commercial printing facility ☐ a dry cleaners ☐ a photo developing laboratory ☐ a metal plating facility ☐ a farm (please check all that apply and describe) Electrial Contractor Shop	☐ a junkyard or landfill ☐ a waste treatment, storage, disposal, processing or recycling facility ☐ a machine shop ☐ a manufacturing facility ☐ an oil production facility (including oil wells) ☒ any other industrial use

2)	**Please describe the current land uses of the subject property and those surrounding your property. Please indicate all businesses/companies located on property.**	
2a	**Current use of Subject Property** (please check all that apply) ☒ Commercial (retail, offices, etc.) ☐ Residential (single family or apartments) ☐ Industrial (manufacturing, warehousing, processing) ☐ Other-Please Describe	(please include a brief description of current operation) Shop
2b	**Current use of Northern Adjoining Properties** (please check all that apply) ☐ Commercial (retail, offices, etc.) ☒ Residential (single family or apartments) ☐ Industrial (manufacturing, warehousing, processing) ☐ Other-Please Describe	(please include a brief description of current operation)

4)	**Who is the current owner of the facility?**	RWW Properties, LLC

5)	**When did current ownership begin?**	8/8/13
6)	**What is the age of the on-site facility?**	Unknown
7)	**Who is the previous owner of the property?**	Creative Stone Works

8)	**Please indicate the property's current**	
	electrical service provider -	PG-E
	water service provider -	EBMUD
	natural gas service provider -	None
	sewer service provider -	EBMUD
	solid waste hauler -	None

9)	**To the best of your knowledge, has your facility previously or does your facility currently store or use any of the following in individual containers larger than 5 gallons in volume or 50 gallons in the aggregate?** (if yes or unknown, include how many, type, and size)	
	☐ ***Damaged or discarded automotive or industrial batteries***	none
	☐ ***Pesticides***	none
	☒ ***Paints***	<5 gallons
	☐ ***Oils or solvents***	
	☐ ***Motor vehicle fuel***	
	☐ ***Pesticides or Herbicides***	
	☐ ***Other Chemicals or hazardous substances***	

10)	**Please indicate any wastes generated at the facility.**		
	Hazardous waste:	**Quantity:**	**Disposal Method:**

11)	**Are there currently or to the best of your knowledge have there been previously, any industrial drums (typically 55 gallon) or sacks of chemicals located on the property or at the facility?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

12)	**Are there currently or to the best of your knowledge have there been previously, any evidence of fill dirt having been brought onto the property that originated from a contaminated site or that is of an unknown origin?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

13)	**Are there currently or to the best of your knowledge have there been previously, any pits, ponds or lagoons located on the property in connection with waste treatment or waste disposal?**	
	☒ Yes ☐ No ☐ Unknown	if Yes or Unknown, please describe Floor vents to collect stone dust, does not drain to sewer or other

14)	**Are there currently or to the best of your knowledge have there been previously, any sumps, clarifiers, or solvent degreasers on the property?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

15)	**Are there currently or to the best of your knowledge have there been previously, any stained soil on the property?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

16)	**Are there currently or to the best of your knowledge have there been previously, any storage tanks (above or below ground) located on the property?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

17)	**Are there currently or to the best of your knowledge have there been previously, any vent pipes, fill pipes, or access ways (etc.) indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

18)	**If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government agency?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

19)	**Are there currently or to the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water, or are emitting foul odors?**	
	☐ Yes ☐ No ☐ Unknown	if Yes or Unknown, please describe No

20)	**To the best of your knowledge has your facility previously or does your facility currently, discharge wastewater on or adjacent to the property other than storm water into a sanitary sewer system?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

21)	**Have any of the following ever been dumped above grade, buried and/or burned on the property?** (please check all that apply and describe if possible)	
	☐ hazardous substances	
	☐ petroleum products	
	☐ unidentified waste materials	
	☐ tires	
	☐ automotive or industrial batteries	
	☒ other waste materials (please describe)	Stone dost

22)	**Are there currently or to the best of your knowledge have there been previously, a transformer, capacitor or any hydraulic equipment on the property?**	
	☒ Yes ☐ No ☐ Unknown	if Yes or Unknown, please describe Transformer in property

23)	**Are there currently or to the best of your knowledge have there been previously any records indicating the presence of PCBs?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

24)	**Are there currently or to the best of your knowledge have there been previously any records indicating the presence of pesticides or herbicides?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

25)	**Do your have any environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

26)	**Have you been informed of the past or current existence of hazardous substances, petroleum products, or environmental violations with respect to the property or any facility located on the property?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

27)	**Do you have any knowledge of any environmental site assessments of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?**	
	☐ Yes ☒ No ☐ Unknown	if Yes or Unknown, please describe

To qualify for one of the *Landowner Liability Protections* (*LLPs*) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"*), the *user* must provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

We respectfully request that you fill out this form and e-mail it to ***jlippman@rinconconsultants.com*** *or fax it to* ***Jake Lippman*** *at* ***760-918-9449*** *within one week from the date of this transmittal.*

1. **Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law? (40 CFR 312.25)**

   Please checkmark the most appropriate response:

   ☒ I *have not* reviewed the records and ***do not know*** if there are any filed or recorded environmental liens.

   ☐ I *have* reviewed the records, and ***No, there aren't any*** filed or recorded environmental liens.

   ☐ I *have* reviewed the records, and ***Yes, there are*** environmental liens. Explain:

2. **Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law? (40 CFR 312.26)**

   Please checkmark the most appropriate response:

   ☒ I *have not* reviewed the records and ***do not know*** if there are any filed/recorded AULs or any AULs in place at the site.

   ☐ I *have* reviewed the records, and ***No, there aren't any*** filed/recorded AULs or any AULs in place at the site.

   ☐ I *have* reviewed the records, and ***Yes, there are*** AULs filed, recorded, and/or in place at the site. Explain:

3. **Does the Title Report provide any information pertaining to environmental cleanup liens or activity and use limitations (AULs) for the subject property?**

   Please checkmark the most appropriate response:

   ☒ I *have not* reviewed the Title Report and ***do not know*** if it provides environmental cleanup liens or AULs information.

   ☐ I *have* reviewed the Title Report, and ***No, it does not*** provide environmental cleanup liens or AULs information.

   ☐ I *have* reviewed the Title Report, and ***Yes, it does provide*** environmental cleanup liens or AULs information. Explain:

4. **As the user of this ESA and the person seeking to qualify for the LLP, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? (40 CFR 312.28)**

   Please checkmark the most appropriate response:

   ☒ ***No***, I *do not* have any specialized knowledge and/or experience related to the property or nearby properties.

   ☐ ***Yes***, I *do* have specialized knowledge and/or experience related to the property or nearby properties. Explain:

5. **As the user of this ESA, based on your knowledge and experience related to the property, are you aware of any information pertaining to a reduction in value for the subject property relative to any known environmental issues?**

   Please checkmark the most appropriate response:

   ☒ ***No***, I *do not* have any information about a reduction in property value relative to environmental issues.

   ☐ ***Yes***, I *do* have information about a reduction in property value relative to environmental issues. Explain:

6. **Does the purchase price being paid for this property reasonably reflect the fair market value of the property?**

   Please checkmark the most appropriate response:

   ☒ ***Yes***, I *do* believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Skip to question #7.

   ☐ ***No***, I *do not* believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Proceed to question #6a.

   a. **If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? (40 CFR 312.29)**

      Please checkmark the most appropriate response:

      ☐ ***No***, I *have not* considered the idea that known or believed contamination at the site has caused the lower purchase price.

      ☐ ***Yes***, I *have* considered the idea that known or believed contamination at the site has caused the lower purchase price. Explain.

7. **Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? (40 CFR 312.30)**

   a. What are the past uses of the property?

   ☐ I *do not* know.

   ☒ I *do* know. Explain: Stone Fabrication Shop

   b. What (if any) specific chemicals are present, or once were present, at the property?

   ☒ I *do not* know.

   ☐ I *do* know. Explain:

   c. What (if any) spills or other chemical releases have taken place at the property?

   ☒ I *do not* know.

   ☐ I *do* know. Explain:

   d. What (if any) environmental cleanups have taken place at the property?

   ☒ I *do not* know.

   ☐ I *do* know. Explain:

8. **As the User of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property? (40 CFR 312.31)**

   Please checkmark the most appropriate response:

   ☒ ***No***, I *do not know and/or do not have any experience with* any obvious indicators that point to the presence or likely presence of contamination at the property.

   ☐ ***Yes***, I *do know of and/or do have experience with* obvious indicators that point to the presence or likely presence of contamination at the property. Explain:

9. **Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site?**

   ☒ ***No***, I *am not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site.*

   ☐ ***Yes***, I *am aware of pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site*. Explain:

10. **Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site?**

    ☒ ***No***, I *am not aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site.*

    ☐ ***Yes***, I *am aware of pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site.* Explain:

11. Are you aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

☒ ***No,*** *I am not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.*

☐ ***Yes,*** *I am aware of a notice, or notices, from a government entity (or multiple government entities) regarding a possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.* Explain:

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL---------- National Priority List

Proposed NPL ---- Proposed National Priority List Sites
NPL LIENS ---- Federal Superfund Liens

Federal Delisted NPL site list

Delisted NPL ---- National Priority List Deletions

Federal CERCLIS list

FEDERAL FACILITY ---- Federal Facility Site Information listing

Federal RCRA generators list

RCRA-CESQG ---- RCRA - Conditionally Exempt Small Quantity Generator

Federal institutional controls / engineering controls registries

US ENG CONTROLS ---- Engineering Controls Sites List
US INST CONTROL ---- Sites with Institutional Controls
LUCIS ---- Land Use Control Information System

Federal ERNS list

ERNS ---- Emergency Response Notification System

State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF ---- Solid Waste Information System

State and tribal leaking storage tank lists

INDIAN LUST ---- Leaking Underground Storage Tanks on Indian Land

State and tribal registered storage tank lists

CA AST ---- Aboveground Petroleum Storage Tank Facilities
INDIAN UST ---- Underground Storage Tanks on Indian Land
FEMA UST ---- Underground Storage Tank Listing

State and tribal voluntary cleanup sites

INDIAN VCP ---- Voluntary Cleanup Priority Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

ODI ---- Open Dump Inventory
DEBRIS REGION 9 ---- Torres Martinez Reservation Illegal Dump Site Locations
CA HAULERS ---- Registered Waste Tire Haulers Listing
INDIAN ODI ---- Report on the Status of Open Dumps on Indian Lands

Local Lists of Hazardous waste / Contaminated Sites

US CDL ---- Clandestine Drug Labs

CA CDL ---- Clandestine Drug Labs
US HIST CDL ---- National Clandestine Laboratory Register

Local Land Records

LIENS 2 ---- CERCLA Lien Information

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System
CA LDS ---- Land Disposal Sites Listing
CA SPILLS 90 ---- SPILLS 90 data from FirstSearch

Other Ascertainable Records

DOT OPS ---- Incident and Accident Data
CONSENT ---- Superfund (CERCLA) Consent Decrees
ROD ---- Records Of Decision
UMTRA ---- Uranium Mill Tailings Sites
US MINES ---- Mines Master Index File
TRIS ---- Toxic Chemical Release Inventory System
TSCA ---- Toxic Substances Control Act
SSTS ---- Section 7 Tracking Systems
ICIS ---- Integrated Compliance Information System
PADS ---- PCB Activity Database System
MLTS ---- Material Licensing Tracking System
RADINFO ---- Radiation Information Database
RAATS ---- RCRA Administrative Action Tracking System
RMP ---- Risk Management Plans
CA UIC ---- UIC Listing
CA CUPA Listings ---- CUPA Resources List
CA WIP ---- Well Investigation Program Case List
INDIAN RESERV ---- Indian Reservations
SCRD DRYCLEANERS ---- State Coalition for Remediation of Drycleaners Listing
CA HWT ---- Registered Hazardous Waste Transporter Database
CA MWMP ---- Medical Waste Management Program Listing
COAL ASH DOE ---- Steam-Electric Plant Operation Data
COAL ASH EPA ---- Coal Combustion Residues Surface Impoundments List
LEAD SMELTERS ---- Lead Smelter Sites
2020 COR ACTION ---- 2020 Corrective Action Program List
PCB TRANSFORMER ---- PCB Transformer Registration Database
US AIRS ---- Aerometric Information Retrieval System Facility Subsystem
EPA WATCH LIST ---- EPA WATCH LIST

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP ---- EDR Proprietary Manufactured Gas Plants

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 04/26/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
CAL TECH METAL FINISHERS INC	***841 31ST STREET***	***ESE 1/4 - 1/2 (0.395 mi.)***	***AI150***	***316***

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 04/26/2013 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

DONCO INDUSTRIES - OAK	2401 UNION ST.	SW 1/4 - 1/2 (0.423 mi.)	AG164	358

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 07/11/2013 has revealed that there are 2

CORRACTS sites within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

PFIZER INC	*4650 SHELLMOUND ST*	*NW 1/2 - 1 (0.949 mi.)*	*AZ232*	*748*

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, and dated 09/05/2013 has revealed that there are 12 CA RESPONSE sites within approximately 1 mile of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 09/05/2013 has revealed that there are 61 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, and dated 09/16/2013 has revealed that there is 1 CA UST site within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 09/05/2013 has revealed that there are 7 CA VCP sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/11/2013 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 31 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 25 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

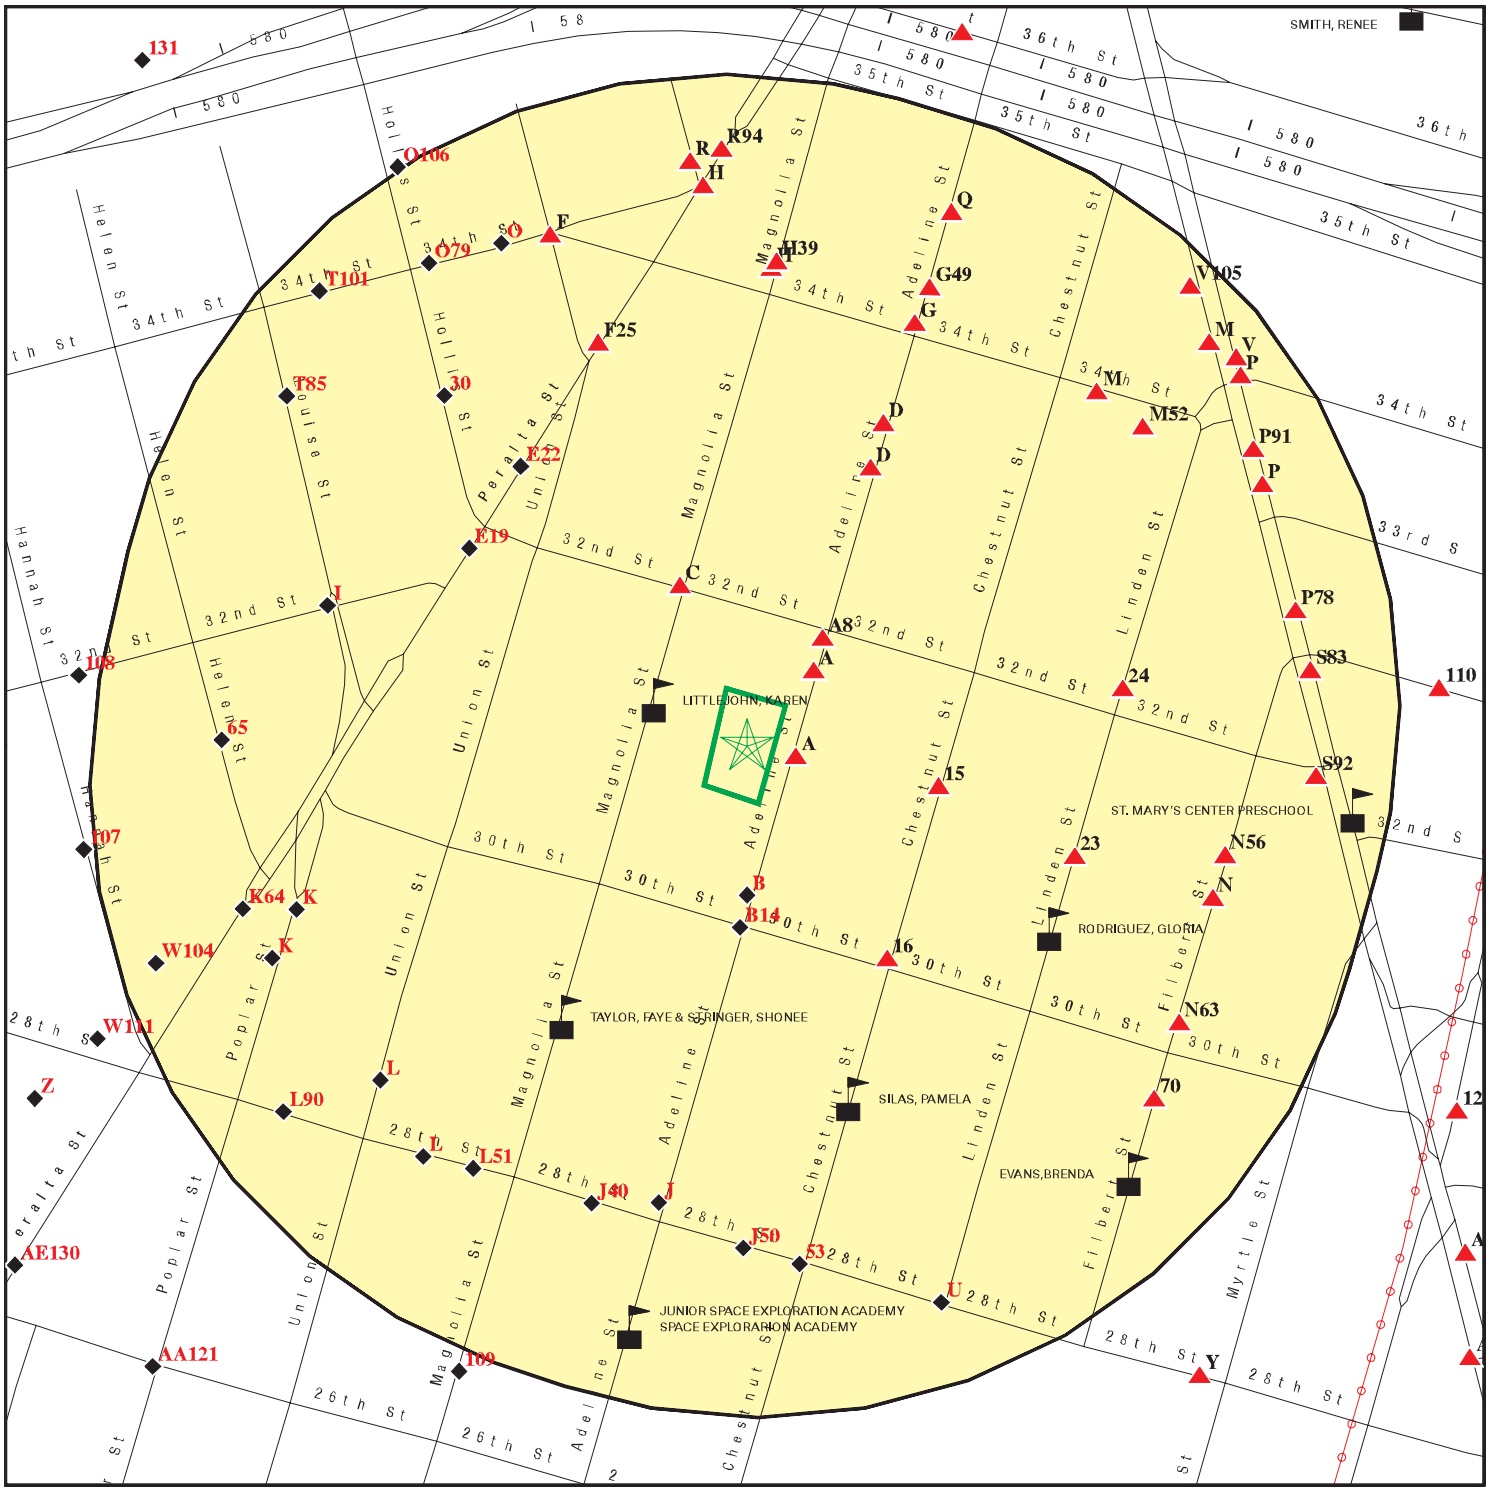
DETAIL MAP - 03774911.2r



- Target Property
- Sites at elevations higher than or equal to the target property
- Sites at elevations lower than the target property
- Manufactured Gas Plants
- Sensitive Receptors
- National Priority List Sites
- Dept. Defense Sites
- Indian Reservations BIA
- Power transmission lines
- Oil & Gas pipelines from USGS
- 100-year flood zone
- 500-year flood zone
- Areas of Concern

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Status:	Open - Site Assessment
Status Date:	04/13/2004
Lead Agency:	ALAMEDA COUNTY LOP
Case Worker:	BJJ
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	NA
LOC Case Number:	RO0002592
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Four USTs were removed from the site in 2001. However, no reports were submitted due to bankruptcy of the removal company. Confirmation soil samples collected from beneath the USTs indicated that petroleum hydrocarbons were present in soil. However, no map is available to show where the samples were collected. A water sample collected from the tank pit contained 400 g/L TVHg, 6.3 g/L benzene and 11,000 g/L MTBE. An investigation was performed in 2004 to determine the extent of contamination. The maximum contamination was detected off-site and subsequent investigation was proposed and approved by ACEH. However, no report was submitted.

RB Case Number:	NA
LOC Case Number:	RO0002562
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	In July 2002, a subsurface investigation consisting of borings were installed at the site. Elevated concentrations of petroleum hydrocarbons were detected at the site. In January 2003, one 350-gallon and one 500-gallon USTs were removed from the site. Elevated concentrations of petroleum hydrocarbons were detected in groundwater samples. In 2006, several borings were installed at the site to delineate the extent of contamination. Concentrations of petroleum hydrocarbons as wells as solvents were detected at the site. In April 2007, borings were installed up-gradient to identify source of solvents detected at the site. Most elevated concentrations of solvents were detected up-gradient of the site. However, a source was not identified.

Lead Agency:	ALAMEDA COUNTY LOP
Case Worker:	BJJ
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	NA
LOC Case Number:	RO0002901
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	The property operated as an express courier facility (Modern Mail Services, Inc.) between 1951 and 2003. One 10,000-gallon gasoline underground storage tank (UST) was installed in the late 1970s and removed in 1998. The site is located in a mixed commercial residential area and currently contains a vacant structure. Cars are parked on this lot occasionally to make it appear occupied. On July 14, 1998, Golden Gate Tank Removal removed the 10,000-gallon gasoline UST. The tank appeared to be intact yet floating product was observed on the tank pit water. Because the water in the tank pit contained floating product, the accumulated water was removed from the tank pit before sampling. Soil samples were collected from the east and west sidewalls from a depth of 8.5 feet below grade, and one water sample was collected from the tank pit water. One soil sample was collected from beneath the dispenser. The maximum detected concentrations in soil during this sample event were detected from the dispenser sample at concentrations of 2,100 mg/kg TPHg, and 2.8 mg/kg benzene. The water sample contained 4,200 micrograms per liter (g/L) TPHg, 15 g/L benzene and 150 g/L MTBE. On November 22, 2005, Stellar Environmental Solutions advanced four soil borings at the site. Maximum concentrations were 920 ppm TPHg, 1.8 ppm benzene and 0.024 ppm MTBE in soil. Maximum concentrations in groundwater were 430,000 ppb TVHg, 6,700 ppb benzene and 24 ppb MTBE. On April 3, 2006, Stellar Environmental Solutions advanced nine exploratory boreholes (BH-5 to BH-13) to determine the lateral and vertical extent of soil and groundwater contamination. Maximum soil concentrations were detected in BH-8 at concentrations of 5,300 ppm TVHg, 0.67 ppm benzene and 0.22 ppm MTBE. Maximum groundwater concentrations were also detected in BH-8 at 120,000 ppb TVHg, 1,200 ppb benzene, and 120 ppb MTBE. On September 25 and 26, 2006, five monitoring well pairs (MW-1A, MW-1B through MW-5A, MW-5B) were installed, and one soil boring (BH-14) was advanced. Maximum concentrations in soil were 790 ppm TVHg, and 0.031 ppm MTBE. No benzene was detected in soil. Maximum groundwater concentrations were 1,900 ppb TVHg, 9.6 ppb benzene and 37 ppb MTBE. On October 3, 2006, Stellar oversaw excavation of approximately 397.6 tons of contaminated soil. In addition, 5,100 gallons of contaminated groundwater were pumped from the excavation pit. Soil samples collected from the sidewalls contained maximum concentrations of 1,700 ppm TVHg, indicating that some residual contamination remained in place near the building adjacent to the service bay. Samples collected from the bottom of the excavation were all below the detection limit. Advanced Oxygen Reducing Compound (ORC) product was placed into the open excavation prior to backfilling and a perforated PVC pipe was placed in drain rock from 6 to 11 feet bgs to be used as a dewatering point. On November 27, 2007, the building containing the service bay was removed and the soil beneath was excavated to a depth of approximately 10.5 ft bgs with 212.6 tons of soil removed. Approximately 4,500 gallons of groundwater were removed from the

MODERN MAIL EXPRESS INC (Continued) **S107619858**

excavation and 375 pounds of ORC were applied to the excavation during backfilling. Soil samples collected from the sidewalls and floor detected maximum concentrations of 4.7 ppm TVHg. No BTEX or oxygenates were detected in these samples. December 2008, Stellar submitted a Preferential Pathway Utility and Well Survey. One water supply well is located within a half mile radius of the site. This well is listed as a public well and is located to the north of the site. Since this well is located in the cross-gradient direction it is unlikely to be impacted due to the distance from the site and the low concentrations at the site. In September 2010, Stellar Environmental injected ORC into the subsurface in the area near MW-3A, MW-3B, MW-4B, and MW 1B. The sit

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location:	Stored electronically as an E-file
Potential Media Affect:	Under Investigation
Potential Contaminants of Concern:	Gasoline
Site History:	Beginning on May 30, 1996 two 700-gallon USTs one containing gasoline the other waste oil and associated product piping were removed. Corrosion and holes were observed in both tanks. Elevated petroleum hydrocarbon concentrations were observed in confirmation soil samples. ACEH requested further investigation and collection of groundwater samples and sent notices of violation. However, no further work was performed. On the Project Information screen, add this phrase to the Staff Notes and Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historical case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Stoddard solvent / Mineral Spriits / Distillates
Site History:	On October 4, 1990 one 750-gallon and two 1,000-gallon Stoddard solvent USTs were excavated and removed. A 250-gallon UST was removed on October 31, 1991. A total of 59 yd3 of soil was excavated, bioremediated and reused as backfill. Maximum soil concentrations detected were 1,000 mg/kg TPHg, 140 mg/kg Stoddard solvent, 110 mg/kg TPHd. On-site groundwater monitoring wells were installed on October 29, 1992. Onsite industrial well impacted with petroleum hydrocarbons.

Case Type: LUST Cleanup Site
Status: Open - Site Assessment
Status Date: 06/27/2000
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Case Worker: REL
Local Agency: Not reported
RB Case Number: 01-2318
LOC Case Number: Not reported
File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Benzene, Gasoline
Site History: February 29, through March 1, 1996 four gasoline USTs (one 8,000 gallon, one 6,000 gallon and Two 4,000 gallon) were removed from the site. The maximum concentrations in soil were 8,000 mg/kg TPHg and 4 mg/kg benzene. Grab groundwater was 46,000 g/L TPHg and 440g/L benzene. Soil removed from the tank pit was placed back in the excavation with no treatment. A work plan was subsequently submitted and approved but was not implemented. On the Project Information screen, add this phrase to the Staff Notes and Site History: Not all

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Longitude: -122.277468
Case Type: LUST Cleanup Site
Status: Open - Eligible for Closure
Status Date: 08/05/2013
Lead Agency: ALAMEDA COUNTY LOP
Case Worker: SP
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: 01-1478
LOC Case Number: RO0000004
File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: This site has evidence of a new release as of 2012 (methanol detected). In 1986 a preliminary site assessment was completed and groundwater monitoring wells were installed. In 1998 four UST were replaced and confirmation soil sampling detected significantly elevated levels of TPHg and BTEX, confirming that an unauthorized release to soil and groundwater occurred. Site characterization completed in 2004 defined the extent of contamination onsite. Interim remedial action and plume migration are currently in progress and

THRIFTY OIL CO. #049 (Continued) **S103950804**

additional remedial action using multi-phase vapor extraction has been proposed. The downgradient extent of contamination remains undefined; however, monitoring wells are proposed to define the dissolved plume.

Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	01-1358
LOC Case Number:	RO0000006
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil Vapor
Potential Contaminants of Concern:	Gasoline
Site History:	In December 1984, gasoline-saturated soil was discovered beneath the pump island area. The steel USTs were replaced in January 1985. Monitoring well installation and other site characterization activities were conducted at various times from 1988 to 2006. A soil vapor extraction test was conducted in 1993. In 1997, the station was station was renovated and a new larger station building constructed. Free product was bailed from monitoring wells MW-1 through MW-7 at various times during groundwater monitoring. Groundwater monitoring has been conducted at the site since 1991. Further investigation is ongoing to define the extent of lead in shallow soils within a portion of the site.

Completed Area Name: PROJECT WIDE

GIAMPOLINI PROPERTY (Continued) **S108752920**

Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/22/2007
Comments: Report accepted, no comments. Sampling data shows petroleum hydrocarbon levels in the area of the former USTs reduced to non-detect (<50 micrograms per liter). Soil gas was sampled in only one of the two sampling points as groundwater levels had risen.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 03/09/2007
Comments: Consultant collected groundwater samples on 3/9/2007

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 05/08/2007
Comments: Report accepted

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/15/2007
Comments: Only groundwater monitoring conducting this event.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 08/03/2007
Comments: DTSC agreed to the well survey proposed to determine if groundwater pumping is occurring in the area. This information is needed to evaluate the four foot drop in water level as you proceed across the street. Additional sounding and sampling data is necessary to show that the groundwater plume is stable and that biodegradation is occurring.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 03/04/2008
Comments: Conference call held to discuss TPH results in downgradient monitoring well. Agreed to one more quarterly sampling result to assess conditions.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 03/20/2009
Comments: DTSC approves this report with modifications. DTSC disagreed that TPH detected in MW-5 is due to an offsite source and that the groundwater monitoring shoul dbe discontinued and the monitoring wells discontinued. DTSC required groundwater monitoring to continue on a semiannual basis for a minimum of one year to document sustainable decreasing or stable trends for contaminant concentrations in groundwater.

GIAMPOLINI PROPERTY (Continued) **S108752920**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 11/02/2010
Comments: A request to discontinue groundwater monitoring was denied. Requests for a workplan for additional plume delineation and appropriate destruction of lost groundwater monitoring wells were made. A request for existing submittal of soil gas data was made.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 12/23/2010
Comments: Groundwater sampling was completed.

Completed Area Name: PROJECT WIDE

Completed Date: 06/14/2011
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 01/25/2012
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 04/05/2013
Comments: Groundwater monitored this period continued to show low residual concentrations of hydrocarbons with a decreasing trend. Based on those results and completion of the remedial activities, DTSC is closing the site. No additional groundwater monitoring will be required and the land use restrictions under the Land Use Covenant (LUC) will be rescinded. DTSC requested a workplan for proper abandonment of all remaining groundwater monitoring and soil gas monitoring wells.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 11/23/2011
Comments: Groundwater sampling was completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 02/07/2012
Comments: Groundwater samples were collected earlier that previously scheduled.

GIAMPOLINI PROPERTY (Continued) **S108752920**

This was agreed upon at the January meeting.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 01/25/2013
Comments: Groundwater samples were collected.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 06/01/2011
Comments: DTSC did not agree with the consultant's recommendation for discontinuation of groundwater monitoring. DTSC will require additional groundwater monitoring or investigation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Report
Completed Date: 03/12/2012
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/12/2012
Comments: Two soil gas samples were collected from the 5 foot depth below ground surface and tested for benzene. The concentrations were 2.2 and 23 micrograms per cubic meter which is below the California Human Health Screening Level (CHHSL) for benzene which is 36.2 micrograms per cubic meter for residential land use. DTSC approved a recommendation to discontinue the requirement for soil gas monitoring at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 11/13/2012
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 07/24/2013
Comments: All monitoring wells for groundwater and soil vapor probes at the Site were destroyed. This included three groundwater monitoring wells and two soil vapor probes. All wells were overdrilled and grouted except well MW-5 which was pressure grouted.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Workplan
Completed Date: 05/22/2013
Comments: The workplan describes procedures for abandonment of three groundwater monitoring wells and two soil vapor monitoring probes. Each well and probe will be drilled out and sealed with cement grout. Following abandonment of these wells and probes, there will be no

GIAMPOLINI PROPERTY (Continued) **S108752920**

remaining wells or probes at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 04/05/2013
Comments: The report documented compliance with the land use restrictions under the Land Use Covenant (LUC). Groundwater monitoring was completed; groundwater was not extracted and used for any purpose except groundwater monitoring.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/26/2013
Comments: Monitoring wells at the site were drilled out except for one well which was pressure-grouted due to being located within 2' of a water line in the street. The pressure-grouting was a change from the workplan so the consultant called received verbal approval for that change from the workplan from DTSC after calling from the field; under the well destruction permit, the consultant also called the county for approval of that change.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 08/12/2013
Comments: Estimated costs for regulatory oversight by DTSC for the 2013-14 fiscal year.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 06/30/2005
Comments: Voluntary Cleanup Agreement for characterization and cleanup of the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

GIAMPOLINI PROPERTY (Continued) **S108752920**

Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 08/11/2010
Comments: The estimated costs for DTSC's oversight for the fiscal year (7/1/2010-6/30/2011) is $6,410.00.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 01/10/2011
Comments: Groundwater samples were collected earlier that previously scheduled. This was agreed upon at the January meeting.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/30/2009
Comments: Annual cost estimate covers oversight expenses through 6/30/2010.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 09/29/2005
Comments: Agreement amended to correct site boundaries.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: California Land Reuse and Revitalization Agreement
Completed Date: 04/11/2006
Comments: Property owner entered into an California Land Reuse and Revitalization Act Agreement.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 12/01/2006
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 04/18/2013
Comments: This amendment to the California Land Reuse and Revitalization Act (CLRRA) agreement between the owner and DTSC added City Slicker Farms as a party to the agreement. The property was subdivided into two lots (Lot 1 and Lot 2) and City Slicker Farms purchased Lot L. The amendment also updated the legal description of the property.

Comments:	Demand letter #1
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	AB 389 Response Plan
Completed Date:	05/25/2006
Comments:	DTSC approved Cleanup Plan for implementation
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	08/25/2005
Comments:	Environmental Site Characterization Report sufficient to identify that there have been releases at the Stie. Environmental samples collected as part of a Phase II ESA indicate that portions of the site have been impacted by petroleum hydrocarbons (gasoline, diesel, mineral spirits and motor oil). Benzene, toluene, and ethyl benzene have been detected in soil vapor.

Completed Date: 06/15/2007

GIAMPOLINI PROPERTY (Continued) **S108752920**

Comments: Only groundwater monitoring conducting this event.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 08/03/2007
Comments: DTSC agreed to the well survey proposed to determine if groundwater pumping is occurring in the area. This information is needed to evaluate the four foot drop in water level as you proceed across the street. Additional sounding and sampling data is necessary to show that the groundwater plume is stable and that biodegradation is occurring.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 03/04/2008
Comments: Conference call held to discuss TPH results in downgradient monitoring well. Agreed to one more quarterly sampling result to assess conditions.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 03/20/2009
Comments: DTSC approves this report with modifications. DTSC disagreed that TPH detected in MW-5 is due to an offsite source and that the groundwater monitoring shoul dbe discontinued and the monitoring wells discontinued. DTSC required groundwater monitoring to continue on a semiannual basis for a minimum of one year to document sustainable decreasing or stable trends for contaminant concentrations in groundwater.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 11/02/2010
Comments: A request to discontinue groundwater monitoring was denied. Requests for a workplan for additional plume delineation and appropriate destruction of lost groundwater monitoring wells were made. A request for existing submittal of soil gas data was made.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 12/23/2010
Comments: Groundwater sampling was completed.

Completed Date: 01/25/2012
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 04/05/2013
Comments: Groundwater monitored this period continued to show low residual concentrations of hydrocarbons with a decreasing trend. Based on those results and completion of the remedial activities, DTSC is closing the site. No additional groundwater monitoring will be required and the land use restrictions under the Land Use Covenant (LUC) will be rescinded. DTSC requested a workplan for proper abandonment of all remaining groundwater monitoring and soil gas monitoring wells.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 11/23/2011
Comments: Groundwater sampling was completed.

Completed Area Name: PROJECT WIDE

Completed Document Type: Well Decommissioning Report
Completed Date: 03/12/2012
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

GIAMPOLINI PROPERTY (Continued) **S108752920**

Completed Document Type:	Monitoring Report
Completed Date:	03/12/2012
Comments:	Two soil gas samples were collected from the 5 foot depth below ground surface and tested for benzene. The concentrations were 2.2 and 23 micrograms per cubic meter which is below the California Human Health Screening Level (CHHSL) for benzene which is 36.2 micrograms per cubic meter for residential land use. DTSC approved a recommendation to discontinue the requirement for soil gas monitoring at the site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Phase 1
Completed Date:	11/13/2012
Comments:	Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Other Report
Completed Date:	07/24/2013
Comments:	All monitoring wells for groundwater and soil vapor probes at the Site were destroyed. This included three groundwater monitoring wells and two soil vapor probes. All wells were overdrilled and grouted except well MW-5 which was pressure grouted.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Well Decommissioning Workplan
Completed Date:	05/22/2013
Comments:	The workplan describes procedures for abandonment of three groundwater monitoring wells and two soil vapor monitoring probes. Each well and probe will be drilled out and sealed with cement grout. Following abandonment of these wells and probes, there will be no remaining wells or probes at the Site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Operations and Maintenance Report
Completed Date:	04/05/2013
Comments:	The report documented compliance with the land use restrictions under the Land Use Covenant (LUC). Groundwater monitoring was completed; groundwater was not extracted and used for any purpose except groundwater monitoring.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	06/26/2013
Comments:	Monitoring wells at the site were drilled out except for one well which was pressure-grouted due to being located within 2’ of a water line in the street. The pressure-grouting was a change from the workplan so the consultant called received verbal approval for that change from the workplan from DTSC after calling from the field; under the well destruction permit, the consultant also called the county for approval of that change.
Completed Area Name:	PROJECT WIDE

Region:	STATE
Facility Status:	**Open - Site Assessment**
Status Date:	07/21/2008
Global Id:	T06019741226
Lead Agency:	ALAMEDA COUNTY LOP
Lead Agency Case Number:	RO0002508
Latitude:	37.823125
Longitude:	-122.286483
Case Type:	Cleanup Program Site
Case Worker:	PK
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	NA
File Location:	Stored electronically as an E-file
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Diesel, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating
Site History:	From the 1940's to 1983, the site heat-treated metal products, and operated as a steel foundry from 1983 to 2002. A putty and paint factory also operated at the site unitl 1985. In 1988 a soil investigation was conducted and included advancement of 4 exploratory soil borings (unknown depths and locations). Concentrations of ethanol, methanol, 1,1-dichloroethene (1,1,-DCE), and metals were detected in the samples. In March 2002, samples collected from four soil borings were reported to have elevated concentrations of total recoverable petroleum hydrocarbons (TRPH) and minor concentrations of BTEX. In April 2002, during advancement of seven soil borings, free floating oil was observed, and a waste oil percolaton well discovered. Remedial soil removal activites were conducted in April and May 2002 in the vicinity of the percolation well. Grab groundwater sample analytical results reported elevated concentrations of BTEX, 1,2 - DCE and napthalene. In May 2003, 11 soil borings were advanced to depths of approximateley 16 to 20 feet bgs and three temporary piezometers installed. Groundwater flow direction was estimated to be west to northwest. Soil sample analytical results reported elevated concentrations of total extractable petroleum hydrocarbons (TEPH) and VOCs. TPH and dissolved metals were reported in grab groundwater samples. Between September 2003 to January 2004, remedial soil excavation activites were conducted to remove soil containing TEPH as hydraulic oil above 500 mg/kg. Approximatley 3,202 cubic yards of soil was excavated and disposed of off-site. In April 2005, site investigation activities were conducted to evaluate the effectiveness of the remedial soil excavation activities and included advancement of 15 soil borings primarily around the perimeter of the site and soil gas samples. In September 2008, nine soil borings (EB1 through EB9) were advanced at both on and off-site locations to further characterize the vertical and lateral extent of COCs in soil and groundwater. Soil samples were analyzed for TEPH as diesel-range and motor oil-range petroleum hydrocarbons and halogenated VOCs.

Background Info:	Prior to Alameda Chemical and Scientific (ACS) occupancy, Stiles Paint Company occupied the site. Stiles Paint manufactured architectural paint and was in business in Oakland from 1976 to 1982. Chemicals used were mineral spirits, calcium carbonate, tar, latex paint, linseed oil, ethylene glycol, and pigment binder. In response to a complaint filed by a prospective buyer, the site was inspected. Drums of material were stocked up to 8 drums high and the soil discolored with solvent and resins. The site also had an underground tank that contained paint thinners, or other solvents.
Comments Date:	01241985
Comments:	Certified Site. Cleanup of the site started on October 3, 1984,

Potential Contaminants of Concern: Lead, Diesel, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History: An 8,000-gallon gasoline UST was removed from the eastern edge of the parcel in November 1994; is reported to have stored gasoline, and closure sampling is reported to have found no detectable concentrations; data to confirm this is not available. A 2,500-gallon UST, installed between 1906 and 1912, and presumed to be a fuel oil or kerosene UST, was removed in August 1995. Residual fuel oil was removed during the UST removal, and 54 tons of soil was excavated afterwards. Six soil bores (B-1 to B-6) and a six-inch diameter well MW-1 / EW-1 were installed in November 1995. In September 1999 three soil bores (SB-1 to SB-3) were installed near a recently discovered sump containing oily sludge near the eastern property line. In May 2003, 10 Geoprobe bores (B-1 to B-10) were installed across the site. In August 2005 a sump on the western portion of the site was discovered and removed during site demolition. A third UST was discovered at the time of sump removal; however, was left in-place.

OWENS MORTGAGE INVESTMENT (Continued) **S104566931**

In October 2007 the third UST was removed from the site after a Geophysical survey had been conducted and relocated the UST and also found remaining product piping. The UST appears to have held diesel and was buried at a depth of 9 feet. In December 2007 10 soil bores (KB-1 to KB-10) were installed at the site. Six vapor points (SV-1 to SV-6) were also installed. In February 2009 seven CPT bores were advanced in order to help characterize the subsurface and to determine appropriate screening intervals for five monitoring wells, installed shortly after and immediately adjacent to the CPT bore locations. One round of groundwater sampling was conducted in April 2009. Onsite 156 foot depth water supply well discovered prior to May 15, 2012 with a currently undetermined thickness of Free-Phase Product.

Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at https://ehgis.acgov.org/dehpublic/dehpublic.jsp. Site is a scap metal recycling facility. SWIs found TPH and VOC impacts in soil and groundwater. A 1998 RBCA identified risks for volatilization from groundwater to both onsite and down gradient receptors. Concentrartions in soil include 4,300 mg/kg TPHd, 4,500 mg/kg TOG,

Site History:	Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at https://ehgis.acgov.org/dehpublic/dehpublic.jsp. Two USTs were removed from the site in April 1990. In May and October 1990, several borings and monitoring wells were installed. MW-1 and MW-2 have been reported to contain over 3 feet of free product. In January 1991, a work plan was submitted and subsequently approved, but scope of work of never implemented. NOV's sent to RP with no response. Skimmer used to extract free product. Two extraction wells and a trench used for groundwater extraction. Some soil bioremediated.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: * Solvents, Other Metal, Gasoline, Kerosene, Waste Oil / Motor / Hydraulic / Lubricating
Site History: Two underground storage tanks (USTs) were removed from the Site in the later 1980s. Soil sample analytical results detected total petroleum hydrocarbons (TPH) as gasoline and benzene. It is reported that this UST contained Great Western Solvent 225 for an unspecified period of time. Groundwater samples obtained from a well located in the UST area (referred to as Former Well) detected a variety of petroleum hydrocarbons, volatile organics, and barium. In 2002 , borings and monitoring wells were installed at the site. In a risk assessment performed in 2003 for the site Fugro stated that residual contaminants do not pose a significant risk to human health or the environment. Currently awaiting well decommissioning for case closure.

RB Case Number: Not reported
LOC Case Number: RO0003068
File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Diesel, Other Petroleum
Site History: A 2002 Phase I Environmental Assessment found that the site had been a gasoline service station between approximately 1947 and 1969. A 2004 subsurface investigation conducted a geophysical survey and found a generalized disturbed signature beneath the site. Five soil bores were also installed and found "low to moderate" concentrations of TPH, BTEX, and MTBE, generally below regulatory thresholds. Two petroleum hydrocarbon hotspots were encountered during site grading, up to 20 eight-foot deep soil bores were installed around Hotspot #1, soil samples collected, and ultimately approximately 25.5 tons of impacted soil was excavated off hauled. Hotspot #2 is described as a fill pit presumed to be a location of a former UST, soil samples were collected, and ultimately approximately 127.1 tons of soil was excavated and off-hauled. Concentrations up to 310 mg/kg TPHg, 629 mg/kg TPHd, 1,700 mg/kg TPHmo, <2.5 mg/kg benzene, <2.5 mg/kg toluene, 3.7 mg/kg ethylbenzene, 5.3 mg/kg total xylenes, and <2.5 mg/kg MTBE were encountered in the two hotspot locations. The chromatographic pattern for the TPHg and TPHd analysis are reported not to match standard patterns. One UST of unknown size was encountered and abandoned in-place during installation of the fire service as the site continued construction. The UST was cleaned and backfilled. One soil sample was collected at a depth of approximately 5.5 ft bgs at a location approximately 2 feet east of the UST.
Analysis of the soil sample indicated that 980 mg/kg TPHg, 870 mg/kg TPHd, 3,300 mg/kg TPHmo, <0.77 mg/kg benzene, 2.3 mg/kg toluene, 1.5 mg/kg ethylbenzene, 11.4 mg/kg total xylenes, and <0.77 mg/kg MTBE were present; additional analytes were also detected.

CHUNG PROPERTY / LANE METAL FINISHERS (Continued) **S108430860**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 12/09/2009
Comments: Remedial investigation of groundwater and soil vapor in the vicinity of the site and soil sampling of the adjacent property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 01/22/2010
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 01/28/2011
Comments: Soil, groundwater and soil gas were investigated within the site boundary. Groundwater investigations were also conducted on several locations along San Pablo Avenue and Market Street. Primary contaminants found include trichloroethene (TCE) and its breakdown products; cis-1,2-dichloroethene (cis-DCE), trans-1,2-Dichloroethene (trans-DCE) and vinyl chloride.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/26/2008
Comments: Indoor air sampling at the Lane Metals site conducted with 23 Summa canisters placed in 8 residences, one day care facility, one business, two crawl spaces under homes and four outdoor locations. Seven of these locations had duplicate canisters.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 01/28/2011
Comments: Soil, groundwater and soil gas were investigated within the site boundary. Groundwater investigations were also conducted on several locations along San Pablo Avenue and Market Street. Primary contaminants found include trichloroethene (TCE) and its breakdown products; cis-1,2-dichloroethene (cis-DCE), trans-1,2-Dichloroethene (trans-DCE) and vinyl chloride.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/26/2008
Comments: Indoor air sampling at the Lane Metals site conducted with 23 Summa canisters placed in 8 residences, one day care facility, one business, two crawl spaces under homes and four outdoor locations. Seven of these locations had duplicate canisters.

Potential Contaminants of Concern:	Diesel, Gasoline
Site History:	The site is located at 2500 Poplar Street in Oakland, California. The site is situated on the southern site of 26th Street between Poplar and Union Streets in Oakland. The site has been historically operated

OAKLAND YARD (Continued) **S101624379**

as a truck maintenance, fueling, and dispatch facility. On August 2, 1994, CNC Services of Antioch, California removed three underground storage tanks (USTs) from two excavations at the site, consisting of one 1,000-gallon and two 4,000-gallon single-walled steel tanks. According to Matheson Trucking, none of the USTs were used by them and were already in-place prior to their occupancy in 1972. It is assumed that the USTs stored either gasoline or diesel fuel. Soil sample analytical results detected concentrations of TPH-d up to 44 mg/kg and TPH-g at concentrations up to 1,360 mg/kg in soil sample West Tank #4. Benzene was detected above the laboratory reporting limit of <0.15 mg/kg in soil sample West Tank #4. Groundwater sample analytical results detected TPH-d, TPH-g, and benzene at concentrations of 140 g/L, 60 g/L, and <0.3 g/L, respectively. On January 29, 1996, Hageman-Aguiar, Inc. installed two shallow groundwater monitoring wells, MW-1 and MW-2, in the vicinity of the former UST excavations. During the last two quarters in September 1997, gasoline and diesel range hydrocarbons were not detected above the laboratory detection limit in the groundwater samples collected from the monitoring wells. On September 27, 1999, Eureka Builders of Carson City, Nevada, removed four USTs from a common excavation located at the site. The tanks consisted of one 7,000-gallon diesel, one 4,000-gallon diesel, one 4,000-gallon gasoline, one 550-gallon waste oil UST. Soil sample analytical results detected TPH-g, TPH-d, TPH-mo, TOG, and benzene at concentrations of 73 mg/kg, 760 mg/kg, 2,000 mg/kg, 1,600 mg/kg, and 0.77 mg/kg, respectively. A groundwater sample collected from the excavation pit detected TPH-g, TPH-d, TPH-mo, benzene, and MTBE at concentrations 890 g/L, 3,900 g/L, 1,600 g/L, 2.2 g/L, and <5.0 g/L, respectively. On April 18, 2000, two groundwater monitoring wells (MW-3 and MW-4) were installed at the site. Soil sample analytical results detected TPH-mo at a concentration 220 mg/kg. Groundwater sample analytical results, collected on August 6, 2009, detected TPH-d at a concentration of 500 g/L in a groundwater sample collected from MW-4.

CA WDS:
Facility ID: San Francisco Bay 01I005913
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

OAKLAND YARD (Continued) **S101624379**

Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	2
Facility Telephone:	5108930431
Facility Contact:	VELASCO MARK
Agency Name:	MATHESON ROBERT B
Agency Address:	PO Box 970
Agency City,St,Zip:	Elk Grove 957590970
Agency Contact:	LOCKHART LARRY

Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	Not reported
POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Case Worker:	PK
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	01-2249
LOC Case Number:	RO0000292
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel
Site History:	In December 1996 one 4,000-gallon single wall fiberglass UST that stored heating oil was removed from the site. Elevated concentrations of petroleum hydrocarbons were detected in soil and approximately 4 inches of floating product, reported as diesel fuel, was floating on top of the groundwater in the excavation pit. Five groundwater pumping events totaling approximately 21,800 gallon of contaminated groundwater was removed from the excavation and approximately 130 cubic yards of soil was over-excavated. In January 1997, ACC Environmental installed an observation well in the tank backfill. Groundwater sample analytical results detected significantly elevated concentrations of petroleum hydrocarbons as diesel (130,000 ug/l) and BTEX concentrations of benzene = 3.3 ug/l, toluene 4.7 ug/l, ethylbenzene = 9.6 ug/l, xylenes = 40 ug/l. ACC concluded that the elevated concentrations of TPHd were likely a result of turbidity in the sample since no evidence of free product was observed in the well. ACC recommended that an additional groundwater sample be collected and field filtered prior to analysis by the laboratory for TPHd, and oxygen releasing compound be injected into groundwater at the observation well to enhance natural biodegradation of residual diesel constituents. ACEH concurred with ACC that the TPHd result may be skewed high and requested an additional groundwater sampling event be conducted by June 1997.Results of the additional groundwater monitoring event were never submitted to ACEH. A Notice of Violation was issued by ACEH LOP on July 24, 2009 for failure to upload data and documents.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: Previous operations may have caused releases. Preliminary endangerment assessment required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 09/01/1983
Comments: This certification was confirmed by a report prepared by the Auditor General. The Auditor General conducted an audit of the Department's records to confirm a list of sites where the Department was involved in the cleanup and the cleanup had been completed. This Auditor General list became the basis for our historical certification information. Many of the sites on this list were handled by our Surveillance and Enforcement Staff. Much of this work was in response to complaints from the public or reports from industry and the response action may have only addressed the immediate problem and not the entire facility.

Description:	A single-story brick warehouse building constructed sometime between 1912 and 1930 occupies a majority of the 0.13-acre site property. The use of the building prior to 1958 is unknown. The current owner of the site property has been the Northwestern Venetian Supply Company (Northwestern) since 1958. Northwestern manufactured and painted metal blinds onsite from 1958 until July 1987 using chemicals that included oil-based paints, lacquers, thinners, and the volatile organic compounds (VOCs) trichloroethylene (TCE) and 1,1,1-trichloroethane (1,1,1-TCA). The property was vacant between the late 1980s and 2001. An ornamental iron gate manufacturer then leased and conducted operations onsite from 2001 to 2004. The property has remained vacant since February 2004.

Alternate Address:	1218 24TH STREET
Alternate City,St,Zip:	OAKLAND, CA 94607
Background Info:	A single-story brick warehouse building constructed sometime between 1912 and 1930 occupies a majority of the 0.13-acre site property. The use of the building prior to 1958 is unknown. The current owner of the site property has been the Northwestern Venetian Supply Company (Northwestern) since 1958. Northwestern manufactured and painted metal blinds onsite from 1958 until July 1987 using chemicals that included oil-based paints, lacquers, thinners, and the volatile organic compounds (VOCs) trichloroethylene (TCE) and 1,1,1-trichloroethane (1,1,1-TCA). The property appears to have been vacant between the late 1980s and 2001. An ornamental iron gate manufacturer then leased and conducted operations onsite from 2001 to 2004. The chemical use(s) associated with the ornamental iron gate manufacturer is unknown. The property has remained vacant since February 2004.

Description: Lane Metal Finishers and Cal-Tech Metal Finishers (Cal-Tech) operated at the Site from 1947 to 2000. Cal-Tech operations included polishing, electroplating, anodizing and plating of metal parts. Chemicals historically used at the Site include caustic liquids, sodium, hydroxide, hydrochloric acid, nitric acid, sulfuric acid, chromic acid, chromic trioxide, sodium cyanide, cadmium, copper cyanide, potassium cyanide, silver cyanide and plating solutions containing variety of metals. The waste generated at the Site included aqueous waste containing hexavalent chromium and sludges containing metals.

CAL TECH METALS (Continued) **S110326384**

Completed Document Type: Fieldwork
Completed Date: 03/02/2007
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 01/31/2008
Comments: Soil, groundwater and soil gas was investigated within the site boundary and on several locations along 30th and 31st Streets. Trichloroethene (TCE) concentrations up to 39,000 ppm were found in the soil down to 20 feet below ground surface (bgs) in the courtyard area in the eastern part of the site, and to 10 feet bgs in the western part of the site. Lead concentrations up to 2,470 ppm and nickel up to 5,180 ppm were found under the buildings. There is no indication that metal contamination has moved outside the Site boundaries. TCE, cis 1,2 DCE and vinyl chloride were detected in groundwater in the courtyard up to 61 ppm, 23 ppm and 0.67 ppm, respectively. The highest concentrations VOCs, in the soil, soil gas and groundwater were found in the courtyard. TCE or any other VOCs were not detected above screening levels in any of the other off-site soil gas borings on 30th Street, 31st Street or on the adjacent residential property east of the Site. Soil gas results suggest that the risk of soil gas intrusion is isolated to the courtyard area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 07/01/2005
Comments: The soil and groundwater samples were analyzed for volatile organic compounds (VOCs) and nickel. The results showed TCE up to 20 mg/kg and nickel up to 83 mg/kg in soil. The groundwater analytical results showed TCE up to 61 milligrams per liter (mg/l).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 06/21/2007
Comments: In February and March 2007, DTSC conducted soil, groundwater, and soil gas testing on the property and along 31st and 30th Streets to determine the extent of the contamination. Based on the preliminary results, DTSC needs to collect additional soil gas samples in the area near the north east corner of the property to better understand extent of the contamination in that area.

Completed Area Name: PROJECT WIDE

Completed Date: 05/07/2008
Comments: Sampling completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 08/21/2008
Comments: Trichloroethylene (TCE) related to the Caltech Site was found in indoor air at very low concentration (2 micrograms/cubic meter (ug/m3)). The State of California Human Health Screening Level (CHHSL) for TCE is 1.2 ug/m3. This is effectively the ono action levelo for a lifetime exposure in a residence, below which DTSC would not undertake any measures to reduce exposure. DTSC believes that even these very low concentrations will be eliminated when we implement the expedited cleanup at the Caltech Site later this year.

Completed Area Name: PROJECT WIDE

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 07/01/2002
Comments: In 2001, USEPA contractor removed 27,425 gallons of liquid chemicals, materials in the containers, debris and contaminated equipment and decontaminated the interior of the buildings.Soil sampling was conducted chromium, nickel, lead and cyanide were detected in soil up to 865 milligrams per kilogram (mg/kg), 7,320 mg/kg, 6,660 mg/kg and 994 mg/kg respectively. Trichloroethylene (TCE) was also detected in soil up to 7.3 mg/kg at 3 feet bgs.

Comments: Community Profile completed.

Completed Area Name: PROJECT WIDE

CAL TECH METALS (Continued) **S110326384**

Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 02/08/2007
Comments: Workplan to conduct soil, soil gas and groundwater investigation approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 03/02/2007
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 01/31/2008
Comments: Soil, groundwater and soil gas was investigated within the site boundary and on several locations along 30th and 31st Streets. Trichloroethene (TCE) concentrations up to 39,000 ppm were found in the soil down to 20 feet below ground surface (bgs) in the courtyard area in the eastern part of the site, and to 10 feet bgs in the western part of the site. Lead concentrations up to 2,470 ppm and nickel up to 5,180 ppm were found under the buildings. There is no indication that metal contamination has moved outside the Site boundaries. TCE, cis 1,2 DCE and vinyl chloride were detected in groundwater in the courtyard up to 61 ppm, 23 ppm and 0.67 ppm, respectively. The highest concentrations VOCs, in the soil, soil gas and groundwater were found in the courtyard. TCE or any other VOCs were not detected above screening levels in any of the other off-site soil gas borings on 30th Street, 31st Street or on the adjacent residential property east of the Site. Soil gas results suggest that the risk of soil gas intrusion is isolated to the courtyard area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 07/01/2005
Comments: The soil and groundwater samples were analyzed for volatile organic compounds (VOCs) and nickel. The results showed TCE up to 20 mg/kg and nickel up to 83 mg/kg in soil. The groundwater analytical results showed TCE up to 61 milligrams per liter (mg/l).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 06/21/2007
Comments: In February and March 2007, DTSC conducted soil, groundwater, and soil gas testing on the property and along 31st and 30th Streets to determine the extent of the contamination. Based on the preliminary results, DTSC needs to collect additional soil gas samples in the area near the north east corner of the property to better understand extent of the contamination in that area.

Comments:	Sampling completed.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report
Completed Date:	08/21/2008
Comments:	Trichloroethylene (TCE) related to the Caltech Site was found in indoor air at very low concentration (2 micrograms/cubic meter (ug/m3)). The State of California Human Health Screening Level (CHHSL) for TCE is 1.2 ug/m3. This is effectively the ono action levelo for a lifetime exposure in a residence, below which DTSC would not undertake any measures to reduce exposure. DTSC believes that even these very low concentrations will be eliminated when we implement the expedited cleanup at the Caltech Site later this year.

Waste code:	331
Waste name:	331
Waste code:	551
Waste name:	551
Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are

CAL TECH METAL FINISHERS INC (Continued) **1000133512**

transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

LOC Case Number:	RO0000378
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	A WO and a gasoline UST were removed from the site in 1991. Visual observations of the removed USTs revealed the presence of numerous holes in both tanks. Subsurface investigations followed revealing that free phase petroleum hydrocarbons are present in groundwater. In 1994, an interim correction action was initiated. However, free phase product is still present at the site. In June 1999 three groundwater monitoring wells were installed. Free product was noted in each of the wells at thicknesses of up to 10.6 feet. Three additional monitoring wells were installed in 2001. Soil vapor sampling was performed in 2009 revealng levels of soil gas below residential ESLs indicating an incomplete indoor air pathway. A FS/CAP submitted to address free phase product removal beneath the Site. RP changed consultants & FS/CAP not approved for implementation. New WP submittal to evaluate building perimeter TPH impacts being evaluated.

Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Historical Generators:

Date form received by agency:	02/12/1986
Facility name:	MORGAN ENVIRONMENTAL SERVICES
Classification:	Small Quantity Generator

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

MORGAN ENVIRONMENTAL SERVICES (Continued) **1000190324**

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

Registry ID: 110002643088

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker:	MD
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	NA
LOC Case Number:	RO0002520
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Gasoline, Heating Oil / Fuel Oil
Site History:	Two USTs (550- and 1,000-gallon) were removed in May 2002; presumed to have been used for heating oil. Seven Geoprobe soil bores were installed in May 2007. Trace concentrations were detected in soil; however, TPHg and BTEX compounds were encountered in the grab groundwater samples at concentrations of concern. Removal records (1981) for two additional 1,000-gallon USTs and two dispensers were thereafter uncovered; however, the exact locations are unknown, but are presumed to be in the parking lot to the rear of the building. Groundwater flow appears to be directly beneath the site building; additional work, including a vapor intrusion survey, is pending.

RB Case Number:	01-2319
LOC Case Number:	RO0000503
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel
Site History:	The site is situated beneath Highway 580 in an industrial area of Oakland. The USTs were located between freeway columns. On October 19 and 20, 1995 two USTs (one-4,000-gallon gasoline and one 7,000-gallon diesel) were removed from the site. Confirmation samples contained 64,000 mg/kg TPHd (dispenser sample) and 560 mg/kg TPHoil. Tank pit water samples contained 170 g/L TPHoil and 2,000 g/L TPHd. No benzene was detected in any sample. MTBE was detected in the water sample collected from the gasoline UST excavation at a concentration of 260

OAKLAND (Continued) **S101624333**

g/L. The pea gravel was sampled and reused. A small portion of soil (20.6 tons) was removed from the site. Two soil borings were advanced downgradient of the USTs on February 8, 1996. Soil samples contained 1,200 mg/kg TPHoil in TW-1 and groundwater samples contained 2,300,000 g/L TPHoil from TW-2. TPHd was not detected with a reporting limit of 62,500 g/L. TW-2 is located at a freeway column for Highway 580. On July 29, 1997, six borings were advanced four of which were converted to monitoring wells. Total oil and grease was detected in soil at a maximum concentration of 5,200 mg/kg. Tetrachloroethene was detected at 0.03 mg/kg in sample B4-5 and 0.025 mg/kg 1,2,4 trimethylbenzene and 0.0078 mg/kg 1,3,5 trimethylbenzene were detected in B4-10. No other VOCs were detected in soil. Benzene was detected in a groundwater sample from MW-1 at a concentration of 1.1 g/L. No TPHg, TPHd, TOG, MTBE or other VOCs were detected. Subsequent groundwater monitoring occurred for a total of 3 quarters. MTBE was detected at 95 ppb, no other constituents were detected in the wells. Well MW-2 was located less than 15 feet in the downgradient direction from TW-2. Groundwater samples from this well were below the detection limit for TPHg, TPHd, BTEX, MTBE indicating that the contamination is not laterally extensive. The monitoring wells were last sampled March 13, 1998 and shortly afterward destroyed. No monitoring well destruction report was provided at the time of decommissioning.

File Location:	Not reported
Potential Media Affect:	Soil
Potential Contaminants of Concern:	Lead, Benzene, Crude Oil, Diesel, Ethylbenzene, Gasoline, Toluene, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating, Xylene
Site History:	The approximate 22-acre Yerba Buena/ East Bay Bridge Center (YB/EBBC) site is bounded by West MacArthur Boulevard to the south, Peralta Street and San Pablo Avenue to the east and Hollis Street to the west. The YB/EBBC property is commercially developed with approximately 200,000 sq ft of tilt-up single-story retail space and about 480,000 sq ft of paved parking. The YB/EBBC consists of four parcels and occupies pre-development regions known as former Area A and the southern portion of Area B. The separation of the former

YERBA BUENA - EAST BAY BRIDGE CENTE (Continued) **S112186514**

Areas A and B was the east-west trending Yerba Buena Avenue. Site cleanup criteria of 1,000 milligrams per kilogram (mg/kg) total oil and grease (TOG), 100 mg/kg total petroleum hydrocarbons as diesel (TPHd), 10 mg/kg TPHg, and 1 mg/kg benzene, toluene, ethylbenzene, and xylenes (BTEX) (combined) were established with Alameda County Health Care Services Agency (ACHA), predecessor to the Alameda County Department of Environmental Health (ACDEH) in January 1991. A 1992 revision to the clean up levels reduce the benzene concentration to non-detect. Clean up levels for metals were their respective Total Threshold Limit Concentrations (TTLCs). Site characterization studies were conducted from 1989 through 1991. The results of the soils investigations revealed the presence of concentrations of up to 14,000 mg/kg TPHo. Toluene and ethylbenzene were reported at concentrations up to 0.290 mg/kg and 0.019 mg/kg, respectively. The Concentrations of total petroleum hydrocarbons as gasoline (TPHg), TPHd, benzene, and xylenes were documented below the laboratory reporting limit for the site soils. Maximum metals concentrations included arsenic (As) up to 12 mg/kg, cadmium (Cd) 2.8 mg/kg, chromium (Cr) to 58 mg/kg, nickel (Ni) to 68 mg/kg, copper (Cu) to 640 mg/kg, lead (Pb) to 1,400 mg/kg, and zinc (Zn) to 270 mg/kg. Delineation of the lead impacted area indicated it was localized, and in June 1991, approximately 360 cubic yards (cu yds) of lead-impacted soil was excavated and transported to a US Ecology facility near Beatty, Nevada for disposal. Confirmation samples contained residual lead concentrations of up to 150 mg/kg. The excavation was backfilled with clean aggregate base import material. Two USTs were discovered during site grading activities in 1993. The two USTs were discovered on the western, SFTS-A, portion of the site. The SFTS-A USTs had capacities of 2,000 and 1,500 and were used for the storage of fuel oil. In 1994 the site received soil impacted with TPHd, TPHo and TOG from the greater (52 acres) EBC project site. The soil was placed in accordance with the Soil Containment Plan approved by ACEH and the RWQCB. A condition of the placement approval included the site receive a deed restriction. The soil placed at the site contained documented concentrations of up to 260 mg/kg TPHd, 4,400 mg/kg TPHo, and 18,000 mg/kg TOG. The site was subsequently capped with large tilt-up style slab-on-grade box stores and asphalt-paved parking with local raised-bed landscaping located within the parking area. The presence of the soil containment are was to trigger a deed restriction. The case will be closed upon execution of the deed restriction during 2013.

Environmental Interest/Information System
The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 05/18/2010
Comments: The Final Supplemental Site Characterization and Risk Evaluation Report summarized the results of site investigations and included a screening level risk evaluation. Based on the risk evaluation, it was concluded there is no significant human health risk with the current Site conditions and use, but there could be a significant risk should the site use change. A Land Use Covenant has been been put in place that restricts the use of the site. No further actions are required for the site except those required by the Land Use Covenant. Annual inspections are to be performed and inspection reports are to be submitted to DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 01/05/2010
Comments: DTSC determined that its approval of the Supplemental Site Characterization and Risk Evaluation Report, with the recommendation to place a land use covenant on the Site, was a Class 30 Categorical Exemption under the California Environmental Quality Act.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 02/04/2011
Comments: StorageMart, the site owner, completed the annual inspection and submitted the report required by Section 4.06 of the Land Use Covenant that is in place. Only minor cracking of asphalt and concrete pavement and the building slab were observed. No intrusive activities have occurred on the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 12/13/2006
Comments: The Phase I Environmental Site Assessment was submitted with the VCA Agreement as a final document. DTSC did not comment on it.

Completed Date:	04/09/2008
Comments:	Workplan approval letter signed April 9, 2008.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Risk Assessment Report
Completed Date:	01/05/2010
Comments:	The Supplemental Site Characterization and Risk Evaluation Report summarizes the results of all soil, grab groundwater, and sub-slab soil vapor sampling performed on the Site. The Report all includes a risk evaluation that considers potential risk to current workers, future workers, and hypothetical future residents should Site use change. The Report recommended no further action under the current land use with the exception of putting in place a land use covenant that restricts the use of the Site.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Community Profile
Completed Date:	02/26/2009

Completed Document Type:	Site Characterization Workplan
Completed Date:	12/25/2006
Comments:	Additional Soil and Groundwater Investigation Report was submitted as Final with the MOA application.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported

TKG CALIFORNIA STORAGE (Continued) **S108936104**

Completed Document Type: Site Characterization Workplan
Completed Date: 04/09/2008
Comments: Workplan approval letter signed April 9, 2008.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 01/05/2010
Comments: The Supplemental Site Characterization and Risk Evaluation Report summarizes the results of all soil, grab groundwater, and sub-slab soil vapor sampling performed on the Site. The Report all includes a risk evaluation that considers potential risk to current workers, future workers, and hypothetical future residents should Site use change. The Report recommended no further action under the current land use with the exception of putting in place a land use covenant that restricts the use of the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 02/26/2009

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 03/23/2012
Comments: An annual land use restriction monitoring inspection was performed and a report was submitted by the property owner as required by paragraph 4.06 of the land use covenant. The observations made during the inspection noted minor cracking in the asphalt and concrete pavement. No intrusive activities have occurred on the property. DTSC approved the annual report.

File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel, Gasoline
Site History:	Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at https://ehgis.acgov.org/dehpublic/dehpublic.jsp. May 13, 1992, Four USTs (One 8,000-gallon diesel, one 8,000-gallon gasoline, one 500-gallon solvent and one 500-gallon waste-oil) were removed from the site. Maximum concentrations in soil sidewall samples were 26,000 mg/kg TPHd, 5,100 mg/kg TVHg, and 1.4 mg/kg benzene. The groundwater sample contained 12,000 g/L TPHd, 190 g/L TVHg and 23.6 g/L lead. A work plan for subsequent investigation was requested in a May 4, 1993 letter. Directive letters and a NOV resulted in a work plan submitted in 2011 and executed in 2012. The 2012 investigation found little of note but was unable to sample the former pit area along side bldg.

Completed Document Type: Site Screening
Completed Date: 05/26/1993
Comments: Completed Site Screening. Available information indicates that four underground storage tanks (UST) formerly located along the west side of the storage building, were removed in May 1992. Soil and groundwater sampling was conducted in March 1993 in conjunction with CalTrans activities and revealed the presence of the following contaminants in soil: total Petroleum Hydrocarbons (TPH) as diesel - 2.1 ppm; total recoverable petroleum hydrocarbons (TRPH) as high as 27.6 ppm; toluene as high as 26 ppb; and lead as high as 220 ppm. Groundwater sample analyses showed non-detectable levels of contamination.

Description: The 7.559-acre site is located approximately 0.25 mile south of the Freeway 580 and 80 interchange bordered by Wood and 34th, 28th and Cypress, and Willow and 26th St., in the City of Oakland, Alameda County, California. The three block area that constitutes the site has been developed commercially, including a recycling center, trucking company, and other businesses.
The Department of Defense (DoD) began occupation of the property in 1942 with the acquisition of 7.559 accres by four leases from several sources and a donated revocable permit. Warehouse and office buildings were constructed prior to DoD use. The site was used as an open storage yard by the Army Air Force during WWII. The 7.56 lease acres were cancelled and the revocable permit was terminated during 1945 and 1946. Per this revocable permit the U.S. was to remove any paving done on the permitted parcels of land. The land is currently owned by several private businesses. The property is currently under investigation to determine the Potential Responsible Party (PRP) and what, if any, actions need to be taken for remediation.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Amendment - Order/Agreement
Completed Date:	01/07/1999
Comments:	Amendment to the May 10, 1994 VCA, which allows work to continue under Chapter 6.5 of the Health and Safety Code.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Plan
Completed Date:	08/14/1995
Comments:	The Feasibility Study/Remedial Action Plan (FS/RAP) requires that a Preliminary Endangerment Assessment (PEA) be conducted. Once the PEA is completed, a recommendation following the approved alternatives in the FS/RAP will be implemented.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation / Feasibility Study
Completed Date:	07/30/1995
Comments:	RIFS approved. Site investigation activities, performed prior to the 5/10/1994 VCA, were reported in the oSite Investigation Report u Area 5o dated August 1992. The RI/FS was approved on July 30, 1995 when the Remedial Action Plan Was approved. Soil sampling detected petroleum hydrocarbons, mercury, and arsenic.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Amendment - Order/Agreement
Completed Date:	08/15/2002
Comments:	Amendment to the 5/10/1994 VCA to amend Section 3.16, "Payment" and Section 3.35, "Time Periods".

Case Type:	Cleanup Program Site
Case Worker:	PK
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	NA
File Location:	Stored electronically as an E-file
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Dichloroethene (DCE), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at https://ehgis.acgov.org/dehpublic/dehpublic.jsp. The site is located at 2221 Union Street in Oakland, California, bordered by Union Street to the east and Poplar Street to the west, between West Grand Avenue and 25th Street. On June 22, 1999, Aqua Science Engineers, Inc. installed a boring in which contamination was verified. In July 1999, additional borings were installed at the site, followed by monitoring well installations (MW-1 through MW-3) in August 1999. In October 1999, a fourth monitoring well was installed. In November 1999, approximately 24 cubic yards of impacted soil was excavated from the site. Ten additional borings were installed in August 2002 to delineate the vertical and lateral extent of contamination. In March 2006, four additional borings were installed at the site to further investigate that lateral and vertical extent of contamination present near previously installed boring BH-O. The 2006 investigation found up to 440 ug/L PCE and 190 ug/L TCE.

Site History:

Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at https://ehgis.acgov.org/dehpublic/dehpublic.jsp. Site History and Description of Corrective Actions: The former Peralta Street Right Of Way (ROW) is a one-block-long northeast trending alley bounded by Emery Street to the southwest and by San Pablo Avenue to the northeast. The approximately 570-foot long private drive is approximately +-acre in area and is situated at the southeastern corner of the 51-acre retail and residential redevelopment project named the East Baybridge Center (EBC). Due to the size and history of the EBC property, Catellus Land Development Corporation (Catellus), the EBC developer, used three areas transected by Yerba Buena Avenue and Hollis Street to aid with the geographic distinction during the environmental characterization of the EBC development. The portion of the EBC property east of Hollis Street and south of Yerba Buena Avenue was designated Area A; the area east of Hollis Street and north of Yerba Buena Avenue was designated Area B; and the area west of Hollis Street was designated Area C. These area designations were used throughout EBC site redevelopment. Area A of the EBC project consisted of Santa Fe Terminal Services (SFTS)-Area A, Clipper Exxpress warehouse, LDS warehouse, and the segment of Peralta Street between San Pablo Avenue and Emery Street. The ownership of the Peralta Street ROW was transferred to Catellus by the City of Emeryville on April 14, 1992. Area B of the EBC project consisted of SFTS-Area B, and the Ransome Construction Company. Area C of the EBC project consisted of SFTS-Area C, Bashland, Bay Area Warehouse, and M and N Trucking Warehouse. The SFTS areas were operated by the railroad company and consisted of railroad tracks and sidings and open areas for the storage of rolling stock. Except for Peralta Street and Ransome, the facilities in areas A, B and C consisted of warehouse structures serviced by rail sidings alongside the buildings. Ransome was also serviced by a rail siding but lacked a large warehouse structure. Unimproved access roads typically paralleled the rail road tracks. ACEH case files for the sites within the EBC development consist of RO0000049 (Ransome), RO0000326 (Bashland), RO0000369 (Bay Area Warehouse and SFTS-Area C), RO0003092 (M and N Trucking Warehouse), RO0003093 (Clipper Exxpress, LDS, and SFTS Areas A and B), and RO0003111 (Peralta Street ROW). The Peralta Street ROW is currently owned by East Bay Bridge Retail LLC and occupies a portion of the EBC development having Assessors Parcel Number APN 49-619-6 in the City of Emeryville, California. Current development consists of paved private alley. The Peralta Street ROW was owned by the City of Emeryville and transferred to the Catellus Development Corporation (Catellus) in 1990. Catellus developed the Peralta Street ROW as part of the 51-acre EBC redevelopment project. Catellus merged with Prologis in 2005. The project at the time of the Prologis merger was identified as the East Bay Bridge Shopping Center. Catellus was subsequently renamed PAC Operating Limited Partnership, as subsidiary of Prologis. The ownership of the property was transferred to East Bay Bridge Retail LLC in 2011. Historical documentation indicates Peralta Street was in existence since before 1931. The land to the west of Peralta street was occupied in 1931 and 1940 by a vehicle storage and wrecking yard. A heating oil underground storage tank (UST) on the Peralta Street ROW was encountered in June, 1993 during preparation for site redevelopment. The tank was situated beneath the sidewalk within the EBC project

PERALTA STREET RIGHT OF WAY (Continued) **S113804509**

area. On June 7, 1993, a sample of the tank contents was profiled and the tank contents were consistent with diesel fuel or fuel oil. The tank, a 1,500-gallon heating oil UST

Local Agency: ALAMEDA COUNTY LOP
RB Case Number: 01-0505
LOC Case Number: RO0000347
File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Diesel
Site History: August 14, 1991 One- 1,000 gallon diesel UST was removed from the site. Soil samples indicated residual diesel and the area was overexcavated on September 5, 1991. Remaining concentrations of 86 ppm diesel in soil were overexcavated on October 15, 1991. Three groundwater monitoring wells were installed on-site in May 1995. The three subsequent monitoring events did not detect TPHg or BTEX in site groundwater. However, diesel was detected in two wells during the last monitoring event at concentrations of 400 g/L. The DTSC became the lead for the rest of the site that did not include the diesel UST. DTSC closed their portion of the site in 2007.

FORMER HALL PROPERTY (Continued) **S102792664**

under Chapter 6.5 of the Health and Safety Code.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 08/15/2002
Comments: Amendment to the 5/10/1994 VCA to amend Section 3.16, "Payment" and Section 3.35, "Time Periods".

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 03/21/1996
Comments: Amendment to the 5/10/1994 VCA to add to Section 2.2.1- site history and description, to add to section III, Exhibit C - a schedule, and to add to Section 3.3, Exhibit D- site requiring a PEA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 02/07/2007
Comments: Caltrans proposes in this letter to limit mitigation at the Former Hall Property to land use restrictions through a land use covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 06/03/2008
Comments: DTSC responded to Caltrans February 7, 2007 letter and conveyed that it would not accept Caltrans' proposal to limit action at the Former Hall Property to a Land Use Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 03/03/1997
Comments: Approved PEA. Soil samples detected oil and grease, volatile organic compounds (VOCs), and semi-volatile organic compounds (SVOCs). Groundwater monitoring detected similar compounds. Primary constituent of concern in groundwater is 1,1-dichloroethane. Groundwater monitoring is ongoing.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 06/21/2004
Comments: This report presents the results of a groundwater investigation conducted at the Former Hall Property.

Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	01-1045
LOC Case Number:	RO0000126
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	A subsurface investigation was conducted in August 1992, consisting of borings installed in the immediate vicinity of the existing USTs. Elevated concentrations of petroleum hydrocarbons were detected in soil samples. Two USTs were removed from the site on January 28, 1993. Petroleum impacted soil was present in the tank pit and the soils were over-excavated on January 29, 1993. Three groundwater monitoring wells were installed at the site. On May 10, 1994, Caltrans purchased the property as part of the Interstate 880 Cypress Freeway Reconstruction project and DTSC assumed lead agency role for cleanup of non-UST related contaminants at the site. Groundwater monitoring continued at the site until June 2004.

RANSOME COMPANY MAIN YARD (Continued) **1000384031**

RB Case Number: 01-1223
LOC Case Number: RO0000049
File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Polychlorinated biphenyls (PCBs), Lead, Zinc, Benzene, Diesel, Ethylbenzene, Gasoline, Heating Oil / Fuel Oil, Toluene, Waste Oil / Motor / Hydraulic / Lubricating, Xylene
Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at https://ehgis.acgov.org/dehpublic/dehpublic.jsp. The Alameda County Environmental Health case file for Ransome Company may contain files for the other East Baybridge Center redevelopment project including the following associated cases: Bay Area Warehouse/Santa Fe Terminal Services Area C (RO0000369), M&N Warehouse (RO0003092), Clipper Exxpress, LDS, and SFTS Areas A and B (RO0003093), and the Peralta Street Right Of Way (RO0003111). The Ransome Company site, formerly leased an approximately four and one-half- acre property within the 51-acre retail and residential redevelopment project named the East Baybridge Center (EBC). Due to the size and history of the EBC property, Catellus Land Development Corporation (Catellus), the EBC developer, used three areas transected by Yerba Buena Avenue and Hollis Street to aid with the geographic distinction during the environmental characterization of the EBC development. The portion of the EBC property east of Hollis Street and south of Yerba Buena Avenue was designated Area A; the area east of Hollis Street and north of Yerba Buena Avenue was designated Area B; and the area west of Hollis Street was designated Area C. These area designations were used throughout EBC site redevelopment. Sites occupying Area A of the EBC project consisted of Santa Fe Terminal Services (SFTS)-Area A, Clipper Exxpress warehouse, LDS warehouse, and the segment of Peralta Street between San Pablo Avenue and Emery Street. The ownership of the Peralta Street Right Of Way (ROW) was transferred to Catellus by the City of Emeryville on April 14, 1992. Area B of the EBC project consisted of SFTS-Area B, and the Ransome Construction Company. Area C of the EBC project consisted of SFTS-Area C, Bashland, Bay Area Warehouse, and M and N Trucking Warehouse. The SFTS areas were operated by the railroad company and consisted of railroad tracks and sidings and open areas for the storage of rolling stock. Except for Peralta Street ROW and Ransome, the sites in areas A, B and C consisted of warehouse structures serviced by rail sidings alongside the buildings. Ransome was also serviced by a rail siding but lacked a large warehouse structure. Unimproved access roads typically paralleled the rail road tracks. ACEH case files for the sites within the EBC development consist of RO0000049 (Ransome), RO0000326 (Bashland), RO0000369 (Bay Area Warehouse and SFTS-Area C), RO0003092 (M and N Trucking Warehouse), RO0003093 (Clipper Exxpress, LDS, and SFTS Areas A and B), and RO0003111 (Peralta Street ROW). The property is currently owned by PAC Residential Group, Inc. The portion of the EBC development comprising the Ransome site consists of two parcels having APNs 49-619-1 and 49-619-4 in the City of Emeryville, California. The site as currently developed consists of Bridgecourt, four three-story structures of 220 apartments, with a parking garage on the ground floor. End units of the residential structures consist of single story commercial suites. The Ransome site occupied the northwestern portion of Area B within the pre-EBC development. The approximate triangular-shaped site was situated near the southeast

RANSOME COMPANY MAIN YARD (Continued) **1000384031**

side of the existing Hollis and 40th Streets. Prior to its existing configuration, the northern portion of 40th Street was occupied by sets of rail tracks and an access road. The northern boundary of the Ransome site extended northward to the approximate centerline of the current 40th Street. The western site boundary extended westward into the Hollis Street right of way. The property was previously occupied by a Western Electric Company yard (1911). By 1930 Hutchinson Company operated an asphalt batch plant with a concrete UST for oil storage, asphalt kettles & mixer, and an asphalt tank.

Completed Document Type:	Removal Action Completion Report
Completed Date:	06/14/2011
Comments:	The remedial plan consisted of excavation and off-site disposal of soil containing constituents of concern exceeding the cleanup goals. Several pre-remediation activities were conducted prior to soil excavation, including updating plan documents by the contractor, permitting, locating utilities, fencing the area, and soil sampling for waste classification. Soil was excavated to approximately 3

UNITED STAMPING COMPANY (Continued) **S111022974**

feet bgs within the designated area. A total of approximately 115 cubic yards of soil classified as non-hazardous waste by Waste Management, Inc. were transported to and disposed at WMI?s landfill facility located at 10840 Altamont Pass Road in Livermore, California

Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp. The site is a senior residential board and care facility located at the corner of 40th Street and Horton Street in Emeryville, CA. Surrounding land use is commercial. Soils observed during the excavation were primarily clay. A heating oil underground storage tank (UST) was installed on the property at an unknown date. On June 18, 2008, the 500-gallon heating oil underground storage tank was removed from the property. The bottom of the tank was measured to be at 6.5 feet below ground surface (bgs). Product piping that extended from the top of the tank beneath the former building was not found. Prior to removal, residual product was pumped and the tank was triple rinsed. A water sample was also collected from tank rinsate. The tank was observed to be in poor condition, with at least one observable hole. Visible staining and odors were also noted in the soil underlying the tank. Groundwater was not encountered during the excavation. Soil samples were collected beneath the tank at each end (9006-N-8.5 and 9006-S-8.5) along with one four-point composite sample (9006-SP(A-D)) from the soil stockpile. Total Petroleum Hydrocarbons as diesel, motor oil, kerosene, and stoddard solvent were not detected in the two soil samples collected beneath the UST at a depth of 6.5 feet below surface grade (bgs). The soil samples were additionally analyzed for benzene, toluene, ethylbenzene, and xylenes (BTEX), methyl tertiary butyl ether (MTBE), and other volatile organic compounds (VOCs) and none were detected. A tank rinsate sample contained 1,600 parts per billion (ppb) TPH as motor oil, and was noted during analysis to also contain heating oil. The stockpile composite sample contained 5 ppm lead. The UST excavation was subsequently overexcavated to 8.5 for building construction. Additional confirmation sampling was not performed and the building was constructed over the UST location. It appears that residual contamination that may be present was removed to a depth of 8.5 feet bgs. Groundwater was not encountered during UST removal and overexcavation and groundwater analysis was not performed prior to redevelopment of the site. The site has been redeveloped and the closest downgradient accessible sampling location is approximately 95 to 100 from the former UST location so groundwater sampling is not possible at or immediately downgradient

WEYERHAEUSER CO (Continued) **S101630370**

of the former UST location. Heating oil typically contains trace to low levels of BTEX and overexcavation likely removed any contamination present to the 8.5 bgs depth. Therefore, additional characterization and groundwater sampling was not performed.

Completed Document Type: Remedial Investigation Report
Completed Date: 05/08/2000
Comments: Site Investigation Report presents results from investigation activities that included drilling 103 soil borings and collecting 32 grab groundwater samples from the borings. Petroleum hydrocarbons were detected in soil and groundwater and the source of release was identified as nearby gas stations and junk car storage. Polynuclear aromatic hydrocarbons, lead, and other metals were detected at concentrations exceeding human health risk-based screening levels. Low concentrations of volatile organic compounds were detected.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 05/08/2000
Comments: Site Investigation Report presents results from investigation activities that included drilling 103 soil borings and collecting 32 grab groundwater samples from the borings. Petroleum hydrocarbons were detected in soil and groundwater and the source of release was identified as nearby gas stations and junk car storage. Polynuclear aromatic hydrocarbons, lead, and other metals were detected at concentrations exceeding human health risk-based screening levels. Low concentrations of volatile organic compounds were detected.

Lead Agency:	ALAMEDA COUNTY LOP
Case Worker:	MD
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	01-2392
LOC Case Number:	RO0000398
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel, Gasoline
Site History:	Chromex ceased operations in January 1991. Facility closure activities started in April 1991, and included the removal of eight ASTs that had been located in either a below-grade concrete vault or an aboveground bermed area. The former below grade concrete vault was removed in April 1992, and 40 tons of soil with elevated metals, including chromium, was also removed. Four soil bores were installed in October 1992 to delineate the extent of chromium impacted soils about the vault and only several of the one foot samples contained metals values over potential regulatory concern. Grab groundwater was successfully collected in three of the four bores, all metals results were acceptable; however, several VOCs were detected and were attributed to offsite sources. In December 1994 six soil bores (SB-1 to SB-6) were installed, and three wells were installed (MW-1 to MW-3). Chromium, hexavalent chrome, and lead were detected in soil or groundwater, but below regulatory concern. HVOCs were also present and were ultimately attributed to offsite sources, with similar concentrations. As part of the closure activities a vertical honing pit was excavated in July 1995 and 75 cubic yards (112.36 tons) of associated soil were removed. Concentrations up to 870 ppm were left in place due to limitations imposed by the building and the sidewalk. In December 1996 well MW-4 was installed in proximity to the honing pit excavation. Three 550-gallon USTs (two gasoline, one diesel and / or motor oil) were removed in October 1995; existing well MW-1 was also used to monitor groundwater for these USTs. The excavation for these USTs was backfilled with imported soil and contaminated soil disposed of under manifest offsite. In 1997 a half buried AST was abandoned in-place; it may have been utilized for storm water. Well MW-3 was decommissioned under permit in February 1999. The three remaining wells were redeveloped and sampled in January 2007. All hydrocarbon concentrations were non-detectable; however, TPHmo was not analyzed for. Review of the well network does not appear to support downgradient delineation of a dissolved phase plume, and thus an understanding of the site hydrogeology appears to be inadequate. Wells at the site have not been surveyed to Geotracker standards. Wells MW-1 to MW-3 were originally installed to monitor the toxic portion of this site (Chromium, and other contaminants). Well MW-1 has been located in at least two different locations and is stated to be the well that is used to define the downgradient dissolved phase plume extent.. The most recent depicted position of well MW-1 appears to be west of the former USTs. Depending on the well network available (MW-3 was destroyed under permit) , groundwater is documented to flow to either the northwest or to the south. With either groundwater gradient, the well MW-1 appears to monitor a crossgradient position rather than a downgradient position. No soil analytical data has been collected for TPH gasoline, BTEX, MTBE, TPH diesel, or TPH motor oil outside the source area, thus a vapor intrusion and direct contact LTCP criterias cannot be evaluated. There are a series of reports that have not been submitted to ACEH or Geotracker. These missing reports are cited in several of the

CHROMEX (Continued) **1000334672**

available reports and may be useful to understanding the site. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: This site is projected to be remediated by the responsible parties with reimbursement to DHS for its oversight and monitoring costs. However, if the responsible parties are unable to fund the remediation activities, another source of funds will needto be identified.
Site Description: This site is plating facility which previously disposed of chromium waste to shallow wells onsite.

ELECTRO-COATINGS, INC (Continued) **S100833503**

Hazardous Waste Desc:	Hexavalent chromium has been detected in the subsurface soil and the ground water.
Threat To Public Health & Env:	This is a small site and the public health threat posed by the site is believed to be minimal. The site, which is located in an industrial area, is paved and has restricted access. There is salt water intrusion in the area and ground water is not used for drinking.
Site Activity Status:	Phase I soil and ground water sampling has been completed. Phase II sampling has not been initiated because the company declared bankruptcy. This site has been placed in the backlog due to the relatively low public health/environmental hazard.

Comments:	Chromium (VI) has been measured as high as 880 ppm in groundwater and TCE has been measured as high as 80 ppm in groundwater. Soil contamination with Chromium as high as 5200 ppm has been measured. A review of of a well inventory provided by the Alameda County Public Works Department revealed no groundwater use which would result in significant human exposure.

Description: The site is 3.08 acres and is located in the City of Oakland in Alameda County, CA. Two 10,000-gallon underground storage tanks (USTs), a pumping station, a diesel fuel dispenser, and two fill pipes were installed and used by the Santa Fe Land and Improvement Company prior to and after Department of Defense leased the property. The USTs were last used in June 1962 for diesel fuel storage and dispensing. A private individual currently owns the property and leases it to LDS Truck Lines and A.M. and S Transportation Company for use as a warehouse and truck distributing center.
On 15 October 1943, the War Department leased a total of 3.08 acres from the Santa Fe Land and Improvement Company. The 9th District's Transportation Officer used the site for warehousing facilities, trucking operations, and as a distribution center. The War Department terminated the lease on 15 June 1946 and the site reverted back to the Santa Fe Land and Improvement Company. In 1982 the property was sold to a private individual. There are no potential hazards related to previous DoD activities currently identified at this site.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Completed Date: 03/30/2010
Comments: CFA extension approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 09/10/1993
Comments: Investigation conducted by Penn Environmental. Soil samples had tetrachlorethylene (PCE) up to 0.14 milligrams per kilogram (mg/kg) and trichloroethylene (TCE) up to 0.19 mg/kg. Groundwater had PCE up to 8100 micrograms per liter (ug/L) and chloroform up to 2.3 ug/L. The report concluded that there had been an on-site release of PCE impacting groundwater, with evidence of off-site migration. DTSC did not oversee the investigation.

Completed Date: 04/06/2010
Comments: Soil, groundwater and soil gas at the Site are contaminated with tetrachloroethene (PCE), TPH Stoddard Solvent, TPH gas.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 08/30/2002
Comments: Site Screening approved 8/30/08. Removal action recommended.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 08/04/1993
Comments: Investigation conducted by Penn Environmental. Limited soil sampling detected tetrachloroethylene (PCE) at concentrations up to 4.6 milligrams per kilogram (mg/kg). Report recommended further investigation of soil and groundwater. DTSC did not oversee this investigation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/29/2010
Comments: Indoor air sampling completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 09/29/2010
Comments: Investigation didn't find the Harris Site contaminants of concerns, PCE,TCE or cis-DCE, in the indoor air or crawl space. However, low level concentration of vinyl chloride (VC) was detected in on residential unit. Due to the absence of VC in the crawl space or at the site soil, soil gas or groundwater, VC inside house is considered consistent with a household source.

SOUTHERN PACIFIC TRANSPORTATION COM (Continued) **S104396738**

Completed Document Type: Monitoring Report
Completed Date: 05/22/2007
Comments: Report adequately documents groundwater sounding event conducted during the first quarter 2007. Groundwater sampling occurred in April 2007.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 05/04/2007
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Treatability Study Report
Completed Date: 06/28/2007
Comments: The study found that the vast majority of the arsenic within the site soils is bound within amorphous silica. Therefore, the mobility of arsenic in the soils will be controlled by the stability of the amorphous silica. Amorphous silica becomes unstable (the solubility increases) at pH values above about 9-10.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Treatability Study Report
Completed Date: 09/24/2007
Comments: Report presents results of the Phase III Grout Injection Pilot Test but does not interpret results. Interpretation will be provided in Feasibility Study Report.

Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 12/11/2007
Comments: Report accepted.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: *Correspondence - Received
Completed Date: 12/17/2007
Comments: Letter notifying DTSC that the groundwater extraction and treatment system was successfully restarted and became fully operational as of December 7, 2007. The groundwater extraction and treatment system was offline for approximately 15 weeks to allow for demolition of several onsite structures. No cahnges were made to the treatment system. There is a new layout for the conveyance lines.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 12/14/2007
Comments: DTSC received the report on 12/14/2007. The report documents the results of depth to groundwater monitoring conducted at the former Rifkin property on Friday, October 12, 2007 and weekly groundwater level monitoring conducted at site piezometers from 9/28/2007 through 10/19/2007.

Completed Date: 05/07/2008
Comments: Monthly report accepted.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 07/11/2008
Comments: In addition to coordinating groundwater monitoring events with the adjacent South Bayfront site, DTSC has asked that Sherwin-Williams incorporate South Bayfront data in its figures. These figures will be submitted under separate cover.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 10/21/2002
Comments: RI Report approved by the Water Board, administering agency for the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Workplan
Completed Date: 10/06/2008
Comments: Work plan approved with comments to be addressed in the PHERA Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Feasibility Study Report
Completed Date: 05/07/2009
Comments: Approved Feasibility Study Report and PHERA Report together. PHERA Report found that potential releases of chemicals of concern from soil, soil gas and groundwater during excavation could be controlled with sufficient dust and vapor controls. Therefore, proposed excavation of approximately 64,000 cubic yards of soil is considered implementable and the FS Report is approved.

Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 08/26/2013
Comments: Remedy implementation at the Site is effective; At those wells that have sufficient groundwater data to make an evaluation, COC concentrations are below cleanup goals and/or concentration trends are statistically stable or decreasing. Also, groundwater movement patterns are consistent with the projected design conditions.

Case Type:	LUST Cleanup Site
Status:	Open - Site Assessment
Status Date:	12/15/1999
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Case Worker:	SP
Local Agency:	Not reported
RB Case Number:	01-1791
LOC Case Number:	RO0000079
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Other Chlorinated Hydrocarbons, Gasoline, Stoddard solvent / Mineral Spriits / Distillates
Site History:	One UST was removed from the site in 1987 and one UST was closed in place in 1993. TPHms and BTEX were detected in soil beneath the site during the UST removal. Between 1990 and 1993 groundwater monitoring wells were installed beneath the site to evaluate the dissolved phase

PROPOSED CHARTER - MCGRATH (Continued) **S101293788**

plume. SPH was detected in onsite wells as recently as 2005, and significantly elevated levels of TPHms is present in soil throughout the site. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp. The subject site is one of seven sites with a co-mingled soil and groundwater contaminant plumes sites (Oakland National Engravers; RO0000079; Dunne Quality Paints; RO0000073; San Francisco French Bread Company; RO0000171; Celis Service Station; RO0000453; SNK Andante; RO0002530; Oak Walk; RO0002733, and Magnolia Terrace; RO0003004). The groundwater contaminant plume extends a minimum distance of approximately 1,200 feet in length (see attached paleochannel figure). The soil and groundwater plumes appear to have moved through a series of granular paleochannels (with significant interconnectivity) that is present beneath the sites. The subject site appears to have been contributed contamination to all downgradient sites (San Francisco French Bread Company; RO0000171; Celis Service Station; RO0000453; SNK Andante; RO0002530; and Oak Walk; RO0002733). The subject site, in addition to the adjacent Dunne Quality Paints site (RO0000073) appears to have contaminated groundwater beneath an innocent residential landowner (four Victorian homes; Ennis Properties) with free-phase concentrations of mineral spirits, and the adjacent Magnolia Terrace (RO0003004) with lower contaminant loads. Free-phase remains in two wells that are offsite and no attempts to recover the product have been undertaken despite multiple requests. Additionally the Department of Toxic Substance Control (DTSC) reviewed the site at the request of the property owners representative and discovered multiple deficiencies in the scope of contaminant characterization DTSC would require to be investigated for use as a potential school site. Included in this area of concern is the apparent discharge of solvents by a former furniture stripping company tenant to a drain line that appears to have been previously severed by the removal of an underground storage tank (however, additional contaminants also appear to require investigation). Finally partly based on contaminant distribution, additional sources of contamination appear to be present beneath the site and buildings that have not been investigated. A pilot test was approved in July 2010; however, a report has not been submitted despite multiple requests and extensions. Multiple late letters and Notices of Violation have been issued; however, no progress has been made (December 16, 2010, and November 28, 2011). Please refer to the electronic case file for these details.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:
Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: 5 Year Review Reports
Completed Date: 11/30/2007
Comments: Finalized five year review.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: 5 Year Review Reports
Completed Date: 04/05/2002
Comments: Not reported

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Removal Action Completion Report
Completed Date: 11/06/1996
Comments: Removal Action completed. Chiron excavated over 7100 cubic yards of soils containing PCBs which were hauled offsite for disposal.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Removal Action Workplan
Completed Date: 07/31/1996
Comments: Removal Action Workplan (RAW) approved for excavation of contaminated soils. A Deed Restriction was also required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 03/24/1987
Comments: Site Screening completed. Sampling conducted in 1983 and 1984 showed elevated levels of polychlorinated biphenyls (PCBs). These soils were excavated and disposed offsite in 1986. Confirmation sampling showed these areas had been cleaned. Additional sampling in 1986 showed elevated levels of PCBs in one area, but since it was capped, no further action was recommended. In 1987, an oil-stained area was found to contain elevated levels of PCBs. Additional samples to determine the extent of the contamination were taken.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 05/17/2006
Comments: Letter notified DTSC that the company had changed ownership and was now known as Novartis Vaccines and Diagnostics.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 12/10/2012
Comments: Five-Year review completed for the Restricted Excavation Area located

MATERIALS DISTRIBUTION CENTER (Continued) **S101624440**

on Novartis property in Emeryville. The five-year review concluded that the remedy selected for the site, capping and institutional controls, remained protective of public health and the environment.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 05/18/2010
Comments: Not reported

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Tank Removal Report
Completed Date: 01/01/2001
Comments: Report submitted to Alameda County for review and approval from PG&E. However, this report was never officially approved by the County.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 09/27/2010
Comments: DTSC has approved the "Revised Additional Site Investigation Workplan" for the PG&E Emervyile Materials Facility. The workplan proposes additional soil, groundwater, and soil gas investigation at the site in order to address data gaps that exist at the site.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 04/01/2011
Comments: Fieldwork during the supplemental investigation consisted of soil, groundwater, and soil gas sampling.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Community Profile
Completed Date: 07/01/1996
Comments: Community Profile Approved

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Health & Safety Plan
Completed Date: 03/27/1996
Comments: HASP

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Fact Sheets
Completed Date: 06/25/1996
Comments: Fact Sheet for proposed excavation of PCB contaminated soils

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Public Notice
Completed Date: 06/26/1996
Comments: Public Notice placed in Oakland Tribune

MATERIALS DISTRIBUTION CENTER (Continued) **S101624440**

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Southern Pacific Right-Of-Way
Completed Document Type: Site Screening
Completed Date: 10/15/1989
Comments: Site screening performed.

Completed Area Name: Materials Facility
Completed Sub Area Name: Building A Area
Completed Document Type: Fieldwork
Completed Date: 11/09/2011
Comments: Soil gas, hydropunch, and monitoring well sampling completed in and downgradient of Building A.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 10/18/2011
Comments: Work notice for offsite soil gas and groundwater sampling mailed out.

Completed Area Name: Materials Facility
Completed Sub Area Name: Building A Area
Completed Document Type: Risk Assessment Report
Completed Date: 07/31/2013
Comments: DTSC has approved the offsite indoor air risk evaluation. The risk evaluation concluded that under current site conditions, there was no significant indoor air risk to nearby residents and workers.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Workplan
Completed Date: 06/14/2012
Comments: Workplan for the site wide baseline risk assessment approved by DTSC.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 12/03/2009
Comments: DTSC inspected the portions of the asphalt parking lot, landscaped areas, sidewalk and Chiron Way that comprise the Restricted Excavation Area. The area appeared to be in good condition, with no visible signs of significant cracking or damage.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 12/08/2008
Comments: The Restricted Excavation Area appeared to be in good condition, with no visible signs of significant cracking or damage.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 12/21/2009
Comments: VCA for the PG&E Materials Facility fully executed.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area

MATERIALS DISTRIBUTION CENTER (Continued) **S101624440**

Completed Document Type: Land Use Restriction
Completed Date: 08/26/1998
Comments: Recorded Deed Restriction.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Certification
Completed Date: 11/14/1998
Comments: Certified Site.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: CEQA - Responsible Agency Review
Completed Date: 07/31/1996
Comments: Not reported

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 04/01/1996
Comments: Voluntary Cleanup Agreement with Chiron Corporation (property owner) for characterization and cleanup.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Not reported
Completed Document Type: De-Certification
Completed Date: 01/01/1995
Comments: Decertified Site. In 1994, while constructing a temporary parking lot, an additional area of soil with PCB contamination was discovered. Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/30/1989
Comments: Certified Site. Between July 1987 and June 1989, approximately 400 cubic yards of PCB contaminated soils were removed.

Completed Area Name: Materials Facility
Completed Sub Area Name: Building A Area
Completed Document Type: Fieldwork
Completed Date: 06/18/2012
Comments: Resampling of current soil vapor wells along Holden St. and installation of two new vapor wells was performed.

Completed Area Name: Materials Facility
Completed Sub Area Name: Building A Area
Completed Document Type: Work Notice
Completed Date: 06/06/2012
Comments: Work notice for supplemental soil vapor sampling approved by DTSC.

Completed Area Name: Materials Facility
Completed Sub Area Name: Building A Area
Completed Document Type: Fieldwork
Completed Date: 09/28/2012
Comments: Supplemental soil vapor sampling performed at the site.

MATERIALS DISTRIBUTION CENTER (Continued) **S101624440**

Completed Area Name: Materials Facility
Completed Sub Area Name: Building A Area
Completed Document Type: Work Notice
Completed Date: 09/21/2012
Comments: Work notice mailed out for additional soil gas sampling in the Building A area.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 02/14/2013
Comments: Workplan for additional groundwater investigation in the Building A area and along the historical mineral oil pipeline.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 03/15/2013
Comments: Additional groundwater investigation performed at the site.

Completed Date: 05/25/2011
Comments: Demand Letter #2

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/30/2012
Comments: Annual DTSC oversight cost estimate mailed to responsible party.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 06/13/2006
Comments: Not reported

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 07/16/2013
Comments: DTSC has approved the site investigation addendum report, which documents the results of additional soil and groundwater sampling in the Building A area and along the historical insulating oil pipeline.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 02/25/2013
Comments: Work notice informing the community of additional soil and

MATERIALS DISTRIBUTION CENTER (Continued) **S101624440**

groundwater sampling at the site was finalized.

Completed Area Name: Materials Facility
Completed Sub Area Name: Building A Area
Completed Document Type: Well Installation Workplan
Completed Date: 08/30/2013
Comments: Workplan for installation of three groundwater monitoring wells in Holden Street approved by DTSC.

Completed Area Name: Materials Facility
Completed Sub Area Name: Building A Area
Completed Document Type: Work Notice
Completed Date: 08/27/2013
Comments: Work Notice for additional well installation near Building A approved and mailed out.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Not reported
Completed Document Type: Letter - Demand
Completed Date: 06/20/2011
Comments: Demand Letter #3

Completed Area Name: Chiron/Novartis Property

Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 01/04/2011
Comments: Not reported

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 08/26/2010
Comments: Annual cost estimate for DTSC oversight for the fiscal year 2010-11.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/13/2011
Comments: annual cost estimate for fiscal year 2011-12 finalized.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/30/2012
Comments: Annual DTSC oversight cost estimate mailed to project proponent.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: De-Certification
Completed Date: 01/14/2009
Comments: PG&E Materials Facility decertified. A recent investigation on the

MATERIALS DISTRIBUTION CENTER (Continued) **S101624440**

property by PG&E discovered elevated levels of contaminants in soil. DTSC will negotiate a VCA with PG&E to investigate and remediate the property.

Completed Info:
Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: 5 Year Review Reports
Completed Date: 11/30/2007
Comments: Finalized five year review.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: 5 Year Review Reports
Completed Date: 04/05/2002
Comments: Not reported

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Removal Action Completion Report
Completed Date: 11/06/1996
Comments: Removal Action completed. Chiron excavated over 7100 cubic yards of soils containing PCBs which were hauled offsite for disposal.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Removal Action Workplan
Completed Date: 07/31/1996
Comments: Removal Action Workplan (RAW) approved for excavation of contaminated soils. A Deed Restriction was also required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 03/24/1987
Comments: Site Screening completed. Sampling conducted in 1983 and 1984 showed elevated levels of polychlorinated biphenyls (PCBs). These soils were excavated and disposed offsite in 1986. Confirmation sampling showed these areas had been cleaned. Additional sampling in 1986 showed elevated levels of PCBs in one area, but since it was capped, no further action was recommended. In 1987, an oil-stained area was found to contain elevated levels of PCBs. Additional samples to determine the extent of the contamination were taken.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 05/17/2006
Comments: Letter notified DTSC that the company had changed ownership and was now known as Novartis Vaccines and Diagnostics.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Not reported

MATERIALS DISTRIBUTION CENTER (Continued) **S101624440**

Completed Document Type: 5 Year Review Reports
Completed Date: 12/10/2012
Comments: Five-Year review completed for the Restricted Excavation Area located on Novartis property in Emeryville. The five-year review concluded that the remedy selected for the site, capping and institutional controls, remained protective of public health and the environment.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported

Completed Date: 03/27/1996
Comments: HASP

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Fact Sheets
Completed Date: 06/25/1996
Comments: Fact Sheet for proposed excavation of PCB contaminated soils

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Public Notice

MATERIALS DISTRIBUTION CENTER (Continued) **S101624440**

Completed Date: 06/26/1996
Comments: Public Notice placed in Oakland Tribune

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Southern Pacific Right-Of-Way
Completed Document Type: Site Screening
Completed Date: 10/15/1989
Comments: Site screening performed.

Completed Area Name: Materials Facility
Completed Sub Area Name: Building A Area
Completed Document Type: Fieldwork
Completed Date: 11/09/2011
Comments: Soil gas, hydropunch, and monitoring well sampling completed in and downgradient of Building A.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 10/18/2011
Comments: Work notice for offsite soil gas and groundwater sampling mailed out.

Completed Area Name: Materials Facility
Completed Sub Area Name: Building A Area
Completed Document Type: Risk Assessment Report
Completed Date: 07/31/2013
Comments: DTSC has approved the offsite indoor air risk evaluation. The risk evaluation concluded that under current site conditions, there was no significant indoor air risk to nearby residents and workers.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Workplan
Completed Date: 06/14/2012
Comments: Workplan for the site wide baseline risk assessment approved by DTSC.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 12/03/2009
Comments: DTSC inspected the portions of the asphalt parking lot, landscaped areas, sidewalk and Chiron Way that comprise the Restricted Excavation Area. The area appeared to be in good condition, with no visible signs of significant cracking or damage.

Completed Area Name: Chiron/Novartis Property
Completed Sub Area Name: Ramp Area
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 12/08/2008
Comments: The Restricted Excavation Area appeared to be in good condition, with no visible signs of significant cracking or damage.

Completed Area Name: Materials Facility
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 12/21/2009
Comments: VCA for the PG&E Materials Facility fully executed.

CA BOND EXP. PLAN:

Reponsible Party:	RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	DHS will be issuing a remedial action order or entering into an enforceable agreement with the responsible parties. DHS has budgeted $50,000 for oversight/monitoring of cleanup efforts. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with remedial investigations and cleanup activities.
Site Description:	This site, which has been in operation since the early 1920s, is a Pacific Gas and Electric's Materials Distribution Center. The site has served as a warehouse, repair shop and storage yard for transformers, capacitors and other electrical supplies.A tank farm for the storage of fuel and transformer oil is also present on the site. The facility covers approximately two city blocks of an area which is generally industrialized.
Hazardous Waste Desc:	The soil is contaminated with polychlorinated biphenyls (PCBs) and lead, which is present at very high concentrations in localizd areas. The ground water is contaminated with heavy metals that may have origniated from the site.
Threat To Public Health & Env:	Direct contact with soil is unlikely; the site is completely fenced. Two ground water wells present on the site have been abandoned. There is no known use of the ground water for drinking water supply or for industrial uses.
Site Activity Status:	More PCB contamination has been found as the result of recent soil sampling. PG&E plans to modify their removal action plan, accordingly. If the cleanup costs are less than $250,000, DHS will exempt the site from the formal RAP requirements.

Background Info:	The Site is located immediately adjacent to Pacific Gas and Electric Company's (PG&E) Materials Distribution Center. The Materials Distribution Center has served as a warehouse, repair shop, and storage yard since the early 1920's for equipment used by PG&E's substations and electrical distribution network. In the past, fluids in transformers and capacitors contained polychlorinated biphenyls (PCBs). The Site is currently owned by

SOUTHERN PACIFIC RIGHT-OF-WAY EMERYVILLE (Continued) **S102008216**

Chiron Corporation and Wareham Development. Chiron operates a research and development facility and the area where residual PCB-contaminated soil may be present is paved. Wareham Development has a parking lot on its property that it leases to Chiron. DTSC is currently evaluating whether land use restrictions on the area where residual contamination may be present are required.

Comments Date: 04112002
Comments: Completed PEA (PA/SI). In the early 1980s PG&E began performing

CITY OF OAKLAND - SUBARU LOT (Continued) **S109034296**

Completed Date: 09/28/2009
Comments: DTSC has determined it is most cost effective to synchronize the review of the remedy for the City of Oakland u Subaru with that of the review of the remedy for the Oakland Gateway Development Area, rather than to review the remedies separately for each site. The City of Oakland is the landowner for both the Subaru Lot and the northern portion of the Oakland Gateway Development Area. Since the City of Oakland will submit the draft five-year review report for the Oakland Gateway Development Area in May 2010, it is cost effective to combine the Subaru Lot?s five-year review with that of the Oakland Gateway Development Area.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 07/23/2013
Comments: DTSC, City of Oakland, and Port of Oakland inspected the site on 1/29/13. DTSC found site activities consistent with the land use covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 11/18/2004
Comments: The LUC for Parcels 6 and 7, also known as the Subaru lot, was recorded with the Alameda County Assessor’s Office on 11/18/04 for 19 acres. The property is restricted to industrial or commercial use, as there is residual contamniation insconsistent with sensitive uses.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/26/2003
Comments: Completed PEA. A Site Screening was prepared in 2001 under contract with the United States Environmental Protection Agency (U.S. EPA). The site screening consisted of a drive-by and review of available regulatory files, historical information, and ownership information. In 1989, elevated levels of lead were detected beneath paved areas of the Site. The site screening recommended further action based on the fact that elevated levels of lead and possibly other hazardous contaminants existed in the soil at the Site, and that the Site was adjacent to residences. DTSC is currently working with the Site owner to explore remedial options for the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 07/11/2005
Comments: PEA recommends - A land use covenant (LUC or deed restriction) should be placed on the property, since the contamination is not at the surface (1-3 feet bgs), the area will be completely paved. There is no onsite risk to workers or the nearby residents. Lead has been detected up to 1,100 mg/kg at 1-3 feet bgs in soils beneath the asphalt at the Site. Using LeadSpread (the lead risk assessment spreadsheet) developed by the DTSC, the screening level for lead at the PRG 99th percent level is 260 ug/g. Analytical testing of soil and ground water for TPHg, TPHd, total lead, BTEX, MTBE, metals, and VOCs on site did not identify any other contaminants above residential or drinking water standards. An Operation and Maintenance Plan and Agreement with the property owner will ensure that the pavement is maintained and that financial assurance is in place.

OAKLAND ARMY RESERVE EXCHANGE (Continued) **S106965131**

Site History: From Envirostor: The Oakland Army Reserve Exchange (Site) consists of three non-contiguous properties near the eastern terminus of the San Francisco-Oakland Bay Bridge. The Site includes (1) the Heroic War Dead United States Army Reserve Center at 2400 Engineer Road, Oakland, California, 16 acres, (2) former Base Realignment and Closure (BRAC) Parcels 6 and 7 (also known as the Subaru Lot), 19 acres, at the former Oakland Army Base, and (3) former BRAC Parcels 18 and portions of former BRAC Parcels 19 and 21, 6.76 acres, at the former Oakland Army Base. These areas total to approximately 42 acres. The United States Army Reserve is the property owner of the Site. The Headquarters, United States Army, 63D Regional Readiness Command in Los Alamitos, California is managing all operations at the Site. Previous site assessment and investigation efforts reveal that the Site is potentially impacted in soil and groundwater with metals, volatile organic compounds, semi-volatile organic compounds, pesticides, polychlorinated biphenyls, and total petroleum hydrocarbons. Detailed chemical data for the Site would be available upon completion of remedial investigation. The Site area was principally intertidal mudflats as late as the early 1930s. Landfilling activities created the land for the development of industrial, commercial, and military facilities. Since the mid-1930s, the Site vicinity has been used for industrial, shipping and maritime, and military and government agency facilities and activities. The Site is composed of office buildings, maintenance and storage buildings, and open lots used to support mission requirements for the Heroic War Dead United States Army Reserve Center. The current land use includes the following: United States Army Reserve administration, vehicle maintenance and repair operations, and medical equipment and vehicle storage activities. DTSC issued a Conditional Remedy Completion Letter for Parcels 6 and 7 in August 2004. On June 7, 2007, DTSC approved the Removal Action Workplan, Heroic War Dead United States Army Reserve Center, Oakland, California. The Army Reserve and the East Bay Municipal Utility District (EBMUD) implemented the remedy as selected in the Removal Action Workplan. The June 2007 Remedy Completion Report documents the field cleanup activities consisting of: (a) constructing an engineered asphalt cap over lead contaminated soil in the Building 1070 Yard, (b) advancing additional exploratory borings, test pits, and an exploratory excavation in the Building 1064 Yard near the PV18 test pit area, and (c) installing additional groundwater monitoring wells in the Building 1070 Yard. The Army Reserve and EBMUD implemented field cleanup activities in general accordance with the DTSC approved Remedial Design Work Plan dated June 2007 for the site. The Army Reserve recorded the Covenant to Restrict Use of Property, Environmental Restriction with the Alameda County Assessors Office on June 29, 2007. DTSC effectively approved the Remedy Completion Report on June 29, 2007. The Army Reserve transferred the Heroic War Dead to EBMUD on June 29, 2007; and former BRAC Parcels 18 and portions of former BRAC Parcels 19 and 21 to the Port of Oakland on June 29, 2007. DTSC and the Port of Oakland signed a Consent Agreement on June 29, 2007.

Completed Info:

Completed Area Name:	P18+19+21
Completed Sub Area Name:	Not reported
Completed Document Type:	Environmental Assessment
Completed Date:	12/04/2006
Comments:	DTSC approved the Remedial Action Plan Amendment for Parcel 18 and Subparcels 19 and 21 on December 4, 2006. The parcels total approximately 6.76 acres. The selected remedy is institutional controls that prohibit sensitive land uses, prohibit the construction of groundwater wells and the extraction of groundwater, and require

OAKLAND ARMY RESERVE EXCHANGE (Continued) **S106965131**

implementation and enforcement plan compliance. DTSC approved the Notice of Determination on December 4, 2006 and filed the document with the State Clearinghouse on December 19, 2006.

Completed Area Name: HWD
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Assessment
Completed Date: 06/07/2007
Comments: DTSC approved the Notice of Exemption for the Heroic War Dead United States Army Reserve Center, in Oakland, California. DTSC had considered the proposed project activities, and determined that the project activities would not cause a significant environmental effect. The bases for this determination were (a) the limited project scale in an industrially developed area and (b) the lack of potential resources due to prior land disturbance and current site use patterns. DTSC will file the Notice of Exemption with the State?s Office of Planning and Research in the week of June 11, 2007.

Completed Area Name: P6+7
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 05/01/2009
Comments: On August 2, 2004, DTSC approved the Amendment to Remedial Action Plan, which specified an institutional control remedy in a form of a land use covenant. The Army Reserve recorded the Covenant to Restrict Use of Property, Environmental Restriction on November 18, 2004 with the Alameda County Assessor?s Office. Recordation of the covenant constitutes implementation of the remedial action. The Army Reserve and DTSC executed the Covenant to Restrict Use of Property, Environmental Restriction on November 18, 2004, which prohibits sensitive land uses, restricts construction of groundwater wells and the extraction of groundwater, and requires submittal of annual inspection reports. The City of Oakland and DTSC entered into a Consent Agreement identifying land use restrictions in the Covenant to Restrict Use of Property, Environmental Restriction. Specifically, the City of Oakland agreed to retain all inspection, certification, and reporting responsibilities as required in the Covenant, Section 4.02 and responsibility to pay all State costs associated with the administration of the Covenant pursuant to the California Code of Regulations, section 67391.1(h). The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for this site.

Completed Document Type: Remedial Action Plan
Completed Date: 08/02/2004
Comments: DTSC approved the Remedial Action Plan Amendment for the Subaru Lot on August 2, 2004.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 12/04/2006
Comments: DTSC approved the Remedial Action Plan Amendment for Parcel 18 and Subparcels 19 and 21 on December 4, 2006. The parcels total approximately 6.76 acres. The selected remedy is institutional controls that prohibit sensitive land uses, prohibit the construction of groundwater wells and the extraction of groundwater, and require implementation and enforcement plan compliance.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Deed/LUR Enforcement & Implementation Plan
Completed Date: 06/29/2007
Comments: The Implementation and Enforcement Plan is Section 4.02 of the Covenant to Restrict Use of Property, Environmental Restriction. DTSC signed the Covenant on 5/21/07. The Army Reserve signed the Covenant on 6/21/07. The Army Reserve recorded the Covenant with the Alameda County Assessor's Office on 6/29/07.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 06/29/2007
Comments: DTSC issued a oconditionalo FOST Concurrence Letter to the Army Reserve on 6/14/07 stating that DTSC would concur with the subject FOST when: (a) the Army Reserve revise the environmental restriction in the FOST consistent with that in the oCovenant to Restrict Use of Property, Environmental Restriction,o and (b) execute the oCovenant to Restrict Use of Property, Environmental Restriction,o and recorded this covenant with the Alameda County Assessor?s Office. The Army Reserve plans to transfer the parcels to the Port of Oakland by 6/29/07.

Completed Document Type: *Site Inspection (SI) Workplan
Completed Date: 09/27/2004
Comments: DTSC issued a no further comment letter on the SI Workplan.

OAKLAND ARMY RESERVE EXCHANGE (Continued) **S106965131**

Completed Area Name: HWD
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 05/29/2007
Comments: DTSC approved the Remedial Investigation/Feasibility Study Report (RI/FS) dated May 2007 for the Heroic War Dead U.S. Army Reserve Center. The RI/FS compiles, summarizes, and integrates the results of previous and current environmental studies conducted in order to identify remedial action objectives and a recommended remedial alternative for the property that is protective of human health and the environment. The work completed in support of this objective that has not previously been reported included the collection and analysis of soil samples from two areas of the property in September and October 2006 with impacts from lead and carcinogenic polynuclear aromatic hydrocarbons, screening to identify contaminants of concern, and performance of a Feasibility Study to evaluate potential remedial alternatives and to identify and describe recommended remedial actions for the entire 16-acre Heroic War Dead property.

Completed Area Name: HWD
Completed Sub Area Name: Not reported
Completed Document Type: *Action Memorandum (if <$1M)
Completed Date: 06/07/2007
Comments: DTSC approved the Removal Action Workplan for the Heroic War Dead United States Army Reserve Center, in Oakland, California. The selected remedy is Alternative 6, which include (a) institutional controls, (b) excavation and offsite disposal of polynuclear aromatic hydrocarbon-impacted soil at the Building 1064 Yard, (c) engineered asphalt cap for lead-impacted soil at the Building 1070 Yard, and (d) groundwater monitoring.

Completed Area Name: HWD
Completed Sub Area Name: Not reported
Completed Document Type: Deed/LUR Enforcement & Implementation Plan
Completed Date: 06/29/2007
Comments: The Implementation and Enforcement Plan is Section 4.02 of the Covenant to Restrict Use of Property, Environmental Restriction. DTSC signed the Covenant on 6/18/07. The Army Reserve signed the Covenant on 6/21/07. The Army Reserve recorded the Covenant with the Alameda County Assessor's Office on 6/29/07.

Completed Area Name: P6+7
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 06/14/2004
Comments: On 6/14/04, DTSC issued a fact sheet informing the public of the draft Amendment to the Final Remedial Action Plan Oakland Army Base (draft RAP Amendment) for the Subaru Lot and inviting the community to review and comment on the draft RAP Amendment.

Completed Area Name: HWD
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/08/2007
Comments: DTSC approved the Remedial Design Work Plan for the Heroic War Dead United States Army Reserve Center, in Oakland, California. The plan details cleanup activities for the Building 1070 Yard at the Heroic

OAKLAND ARMY RESERVE EXCHANGE (Continued) **S106965131**

War Dead site. The Army Reserve plans to complete cleanup activities in three weeks.

Completed Area Name: HWD
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/29/2007
Comments: Based upon existing information, DTSC's oversight at the Heroic War Dead United States Army Reserve Center, and DTSC?s review on the June 2007 Remedy Completion Report, DTSC has determined that the Army Reserve will have completed the required remedy pursuant to the Removal Action Workplan immediate upon execution and recordation of the "Covenant to Restrict Use of Property, Environmental Restriction" scheduled on 6/29/07. Covenant recordation is a required condition before the Army Reserve may transfer the subject property.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 10/23/2006
Comments: DTSC prepared a fact sheet for the Remedial Action Plan Amendment for Parcel 18 and Subparcels 19 and 21.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 10/23/2006
Comments: DTSC prepared a public notice for the Remedial Action Plan Amendment for Parcel 18 and Subparcels 19 and 21. The 30-day public comment period starts on 10/23/06 and ends on 11/21/06. DTSC will hold a public meeting on 11/9/06.

Completed Area Name: HWD
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 06/29/2007
Comments: On 6/27/07, DTSC issued the Finding of Suitability to Transfer Concurrence Letter for the Heroic War Dead United States Army Reserve Center conditioned upon recordation of the covenant. Covenant recordation is a required escrow instruction before the Army Reserve may transfer the subject property scheduled on 6/29/07. The Army Reserve shall record the enclosed oCovenant to Restrict Use of Property, Environmental Restriction,o with the Alameda County Assessor?s Office.

OAKLAND ARMY RESERVE EXCHANGE (Continued) **S106965131**

Completed Area Name: P6+7
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/17/2004
Comments: Based upon existing information and our oversight on past investigation, remedy selection, and remedy implementation, DTSC is certifying that all necessary remedies for the Subaru Lot required in the approved RAP Amendment will be in place when the covenant is recorded with the Alameda County Assessor?s Office. This covenant recordation is a required condition in the instructions for closure of escrow on the property.

Completed Area Name: P6+7
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 08/17/2004
Comments: DTSC concurred with the Finding of Suitability to Transfer (FOST) for an approximately 19-acre property at 63D Army Reserve Enclave, Oakland, CA, commonly known as the Subaru Lot, consisting of parcels 6 and 7, for transfer to the City of Oakland. The property is to be used for development consistent with the uses identified in the OBRA?s Final Reuse Plan for the Former Oakland Army Base dated July 31, 2002.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/14/2007
Comments: Based upon existing information and DTSC’s oversight at Parcel 18 and Subparcels 19 and 21, DTSC has determined that the Army Reserve will have completed the required remedy pursuant to the RAP Amendment immediate upon execution and recordation of the "Covenant to Restrict Use of Property, Environmental Restriction." Covenant recordation is a required condition before the Army Reserve may transfer the subject property.

Completed Area Name: P6+7
Completed Sub Area Name: Not reported

Completed Date: 05/02/2005
Comments: Not reported

Completed Area Name: HWD
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/25/2009
Comments: On 6/25/09, DTSC completed the Remedial Action Certification for the "Heroic War Dead U.S. Army Reserve Center" site. The U.S. Army Reserve and East Bay Municipal Utility District implemented the remedy as selected in the Removal Action Workplan developed for the Heroic War Dead United States Army Reserve Center. Field cleanup activities included: (a) construction of an engineered asphalt cap over lead-impacted soil in the Building 1070 Yard; (b) construction of additional exploratory borings, test pits and an exploratory excavation in the Building 1064 Yard near the PV18 test pit area; and (c) installation of additional groundwater monitoring wells in the Building 1070 Yard. On 6/29/07, the Army Reserve recorded the

OAKLAND ARMY RESERVE EXCHANGE (Continued) **S106965131**

"Covenant to Restrict Use of Property, Environmental Restriction" with the Alameda County Assessor?s Office to establish land and groundwater use restrictions and require proper soil and groundwater management practices.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 05/01/2009
Comments: On December 4, 2006, DTSC approved the Remedial Action Plan Amendment, which specified an institutional control remedy in a form of a land use covenant. The Army Reserve recorded the Covenant to Restrict Use of Property, Environmental Restriction on June 29, 2007 with the Alameda County Assessor?s Office. Recordation of the covenant constitutes implementation of the remedial action. The Army Reserve and DTSC executed the Covenant to Restrict Use of Property, Environmental Restriction on June 29, 2007, which prohibits sensitive land uses, restricts construction of groundwater wells and the extraction of groundwater, and requires submittal of annual inspection reports. The Port of Oakland and DTSC entered into a Consent Agreement identifying land use restrictions in the Covenant to Restrict Use of Property, Environmental Restriction. Specifically, the Port of Oakland agreed to retain all inspection, certification, and reporting responsibilities as required in the Covenant, Section 4.02 and responsibility to pay all State costs associated with the administration of the Covenant pursuant to the California Code of Regulations, section 67391.1(h). The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for this site. However, DTSC has determined that the Port of Oakland's compliance with the annual inspection reporting requirements pursuant to the covenant would satisfy the five-year review requirement.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 06/29/2007
Comments: On 6/29/07 the Army Reserve transferred Parcel 18 and Subparcels 19 and 21 at the former Oakland Army Base to the Port of Oakland. On 6/29/07 the Port of Oakland and DTSC signed the Consent Agreement, which binds the Port of Oakland to comply with the environmental restrictions for Parcel 18 and Subparcels 19 and 21 as necessary to protect human health and the environment. These environmental restrictions are consistent with the DTSC-approved 12/4/06 oAmendment to Final Remedial Action Plan, Oakland Army Base, Oakland, California, for Former Parcel 18 and Subparcels 19 and 21, Oakland United States Army Reserve Center #2o.

OAKLAND ARMY RESERVE EXCHANGE (Continued) **S106965131**

Completed Date:	12/04/2006
Comments:	DTSC approved the Remedial Action Plan Amendment for Parcel 18 and Subparcels 19 and 21 on December 4, 2006. The parcels total approximately 6.76 acres. The selected remedy is institutional controls that prohibit sensitive land uses, prohibit the construction of groundwater wells and the extraction of groundwater, and require implementation and enforcement plan compliance. DTSC approved the Notice of Determination on December 4, 2006 and filed the document with the State Clearinghouse on December 19, 2006.
Completed Area Name:	HWD
Completed Sub Area Name:	Not reported
Completed Document Type:	Environmental Assessment
Completed Date:	06/07/2007
Comments:	DTSC approved the Notice of Exemption for the Heroic War Dead United States Army Reserve Center, in Oakland, California. DTSC had considered the proposed project activities, and determined that the project activities would not cause a significant environmental effect. The bases for this determination were (a) the limited project scale in an industrially developed area and (b) the lack of potential resources due to prior land disturbance and current site use patterns. DTSC will file the Notice of Exemption with the State?s Office of Planning and Research in the week of June 11, 2007.
Completed Area Name:	P6+7

Completed Document Type:	Certification
Completed Date:	05/01/2009
Comments:	On August 2, 2004, DTSC approved the Amendment to Remedial Action Plan, which specified an institutional control remedy in a form of a land use covenant. The Army Reserve recorded the Covenant to Restrict Use of Property, Environmental Restriction on November 18, 2004 with the Alameda County Assessor?s Office. Recordation of the covenant constitutes implementation of the remedial action. The Army Reserve and DTSC executed the Covenant to Restrict Use of Property, Environmental Restriction on November 18, 2004, which prohibits sensitive land uses, restricts construction of groundwater wells and the extraction of groundwater, and requires submittal of annual inspection reports. The City of Oakland and DTSC entered into a Consent Agreement identifying land use restrictions in the Covenant to Restrict Use of Property, Environmental Restriction. Specifically, the City of Oakland agreed to retain all inspection, certification, and reporting responsibilities as required in the Covenant, Section 4.02 and responsibility to pay all State costs associated with the administration of the Covenant pursuant to the California Code of Regulations, section 67391.1(h). The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for this site.

Completed Area Name:	HWD
Completed Sub Area Name:	Not reported
Completed Document Type:	*Site Inspection (SI) Workplan
Completed Date:	09/27/2004
Comments:	DTSC issued a no further comment letter on the SI Workplan.

Completed Area Name:	HWD
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation / Feasibility Study
Completed Date:	05/29/2007
Comments:	DTSC approved the Remedial Investigation/Feasibility Study Report (RI/FS) dated May 2007 for the Heroic War Dead U.S. Army Reserve Center. The RI/FS compiles, summarizes, and integrates the results of previous and current environmental studies conducted in order to identify remedial action objectives and a recommended remedial alternative for the property that is protective of human health and the environment. The work completed in support of this objective that has not previously been reported included the collection and analysis of soil samples from two areas of the property in September and October 2006 with impacts from lead and carcinogenic polynuclear aromatic hydrocarbons, screening to identify contaminants of concern, and performance of a Feasibility Study to evaluate potential remedial alternatives and to identify and describe recommended remedial actions for the entire 16-acre Heroic War Dead property.

Completed Area Name:	HWD
Completed Sub Area Name:	Not reported
Completed Document Type:	*Action Memorandum (if <$1M)
Completed Date:	06/07/2007
Comments:	DTSC approved the Removal Action Workplan for the Heroic War Dead United States Army Reserve Center, in Oakland, California. The selected remedy is Alternative 6, which include (a) institutional controls, (b) excavation and offsite disposal of polynuclear aromatic hydrocarbon-impacted soil at the Building 1064 Yard, (c) engineered asphalt cap for lead-impacted soil at the Building 1070 Yard, and (d) groundwater monitoring.

Completed Area Name:	HWD
Completed Sub Area Name:	Not reported
Completed Document Type:	Deed/LUR Enforcement & Implementation Plan
Completed Date:	06/29/2007
Comments:	The Implementation and Enforcement Plan is Section 4.02 of the Covenant to Restrict Use of Property, Environmental Restriction. DTSC signed the Covenant on 6/18/07. The Army Reserve signed the Covenant on 6/21/07. The Army Reserve recorded the Covenant with the Alameda County Assessor's Office on 6/29/07.

Completed Area Name:	P6+7
Completed Sub Area Name:	Not reported
Completed Document Type:	Fact Sheets
Completed Date:	06/14/2004
Comments:	On 6/14/04, DTSC issued a fact sheet informing the public of the draft Amendment to the Final Remedial Action Plan Oakland Army Base (draft RAP Amendment) for the Subaru Lot and inviting the community to review and comment on the draft RAP Amendment.

Completed Area Name:	HWD

OAKLAND ARMY RESERVE EXCHANGE (Continued) **S106965131**

Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/08/2007
Comments: DTSC approved the Remedial Design Work Plan for the Heroic War Dead United States Army Reserve Center, in Oakland, California. The plan details cleanup activities for the Building 1070 Yard at the Heroic War Dead site. The Army Reserve plans to complete cleanup activities in three weeks.

Completed Area Name: HWD
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/29/2007
Comments: Based upon existing information, DTSC's oversight at the Heroic War Dead United States Army Reserve Center, and DTSC?s review on the June 2007 Remedy Completion Report, DTSC has determined that the Army Reserve will have completed the required remedy pursuant to the Removal Action Workplan immediate upon execution and recordation of the "Covenant to Restrict Use of Property, Environmental Restriction" scheduled on 6/29/07. Covenant recordation is a required condition before the Army Reserve may transfer the subject property.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 10/23/2006
Comments: DTSC prepared a fact sheet for the Remedial Action Plan Amendment for Parcel 18 and Subparcels 19 and 21.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 10/23/2006
Comments: DTSC prepared a public notice for the Remedial Action Plan Amendment for Parcel 18 and Subparcels 19 and 21. The 30-day public comment period starts on 10/23/06 and ends on 11/21/06. DTSC will hold a public meeting on 11/9/06.

Completed Area Name: HWD
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 06/29/2007
Comments: On 6/27/07, DTSC issued the Finding of Suitability to Transfer Concurrence Letter for the Heroic War Dead United States Army Reserve Center conditioned upon recordation of the covenant. Covenant recordation is a required escrow instruction before the Army Reserve may transfer the subject property scheduled on 6/29/07. The Army Reserve shall record the enclosed oCovenant to Restrict Use of Property, Environmental Restriction,o with the Alameda County Assessor?s Office.

Completed Document Type: Remedial Action Completion Report
Completed Date: 08/17/2004
Comments: Based upon existing information and our oversight on past investigation, remedy selection, and remedy implementation, DTSC is certifying that all necessary remedies for the Subaru Lot required in the approved RAP Amendment will be in place when the covenant is recorded with the Alameda County Assessor?s Office. This covenant recordation is a required condition in the instructions for closure of escrow on the property.

Completed Area Name: P6+7
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 08/17/2004
Comments: DTSC concurred with the Finding of Suitability to Transfer (FOST) for an approximately 19-acre property at 63D Army Reserve Enclave, Oakland, CA, commonly known as the Subaru Lot, consisting of parcels 6 and 7, for transfer to the City of Oakland. The property is to be used for development consistent with the uses identified in the OBRA?s Final Reuse Plan for the Former Oakland Army Base dated July 31, 2002.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/14/2007
Comments: Based upon existing information and DTSC's oversight at Parcel 18 and Subparcels 19 and 21, DTSC has determined that the Army Reserve will have completed the required remedy pursuant to the RAP Amendment immediate upon execution and recordation of the "Covenant to Restrict Use of Property, Environmental Restriction." Covenant recordation is a required condition before the Army Reserve may transfer the subject property.

Completed Area Name: HWD
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 06/25/2009
Comments: On 6/25/09, DTSC completed the Remedial Action Certification for the "Heroic War Dead U.S. Army Reserve Center" site. The U.S. Army Reserve and East Bay Municipal Utility District implemented the remedy as selected in the Removal Action Workplan developed for the Heroic War Dead United States Army Reserve Center. Field cleanup

OAKLAND ARMY RESERVE EXCHANGE (Continued) **S106965131**

activities included: (a) construction of an engineered asphalt cap over lead-impacted soil in the Building 1070 Yard; (b) construction of additional exploratory borings, test pits and an exploratory excavation in the Building 1064 Yard near the PV18 test pit area; and (c) installation of additional groundwater monitoring wells in the Building 1070 Yard. On 6/29/07, the Army Reserve recorded the "Covenant to Restrict Use of Property, Environmental Restriction" with the Alameda County Assessor?s Office to establish land and groundwater use restrictions and require proper soil and groundwater management practices.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 05/01/2009
Comments: On December 4, 2006, DTSC approved the Remedial Action Plan Amendment, which specified an institutional control remedy in a form of a land use covenant. The Army Reserve recorded the Covenant to Restrict Use of Property, Environmental Restriction on June 29, 2007 with the Alameda County Assessor?s Office. Recordation of the covenant constitutes implementation of the remedial action. The Army Reserve and DTSC executed the Covenant to Restrict Use of Property, Environmental Restriction on June 29, 2007, which prohibits sensitive land uses, restricts construction of groundwater wells and the extraction of groundwater, and requires submittal of annual inspection reports. The Port of Oakland and DTSC entered into a Consent Agreement identifying land use restrictions in the Covenant to Restrict Use of Property, Environmental Restriction. Specifically, the Port of Oakland agreed to retain all inspection, certification, and reporting responsibilities as required in the Covenant, Section 4.02 and responsibility to pay all State costs associated with the administration of the Covenant pursuant to the California Code of Regulations, section 67391.1(h). The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for this site. However, DTSC has determined that the Port of Oakland's compliance with the annual inspection reporting requirements pursuant to the covenant would satisfy the five-year review requirement.

Completed Area Name: P18+19+21
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 06/29/2007
Comments: On 6/29/07 the Army Reserve transferred Parcel 18 and Subparcels 19 and 21 at the former Oakland Army Base to the Port of Oakland. On 6/29/07 the Port of Oakland and DTSC signed the Consent Agreement, which binds the Port of Oakland to comply with the environmental restrictions for Parcel 18 and Subparcels 19 and 21 as necessary to protect human health and the environment. These environmental restrictions are consistent with the DTSC-approved 12/4/06 oAmendment to Final Remedial Action Plan, Oakland Army Base, Oakland, California, for Former Parcel 18 and Subparcels 19 and 21, Oakland United States Army Reserve Center #2o.

Environmental Interest/Information System

RELIANCE UPHOLSTERY SUPPLY (Continued) **1001217518**

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:

Reponsible Party:	RWQCB REFERRAL SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The responsible parties will pay all costs associated with remedial investigations and cleanup activities under RWQCB oversight. There are no plans to utilize Bond funds for this site.
Site Description:	Southern Pacific, Oakland, is a large railyard, switching and maintenance facility located between the Outer Harbor and Inner Harbor of San Francisco Bay. The site includes two surface impoundments which are separated by approximately a one-half mile distance: an oil/water separator system for waste waters from the cleaning of rail cars and an inactive waste pond for wash waters from the interiors of tank cars (referred to as polychlorinated biphenyl (PCB) sludge pond). There is soil and groundwater contamination at each of the surface impoundment areas.
Hazardous Waste Desc:	This site has been contaminated by PCBs, polynuclear aromatics (PNAs), benzene, toluene, xylene, ethylbenzene, waste oils, solvents such as trichloroethylene (TCE) and dichloroethylene (DCE) and heavy metals such as lead and arsenic. Shallow ground water is contaminated by solvents.
Threat To Public Health & Env:	The waste impoundment area is fenced; however, direct contact would present a potential health threat. This site is located within one mile of the San Francisco Bay; a drainage ditch is underneath the site. Potential for migration of contaminants tothe Bay is low. Solvents are known to have migrated offsite (at least 200 feet from the site at 3-foot depth) and to shallow ground water. There are no known domestic wells within three miles of the site.
Site Activity Status:	Southern Pacific submitted a draft RAP to the RWQCB and DHS in April, 1988. The RWQCB has determined the RAP to be unacceptable and is requiring additional hydrogeologic and site characterization.

Completed Document Type: Design/Implementation Workplan
Completed Date: 10/25/1996
Comments: Approved Design Plan to remove asbestos and demolish buildings.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 11/30/1998
Comments: Completed Removal Action (RA) A for Phase I. The RA consisted of excavating and disposing of soil which contained total petroleum hydrocarbon (TPH) as diesel, lead, arsenic, pesticides, semivolatile organic compoounds (SVOCs), and polychlorinated biphenyls (PCBs) in accordance with the cleanup leveld established int he Remedial Action Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 04/08/1996
Comments: Amended FS to propose hot spot removal and capping the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 06/24/1996
Comments: Approved RAP requiring building demolition, hot spot soil removal, capping and groundwater monitoring.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 04/28/1995
Comments: Completed RIFS. Approved proposing hot spot removal and bioremediation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Participation Plan / Community Relations Plan
Completed Date: 12/12/1991
Comments: Completed Public Participation Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit

PFIZER INC (Continued) **1000443244**

LOC Case Number: 01280006
File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Diesel, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History: The subject parcel is a part of the Shellmound Properties development in Emeryville. A portion of the subject parcel is in the Northern Area of remedial actions, while the majority of the parcel is in the Southern Area of remedial actions. Remedial actions were overseen by the DTSC between 1996 and 2000. DTSC is currently actively providing CAP maintenance oversight related to that work. This LOP case involves the UST portion of the Pfizer parcel. Review of Envirostor indicates DTSC and RP were aware of USTs at site in Feasibility Study, with statements that USTs would be found and contaminated soil excavated at that time. Primary issue under DTSC jurisdiction was arsenic, pesticides, and other contaminates. Remedial Completion Report contains no reference to work at the known UST locations (esp. see figures 9 & 11), although report references a small UST found on the eastern edge of the parcel. The June 2000 "Environmental Risk Management Plan" (Erler & Kalinowski) on Envirostor (Site No. 01890019) indicates the area of the LOP UST case was excavated (described as "Areas of Completed Environmental Excavations" on Figures 4 & 8 of this report; portions of these figures are also in ACEH electronic file as CORRES_2011-05-03 and CORRES_2011-05--12). Additional excavations do not appear to have occurred beyond those shown in this report. Benzene is reported by DTSC to have been included in some of the risk calculations for the referenced report. According to the "First Semi-Annual 2009 Groundwater Monitoring Report" (May 29, 2009, Erler & Kalinowski; available on Envirostor) BTEX, MTBE, DIPE, & TBA have been non-detectable in well EBS4 since May 2003. This well is in close proximity to the former UST locations. Well EBS5 and storm drain sampling point SD-3 are also in close proximity; however, are a bit further north from the former location of the USTs. TPH is not monitored by DTSC. DTSC reports the matter is considered closed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/26/2013
Date Data Arrived at EDR: 05/09/2013
Date Made Active in Reports: 07/10/2013

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2013

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013

Next Scheduled EDR Contact: 01/20/2014
Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/11/2013

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/11/2013

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/06/2013

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

ADELINE STREET
3037-3115 ADELINE STREET
EMERYVILLE, CA 94608

TARGET PROPERTY COORDINATES

Latitude (North):	37.8231 - 37° 49' 23.16''
Longitude (West):	122.2816 - 122° 16' 53.76''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	563226.8
UTM Y (Meters):	4186225.8
Elevation:	21 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	37122-G3 OAKLAND WEST, CA
Most Recent Revision:	1980

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

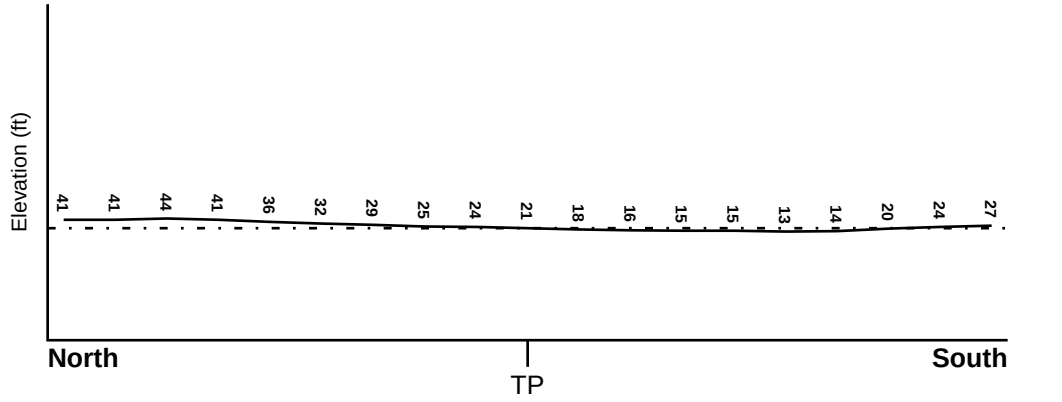
TOPOGRAPHIC INFORMATION

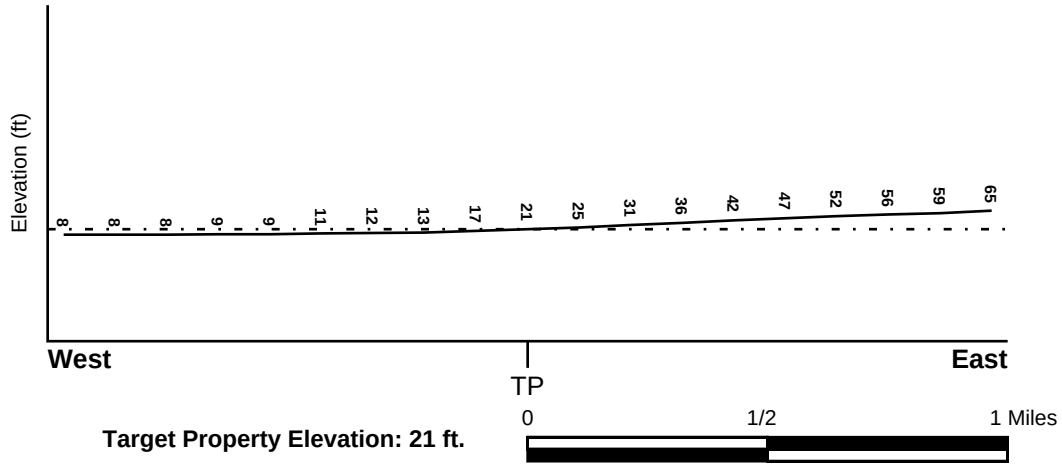
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





0 1/2 1 Miles

Target Property Elevation: 21 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
ALAMEDA, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06001C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OAKLAND WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.
