SUBJECT: LEVEL 1 ESA WITH LIMITED SOIL AND GROUNDWATER SAMPLING REPORT
1501 Martin Luther King Jr. Way, Oakland, CA

Dear Mr. Nowell:

Enclosed, please find a copy of the July 9, 2013 subject Level 1 ESA with Limited Soil and Groundwater Sampling Report prepared by my consultant, Enviro Soil Tech Consultants.

I declare, under penalty of perjury, that the information and/or recommendations contained in this report are true and correct to the best of my knowledge.

Sincerely,

ED HEMMAT

SUBJECT: LEVEL 1 ENVIRONMENTAL SITE ASSESSMENT WITH LIMITED SOIL AND GROUNDWATER SAMPLING AT THE PROPERTY
Located at 1501 Martin Luther King Junior Way, in Oakland, California

Dear Mr. Hemmat:

Per your request and authorization, Enviro Soil Tech Consultants (ESTC) has performed a Level 1 Environmental Site Assessment (ESA) with limited soil and groundwater sampling at properties located at 1501 Martin Luther King Junior Way, in Oakland, California (Figure 1).

This report summarized the results of available (if any) regulatory file review, EDR's report and soil/groundwater sampling activities conducted at the subject property in order to assess potential impact of contamination in subsurface soil and groundwater due to the on-site and/or off-site sources and past usage of the subject property.

File No. 6-13-858-SA
July 9, 2013

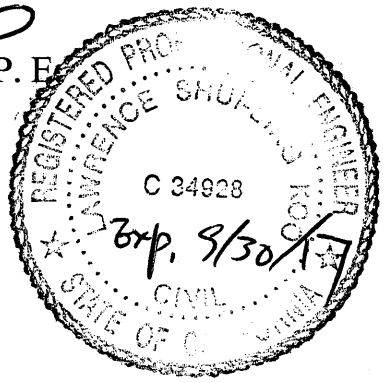
If you have any questions or require additional information, please feel free to contact our office at (408) 297-1500 or via email at info@envirosoiltech.com.

Sincerely,

ENVIRO SOIL TECH CONSULTANTS

FRANK HAMEDI-FARD
GENERAL MANAGER

LAWRENCE KOO, P. E.
C. E. #34928



1.0 INTRODUCTION

ESTC was retained by Mr. Ed Hemmat to perform Level 1 ESA with limited soil and groundwater sampling for properties located at 1501 Martin Luther King Junior Way, in Oakland, California (Site).

2.0 EXECUTIVE SUMMARY

ESTC performed a Level 1 ESA with limited soil and groundwater sampling for the properties located at 1501 Martin Luther King Junior Way, in Oakland, California (Site), to identify if any potential impact to the structure, soil, or groundwater at the Site from the on-site or off-site sources of hazardous substances or petroleum hydrocarbon products.

Review of historical aerial photographs taken since 1939 indicated that the Site was already developed with commercial building, and general surrounding areas in the vicinity of the Site were also developed with commercial and residential buildings.

During ESTC's representative visit, Mr. Frank Hamedi, did not observe any surface stains; however, he noticed that are one vent line pipe for underground storage tank on the sidewalk goes next to the building and 2 hydraulic lifts inside the building.

According to environmental databases (EDR), the Site is not listed on the database. Environmental database listed 35 (higher elevation than the Site) and 41 (lower elevation than the Site) contaminated off-sites within 1-mile radius of subject Site (see Table 2 in Appendix "A"). Seven off-site with higher elevation cases are open with site assessment, remediation or monitoring underway/ongoing or open inactive, and eighteen off-site with lower elevation cases are open with either site assessment or remediation underway/ongoing or open inactive. There are 28 off-site with higher elevation and 23 off-site with lower elevation cases are closed due to completion of cleanup.

According to Geotracker's database (Table 3 – Appendix "A"), there are thirty-two contaminated sites within a 1000 feet radius of the subject Site. Ten off-sites are still open with site assessment, remediation or open-inactive. The other twenty-two off-sites are closed cases due to cleanup completion; however, one case (Uptown Theater District) was closed with land use restrictions.

The subject Site is not listed in the Alameda County Health Care Services Agency's (ACHCSA) database.

Based on the available information, review of the regulatory files and results of laboratory analyses from four soil boreholes, it is our professional opinion that at the present time the impact to soil and/or groundwater contamination of the Site from the identified on-site sources of hazardous substances and petroleum products are most likely.

3.0 OBJECTIVE

The objective of the ESA with limited soil and groundwater sampling is to identify if the past usage of the property or any on-site and off-site contaminated sources or potential conditions that may pose soil and/or groundwater contamination to the Sites.

3.1 PURPOSE AND SCOPE OF WORK

The purpose of the Level 1 ESA with limited soil and groundwater sampling is to identify the potential of impact to the structure, soil or groundwater of the Site from on-site and/or off-site sources of hazardous substances or petroleum products.

The ESA was performed in accordance with American Society for Testing and Materials (ASTM) guidelines for Phase I Environmental Site Assessments (ASTM E 1527-2005), and included the following activities:

- Obtain general information and Sites history.
- Site visit to observe current conditions, hazardous chemical usage, and storage practices.
- Site vicinity drive-by and reconnaissance of the neighborhood within 1-mile radius of the Sites, to identify any potential off-site sources of contamination based on the nature of activities in the area.
- Review historical aerial photographs of the Site and properties within its vicinity to identify land use practices in the areas to evaluate any potential for impact to the soil and groundwater at the Sites.
- Review the appropriate federal and state lists of contaminated sites to determine if any property within 1-mile of the Site is under federal or state investigation from soil or groundwater contamination that could impact or contribute to the environmental impairment to the Site.
- Based on our findings in the Level 1 ESA, 4 soil borings were drilled and collected soil and groundwater samples by advancing four soil boreholes at various locations.
- Summarize the findings in this report.

4.0 SITE OVERVIEW

4.1 SITE NAME

The Site's name is All Power Indoor Soccer Arena.

4.2 SITE ADDRESS

The Site is located at 1501 Martin Luther King Junior Way, in Oakland, California. The subject Site is located on the corner west side of Martin Luther King Junior Way and north side of 15th Street, and surrounded by apartment buildings to the east, a hotel to the west, a church to the north and commercial building to the south.

4.3 LEGAL DESCRIPTION OF THE SITE

According to Chicago Title Company's Preliminary Report that was provided by Mr. Ed Hemmat, the Site has two parcel numbers that are identified as 003-0073-004 and 003-0073-005. However according to the Alameda County Assessor Office (ACAO), the side of the building that facing Martin Luther King Junior Way is 1501 with parcel number 3-73-4 and listed as commercial repair garage, and the side, that is facing 15th Street, is 660 15th Street with parcel number 3-73-5 and listed as vacant commercial land may include miscellaneous imps.

4.4 DESCRIPTION OF EXISTING ON-SITE STRUCTURES AND IMPROVEMENT

ESTC's representative, Mr. Frank Hamedi, visited the Site on June 11, 2013. The Site is an approximately 13,750 square feet one-story, free standing brick building/warehouse with 3 roll-up doors and a locked chain-link-fence 7,500 square feet parking lot for 22 vehicles that was built sometime in 1930's, and is currently used as indoor soccer arena.

4.5 CITY DIRECTORY ABSTRACT REVIEW

Information regarding occupants/usages and years of the Site and surrounding properties was obtained from EDR's City Directory Abstract report. The subject Site (1501 Martin Luther King Junior Way) was not listed in this report; however for the site at 660 15th Street is listed in this report, and it is as follow: AOC Adjusters General Collection Division from 1970 to 1980; United Airlines Reservations and Information in 1980; United Adjusters Inc. in 1980; Kirby Electric Company from 1986 to 1996 and All Power Indoor Soccer Arena from 2000 to 2012.

For complete list of occupants/usage and year in used of properties surrounding the Site are also listed in EDR's City Directory Abstract report that are attached in Appendix "D".

5.0 SITE BACKGROUND/OPERATION HISTORY

5.1 CURRENT OWNERSHIP

According to Chicago Title Company's Preliminary Report, the current Site owner is Clark R. Beerman, and he owned the property since September 7, 1984. However, according to ACAO's record listed Clark R. Beermann, Walter B. Beermann, E. R. Engdahl, LaVergne Engdahl, and Reginal Tomasello as current the owners of the Site.

5.2 PRIOR OWNERSHIP

ESTC was unable to obtain previous owner(s) for the Site.

5.3 HISTORICAL FIRE INSURANCE MAPS

ESTC requested EDR, Inc. to provide historical fire insurance maps for the Sites. The available historical sanborn maps were 1889, 1902, 1912, 1951, 1952, 1957, 1958, 1961, 1967 and 1970 (Appendix "C"). Reviewed of these maps indicated, that Martin Luther King Junior Way was previous named Grove Street and the Site was a vacant land upto 1912. However, in 1951, a commercial building existed on the Site with a name of Furn'e S until sometime in 1957's when the business changed, and the name changed to Parcel Delivery Depot. Sometime in 1958's, business changed to parking facility for 65 vehicles. Again, sometime in 1967's, business changed to Repossessed Auto Storage.

5.4 AERIAL PHOTOGRAPH REVIEW

To better understand the land use practices at the Sites and its vicinity, ESTC reviewed available historical aerial photographs from Environmental Data Resources, Inc. (EDR), in Milford, Connecticut.

The first photograph available for review was taken in 1939. It shows that the Site and the surrounding properties were already developed with commercial buildings.

The 1946, 1958 and 1968 photographs showed that there were little or no changes on the Site and the surrounding properties.

The 1974 photograph showed that there were little or no changes on the Site and the surrounding properties. However, properties to the west of Castro Street were beginning to clear of structure buildings to be widened for the construction of freeway.

The 1984 photograph showed that little or no changes on the Site and the surrounding properties except the property next to the Site's building (west side) was cleared of structure building and became a parking lot, and the clearing and widen of the properties west of Castro Street completed and freeway construction is underway.

The 1993 photograph showed that little or no changes on the Site and the surrounding properties, and the freeway construction had been completed.

The 1999, 2005, 2009, 2010 and 2012 photographs showed that there were little or no changes on the Site and the surrounding properties.

The photocopy of the 1939, 1946, 1958, 1968, 1974, 1984, 1993, 1999, 2005, 2009, 2010 and 2012 aerial photographs are presented in Appendix "C".

6.0 ENVIRONMENTAL SETTING

6.1 SURFACE WATER CHARACTERISTICS

Lake Merritt is located at approximately 3700 feet east of the Site that flows southwesterly toward Oakland Inner Harbor waterway. Oakland Inner Harbor then flows westerly direction toward San Francisco Bay. The Site is approximately 35 feet above sea level.

6.2 GEOLOGIC SETTING

The subject Sites are located in the southwesterly section of the City of Oakland with the coordinates of Latitude (north) 37° 48' 25.92" and Longitude (west) 122° 16' 32.52". The City of Oakland is located in the East Bay Plain, which covers an area approximately 114 square miles in western Alameda County.

The East Bay Plain is situated in the San Francisco Bay depression, which is in part of an irregular down warp complicated by faulting principally along northwest-trending faults and modified by erosion and deposition. Westerly from the base of the Diablo Range, the East Bay Plain includes an alleviated area close to the highlands and marshland area adjacent to the Bay. The predominant land use type of the Bay Plain area is residential with the majority of the residential areas lying east of I-880, spreading up into the East Bay Hills.

Geologic units in the East Bay Plain area are classified in two general groups, consolidated and unconsolidated. The consolidated units are undivided bedrock units. The unconsolidated units include the older alluvium, Merritt sand, bay mud, inter-fluvial basin deposits, fluvial deposits and younger alluvium.

The unconsolidated deposits lie beneath the East Bay Plain. Collectively they make up the groundwater reservoir of the East Bay Plain area. The undivided bedrock units lie east of the Hayward Fault beneath the unconsolidated deposits and from the boundaries of the East Bay Plain aquifer system.

The undivided bedrock units were deposited mainly as marine sedimentary and volcanic rocks in geosynclines that occupied this portion of California during Jurassic, Cretaceous and Tertiary times. These deposits reached a thickness of approximately 10,000 feet. Toward the end of the Tertiary period, a series of earth movements complexly folded and faulted the deposits. These deposits are now found as a series or mix of mostly consolidated or highly compacted sandstone, shale and chert with some volcanic rocks, serpentine and consolidated conglomerates.

The unconsolidated deposits were lain down in a valley that was formed near the end of the Pliocene epoch or sometime in the Pleistocene by the depression of a large block of land west of the Hayward Fault. This mass tilted toward the east with the western edge above sea level forming the San Francisco Peninsula, and the depressed eastern portion forming the asymmetrical depression in which San Francisco Bay now lies. The fault block east of the Hayward Fault formed a steep westward facing scarp and the hills that are now part of the Diablo Range. Most of the sediments that make up the unconsolidated deposits beneath the East Bay Plain were derived from the Diablo Range.

The older alluvium is the oldest of the unconsolidated deposits, being Pleistocene in age. It consists of a heterogeneous mixture of poorly consolidated to unconsolidated clay, silt, sand and gravel. The sediments are derived mainly from the hills to the east and southeast represent successive coalescing alluvial fans. Toward the Bay some estuarine and marine deposits are found near the base of the deposits.

6.3 HYDROGEOLOGIC SETTING

Groundwater occurs in all geologic units in the East Bay Plain Groundwater Basin (EBPGB) area that extends from Richmond to Hayward. The EBPGB is a northwest-trending alluvial plain that bounded by San Pablo Bay on the north, Niles Cone Groundwater Basin on the south, Franciscan Basement rock on the east and San Francisco Bay on the west (Department of Water Resources [DWR], 2004). The alluvium deposits that extend westward from the East Bay hills to San Francisco Bay constitute the deep water-bearing strata for groundwater basin (DWR, 2004). However, older alluvium deposits contain appreciable quantities and are considered as the principal groundwater basin in the East Bay. In general, the groundwater in the East Bay Plain flows west and southwest.

Groundwater in the Site vicinity is generally divided into upper and lower zones. The lower zone is generally found at depths greater than 150 feet and constitutes the principal pumping zone. Groundwater in the upper zone occurs at depths of less than 50 feet.

Groundwater of the Site is in the upper zone with the depth anywhere between 15 to 28 feet below ground surface depending on seasonal changes.

7.0 SITE INSPECTION

7.1 SITE OBSERVATION AND INQUIRIES

ESTC's representative obtained information regarding the Sites from Mr. Ed Hemmat who had provided the Chicago Title Company's Preliminary Report on June 19, 2013. In the report, it stated that Mr. Clark R. Beerman owns the Site since September 7, 1984 but officially recorded as on January 3, 1985, and the buildings were built sometime in 1930's that were used for commercial businesses.

There are no recorded documents suggesting release of hazardous substances or petroleum products or a permitted facility that were sighted in EDR's Radius Map with Geo Check report for the Sites. However, our investigation suggested that the Site is contaminated with petroleum product and evidence of underground storage of petroleum product.

7.2 AST/UST SYSTEM AND PIPELINES

ESTC's representative notice that there are 1 vent line pipe for underground storage tank on sidewalk goes next to the southeast wall of the building and 2 hydraulic lifts inside the building.

7.3 TRANSFORMERS AND PCB EQUIPMENT

Fluorescent light ballasts that contain polychlorinated biphenyls (PCBs) are considered hazardous waste if discarded. Ballast manufactured after January 1, 1978, do not contain PCBs and should be labeled as such on the ballast. Ballast without non-PCB labels, therefore, shall be assumed to contain PCBs. The California Department of Toxic Substances Control (DTSC) does not have the authority to regulate the use of PCBs. Therefore, there are no DTSC regulations that would require removal of an item that contains PCBs such as transformers and fluorescent light ballast. DTSC hazardous waste regulations apply only when and if materials, which contain PCBs, become a waste. Fluorescent light fixtures are used in the building. ESTC's representative observed no building or discarded and defective ballast at the Sites.

Transformers containing more than 50 parts per million (ppm) PCB are considered PCB transformers. Pacific Gas & Electric Company (PG&E) is responsible for overseeing operation and maintenance of transformers. Through a conversation with PG&E representatives, ESTC was told that presently more than 90 percent of transformers are non-PCB transformers in California. If a property owner wishes to determine whether the transformer at his/her property is a PCB transformer, he/she shall need to contact PG&E for inspection, sampling and analysis. If the transformer is a PCB transformer, PG&E will replace PCB with mineral oil at no cost. But if the transformer is non-PCB transformer, the owner has to pay for the inspection and chemical analysis. No transformer was found at the vicinity of the Site.

7.4 ON-SITE REGULATED SUBSTANCE IDENTIFICATION/INVENTORY

ESTC's representative observed several buckets of paint and cleaner chemicals at the Site, and he also noticed vent line pipe for underground storage tank on sidewalk goes next to the building.

7.5 ASBESTOS CONTAINING MATERIAL

The Department of Toxic Substances Control (DTSC) has classified friable, finely divided, and powdered wastes containing greater than one percent (1.0%) asbestos as hazardous waste. Asbestos includes all mineralogical forms of chrysotile, amosite, crocidolite, tremolite, antophyllite, and actinolite. A friable material is one that can be reduced to powder or dust under hand pressure when dry.

The federal government has banned production of friable asbestos-containing materials (ACMs) since 1979. Asbestos generally becomes a health hazard when the individual fibers become airborne and inhaled by the public. ACMs, therefore, are not considered health hazard if they are properly maintained, and not disturbed. No regulation requires property owners to remove ACMs as long as they are maintained properly. ACMs must be removed prior to demolition or renovations where its disturbance becomes imminent.

Section 25915, Division 20 of the California Health and Safety Code dated 1988 indicated that owners of public and commercial buildings constructed prior to 1979 must disclose the presence of asbestos to their tenants and workers doing business or work in areas where they could be exposed to asbestos. Additionally, section 25915 also requires that knowledge of ACMs be disclosed during real estate transactions. No sample was collected for suspected building material containing of ACMs at the subject property during our inspection. However, we recommend that soil to be tested for natural deposit of asbestos such as Tremolite Asbestos after removal of surface structure and Site cleaning prior to grading and excavation.

7.6 LEAD-BASED PAINT

Lead-based paint (LBP) or other surface coatings are considered material that contain an amount of lead equal to, or in excess of, one milligram per square centimeter (1.0 mg/cm^2), more than 5,000 parts per million (ppm), or more than half of one percent (0.5%) by weight. Engineering controls and air monitoring shall be implemented during disturbance of chipping or deteriorated LBP to eliminate the risk of public and workers exposure.

Abatement projects producing hazardous lead waste must meet land disposal restrictions under Resource Conservation and Recovery Act (RCRA).

Cal-OSHA requires that worker's safety protection shall be implemented to prevent lead exposure above Permissible Exposure Level (PEL) during construction activities. PEL for lead is 50µg/m^3.

ESTC's representative did not sample any building material for asbestos, lead base paint peeling or chipped paint at the Site.

7.7 RADON ISSUES

Radon is colorless, odorless, radioactive gas. It is generated from the natural decay of uranium that is found in almost all soils. It typically moves through the ground to the air above and into buildings through cracks and openings in the foundation.

The United States Environmental Protection Agency (EPA) considers 4 picocuries per liter (pCi/L) Radon as the threshold of concern. A document, EPA's Map of Radon Zones for California under Sections 307 and 309 of the Indoor Radon Abatement Act of 1988 (IRAA) identified Alameda County as Zone 2 (Appendix "F").

Zone 2 areas are predicted to have an average indoor radon screening potential to between >=2 pCi/L and <=4 pCi/L. In EDR's report, an information table document shows Federal EPA Radon of 49 tested sites between -0.400 pCi/L and 1.338 pCi/L as a mean radon level surveyed in Alameda County during 1986 to 1992.

A California Statewide Radon Survey Screening Results prepared by Department of Health Services show survey-screening 0 out of 42 tests with the results of >4 pCi/L for the area that within the same zip code as for the Site.

8.0 ENVIRONMENTAL REGULATORY AGENCY INQUIRIES

ESTC reviewed the following federal and state lists of properties known for soil and/or groundwater contamination within a mile radius of the Sites, through an automated database search, EDR Inc. This information is presented in a report by EDR (Appendix "E"). A map produced by EDR (Appendix "E") shows the identified properties in relation to the Site. Please note that some of the lists are extended to a mile while the others cover listed properties located within ⅛ to ½-mile radius of the Sites.

DATABASE	TYPE OF RECORDS	AGENCY

According to EDR's report, the Site was not identified as contaminated or a permitted of hazardous material storage facilities in any of the above-mentioned agencies. There are several other properties identified within 1-mile radius of the Site as permitted hazardous material storage facilities, and records of files for these properties were found with the agencies such as listed-above. There are several properties identified within 1-mile radius of the Sites as contaminated facilities with soil and/or groundwater contamination. A case closure had been issued to some of the properties indicating that it has completed the necessary investigation and cleanup works required by regulatory jurisdiction. Other active properties were sighted which are still performing investigation and/or cleanup activities.

A copy of the relevant most updated document for these properties is provided in Appendix "E".

9.0 SOIL AND GROUNDWATER SAMPLING FIELD WORKS

Based on the results of our Site inspection and review of sanborn maps, we concluded that the past usage of the properties might affect the soil and groundwater beneath the Site; therefore, a limited investigation of soil and groundwater were recommended to Mr. Ed Hemmat. After obtaining all necessary drilling permit form the Alameda County Public Works Agency, fieldwork was conducted on June 11, 2013. ESTC mobilized a trailer-mounted direct-push (Geoprobe) drilling rig and drilled four borings (three inside the building and one in the parking lot area) at various locations in the vicinity of the property. Soil samples were collected in continuous polyethylene tubes for examination and lithologic description, and project engineer logged, described, and sampled the soil. The boring logs are included in Appendix "J". The cores were examined for evidence of hydrocarbon staining or odors. The soil were sampled at 5-foot intervals to the depths of 30 feet below surface grade. Soil samples were labeled with letter and sets of numbers. The first set of number stands for the boring number and second set of number stands for the depth (feet) was collected. A total of 23 soil and 3 groundwater samples were collected, sealed, capped, and labeled and then transmitted to Accutest Laboratories Northern California for analysis with chain-of-custody record.

Three groundwater samples were collected from borings after a temporary casing was placed in each boring, and a bailer was lowered to the bottom to collect a water sample. The samples were then poured into 40-ml glass vials and 1-liter amber bottles, and the borings were backfilled with cement grout. No groundwater was encountered in one of the boring (B-4); therefore, ESTC did not collect water sample from this boring.

Selected soil (10 and 20 feet only) and three groundwater samples were tested in certified laboratory (Accutest Laboratories Northern California). EPA method SW846 8015B M and SW846 3510C were used to detect Total Petroleum Hydrocarbons as diesel and motor oil (TPHd and TPHmo), respectively, and EPA method 8260B was used to detect all other analytes of concern. The laboratory results are summarized in Tables 4 and 5 (Appendix "A"), and the laboratory reports are contained in Appendix "K".

10.0 RESULTS

10.1 SOIL DESCRIPTION

Four soil borings to the depth of 25 to 30 feet revealed that the Site's soil consist of light brown to yellowish-brown sandy silt.

10.2 SOIL ANALYTICAL RESULTS

The laboratory's report is contained in Appendix "K", and the results are summarized in Table 4. Soil sample B-1 at 10 feet detected low level of TPHd at 6.87 milligrams per kilogram (mg/Kg), TOG, 17.7 mg/Kg, Naphthalene at 0.99 microgram per kilogram (µg/Kg0) and 1,2,4-Trimethylbenzene, at 1.6 µg/Kg, but TPHg, BTEX and MTBE were below laboratory detection limit. Sample B-1 at 20 feet detected low level of TPHg at 54.4 µg/Kg, BEX at (3.1 µg/Kg, 1.0 µg/Kg and 3.4 µg/Kg, respectively) and 1,2,4-Trimethylbenzenzene at 1.4 µg/Kg, while TPHd, TPHmo, Toluene and MTBE were below laboratory detection limit. Sample B-2 at 10 feet detected low level of TPHd at 17.7 mg/Kg, TPHmo at 27.5 mgKg, but other analytes were below laboratory detection limt. The rest of soil samples from B-2, B-3 and B-4 detected TPHd, TPHg, TPHmo, BTEX, MTBE and other VOCs are below laboratory detection limit.

10.3 GROUNDWATER ANALYTICAL RESULTS

Table 5 (Appendix "A") summarizes the laboratory results of the grab groundwater samples collected on June 11, 2013, and the laboratory report is contained in Appendix "K". Groundwater samples from all three borings detected low to moderate levels of TPHd, TPHg, BTEX, and other VOCs while TPHmo and MTBE were below laboratory detection limit.

11.0 CONCLUSIONS AND RECOMMENDATIONS

Based on our field works and laboratory tests results, the Site's soil and groundwater are contaminated; therefore, we recommend to remove the underground storage tank and the two hydraulic lifts and conduct additional soil and groundwater assessment to define the extent of contamination, unless different directive from regulatory agency(ies) is requested.

Based on the above information, in our professional opinion, that soil and/or groundwater of the Sites have been impacted by on-site sources of hazardous substances and petroleum products; however, the extent of contamination is unknown at this point.

12.0 LIMITATIONS

This report and the associated work have been provided in accordance with the general principles and practices currently employed in the environmental consulting profession. The contents of this report reflect the conditions of the site at this particular time. The findings of this report are based on:

1) The observations of field personnel.
2) The results of laboratory analyses performed by a state-certified laboratory.

It is possible that variations in the soil and groundwater could exist beyond the points explored in this investigation. Also, changes in groundwater conditions of a property can occur with the passage of time due to variations in rainfall, temperature, regional water usage and other natural processes or the works of man on this property or adjacent properties.

This report is issued with the understanding that it is the responsibility of the owner or his/her representative to ensure that the information and recommendations contained herein are called to the attention of the Local Environmental Agency.

The services that ESTC provided have been in accordance with generally accepted environmental professional practices for the nature and conditions of the work completed in the same or similar localities, at the time the work was performed. This report is not meant to represent a legal opinion. No other warranty, express or implied is made.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. Sanborn® Library search results
Certification # B679-4E96-9481

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ✔ Library of Congress
- ✔ University Publications of America
- ✔ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Enviro Soil Tech Consultants (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

1501 MARTIN LUTHER KING JUNIOR WAY
OAKLAND, CA 94612

COORDINATES

Latitude (North):	37.8072000 - 37° 48' 25.92''

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/04/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/12/2013 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 02/12/2013 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 03/13/2013 has revealed that there are 4 RESPONSE sites within approximately 1 mile of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 03/13/2013 has revealed that there are 29 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 03/18/2013 has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 12/10/2012 has revealed that there

are 54 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there are 2 HIST Cal-Sites sites within approximately 1 mile of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, and dated 12/11/2012 has revealed that there is

1 DRYCLEANERS site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 32 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 33 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Status Date: 05/16/1991
Lead Agency: ALAMEDA COUNTY LOP
Case Worker: PK
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: 01-1070
LOC Case Number: RO0002456
File Location: Stored electronically as an E-file
Potential Media Affect: Soil
Potential Contaminants of Concern: Tetrachloroethylene (PCE), * Chloroform, * * Chloroform, Gasoline
Site History: Two USTs were removed from the site in November 1987. In 1990, a preliminary site assessment was performed which discovered that contaminated soil had been left in place following the initial UST removals. Approximately 430 cubic yards of soil was excavated and removed from the site. Monitoring well installation and quarterly groundwater sampling followed.

File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	During a UST system upgrade in February 1997 to install under dispenser pans a release was noted. In February 1997 hand augered bores CB-1 to CB-12 were installed to further investigate the release. In May 1997 wells MW-1 to MW-3 wee installed. In March 1999 wells MW-4 to MW-6 were installed. In March 2001 well MW-7 was installed. In March 2004 bores B1 to B4 were installed to recharacterize soil for the installation of a new UST complex for a station remodel. Additional work is proposed for delineation of the downgradient extent of the dissolved plume.

Used oil transporter: No

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker:	BJJ
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	01-0210
LOC Case Number:	RO0000151
File Location:	Stored electronically as an E-file
Potential Media Affect:	Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Benzene, Gasoline
Site History:	On June 16, 1987, three gasoline underground storage tanks (USTs) were removed from the Site and a suspect unauthorized release was confirmed. Two USTs had a capacity of 1,000 gallons and one UST held 550 gallons of gasoline. Soil was reportedly excavated to 9 feet bgs, aerated onsite to gacceptableh levels (no confirmation samples analyzed), and used as fill material to backfill and compact the former excavation. Groundwater monitoring wells MW]1 through MW]3 were installed in June 1987 and well MW]1 initially contained 30 inches of free]phase floating product. Free product also detected in monitoring well at off-site down-gradient property.

Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Under Investigation
Potential Contaminants of Concern:	Arsenic, Diesel, Heating Oil / Fuel Oil, Kerosene, Stoddard solvent / Mineral Spriits / Distillates, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	As described in the Limited Phase II Environmental Site Sampling Report dated August 5, 2010, prepared by Basics Environmental, it appears that soil and groundwater contamination at the site consists of petroleum hydrocarbons and heavy metals. The sampling results indicate that diesel, kerosene, motor oil and bunker oil were detected in one grab groundwater sample at concentrations exceeding their respective environmental screening levels (ESLs) for groundwater. Arsenic was detected in two shallow soil samples at concentrations exceeding the ESL for arsenic in shallow soil (0-10 feet).

Case Type:	Cleanup Program Site
Case Worker:	MS
Local Agency:	Not reported
RB Case Number:	01S0375
File Location:	Regional Board
Potential Media Affected:	Soil
Potential Contaminants of Concern:	Diesel
Site History:	The San Francisco Bay Regional Water Quality Control Board (Water Board) announces a proposed soil cleanup plan for Parcel T-12, located in downtown Oakland at 601 12th Street (the Site) between Martin Luther King Jr. Way, Jefferson Street, 11th Street, and 12th Street. The proposed soil cleanup plan consists of excavation and off-site disposal of impacted Site soils. We invite any interested parties to comment on the proposed cleanup plan. Written comments are due to the Water Board at the above address by November 8, 2008. Background The Site was occupied by the old Oakland High School from late 1800s through the 1940s. The building was demolished in 1944 and replaced by a parking lot. Reported land use between 1920 and 1960 within one block of the Site has included manufacturing and machine shops, paint companies, auto-repair / service stations, printers / publishers, and dry cleaning establishments. The Site presently consists of a level asphalt public parking lot, approximately 1.4 acres in size. Surrounding land use is mix used of commercial, residential and parks. Oakland T12 LLC (T12) and the City of Oakland

CITY OF OAKLAND COMMUNITY AND ECONOMIC DEVELOPMENT AGENCY (Continued) **S108997029**

Community and Economic Development Agency plan to develop the Site into a 23-story high-rise office building with two levels of basement parking starting in the fall of 2008. As part of the design, the Site will be excavated to approximately 27 feet below ground surface (bgs), and approximately 60,000 cubic yards of soil will be removed. The Site is shown on the attached map and aerial photograph. The Water Board is the lead regulatory agency overseeing soil and groundwater cleanup activities at this Site Site Investigation Environmental investigations at the Site included the collection of soil samples and the installation of monitoring wells for groundwater sample collection. The Site is underlain by fill consisting of silty to gravelly sand with brick fragments ranging in depth from 4 to 13 feet below ground surface. Native material consisting of silty to clayey sands underlies the fill. Soil in a small area of the Site is impacted with lead, arsenic, thallium and petroleum hydrocarbons (oil and grease) at concentrations slightly above environmental screening levels. Groundwater beneath the site has not been impacted. Proposed Cleanup Plan The proposed cleanup plan consists of excavation and removal of impacted Site soils. The Site hot spot soils will be excavated to the top of the native soil and disposed off-site in appropriate landfills. Confirmation soil samples will be collected from the sidewalls and base of the excavation to confirm the impacted soils are excavated and removed to the extent possible. Dust control, air monitoring and Site access controls will be implemented during soil excavation and removal activities at the Site. The excavation of soil at the Site is anticipated to take approximately 4 to 6 weeks. Truck traffic associated with the removal of excavated soil will be via 11th and 12th Streets and Interstate 980. We invite any interested parties to comment on the proposed cleanup plan. Written comments are due to the Water Board at the above address by November 8, 2008.

US BROWNFIELDS:

Recipient name:	Oakland Redevelopment Agency
Grant type:	Cleanup
Property name:	FOX COURTS SITE
Property #:	0080642017-00
Parcel size:	1.1
Property Description:	The subject site is located adjacent to the historic Fox Theater in downtown Oakland. The site was used for housing in the early 1900s, but from 1928 onwards, it was used for various commercial uses such as auto parking and garage, paint & wallpaper store, furniture store, sign painting, art glass works, and metal/machine works. The site had been occupied by an art school for the past few years. Based on the site investigations, the soils are contaminated with petroleum hydrocarbons and lead. As part of the redevelopment, the contaminated soils will be removed and disposed off at a landfill.

Property name:	FOX COURTS SITE
Property #:	0080642017-00
Parcel size:	1.1
Property Description:	The subject site is located adjacent to the historic Fox Theater in downtown Oakland. The site was used for housing in the early 1900s, but from 1928 onwards, it was used for various commercial uses such as auto parking and garage, paint & wallpaper store, furniture store,

FOX COURTS SITE (Continued) **1010492059**

sign painting, art glass works, and metal/machine works. The site had been occupied by an art school for the past few years. Based on the site investigations, the soils are contaminated with petroleum hydrocarbons and lead. As part of the redevelopment, the contaminated soils will be removed and disposed off at a landfill.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Lead Agency:	ALAMEDA COUNTY LOP
Case Worker:	PK
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	01-0722
LOC Case Number:	RO0000074
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Benzene, Gasoline, Napthalene
Site History:	In June 1989, a preliminary subsurface investigation, consisting of boring installations, detected hydrocarbon contamination in soil samples. Six out of service USTs were removed from the site in April 1990. Free product /groundwater recovery system began operating in November 1992 and ceased operating in January 1997.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)

TRIBUNE TOWER COMPLEX (Continued) **1000277319**

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: June 23, 2006 a phase II environmental assessment was performed. Petroleum hydrocarbons and oxygenates were observed in soil samples. Groundwater samples were not collected. Additional investigation was proposed and approved however, this was not performed. In August

SHORE ACRES GAS (Continued) **S108418274**

2009, three 12,000-gallon USTs, dispensers and piping were removed from the site. Confirmation samples indicated elevated petroleum hydrocarbon concentrations in soil and groundwater.

Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at https://ehgis.acgov.org/dehpublic/dehpublic.jsp. Three Stoddard Solvent USTs were removed from the site, two in 1986 and the third in 2006. Elevated concentrations of TPH-ss (to 5,500 mg/kg) were detected in soil samples. A remedial excavation was proposed and has been approved. The remedial excavation has not been implemented.

Case Worker: PK
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: NA
File Location: Stored electronically as an E-file
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Total Petroleum Hydrocarbons (TPH)
Site History: Unauthorized Release (Leak) Report dated 8/16/1993. Soil and groundwater investigations conducted in 1992,1993 and 1998. Geophysical survey conducted in 1992 turned up eight anomalies - one of the objects identified within the release footprint interpreted as potentially a tank. Elevated contaminant concentrations noted at the site in 1992 at 25-feet below ground surface (bgs) - source has not been identified. A number of soil samples collected from the site in 1993 and 1998 indentified hydrocarbons in the diesel analysis that did not match the diesel standard pattern. On-site monitoring wells MW-20 and MW-21. Depth to ground water reported as 23 to 26 feet bgs. Investigated potential for BART line to act as preferential pathway for on-site/off-site contaminated groundwater migration since the top of the lines are located at 17 feet bgs at the site. Concluded that the BART tube could not act as a conduit because ther is no engineered backfill surounding the tube and the annular spaces between the boring walls and the tube were filled with grout. ACEH requested investigation into whether BART pumps iin the vicinity of the site could influence groundwater flow. Wokplan dated July 27, 1999.

Site History: A plating facility was operated at the site between 1957 and 1998, at

FRANCIS PLATING (Continued) **S107473153**

which time the site was abandoned. The abandoned plating facility contained hazardous materials and wastes, which were removed during an emergency response action directed by U.S. Environmental Protection Agency (EPA), Office of Emergency Response in 1998/1999. Subsequent soil and groundwater investigations have found that the soil and groundwater at the site have been impacted by metals, in particular hexavalent chromium (Cr-VI), and volatile organic compounds (VOCs), in particular, trichloroethene (TCE). The primary source of metals and VOCs appears to have been a below-grade concrete structure referred to as the Frog Pond. Between June and December 2007, the Frog Pond was removed and backfilled with gravel. The Frog Pond was subsequently covered with a concrete cap. Additional investigation is currently underway to define the extent of contamination. Alameda County Environmental Health has requested that site cleanup be initiatied through interim remediation or pilot testing.

Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Four USTs, located under the sidewalk on 11th Street near the Webster Street intersection were removed from the site in April 1987. Significantly elevated concentrations of soil and groundwater contamination was present at the site. In 1987, borings and monitoring wells were installed at the site. In 1988, a groundwater extraction system began operation. The site was later redeveloped to an multi-story office complex with three floors of sub-grade parking.

Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Benzene, Gasoline
Site History: One 1,000-gallon gasoline UST was removed on August 3, 1992 and two 500-gallon USTs were removed on August 6, 1992. The tanks had been located in the sidewalk. Samples collected beneath the tanks. The maximum concentrations were detected near the USTs at 1,500 mg/kg TPHg and 12 mg/kg benzene. Nine soil borings were installed in July 1994 to investigate the extent of the release. Three were converted to monitoring wells.

Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	In 1986 tank basin soil and a groundwater sample were collected during the replacement of USTs in a pre-existing tank basin; hydrocarbon concentrations were encountered. Sixteen soil vapor wells are reported to have been installed in 1986 and 1987 over the BART tube, located directly below the site; however, no data has been submitted. In 1992 a groundwater sample was collected from a former vadose zone well (VW-2) and concentrations of concern were encountered; however, the location of VW-2-1 is unknown. In July 1994 product lines were removed and upgraded and low hydrocarbon concentrations were encountered. In March 2000 eight hand-augered bores were installed at the site; most bore depths were limited to 10 feet by the presence of the BART tube. In Mach 2002 wells MW-1 to MW-3 were installed on either side of the BART tube and right-of-way. Additional work is proposed.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/28/2002
Comments: PEA - PA/SI - Preliminary Assessment completed for U.S. EPA which found that no further action was needed at the site. Starting in 1998, the United States Environmental Protection Agency (US EPA) did an emergency removal of the hazardous substances. In October 1999, soil was removed in selected areas from 6 inches to 2 feet. There are no current operations at the site. Francis Plating used various plating solutions for aluminum anodizing, nickel and cadmium plating, and chromic acid passivation for stainless steel parts. Acids, bases, and dyes were used in the operation. Copper, lead, cadmium, nickel, cyanides, silver, zinc, sulfates, phosphates, chlorides, and soap solutions located in tanks and vats were some of the many chemicals used in the plating process. Some of these were located in a stainless steel containment tank 32 feet by 15 feet by 5 feet inside the building. There was a concrete pit area 15 feet by 68 feet by 3.5 feet outside in the "front yard" called the "Frog Pond". In the Front Yard along the 7th Street (east side) and along the fence next to the Shell Gas Station (north side) were limited areas of exposed soil. Most of the site was either paved, or had concrete or buildings on it. Francis Plating had a discharge permit and sent treated wastewater to the municipal sanitary system. East Bay Municipal Utility District (EBMUD) sealed the sanitary connection with concrete in the fourth quarter of 1996. Wastewater was then treated on-site. Wastewater, sent though the boiler to concentrate and precipitate the metals, was then fed into a filter press. The filter cake was spread out on the cement in the northern portion of the site and dried. There are no records of hazardous materials or waste removed from the site after 1993. After 1994, the property was used to store hazardous material picked up by Earthco Environmental for disposal. The trailers located in the "Rear Yard" area were used. Starting in 1994, hazardous substances generated by operations on site were recycled back into the manufacturing process. US EPA led the cleanup after the fire in 1992. Some runoff from the fire reached

FRANCIS PLATING OF OAKLAND INC (Continued) **1000308458**

the Oakland Estuary from storm drains in the area of the Howard Terminal. Much of the runoff was captured and contained and later disposed off site. The Regional Water Quality Control Board (RWQCB) sampled the water and sediments in the estuary for US EPA. In July 1999, eight surface composite samples were taken in the front yard and three in the rear yard area along Brush Street. In addition, there were 12 subsurface borings taken around the site and five waste sediment locations. The results ranged as follows: cadmium up to 2,100 milligarms per kilogram (mg/kg), lead up to 26,000 mg/kg, arsenic up to 26 mg/kg, and chromium up to 84,000 mg/kg. Based on the initial results, exposed soil to the depth of one-foot was removed along Brush Street and in the Front yard. After confirmation sampling, selected areas were excavated an additional six inches. After additional confirmation sampling, the site soil contained cadmium 0.7-7.5 mg/kg, lead 22-450 mg/kg, arsenic 1.2-7.4, and total chromium 13-300 mg/kg. Only one of the confirmation samples was above the residential cleanup levels for chromium and lead.

Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	01-0475
LOC Case Number:	RO0000359
File Location:	Stored electronically as an E-file
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	In August 1990, two gasoline USTs, one waste-oil UST and four dispensers were removed. Maximum soil concentrations detected were 310 mg/kg TPHg, 100 mg/kg TPHd and 0.820 mg/kg benzene from the the gasoline USTs and dispensers. However, free product was observed in groundwater in the waste-oil UST excavation. Subsequent excavation in the waste-oil tank area could not remove the contaminated soil from beneath the building so this was left in place. Monitoring wells were installed in 1994 and were monitored sporadically until 2005 when semi-annual monitoring began. The recent investigation in 2009

TONY'S BEACON STATION (Continued) **S101624496**

indicated groundwater concentrations up to 41,000 g/L TPHg, 240,000 g/L TPHd, 110,000 g/L TPHmo, and 2,800 g/L benzene.

RB Case Number: 01-0120
LOC Case Number: RO0000072
File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: The site is currently an active ARCO-brand gasoline retail station and consists of a service station building and four gasoline USTs with associated piping and dispensers. Land use in the immediate vicinity is commercial. In May 1991 Gettler-Ryan, advanced four soil borings (A-B through A-E) during a preliminary soil investigation and well abandoment prior to UST replacement. In January 1992, Roux Associates collected nine soil samples (SW-1 through SW-9) during excavation and removal of four USTs. Approximately 2,196 cubic yards of petroleum impacted soil was excavated and disposed of offsite and 10,000 gallons of groundwater removed from the excavation. Four new 10,000 gallon fiberglass USTs were subsequently installed. In February 1992, following removal of the product lines, Roux collected five soil samples (L1 through L5) from the product line trenches. Based on elevated concentrations of TPHd, overexcavation was conducted to remove additional contaminated soil. Components associated with a vapor and groundwater extraction system were

ARCO #02169 (Continued) **S104396772**

installed concurrently with the installation of new product piping to facilitate future installation. In March 1992, GeoStrategies, Inc installed four monitoring wells A-1 through A-4 and one recovery well (AR-1). In June 1992, GSI installed three vapor extraction wells (AV-1 through AV-3) and one recovery well (AR-2). In June 1992, GSI conducted a vapor extraction test and a step-drawdown aquifer test to asses the feasibility of a SVE and groundwater extraction system. In February 1993, GSI installed two off-site monitoring wells (A-5 and A-6). In September 1993, GSI installed 3 air sparge wells (AS-1 through AS-3) and two vapor extraction wells (AV-4 and AV-5) and performed air sparge/vapor extraction pilot tests. In December 1993, GSI installed two additional air sparge wells (AS- and AS-5), two vapor extraction wells (AV-6 and AV-7), and two dual groundwater recovery/vapor extraction wells ADR-1 and ADR-2. Operation of the air sparge and vapor extraction system began in June 1994 and continued until December 2001 when the system was shutdown due to low concentrations. The groundwater extraction system never operated. SVE system was installed and operated from 1994 to 1998. In 1998, began biosparge operation, which ceased in 2001.

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Waste code:	D004
Waste name:	ARSENIC
Waste code:	D005
Waste name:	BARIUM
Waste code:	D006
Waste name:	CADMIUM
Waste code:	D007
Waste name:	CHROMIUM
Waste code:	D008

SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Corrective Action Summary:

Event date: 09/27/1990
Event: RFA Completed, Assessment was an RFA.

Event date: 09/27/1990
Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 03/29/1992
Event: CMS Imposition

Event date: 03/29/1992
Event: RFI Imposition

Event date: 06/01/1993
Event: RFA Completed

Event date: 06/16/1993
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 06/18/1993
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 01/01/1996
Event: RFI Imposition

Event date: 02/01/1996
Event: RFI Workplan Received

SAFETY KLEEN CORP 7 178 01 (Continued) **1000224433**

Event date: 02/23/1996
Event: RFI Workplan Approved

Event date: 05/20/1996
Event: RFI Approved

Event date: 04/06/2000
Event: CMS Workplan Received

Event date: 04/06/2000
Event: CMS Workplan Approved

Event date: 09/21/2009
Event: RFI Report Received

Event date: 02/16/2010
Event: RFI Approved

Event date: 04/09/2010
Event: RFI Workplan Received

Event date: 06/14/2010
Event: RFI Workplan Modification Requested By Agency

Event date: 06/14/2010
Event: RFI Workplan Notice Of Deficiency Issued

Event date: 06/29/2011
Event: RFI Workplan Approved

Event date: 11/04/2011
Event: RFI Supplemental Implementation Begun

Event date: 01/16/2012
Event: RFI Supplemental Implementation Begun

Event date: 03/16/2012
Event: RFI Report Received

Event date: 07/03/2012
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 09/28/2012
Event: RFI Approved

Event date: 11/05/2012
Event: RFI Supplemental Information Received

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA Enforcement Criminal Records Management System (ECRM), now called the Criminal Case Reporting System (CCRS), is the Criminal Investigation Division's (CID) "official record" of all criminal investigation activities. The system maintains and tracks case-specific program and investigative information on over 8,200

E-D COAT, INC. (Continued) **1000108096**

active and archived criminal cases. CCRS is an EPA-only system and data entry is performed directly by CID employees. The Public is allowed to obtain only select defendant data fields for closed, convicted cases via the Freedom of Information Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS WASTE BIENNIAL REPORTER

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to replace EPA’s independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp. A 10,000 fuel UST was removed on June 15, 1988. Agency correspondences also state that TPH-g and benzene concentrations in soil were detected. A groundwater monitoring well installed in 1988, located approximately 4 feet down-gradient of the former UST pit , also detected TPH-g and benzene in soil at concentrations. Soil samples were also collected during the pre-construction for the new Cypress replacement project. Groundwater sample analytical results collected in 1988 detected TPH-g and in June 1992. Groundwater sample analytical results collected in August 16, 2006 detected lower concentrations of TPH-g and benzene.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 01/28/2013
Comments: The Remedial Design Implementation Plan (RDIP) involves excavation of a portion of Jefferson Street where separate-phase petroleum product (SPPH) is present. The scope involves shoring, excavation of approximately 1,700 cubic yards of oil-stained soil, transport of approximately 100 truckloads, and disposal at a licensed landfill. Groundwater will be pumped from the excavation, treated and discharged or stored in tanks temporarily prior to trucking to a treatment facility. The RDIP is being implemented as part of an approved Remedial Action Plan (RAP) cleanup program which is addressing residual contamination at the Site from former power plant operations. The RAP also includes groundwater monitoring, maintenance of an impermeable cap across the Site, and land use restrictions.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 12/12/2012
Comments: The Preliminary Construction Investigation Workplan scope includes potholing two pits for the purposes of 1) inspecting a fuel pipeline and 2) for testing soil and groundwater conditions including hydraulic testing for groundwater recharge rates, soil density, and collection of soil samples for waste characterization. The dimension of the pits will be 2 feet wide and 6 feet long and extend to a depth of 8 feet below the ground surface. The information gathered will be used for shoring design during construction and waste characteristics of excavated soils for off-site disposal. Mitigation alternatives for odors will also be evaluated.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 02/26/2013
Comments: The document summarized field activities conducted from December 17-21, 2012. Two test pits were dug and fuel pipelines were inspected and found to be in good condition. Soil conditions were observed to check for properties like density and groundwater saturation. Air monitoring related to contamination from the historical power plant operations was conducted in order to develop odor mitigation strategies for the future planned excavation in the street area (Jefferson Street). Groundwater and soils which were generated as part of the investigation was tested and found to be non-hazardous; and were properly disposed at liscensed facilities.

PG&E OAKLAND POWER PLANT (Continued) **S103177008**

Comments:	The Remedial Design Implementation Plan (RDIP) involves excavation of a portion of Jefferson Street where separate-phase petroleum product (SPPH) is present. The scope involves shoring, excavation of approximately 1,700 cubic yards of oil-stained soil, transport of approximately 100 truckloads, and disposal at a licensed landfill. Groundwater will be pumped from the excavation, treated and discharged or stored in tanks temporarily prior to trucking to a treatment facility. The RDIP is being implemented as part of an approved Remedial Action Plan (RAP) cleanup program which is addressing residual contamination at the Site from former power plant operations. The RAP also includes groundwater monitoring, maintenance of an impermeable cap across the Site, and land use restrictions.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 12/12/2012
Comments: The Preliminary Construction Investigation Workplan scope includes potholing two pits for the purposes of 1) inspecting a fuel pipeline and 2) for testing soil and groundwater conditions including hydraulic testing for groundwater recharge rates, soil density, and collection of soil samples for waste characterization. The dimension of the pits will be 2 feet wide and 6 feet long and extend to a depth of 8 feet below the ground surface. The information gathered will be used for shoring design during construction and waste characteristics of excavated soils for off-site disposal. Mitigation alternatives for odors will also be evaluated.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 02/26/2013
Comments: The document summarized field activities conducted from December 17-21, 2012. Two test pits were dug and fuel pipelines were inspected and found to be in good condition. Soil conditions were observed to check for properties like density and groundwater saturation. Air monitoring related to contamination from the historical power plant operations was conducted in order to develop odor mitigation strategies for the future planned excavation in the street area (Jefferson Street). Groundwater and soils which were generated as part of the investigation was tested and found to be non-hazardous; and were properly disposed at liscensed facilities.

Manufactured Gas Plants:

The PG AND E Oakland Site is located near the Oakland Inner Harbor along Embarcadero West. The PG AND E Oakland Site is a portion of the former Oakland Manufactured Gas Plant (MGP) site. The Site includes two parcels: a portion of the former MGP at 550 Market Street; and the Station C Electric Generating Substation at 630 Embarcadero West. The MGP operated between 1905 and 1930. Wastes typically associated with MGP included tar residues, sludges, and spent oxides. The Station C property supporteed operations at the off-site historical MGP site.

Environmental Interest/Information System
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal

HARRIS DRY CLEANERS (Continued) **1000855627**

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	09/10/1993
Comments:	Investigation conducted by Penn Environmental. Soil samples had tetrachlorethylene (PCE) up to 0.14 milligrams per kilogram (mg/kg) and trichloroethylene (TCE) up to 0.19 mg/kg. Groundwater had PCE up to 8100 micrograms per liter (ug/L) and chloroform up to 2.3 ug/L. The report concluded that there had been an on-site release of PCE impacting groundwater, with evidence of off-site migration. DTSC did not oversee the investigation.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	02/01/2007
Comments:	Investigation conducted by City of Oakland. Tetrachloroethylene (PCE) was detected om groundwater off-site above screening levels. DTSC did not oversee this investigation.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report
Completed Date:	08/13/2009
Comments:	Tetrachloroethene (PCE) was detected in soil up to 330 milligrams per kilograms, in groundwater up to 53,000 microgram per liter and in soil gas up to 120,000 microgram per cubic meter inside the building. Additional sampling is proposed in the technical memorandum to close the data gaps.

Completed Date:	03/20/2009
Comments:	CFA extended to 6/30/2010.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	State/Federal Funded Site Contract
Completed Date:	04/17/2009
Comments:	Extension for URS contract until June 30, 2010

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Access Agreement
Completed Date:	07/28/2008
Comments:	DTSC received signed and notarized access agreement 7/28/08.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Assessment/Site Inspection Report (PA/SI)
Completed Date:	06/16/2000
Comments:	6/28/2000 EPA decision: Site did not qualify for further remedial assessment under CERCLA. VOCs in groundwater exceed MCLs, but the contaminated groundwater is not used for drinking. However, DTSC determined additional state action is required.

HARRIS DRY CLEANERS (Continued) **1000855627**

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Workplan
Completed Date:	01/28/2009
Comments:	Workplan to conduct soil, soil gas and groundwater investigation approved.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report
Completed Date:	04/06/2010
Comments:	Soil, groundwater and soil gas at the Site are contaminated with tetrachloroethene (PCE), TPH Stoddard Solvent, TPH gas.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	08/30/2002
Comments:	Site Screening approved 8/30/08. Removal action recommended.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	08/04/1993
Comments:	Investigation conducted by Penn Environmental. Limited soil sampling detected tetrachloroethylene (PCE) at concentrations up to 4.6 milligrams per kilogram (mg/kg). Report recommended further investigation of soil and groundwater. DTSC did not oversee this investigation.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	07/29/2010
Comments:	Indoor air sampling completed.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Technical Report
Completed Date:	09/29/2010
Comments:	Investigation didn't find the Harris Site contaminants of concerns, PCE,TCE or cis-DCE, in the indoor air or crawl space. However, low level concentration of vinyl chloride (VC) was detected in on residential unit. Due to the absence of VC in the crawl space or at the site soil, soil gas or groundwater, VC inside house is considered consistent with a household source.

Comments: Signed VCA.

Completed Area Name: Station C
Completed Sub Area Name: Site-Proper
Completed Document Type: Land Use Restriction
Completed Date: 09/07/2012
Comments: The land use covenant restricts the usage of the property due to the presence of contaminants including hydrocarbons, polynuclear aromatic hydrocarbons (PAHs), volatile organic compounds (VOCs), metals, ammonia, and cyanide. Prohibited usages include usage for residential, hospital, schools for persons under 21 years of age, and day care for children. Usage of groundwater and drilling for water is also restricted or prohibited. Other provisions of the land use covenant include requirements related to soil management, and maintenance of a cap and groundwater monitoring wells.

Completed Area Name: Gas Load Center
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 01/23/2008
Comments: NOE signed by Barbara Cook along with approval of Final RAW on 1/23/2008.

Completed Area Name: Gas Load Center
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 07/27/2009
Comments: Not reported

Completed Area Name: Gas Load Center
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 09/09/2009
Comments: DTSC concluded that the Site does not present an unacceptable threat to human health or safety or the environment if limited to industrial use. The Land Use Covenant prohibits use of the Site for residences, a hospital, a school for persons under age 21, or day care center. Additionally, the Land Use Covenant requires that any disturbance of the soil beneath the cap needs to be done in accordance with a Soil and Groundwater Management Plan approved by DTSC.

Completed Area Name: Station C
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 11/26/2012
Comments: The Operations and Maintenance Agreement is an agreement between PG&E and DTSC that PG&E will conduct activities on the Substation C parcel pursuant to implementation of the approved cleanup plan. The approved cleanup pland includes maintenance of an impermeable cap across the site, a groundwater monitoring program, reporting requirements including 5-Year Review reports.

Completed Area Name: Gas Load Center
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 11/09/2009

PG&E OAKLAND-1 MGP (Continued) **S110121723**

Comments: DTSC certified the completion of the removal action on the on Gas Load Center parcel. The completed removal action was selected in the Final Removal Action Workplan approved by DTSC on January 30, 2008. An Operation & Maintenance Agreement and Land Use Covenant between DTSC and PG&E and a financial assurance for operation and maintenance were put in place prior to DTSC's certification of the completion of the removal action.

Completed Document Type: Operations and Maintenance Plan
Completed Date: 06/02/2009
Comments: Plan outlines O&M measures for capped Gas Load Center Parcel; Groundwater monitoring to be performed annually.

Completed Area Name: Station C
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 06/08/2012
Comments: The O&M Plan includes requirements for the site and surrounding sidewalk. Activities include maintenance of the surface cap and groundwater monitoring.

Completed Area Name: Station C
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 02/08/2008
Comments: Work Notice sent out February 8, 2008; Fieldwork scheduled to begin February 18, 2008.

Completed Area Name: PROJECT WIDE

PG&E OAKLAND-1 MGP (Continued) **S110121723**

Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 05/30/2008
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 07/27/2009
Comments: Groundwater analyzed for PAHs, cyanide, TPHs, BTEX. Groundwater monitoring results consistent with historical monitoring results.

Completed Area Name: Gas Load Center
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 06/01/2010
Comments: The cap remains protective and groundwater monitoring results are consistent with previous data.

Completed Area Name: Station C
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 05/17/2010
Comments: The monitoring results are consistent with historical results. DTSC's Geological Services Unit noted that there are no downgradient monitoring wells in close proximity to MW-OAK-8 so additional investigation in that area appears to be necessary.

Completed Area Name: Station C
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/21/2011
Comments: Not reported

Completed Area Name: Station C
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 03/13/2012
Comments: Groundwater monitoring this period was consistent with previous monitoring events. Gauging for groundwater depth is conducted quarterly and samples are collected semi-annually. Low levels of hydrocarbons were detected (up to 260 parts per billion "ppb" as gasoline and up to 510 ppb as diesel). Other contaminants detected included benzene (up to 17 ppb), toluene (up to 0.57 ppb), ethyl-benzene (up to 5 ppb), and ethyl-benzene (up to 3.9 ppb). Low levels of total cyanide were detected in groundwater (up to 200 ppb). Other contaminants detected at low levels included polycyclic aromatic hydrocarbons (PAHs) including naphthalene (up to 58 ppb) and acenaphthene (up to 16 ppb).

Completed Document Type: Fieldwork
Completed Date: 03/14/2012

PG&E OAKLAND-1 MGP (Continued) **S110121723**

Comments:	Groundwater sampling.
Completed Area Name:	Station C
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	01/28/2013
Comments:	The report described subsurface construction activities including replacement of electrical equipment in vaults, trenches, and piles. Due to historical power plant operations at the Site, the excavation soils and groundwater required special handling. Soils were excavated and placed in roll-off bins. Excavated soils totalling approximately 3,500 tons were profiled and it was determined that they could be properly disposed as non-hazardous waste at local landfills. Groundwater generated from excavation dewatering operations was tested, run through an on-site treatment system prior to discharge into the storm or sanitary sewer sytems, or trucked off-site for disposal at a treatment facility. The total volume of groundwater handled was approximately 137,000 gallons. Groundwater discharges were conducted under appropriately permitted procedures including the National Pollution Discharge Elimination System (NPDES) permitting process and at the East Bay Municipal Utilities District (EBMUD) Oakland facility.

Completed Document Type:	Voluntary Cleanup Agreement
Completed Date:	12/18/1996
Comments:	Signed VCA.
Completed Area Name:	Station C
Completed Sub Area Name:	Site-Proper
Completed Document Type:	Land Use Restriction
Completed Date:	09/07/2012
Comments:	The land use covenant restricts the usage of the property due to the presence of contaminants including hydrocarbons, polynuclear aromatic hydrocarbons (PAHs), volatile organic compounds (VOCs), metals, ammonia, and cyanide. Prohibited usages include usage for residential, hospital, schools for persons under 21 years of age, and day care for children. Usage of groundwater and drilling for water is also restricted or prohibited. Other provisions of the land use covenant include requirements related to soil management, and maintenance of a cap and groundwater monitoring wells.
Completed Area Name:	Gas Load Center
Completed Sub Area Name:	Not reported
Completed Document Type:	CEQA - Notice of Exemption
Completed Date:	01/23/2008
Comments:	NOE signed by Barbara Cook along with approval of Final RAW on 1/23/2008.

Completed Date:	07/27/2009
Comments:	Not reported
Completed Area Name:	Gas Load Center
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction
Completed Date:	09/09/2009
Comments:	DTSC concluded that the Site does not present an unacceptable threat to human health or safety or the environment if limited to industrial use. The Land Use Covenant prohibits use of the Site for residences, a hospital, a school for persons under age 21, or day care center. Additionally, the Land Use Covenant requires that any disturbance of the soil beneath the cap needs to be done in accordance with a Soil and Groundwater Management Plan approved by DTSC.
Completed Area Name:	Station C
Completed Sub Area Name:	Not reported
Completed Document Type:	Operation & Maintenance Order/Agreement

PG&E OAKLAND-1 MGP (Continued) **S110121723**

Completed Date: 11/26/2012
Comments: The Operations and Maintenance Agreement is an agreement between PG&E and DTSC that PG&E will conduct activities on the Substation C parcel pursuant to implementation of the approved cleanup plan. The approved cleanup pland includes maintenance of an impermeable cap across the site, a groundwater monitoring program, reporting requirements including 5-Year Review reports.

Completed Area Name: Gas Load Center
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 11/09/2009
Comments: DTSC certified the completion of the removal action on the on Gas Load Center parcel. The completed removal action was selected in the Final Removal Action Workplan approved by DTSC on January 30, 2008. An Operation & Maintenance Agreement and Land Use Covenant between DTSC and PG&E and a financial assurance for operation and maintenance were put in place prior to DTSC's certification of the completion of the removal action.

Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 07/27/2009
Comments: Groundwater analyzed for PAHs, cyanide, TPHs, BTEX. Groundwater monitoring results consistent with historical monitoring results.

Completed Area Name: Gas Load Center
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 06/01/2010
Comments: The cap remains protective and groundwater monitoring results are consistent with previous data.

Completed Area Name: Station C
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 05/17/2010
Comments: The monitoring results are consistent with historical results. DTSC's Geological Services Unit noted that there are no downgradient monitoring wells in close proximity to MW-OAK-8 so additional investigation in that area appears to be necessary.

Completed Area Name: Station C
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/21/2011
Comments: Not reported

Completed Area Name: Station C
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 03/13/2012
Comments: Groundwater monitoring this period was consistent with previous monitoring events. Gauging for groundwater depth is conducted quarterly and samples are collected semi-annually. Low levels of hydrocarbons were detected (up to 260 parts per billion "ppb" as gasoline and up to 510 ppb as diesel). Other contaminants detected included benzene (up to 17 ppb), toluene (up to 0.57 ppb), ethyl-benzene (up to 5 ppb), and ethyl-benzene (up to 3.9 ppb). Low

PG&E OAKLAND-1 MGP (Continued) **S110121723**

levels of total cyanide were detected in groundwater (up to 200 ppb). Other contaminants detected at low levels included polycyclic aromatic hydrocarbons (PAHs) including naphthalene (up to 58 ppb) and acenaphthene (up to 16 ppb).

Completed Document Type: Fieldwork
Completed Date: 03/31/2012
Comments: The waste soil and water was hauled off-site by 3/31/2012. A completion report including disposal manifests is scheduled.

Completed Area Name: Station C
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 03/14/2012
Comments: Groundwater sampling.

Completed Area Name: Station C
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 01/28/2013
Comments: The report described subsurface construction activities including replacement of electrical equipment in vaults, trenches, and piles. Due to historical power plant operations at the Site, the excavation soils and groundwater required special handling. Soils were excavated and placed in roll-off bins. Excavated soils totalling approximately 3,500 tons were profiled and it was determined that they could be properly disposed as non-hazardous waste at local landfills. Groundwater generated from excavation dewatering operations was tested, run through an on-site treatment system prior to discharge into the storm or sanitary sewer sytems, or trucked off-site for disposal at a treatment facility. The total volume of groundwater handled was approximately 137,000 gallons. Groundwater discharges were conducted under appropriately permitted procedures including the National Pollution Discharge Elimination System (NPDES) permitting process and at the East Bay Municipal Utilities District (EBMUD) Oakland facility.

Completed Document Type:	Remedial Investigation / Feasibility Study
Completed Date:	07/03/1995
Comments:	Completed RIFS. Site investigation was conducted by Caltrans consultants in June 1992. Soil and groundwater samples were collected as part of the investigation. Groundwater was encountered at a depth of 6-7 feet. Soil samples revealed the following contaminants: total recoverable petroleum hydrocarbons (TRPH) as high as 6,700 ppm; TPH as diesel as high as 3,800 ppm; acetone-150 ppb; di-n-butylphthalate 0.9 ppm; bis (2-ethylhexyl)phthalate 0.9 ppm; pyrene 0.3 ppm; benzo-a-pyrene 0.3 ppm; lead (840 ppm). The following contaminants were detected in groundwater: arsenic (0.22 ppm); barium (1.1 ppm); and cadmium (0.02 ppm).

Completed Document Type:	Site Screening
Completed Date:	12/28/1992

WAREHOUSE INVESTMENT COMPANY (Continued) **1000191295**

Comments: Completed Site Screening. It is a RCRA facility with five underground storage tanks. Of these, two are 10,000-gallon capacity diesel tanks, one is a waste oil tank, one is a fresh oil tank, and one is an abandoned solvent tank. The solvent tank is reportedly filled with water. All the tanks are reported to have tested leak-free in 1988, and recently.

Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 07/03/1995
Comments: Completed RIFS. Site investigation was conducted by Caltrans consultants in June 1992. Soil and groundwater samples were collected as part of the investigation. Groundwater was encountered at a depth of 6-7 feet. Soil samples revealed the following contaminants: total recoverable petroleum hydrocarbons (TRPH) as high as 6,700 ppm; TPH as diesel as high as 3,800 ppm; acetone-150 ppb; di-n-butylphthalate 0.9 ppm; bis (2-ethylhexyl)phthalate 0.9 ppm; pyrene 0.3 ppm; benzo-a-pyrene 0.3 ppm; lead (840 ppm). The following contaminants were detected in groundwater: arsenic (0.22 ppm); barium (1.1 ppm); and cadmium (0.02 ppm).

Completed Document Type:	Certification
Completed Date:	09/01/1983
Comments:	This certification was confirmed by a report prepared by the Auditor General. The Auditor General conducted an audit of the Department's records to confirm a list of sites where the Department was involved in the cleanup and the cleanup had been completed. This Auditor General list became the basis for our historical certification information. Many of the sites on this list were handled by our Surveillance and Enforcement Staff. Much of this work was in response to complaints from the public or reports from industry and the response action may have only addressed the immediate problem and not the entire facility.

Background Info:	A single-story brick warehouse building constructed sometime between 1912 and 1930 occupies a majority of the 0.13-acre site property. The use of the building prior to 1958 is unknown. The current owner of the site property has been the Northwestern Venetian Supply Company (Northwestern) since 1958. Northwestern manufactured and painted metal blinds onsite from 1958 until July 1987 using chemicals that included oil-based paints, lacquers, thinners, and the volatile organic compounds (VOCs) trichloroethylene (TCE) and 1,1,1-trichloroethane (1,1,1-TCA). The property appears to have been vacant between the late 1980s and 2001. An ornamental iron gate manufacturer then leased and conducted operations onsite from 2001 to 2004. The chemical use(s) associated with the ornamental iron gate manufacturer is unknown. The property has remained vacant since February 2004.

CHUNG PROPERTY / LANE METAL FINISHE (Continued) **S108430860**

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	12/13/2006
Comments:	Cadmium, chromium, lead and nickel were detected in the soil up to 48 mg/kg, 2400 mg/kg, 360 mg/kg and 18,000 mg/kg, respectively. TCE and TPH-g were detected in groundwater up to 9,100 ug/l and 6,800 ug/l, respectively in monitoring wells. TCE, cis-DCE and vinyl chloride were detected in the soil gas up to 16 microgram per liter (ug/l), 44 ug/l and 7.7 ug/l, respectively.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	05/19/2003
Comments:	Trichloroethene (TCE), chromium and cadmium were detected in soil up to 0.54 mg/kg, 63.6 mg/kg and 5.4 mg/kg, respectively. TPH as gasoline (TPH-g), benzene and ethylbenzene were detected in groundwater up to 5,310 microgram per liter (ug/l), 37 ug/l, and 351 ug/l, respectively. TCE, cis-1,2-dichloroethene (cis-DCE), and 1,2-dichloroethane (1,2-DCA) were detected in groundwater at 3,780 ug/l, 193 ug/l, and 10 ug/l respectively.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	10/03/2003
Comments:	TCE was detected up to 0.54 mg/kg in soil.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	11/30/2004
Comments:	3 monitoring wells were sampled TCE ranged from 11.6 ug/l to 5,610 ug/l.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	03/01/2005
Comments:	3 monitoring wells were sampled and TCE concentrations ranged from 12.5 ug/l to 7,130 ug/l.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	06/30/2005
Comments:	3 monitoring wells were sampled and TCE concentrations ranged from 16.2 ug/l to 19,000 ug/l.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Workplan
Completed Date:	02/14/2008
Comments:	Soil, soil gas and groundwater sampling for volatile organic compounds and metals approved.

CHUNG PROPERTY / LANE METAL FINISHE (Continued) **S108430860**

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	09/09/2003
Comments:	Chromium and cadmium were detected in soil up to 63.6 mg/kg and 5.4 mg/kg, respectively. TPH as gasoline (TPH-g), TPH as stoddard solvent (TPH-ss),were detected in groundwater up to 4,900 ug/l and 650 ug/l respectively. TCE was detected in groundwater at 240,000 ug/l.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report
Completed Date:	08/31/2004
Comments:	TCE was detected in soil up to 92 mg/kg. TPH-g, benzene, TCE, cis-DCE, tetrachloroethylene (PCE), carbon tetra chloride, 1,1,2-trichloroethane (1,1,2-TCA), DCE and methylene chloride were detected in groundwater up to 5,310 ug/l, 6.7 ug/l, 412,000 ug/l, 10,800 ug/l, 177 ug/l, 180 ug/l, 19 ug/l, 39 ug/l and 34 ug/l, respectively. Three monitoring wells were installed and TPH-g and TCE were detected up to 2,280 ug/l and 5,670 ug/l, respectively.

Comments:	Remedial Investigation Fact sheet completed.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Workplan
Completed Date:	12/09/2009
Comments:	Remedial investigation of groundwater and soil vapor in the vicinity of the site and soil sampling of the adjacent property.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	01/22/2010
Comments:	Not reported

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report
Completed Date:	01/28/2011
Comments:	Soil, groundwater and soil gas were investigated within the site boundary. Groundwater investigations were also conducted on several locations along San Pablo Avenue and Market Street. Primary contaminants found include trichloroethene (TCE) and its breakdown products; cis-1,2-dichloroethene (cis-DCE), trans-1,2-Dichloroethene (trans-DCE) and vinyl chloride.

CHUNG PROPERTY / LANE METAL FINISHE (Continued) **S108430860**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/26/2008
Comments: Indoor air sampling at the Lane Metals site conducted with 23 Summa canisters placed in 8 residences, one day care facility, one business, two crawl spaces under homes and four outdoor locations. Seven of these locations had duplicate canisters.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 10/06/2009
Comments: Interim Removal Action Plan selected soil vapor extraction as the preferred alternative.

Completed Document Type: Amendment - Order/Agreement
Completed Date: 01/07/1999
Comments: Amendment to the May 10, 1994 VCA, which allows work to continue under Chapter 6.5 of the Health and Safety Code.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/13/1996
Comments: Remedial Action completed. Approximately 4,700 cubic yards of soil was excavated to six feet below ground surface. The site was paved for use as a training area for postal vehicles. Caltrans has installed groundwater monitoring wells and is conducting quarterly monitoring. Since the remediation goals contained in the approved RAP were for an industrial/commercial use, a deed restriction will be placed on the property restricting use.

Completed Area Name: PROJECT WIDE

J&A TRUCK REPAIR (Continued) **S104578474**

Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	08/13/1996
Comments:	Remedial Action completed. Approximately 4,700 cubic yards of soil was excavated to six feet below ground surface. The site was paved for use as a training area for postal vehicles. Caltrans has installed groundwater monitoring wells and is conducting quarterly monitoring. Since the remediation goals contained in the approved RAP were for an industrial/commercial use, a deed restriction will be placed on the property restricting use.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	11/09/1995
Comments:	Approved Design.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Plan
Completed Date:	08/14/1995
Comments:	Approved RAP requiring soil removal, groundwater monitoring and deed restriction if levels left are above unrestricted use.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation / Feasibility Study
Completed Date:	07/03/1995
Comments:	Approved RIFS. Lead was the only contaminant found in excess of the acceptable concentrations.

Potential Contaminants of Concern:	Other Solvent or Non-Petroleum Hydrocarbon, Polychlorinated biphenyls (PCBs), Other Insecticides / Pesticide / Fumigants / Herbicides, Arsenic, Chromium, Lead, Nickel, Diesel, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	The case is overseen by DTSC. Envirostor ID No. 01420128. The site is part of the Cypress Freeway Construction Project. Former site uses include a warehouse and distribution facility since 1967. Site activities consisted of unloading cargo from freight trains and transferring to trucks. Prior to this use, the site was owned by the Commissary Department of the Southern Pacific Railroad. It is not known what site activities took place when it was owned by the railroad. Caltrans purchased the site in 1994 in connection with reconstruction of the Cypress Freeway.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/30/2003
Comments: The PEA was approved by U.S. EPA. No further action is required under CERCLA. However, elevated levels of metals are present. Further action required by the State.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 06/01/1987
Comments: Completed Site Screening. The site is an active metal junk yard. PA recommended because soluble copper, zinc and lead were detected in soil at levels in excess of the CAM limits. Evidence of onsite contamination needs to be checked and verified. The site received several violation notices from DTSC and Alameda County Environmental Health Department.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:
Waste code: 181
Waste name: 181

Waste code: 291
Waste name: 291

Waste code: 331
Waste name: 331

Waste code: 551
Waste name: 551

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

CAL TECH METAL FINISHERS INC (Continued) **1000133512**

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D010
Waste name: SELENIUM

Waste code: D040
Waste name: TRICHLOROETHYLENE

Violation Status: No violations found

Registry ID: 110001133489

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated

CAL TECH METAL FINISHERS INC (Continued) **1000133512**

Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

CAL TECH METAL FINISHERS INC (Continued) **1000133512**

Facility ID:	San Francisco Bay 01I003892
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	2
Facility Telephone:	5106535054
Facility Contact:	SUNG JIN HUH
Agency Name:	CALTECH METAL FINISHERS
Agency Address:	841 31st St
Agency City,St,Zip:	Oakland 946084398

Baseline Flow:	0
Reclamation:	Not reported
POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed:	06/01/2011
Description:	Lane Metal Finishers and Cal-Tech Metal Finishers (Cal-Tech) operated at the Site from 1947 to 2000. Cal-Tech operations included polishing, electroplating, anodizing and plating of metal parts. Chemicals historically used at the Site include caustic liquids, sodium, hydroxide, hydrochloric acid, nitric acid, sulfuric acid, chromic acid, chromic trioxide, sodium cyanide, cadmium, copper cyanide, potassium cyanide, silver cyanide and plating solutions containing variety of metals. The waste generated at the Site included aqueous waste containing hexavalent chromium and sludges containing metals.

CAL TECH METALS (Continued) **S110326384**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 07/01/2002
Comments: In 2001, USEPA contractor removed 27,425 gallons of liquid chemicals, materials in the containers, debris and contaminated equipment and decontaminated the interior of the buildings.Soil sampling was conducted chromium, nickel, lead and cyanide were detected in soil up to 865 milligrams per kilogram (mg/kg), 7,320 mg/kg, 6,660 mg/kg and 994 mg/kg respectively. Trichloroethylene (TCE) was also detected in soil up to 7.3 mg/kg at 3 feet bgs.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 01/31/2008
Comments: Soil, groundwater and soil gas was investigated within the site boundary and on several locations along 30th and 31st Streets. Trichloroethene (TCE) concentrations up to 39,000 ppm were found in the soil down to 20 feet below ground surface (bgs) in the courtyard area in the eastern part of the site, and to 10 feet bgs in the western part of the site. Lead concentrations up to 2,470 ppm and nickel up to 5,180 ppm were found under the buildings. There is no indication that metal contamination has moved outside the Site boundaries. TCE, cis 1,2 DCE and vinyl chloride were detected in groundwater in the courtyard up to 61 ppm, 23 ppm and 0.67 ppm, respectively. The highest concentrations VOCs, in the soil, soil gas and groundwater were found in the courtyard. TCE or any other VOCs were not detected above screening levels in any of the other off-site soil gas borings on 30th Street, 31st Street or on the adjacent residential property east of the Site. Soil gas results suggest that the risk of soil gas intrusion is isolated to the courtyard area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 07/01/2005
Comments: The soil and groundwater samples were analyzed for volatile organic compounds (VOCs) and nickel. The results showed TCE up to 20 mg/kg and nickel up to 83 mg/kg in soil. The groundwater analytical results showed TCE up to 61 milligrams per liter (mg/l).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 06/21/2007
Comments: In February and March 2007, DTSC conducted soil, groundwater, and soil gas testing on the property and along 31st and 30th Streets to determine the extent of the contamination. Based on the preliminary results, DTSC needs to collect additional soil gas samples in the area near the north east corner of the property to better understand extent of the contamination in that area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Information Request Letter
Completed Date: 06/18/2007

CAL TECH METALS (Continued) **S110326384**

Comments: DTSC continues to consider 31 LLC a responsible party. DTSC is not planning to release and/or delete 31 LLC as a respondent.

Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 05/07/2008
Comments: Sampling completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 08/21/2008
Comments: Trichloroethylene (TCE) related to the Caltech Site was found in indoor air at very low concentration (2 micrograms/cubic meter (ug/m3)). The State of California Human Health Screening Level (CHHSL) for TCE is 1.2 ug/m3. This is effectively the ono action levelo for a lifetime exposure in a residence, below which DTSC would not undertake any measures to reduce exposure. DTSC believes that even these very low concentrations will be eliminated when we implement the expedited cleanup at the Caltech Site later this year.

Completed Area Name: PROJECT WIDE

Comments: Community Profile completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 07/01/2002
Comments: In 2001, USEPA contractor removed 27,425 gallons of liquid chemicals, materials in the containers, debris and contaminated equipment and decontaminated the interior of the buildings.Soil sampling was conducted chromium, nickel, lead and cyanide were detected in soil up to 865 milligrams per kilogram (mg/kg), 7,320 mg/kg, 6,660 mg/kg and 994 mg/kg respectively. Trichloroethylene (TCE) was also detected in soil up to 7.3 mg/kg at 3 feet bgs.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 01/31/2008
Comments: Soil, groundwater and soil gas was investigated within the site boundary and on several locations along 30th and 31st Streets. Trichloroethene (TCE) concentrations up to 39,000 ppm were found in the soil down to 20 feet below ground surface (bgs) in the courtyard area in the eastern part of the site, and to 10 feet bgs in the

CAL TECH METALS (Continued) **S110326384**

western part of the site. Lead concentrations up to 2,470 ppm and nickel up to 5,180 ppm were found under the buildings. There is no indication that metal contamination has moved outside the Site boundaries. TCE, cis 1,2 DCE and vinyl chloride were detected in groundwater in the courtyard up to 61 ppm, 23 ppm and 0.67 ppm, respectively. The highest concentrations VOCs, in the soil, soil gas and groundwater were found in the courtyard. TCE or any other VOCs were not detected above screening levels in any of the other off-site soil gas borings on 30th Street, 31st Street or on the adjacent residential property east of the Site. Soil gas results suggest that the risk of soil gas intrusion is isolated to the courtyard area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 07/01/2005
Comments: The soil and groundwater samples were analyzed for volatile organic compounds (VOCs) and nickel. The results showed TCE up to 20 mg/kg and nickel up to 83 mg/kg in soil. The groundwater analytical results showed TCE up to 61 milligrams per liter (mg/l).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 06/21/2007
Comments: In February and March 2007, DTSC conducted soil, groundwater, and soil gas testing on the property and along 31st and 30th Streets to determine the extent of the contamination. Based on the preliminary results, DTSC needs to collect additional soil gas samples in the area near the north east corner of the property to better understand extent of the contamination in that area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Information Request Letter
Completed Date: 06/18/2007
Comments: DTSC continues to consider 31 LLC a responsible party. DTSC is not planning to release and/or delete 31 LLC as a respondent.

Completed Document Type: Fieldwork
Completed Date: 05/07/2008
Comments: Sampling completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 08/21/2008
Comments: Trichloroethylene (TCE) related to the Caltech Site was found in indoor air at very low concentration (2 micrograms/cubic meter (ug/m3)). The State of California Human Health Screening Level (CHHSL) for TCE is 1.2 ug/m3. This is effectively the ono action levelo for a lifetime exposure in a residence, below which DTSC would not undertake any measures to reduce exposure. DTSC believes that even these very low concentrations will be eliminated when we implement the expedited cleanup at the Caltech Site later this year.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 07/03/2008
Comments: Workplan for the soil vapor extraction system installation in the courtyard area of the site is approved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/01/2013

Next Scheduled EDR Contact: 07/22/2013
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/01/2013
Date Data Arrived at EDR: 03/01/2013

Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/04/2013
Date Data Arrived at EDR: 03/01/2013

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/10/2012

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/04/2013

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009
Date Data Arrived at EDR: 04/16/2009
Date Made Active in Reports: 05/11/2009
Number of Days to Update: 25

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision:	1980

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

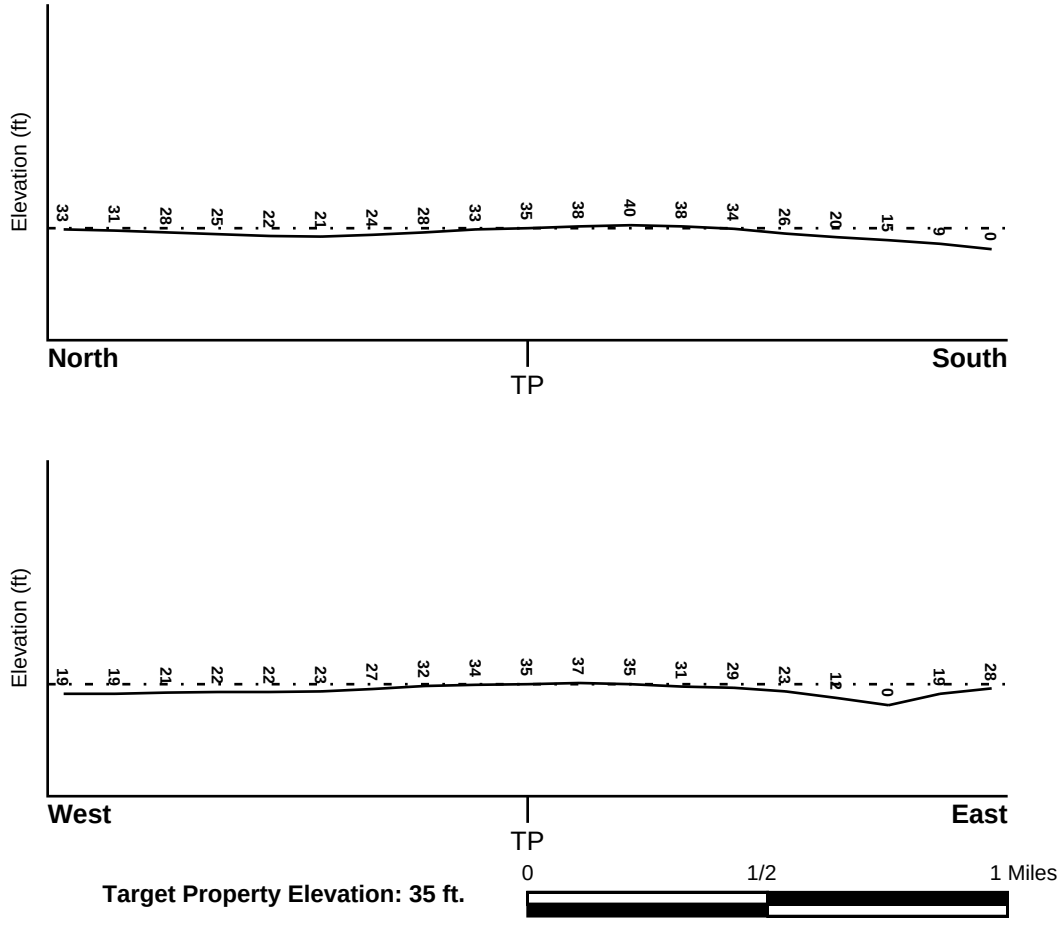
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 35 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
ALAMEDA, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06001C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OAKLAND WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

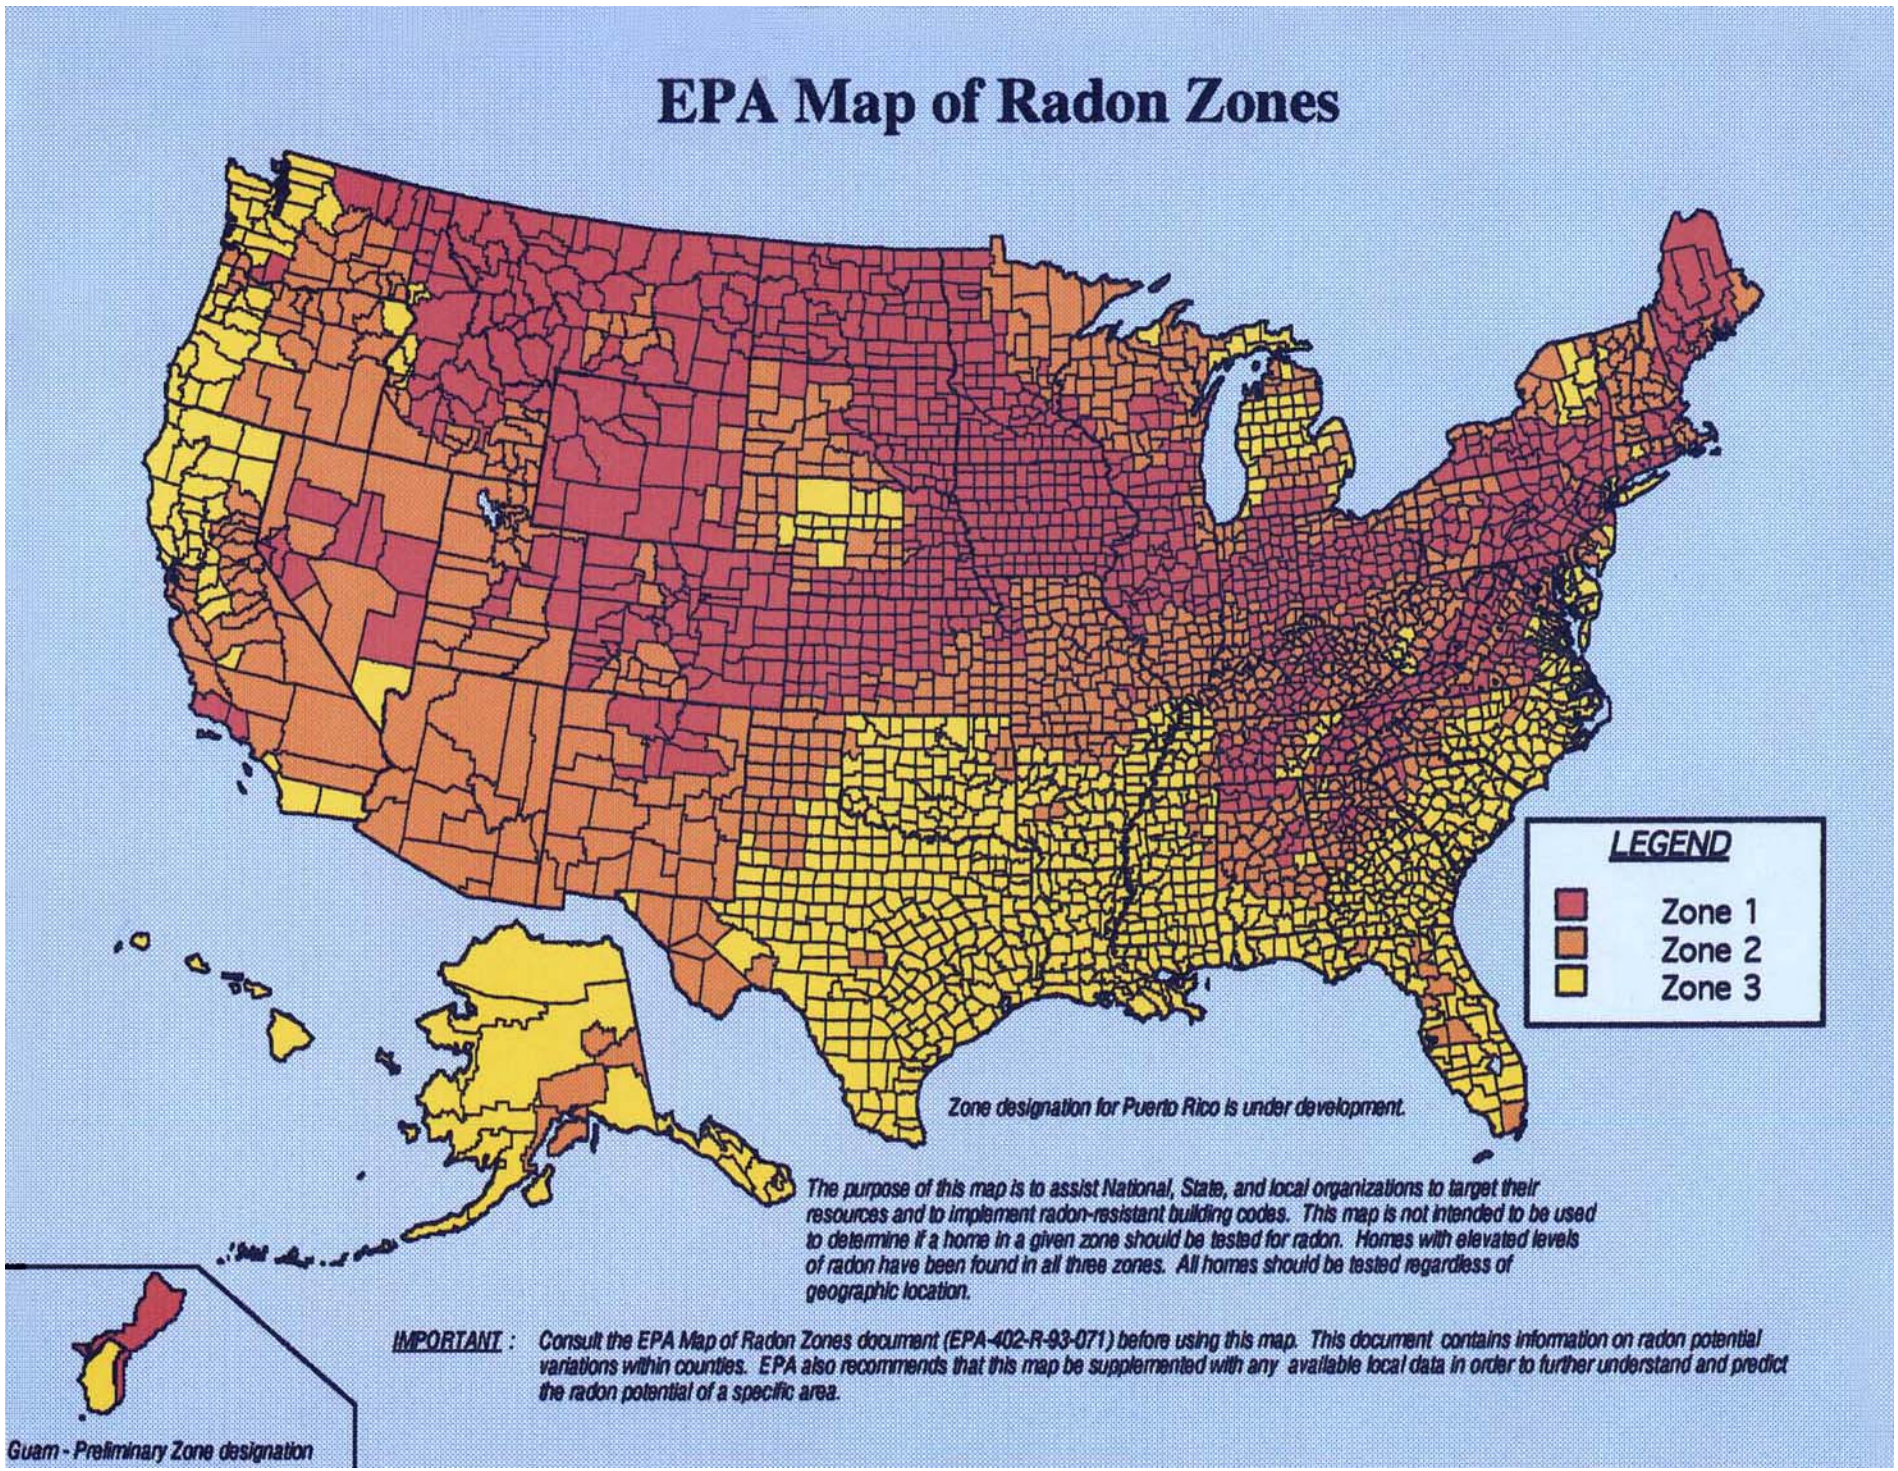
ENVIRO SOIL TECH CONSULTANTS

EPA Map of Radon Zones



The purpose of this map is to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. This map is not intended to be used to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones. All homes should be tested regardless of geographic location.

IMPORTANT : Consult the EPA Map of Radon Zones document (EPA-402-R-93-071) before using this map. This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

EPA United States Environmental Protection Agency

Radon

EPA Map of Radon Zones

The purpose of this map is to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. This map is not intended to be used to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones. All homes should be tested regardless of geographic location. Important points to note:

- **All homes should test for radon**, regardless of geographic location or zone designation. How do I test my home?
- There are many thousands of individual homes with elevated radon levels in Zone 2 and 3. Elevated levels can be found in Zone 2 and Zone 3 counties.

Find state-specific radon information (state radon coordinator, state information, zone maps (including full page versions of the state maps), radon-resistant new construction, regional contact information, radon action month, and more.)

Select your state | Click Here

- EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area. For more information, contact your state radon coordinator. Click Here for a US map (where you can select your state) to see if your state has more detailed information available.
- **The map should not be used in lieu of testing during real estate transactions.**

The Map was developed using five factors to determine radon potential:

1. indoor radon measurements;
2. geology;
3. aerial radioactivity;
4. soil permeability; and
5. foundation type.

Still have questions regarding radon?

Scan our **Frequent Questions** for more information regarding radon.

Find all of our Radon publications and resources at www.epa.gov/radon/pubs.

Radon potential assessment is based on geologic provinces. Radon Index Matrix is the quantitative assessment of radon potential. Confidence Index Matrix shows the quantity and quality of the data used to assess radon potential. Geologic Provinces were adapted to county boundaries for the Map of Radon Zones. To order the U.S. Geological Survey radon potential books, organized by region, with individual chapters for each state, see http://energy.cr.usgs.gov/radon/grpinfo.html

About the Map

Sections 307 and 309 of the Indoor Radon Abatement Act of 1988 (IRAA) directed EPA to list and identify areas of the U.S. with the potential for elevated indoor radon levels. EPA's Map of Radon Zones assigns each of the 3,141 counties in the U.S. to one of three zones based on radon potential.

What do the colors mean?

Zone 1 counties have a predicted average indoor radon screening level greater than 4 pCi/L (picocuries per liter) **(red zones)**	**Highest Potential**
Zone 2 counties have a predicted average indoor radon screening level between 2 and 4 pCi/L **(orange zones)**	**Moderate Potential**
Zone 3 counties have a predicted average indoor radon screening level less than 2 pCi/L **(yellow zones)**	**Low Potential**

Map of Radon Zones for California

The purpose of this map is to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. This map is not intended to be used to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones. All homes should be tested regardless of geographic location. Learn more

Directory of Builders Using Radon-Resistant New Construction

EPA offers the Directory of Builders as a one-stop service to home buyers who are looking for builders that use radon-resistant construction techniques in new homes. The Directory contains the names of builders using RRNC who have voluntarily registered with EPA. EPA encourages all builders that use the recommended radon-resistant techniques to be listed in the Directory. Read more about Radon-Resistant New Construction

CHICAGO TITLE COMPANY

PRELIMINARY REPORT

In response to the application for a policy of title insurance referenced herein, ***Chicago Title Company*** *hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.*

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(s) of title insurance to be issued hereunder will be policy(s) of Chicago Title Insurance Company, a Nebraska corporation.

Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

The form of policy or policies of title insurance contemplated by this report is:

1. THE ESTATE OR INTEREST IN THE LAND HEREINAFTER DESCRIBED OR REFERRED TO COVERED BY THIS REPORT IS:

   A Fee

2. TITLE TO SAID ESTATE OR INTEREST AT THE DATE HEREOF IS VESTED IN:

   Reginald Tomasello, as to an undivided 1/3 interest; Walter C. Berrman, a widower and Clark R. Beerman, a married man as his sole and separate property, as joint tenants, as to an undivided 1/3 interest; LaVergne Engdahl, Successor Trustee of the E.R. and LaVergne Engdahl Family 1996 Trust, as to an undivided 1/3 interest

3. THE LAND REFERRED TO IN THIS REPORT IS DESCRIBED AS FOLLOWS:

   SEE EXHIBIT "A" ATTACHED HERETO AND MADE A PART HEREOF

MQ\YD 06/05/2013

LEGAL DESCRIPTION

EXHIBIT "A"

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE CITY OF OAKLAND, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

A portion of Block 265, Boardman's Map of the City of Oakland, filed April 23, 1883, Map Book 17, Page 14, Alameda County Records, described as follows:

Beginning at the intersection of the Northern line of 15th Street with the Western line of Grove Street; thence Northerly along said line of Grove Street 115 feet 9 inches to a point distant thereon Southerly 92 feet from the intersection thereof with the Southern line of 16th Street; thence Westerly parallel with said line of 16th Street, 182 feet 6 inches; thence Southerly parallel with said line of Grove Street, 115 feet 9 inches to the said Northern line of 15th Street; thence Easterly along said line of 15th Street, 182 feet 6 inches to the point of beginning.

APN: 003-0073-004, 003-0073-005

AT THE DATE HEREOF, ITEMS TO BE CONSIDERED AND EXCEPTIONS TO COVERAGE IN ADDITION TO THE PRINTED EXCEPTIONS AND EXCLUSIONS IN SAID POLICY FORM WOULD BE AS FOLLOWS:

1. **Property taxes**, which are a lien not yet due and payable, including any assessments collected with taxes to be levied for the fiscal year 2013-2014.

2. **The lien of supplemental taxes**, if any, assessed pursuant to the provisions of Chapter 3.5 (Commencing with Section 75) of the Revenue and Taxation code of the State of California.

3. **A deed of trust** to secure an indebtedness in the amount shown below, and any other obligations secured thereby

Amount:	$30,000.00
Dated:	September 7, 1984
Trustor:	Clark R. Beerman, a married man
Trustee:	Not shown
Beneficiary:	Clark R. Beerman, Edwin R. Engdahl and LaVergne Engdahl, husband and wife
Address:	P.O. Box 489 Stockton, CA 95201
Loan No.:	Not shown
Recorded:	January 3, 1985, Instrument No. 85-000834, of Official Records

Affects the interest of Clark R. Beerman only

4. **Terms and conditions** contained in that certain Trust Agreement disclosed by the Deed to The Tony R. Tomasello Living Trust, Tony R. Tomasello, Trustee, recorded May 7, 1998, Instrument No. 98153507, Official Records, and requirement that the written Trust Agreement be submitted to this company for examination.

5. The vesting set forth in this Preliminary Report is subject to verification, to the satisfaction of the company, of the validity and enforceability of the following Uninsured Deed:

Dated:	October 7, 2005
Grantor:	Tony R. Tomasello, as Trustee of the Tomasello Trust
Grantee:	Reginal Tomasello
Recorded:	December 15, 2005, Instrument No. 2005533967, Official Records

6. **The fact** that said land is included within a project area of the Redevelopment Agency shown below, and that proceedings for the redevelopment of said project have been instituted under the Redevelopment Law (such redevelopment to proceed only after the adoption of the redevelopment plan) as disclosed by a document.

Redevelopment Agency:	The Central District Redevelopment Project
Recorded:	December 3, 2007, Instrument No. 2007-409569, of Official Records

7. **The community interest** of the spouse of the vestee named below.

Vestee: Reginald Tomasello

8. **Any invalidity or defect** in the title of the vestees in the event that the trust referred to herein is invalid or fails to grant sufficient powers to the trustee(s) or in the event there is a lack of compliance with the terms and provisions of the trust instrument.

If title is to be insured in the trustee(s) of a trust, (or if their act is to be insured), this Company will require a **Trust Certification pursuant to California Probate Code Section 18100.5.** The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

9. **This company will require a statement of information** from the parties named below in order to complete this report, based on the effect of documents, proceedings, liens, decrees, or other matters which do not specifically describe said land, but which, if any do exist, may affect the title or impose liens or encumbrances thereon. After review of the requested Statement(s) of Information the Company may have additional requirements before the issuance of any policy of title insurance.

Parties: Edward Hemmat

(Note: The statement of information is necessary to complete the search and examination of title under this order. Any title search includes matters that are indexed by name only, and having a completed statement of information assists the Company in the elimination of certain matters which appear to involve the parties but in fact affect another party with the same or similar name. Be assured that the statement of information is essential and will be kept strictly confidential to this file).

An abstract of judgment for the amount shown below and any other amounts due:

Amount:	$10,763.76
Debtor:	Edward K. Hemmat, aka Edward K. Hemmat, individually
Creditor:	Creditors Trade Association, Inc., dba Great Western Collection Bureau
Date Entered:	February 19, 2013
County:	Sonoma
Court:	Superior
Case No.:	MCV 218901
Returned to:	
Name:	Stephen M. Kappos, Robinson-Kappos
Address:	3785 Brickway Blvd., Suite 210 Santa Rosa, CA 95403-9034
Recorded:	March 22, 2013, Instrument No. 2013107878, of Official Records

10. **Any rights of the parties in possession** of a portion of, or all of, said land, which rights are not disclosed by the public record.

This Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage. The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

11. **If extended coverage** title insurance will be requested, or if this report has been issued to facilitate a request for extended coverage title insurance, then the following would also be exceptions to coverage:

Any facts, rights, interests or claims which are not disclosed by the public records but which could be ascertained by making inquiry of the parties or persons in possession of the herein described land.

Any easements, liens (including but not limited to any Statutory Liens for labor or materials arising from any on-going or recently completed works of improvement), encumbrances, facts, rights, interest or claims which are not shown by the public records but which could be ascertained by an inspection of the herein described land.

Discrepancies, conflicts in boundary lines, shortages in area, encroachments or any other facts which a correct survey of the herein described land would disclose which are not shown by the public records and the requirement that said survey meets with the minimum standards for ALTA/ACSM land title surveys.

12. **This Company will require** an Owner's Affidavit to be completed by the party(ies) named below before any title assurance requested under this application will be issued.

Party(ies): Reginald Tomasello, Walter C. Berrman, Clark R. Beerman, LaVergne Engdahl, Successor Trustee of the E.R. and LaVergne Engdahl Family 1996 Trust,

The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit.

13. **The transaction contemplated** in connection with this Report is subject to the review and approval of the Company's Corporate Underwriting Department. The Company reserves the right to add additional items or make further requirements after such review.

END OF ITEMS

Note 1. Property taxes for the fiscal year shown below are PAID. For proration purposes the amounts are:

1st Installment:	$2,220.31
2nd Installment:	$2,220.31
Exemption:	$0.00
Land:	$64,875.00
Improvements:	$90,136.00
Personal Property:	$0.00
Code Area:	17022
Bill No.:	01477600

Note 2. Property taxes for the fiscal year shown below are PAID. For proration purposes the amounts are:

Tax Identification No.:	003-0073-005
Fiscal Year:	2012 - 2013
1st Installment:	$734.24
2nd Installment:	$734.24
Exemption:	$0.00
Land:	$36,360.00
Improvements:	$0.00
Personal Property:	$0.00
Code Area:	17022
Bill No.:	01477700

Note 3. The Company is not aware of any matters which would cause it to decline to attach the CLTA Endorsement Form 116 indicating that there is located on said land a Commercial Improvements known as 1501 Martin Luther King Jr. Way, Oakland, California to an Extended Coverage Loan Policy.

Note 4. The name(s) of the buyer(s) furnished with this application for Title Insurance is/are:

Edward Hemmat

If these names are incorrect, incomplete or misspelled, please notify the Company.

Note 5. There are NO deeds affecting said land, recorded within twenty-four (24) months of the date of this report.

Note 6. **The application** for title insurance was placed by reference to only a street address or tax identification number.

Based on our records, we believe that the description in this report covers the parcel requested, however, if the legal description is incorrect a new report must be prepared.

If the legal description is incorrect, in order to prevent delays, the seller/buyer/borrower must provide the Company and/or the settlement agent with the correct legal description intended to be the subject of this transaction.

Note 7. If a county recorder, title insurance company, escrow company, real estate broker, real estate agent or association provides a copy of a declaration, governing document or deed to any person, California law requires that the document provided shall include a statement regarding any unlawful restrictions. Said statement is to be in at least 14-point bold face type and may be stamped on the first page of any document provided or included as a cover page attached to the requested document. Should a party to this transaction request a copy of any document reported herein that fits this category, the statement is to be included in the manner described.

Note 8. Wiring instructions for Chicago Title Company, Oakland, CA, are as follows:

Receiving Bank:	Wells Fargo 707 Wilshire Blvd., 13th Floor Los Angeles, CA 90017
ABA Routing No.:	121000248
Credit Account Name:	Chicago Title Company - Oakland 1 Kaiser Plaza, Suite 745, Oakland, CA 94612
Credit Account No.:	4121555106
Escrow No.:	13-**58204938**-LE

These wiring instructions are for this specific transaction involving the Title Department of the Concord office of Chicago Title Company. These instructions therefore should not be used in other transactions without first verifying the information with our accounting department. It is imperative that the wire text be exactly as indicated. Any extraneous information may cause unnecessary delays in confirming the receipt of funds.

Note 9. Any documents being executed in conjunction with this transaction must be signed in the presence of an authorized Company employee, an authorized employee of an agent, an authorized employee of the insured lender, or by using Bancserv or other approved third-party service. If the above requirements cannot be met, please call the company at the number provided in this report.

ATTACHMENT ONE

AMERICAN LAND TITLE ASSOCIATION
RESIDENTIAL TITLE INSURANCE POLICY (6-1-87) EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   - land use
   - improvements on the land
   - land division
   - environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at policy date.
   This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:
   - a notice of exercising the right appears in the public records on the Policy Date
   - the taking happened prior to the Policy Date and is binding on you if you bought the land without knowledge of the taking
3. Title Risks:
   - that are created, allowed, or agreed to by you
   - that are known to you, but not to us, on the Policy Date- unless they appeared in the public records
   - that result in no loss to you
   - that first affect your title after the Policy Date - this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
4. Failure to pay value for your title.
5. Lack of a right:
   - to any land outside the area specifically described and referred to in Item 3 of Schedule A
     or
   - in streets, alleys, or waterways that touch your land

   This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

In addition to the Exclusions, you are not insured against loss, costs, attorneys' fees, and the expenses resulting from:

1. Any rights, interests, or claims of parties in possession of the land not shown by the public records.
2. Any easements or liens not shown by the public records. This does not limit the lien coverage in Item 8 of Covered Title Risks.
3. Any facts about the land which a correct survey would disclose and which are not shown by the public records. This does not limit the forced removal coverage in Item 12 of Covered Title Risks.
4. Any water rights or claims or title to water in or under the land, whether or not shown by the public records.

ATTACHMENT ONE
(CONTINUED)

CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY - 1990
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

SCHEDULE B, PART I
EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

PART I

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

FORMERLY AMERICAN LAND TITLE ASSOCIATION LOAN POLICY (10-17-92) WITH A.L.T.A. ENDORSEMENT-FORM 1 COVERAGE EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy (except to the extent that this policy insures the priority of the lien of the insured mortgage over any statutory lien for services, labor or material or to the extent insurance is afforded herein as to assessments for street improvements under construction or completed at Date of Policy); or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any statutory lien for services, labor or materials (or the claim of priority of any statutory lien for services, labor or materials over the lien of the insured mortgage) arising from an improvement or work related to the land which is contracted for and commenced subsequent to Date of Policy and is not financed in whole or in part by proceeds of the indebtedness secured by the insured mortgage which at Date of Policy the insured has advanced or is obligated to advance.
7. Any claim, which arises out of the transaction creating the interest of the mortgagee insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (i) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer; or
   (ii) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or
   (iii) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:
      (a) to timely record the instrument of transfer; or
      (b) of such recordation to impart notice to a purchaser for value or a judgement or lien creditor.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage.
In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

2006 AMERICAN LAND TITLE ASSOCIATION LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage.
In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

FORMERLY AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY (10-17-92)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy, or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.
4. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (i) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or
   (ii) the transaction creating the estate or interest insured by this policy being deemed a preferential transfer except where the preferential transfer results from the failure:
      (a) to timely record the instrument of transfer; or
      (b) of such recordation to impart notice to a purchaser for value or a judgement or lien creditor.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage.
In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

2006 AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage.
In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (10-22-03)
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (10-22-03)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes ordinances, laws and regulations concerning:
   a. building
   b. zoning
   c. Land use
   d. improvements on Land
   e. Land division
   f. environmental protection

This Exclusion does not apply to violations or the enforcement of these matters if notice of the violation or enforcement appears in the Public Records at the Policy Date.
This Exclusion does not limit the coverage described in Covered Risk 14, 15, 16, 17 or 24.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not apply to violations of building codes if notice of the violation appears in the Public Records at the Policy Date.
3. The right to take the Land by condemning it, unless:
   a. notice of exercising the right appears in the Public Records at the Policy Date; or
   b. the taking happened before the Policy Date and is binding on You if You bought the Land without Knowing of the taking.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they appear in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they appear in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.d, 22, 23, 24 or 25.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any Land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 18.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 14, 15, 16 and 18, Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 14:	1.00% of Policy Amount or $ 2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 15:	1.00% of Policy Amount or $ 5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 16:	1.00% of Policy Amount or $ 5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 18:	1.00% of Policy Amount or $ 2,500.00 (whichever is less)	$ 5,000.00

ATTACHMENT ONE

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.

This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 21.

7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19 and 21, Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $ 2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $ 5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $ 5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $ 2,500.00 (whichever is less)	$ 5,000.00

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (10/13/01)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the Land; (ii) the character, dimensions or location of any improvements now or hereafter erected on the Land; (iii) a separation in ownership or a change in the dimensions or areas of the Land or any parcel of which the Land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the Land has been recorded in the Public Records at Date of Policy. This exclusion does not limit the coverage provided under Covered Risks 12, 13, 14, and 16 of this policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the Land has been recorded in the Public Records at Date of Policy. This exclusion does not limit the coverage provided under Covered Risks 12, 13, 14, and 16 of this policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the Public Records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without Knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) created, suffered, assumed or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (this paragraph does not limit the coverage provided under Covered Risks 8, 16, 18, 19, 20, 21, 22, 23, 24, 25 and 26); or
   (e) resulting in loss or damage which would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of the Insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable doing business laws of the state in which the Land is situated.
5. Invalidity or unenforceability of the lien of the Insured Mortgage, or claim thereof, which arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, except as provided in Covered Risk 27, or any consumer credit protection or truth in lending law.
6. Real property taxes or assessments of any governmental authority which become a lien on the Land subsequent to Date of Policy. This exclusion does not limit the coverage provided under Covered Risks 7, 8(e) and 26.
7. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This exclusion does not limit the coverage provided in Covered Risk 8.
8. Lack of priority of the lien of the Insured Mortgage as to each and every advance made after Date of Policy, and all interest charged thereon, over liens, encumbrances and other matters affecting the title, the existence of which are Known to the Insured at:
   (a) The time of the advance; or
   (b) The time a modification is made to the terms of the Insured Mortgage which changes the rate of interest charged, if the rate of interest is greater as a result of the modification than it would have been before the modification. This exclusion does not limit the coverage provided in Covered Risk 8.
9. The failure of the residential structure, or any portion thereof to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This exclusion does not apply to violations of building codes if notice of the violation appears in the Public Records at Date of Policy.

ATTACHMENT ONE

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07/26/10)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

Notice

You may be entitled to receive a $20.00 discount on escrow services if you purchased, sold or refinanced residential property in California between May 19, 1995 and November 1, 2002. If you had more than one qualifying transaction, you may be entitled to multiple discounts.

If your previous transaction involved the same property that is the subject of your current transaction, you do not have to do anything; the Company will provide the discount, provided you are paying for escrow or title services in this transaction.

If your previous transaction involved property different from the property that is subject of your current transaction, you must - prior to the close of the current transaction - inform the Company of the earlier transaction, provide the address of the property involved in the previous transaction, and the date or approximate date that the escrow closed to be eligible for the discount.

Unless you inform the Company of the prior transaction on property that is not the subject of this transaction, the Company has no obligation to conduct an investigation to determine if you qualify for a discount. If you provide the Company information concerning a prior transaction, the Company is required to determine if you qualify for a discount which is subject to other terms and conditions.

Effective Date: 5/1/2008

Personal Information Collected

We may collect Personal Information about you from the following sources:

- Information we receive from you on applications or other forms, such as your name, address, social security number, tax identification number, asset information, and income information;
- Information we receive from you through our Internet websites, such as your name, address, email address, Internet Protocol address, the website links you used to get to our websites, and your activity while using or reviewing our websites;
- Information about your transactions with or services performed by us, our affiliates, or others, such as information concerning your policy, premiums, payment history, information about your home or other real property, information from lenders and other third parties involved in such transaction, account balances, and credit card information; and
- Information we receive from consumer or other reporting agencies and publicly recorded documents.

Disclosure of Personal Information

We may provide your Personal Information (excluding information we receive from consumer or other credit reporting agencies) to various individuals and companies, as permitted by law, without obtaining your prior authorization. Such laws do not allow consumers to restrict these disclosures. Disclosures may include, without limitation, the following:

- To insurance agents, brokers, representatives, support organizations, or others to provide you with services you have requested, and to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure in connection with an insurance transaction;
- To third-party contractors or service providers for the purpose of determining your eligibility for an insurance benefit or payment and/or providing you with services you have requested;
- To an insurance regulatory authority, or a law enforcement or other governmental authority, in a civil action, in connection with a subpoena or a governmental investigation;
- To companies that perform marketing services on our behalf or to other financial institutions with which we have joint marketing agreements and/or
- To lenders, lien holders, judgment creditors, or other parties claiming an encumbrance or an interest in title whose claim or interest must be determined, settled, paid or released prior to a title or escrow closing.

We may also disclose your Personal Information to others when we believe, in good faith, that such disclosure is reasonably necessary to comply with the law or to protect the safety of our customers, employees, or property and/or to comply with a judicial proceeding, court order or legal process.

Effective Date: 5/1/2008

Disclosure to Affiliated Companies - We are permitted by law to share your name, address and facts about your transaction with other FNF companies, such as insurance companies, agents, and other real estate service providers to provide you with services you have requested, for marketing or product development research, or to market products or services to you. We do not, however, disclose information we collect from consumer or credit reporting agencies with our affiliates or others without your consent, in conformity with applicable law, unless such disclosure is otherwise permitted by law.

Disclosure to Nonaffiliated Third Parties - We do not disclose Personal Information about our customers or former customers to nonaffiliated third parties, except as outlined herein or as otherwise permitted by law.

Confidentiality and Security of Personal Information

We restrict access to Personal Information about you to those employees who need to know that information to provide products or services to you. We maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard Personal Information.

Access To Personal Information/
Requests for Correction, Amendment, or Deletion of Personal Information

As required by applicable law, we will afford you the right to access your Personal Information, under certain circumstances to find out to whom your Personal Information has been disclosed, and request correction or deletion of your Personal Information. However, FNF's current policy is to maintain customers' Personal Information for no less than your state's required record retention requirements for the purpose of handling future coverage claims.

For your protection, all requests made under this section must be in writing and must include your notarized signature to establish your identity. Where permitted by law, we may charge a reasonable fee to cover the costs incurred in responding to such requests. Please send requests to:

Chief Privacy Officer
Fidelity National Financial, Inc.
601 Riverside Avenue
Jacksonville, FL 32204

Changes to this Privacy Statement

This Privacy Statement may be amended from time to time consistent with applicable privacy laws. When we amend this Privacy Statement, we will post a notice of such changes on our website. The effective date of this Privacy Statement, as stated above, indicates the last time this Privacy Statement was revised or materially changed.

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

FNF Underwritten Title Company
CTC – Chicago Title Company

FNF Underwriter
CTIC – Chicago Title Insurance Company

Available Discounts

CREDIT FOR PRELIMINARY REPORTS AND/OR COMMITMENTS ON SUBSEQUENT POLICIES (CTIC)

Where no major change in the title has occurred since the issuance of the original report or commitment, the order may be reopened within 12 or 36 months and all or a portion of the charge previously paid for the report or commitment may be credited on a subsequent policy charge.

FEE REDUCTION SETTLEMENT PROGRAM (CTC and CTIC)

Eligible customers shall receive a $20.00 reduction in their title and/or escrow fees charged by the Company for each eligible transaction in accordance with the terms of the Final Judgments entered in *The People of the State of California et al. v. Fidelity National Title Insurance Company et al.,* Sacramento Superior Court Case No. 99AS02793, and related cases.

DISASTER LOANS (CTIC)

The charge for a Lender's Policy (Standard or Extended coverage) covering the financing or refinancing by an owner of record, within 24 months of the date of a declaration of a disaster area by the government of the United States or the State of California on any land located in said area, which was partially or totally destroyed in the disaster, will be 50% of the appropriate title insurance rate.

CHURCHES OR CHARITABLE NON-PROFIT ORGANIZATIONS (CTIC)

On properties used as a church or for charitable purposes within the scope of the normal activities of such entities, provided said charge is normally the church's obligation the charge for an owner's policy shall be 50% or 70% of the appropriate title insurance rate, depending on the type of coverage selected. The charge for a lender's policy shall be 32% or 50% of the appropriate title insurance rate, depending on the type of coverage selected.

DRILLING PERMIT

ENVIRO SOIL TECH CONSULTANTS

Alameda County Public Works Agency - Water Resources Well Permit

399 Elmhurst Street
Hayward, CA 94544-1395
Telephone: (510)670-6633 Fax:(510)782-1939

Application Approved on: 06/10/2013 By jamesy

Permit Numbers: W2013-0424
Permits Valid from 06/11/2013 to 06/11/2013

Application Id: 1370470327952 **City of Project Site:** Oakland
Site Location: 1501 MLK Jr Way, Oakland, CA
Project Start Date: 06/11/2013 **Completion Date:** 06/11/2013
Assigned Inspector: Contact James Yoo at (510) 670-6633 or jamesy@acpwa.org

Applicant: Enviro Soil Tech Consultants - Frank Hamedi **Phone:** 408-297-1500
131 Tully Rd, San Jose, CA 95111
Property Owner: Ed Hemmat **Phone:** 510-428-3950
2420 San Pablo Ave, Oakland, CA 94612
Client: ** same as Property Owner **
Contact: Frank Hamedi **Phone:** --
Cell: 408-858-6908

Total Due: $265.00
Receipt Number: WR2013-0204 **Total Amount Paid:** $265.00
Payer Name : Enviro Soil Tech Paid By: CHECK **PAID IN FULL**

Works Requesting Permits:

Borehole(s) for Investigation-Environmental/Monitorinig Study - 6 Boreholes
Driller: Vironex - Lic #: 705927 - Method: other **Work Total: $265.00**

Specifications

Permit Number	Issued Dt	Expire Dt	# Boreholes	Hole Diam	Max Depth
W2013-0424	06/10/2013	09/09/2013	6	2.00 in.	20.00 ft

Specific Work Permit Conditions

1. Backfill bore hole by tremie with cement grout or cement grout/sand mixture. Upper two-three feet replaced in kind or with compacted cuttings. All cuttings remaining or unused shall be containerized and hauled off site. The containers shall be clearly labeled to the ownership of the container and labeled hazardous or non-hazardous.

2. Boreholes shall not be left open for a period of more than 24 hours. All boreholes left open more than 24 hours will need approval from Alameda County Public Works Agency, Water Resources Section. All boreholes shall be backfilled according to permit destruction requirements and all concrete material and asphalt material shall be to Caltrans Spec or County/City Codes. No borehole(s) shall be left in a manner to act as a conduit at any time.

3. Permittee shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend and save the Alameda County Public Works Agency, its officers, agents, and employees free and harmless from any and all expense, cost, liability in connection with or resulting from the exercise of this Permit including, but not limited to, properly damage, personal injury and wrongful death.

4. Applicant shall contact James Yoo for an inspection time at 510-670-6633 at least five (5) working days prior to starting, once the permit has been approved. Confirm the scheduled date(s) at least 24 hours prior to drilling.

5. Copy of approved drilling permit must be on site at all times. Failure to present or show proof of the approved permit application on site shall result in a fine of $500.00.

6. Permit is valid only for the purpose specified herein. No changes in construction procedures, as described on this

permit application. Boreholes shall not be converted to monitoring wells, without a permit application process.

STANDARD OPERATION PROCEDURES

ENVIRO SOIL TECH CONSULTANTS

File No. 6-13-858-SA
July 9, 2013

DRILLING AND SOIL SAMPLING PROCEDURE

A direct push technology (Geoprobe) tool with hollow-stem auger was used in drilling the soil borings to the desired depths.

Prior to drilling, all drilling equipment was thoroughly steam-cleaned to minimize the possibility of cross-contamination and/or vertical migration of possible contaminants.

In addition, sampling equipment was washed between samples with Tri-sodium Phosphate (TSP) solution or an equivalent EPA-approved detergent followed by a rinse in distilled water.

During the drilling operation, undisturbed soil samples were taken from the required depth by forcing a 2-inch sampler lined with polyethylene or brass tubes driven into undisturbed sediments at the bottom of the borehole by means of hydraulic push technologies.

The selected sampling tubes were immediately trimmed, the ends covered tightly with aluminum foil and plastic caps, sealed with tape labeled, placed in a plastic bag and stored in a cold ice chest in order to minimize the escape of any volatile present in the samples. Soil samples were sent to a state-certified hazardous waste laboratory for analysis accompanied by a chain-of-custody record.

Soil samples collected at each sampling interval were inspected for any possible contamination (odor or peculiar colors). Soil vapor concentrations maybe measured in the field by using a Photoionization Detector (PID). The soil sample will be sealed in a Zip-Loc plastic bag and placed in the sun to enhance volatilization of the hydrocarbons from the sample. The purpose of this field analysis is to qualitatively determine the presence or absence of hydrocarbons and to establish which soil samples will be analyzed at the laboratory. The data will be recorded on the drilling log at the depth corresponding to the sampling point.

Other soil samples may be collected to document the stratigraphy and estimate relative permeability of the subsurface materials.

Soil tailings that are obtained during drilling were stored at the site, pending the analytical test results to determine proper disposal.

File No. 6-13-858-SA
July 9, 2013

GROUNDWATER SAMPLING PROCEDURE

Prior to collection of groundwater samples, all of the sampling equipment (i.e. bailer or tubing) were cleaned by pumping TSP water solution followed by distilled water.

Temporary well casings were installed in the borings for the purpose of groundwater sampling. The wells were bailed or pumped to remove four to ten well volumes or until the discharged water temperature, conductivities and pH stabilized. "Stabilized" is defined as three consecutive readings within 15% of one another.

The groundwater sample was collected when the water level in the well recovered to 80% of its static level.

Forty-milliliter (ml.) glass volatile organic analysis (VOA) vials with Teflon septa and 1 liter amber glass bottle were used as sample containers. The groundwater sample was being decanted into each VOA vial in such a manner that there was a meniscus at the top. The cap quickly was placed over the top of the vial & bottle and securely tightened. The VOA vial and glass bottle were then be inverted and tapped to see if air bubbles are present. If none is present, then the sample was labeled and refrigerated for delivery under chain-of-custody to the laboratory. The label information has included a sample identification number, job identification number, date, time, type of analysis requested and the sampler's name.

Accutest Laboratories Sample Receipt Summary

Accutest Job Number: C28242 **Client:** ENVIRO SOIL **Project:** 1501 MLK JR. WAY

Date / Time Received: 6/13/2013 **Delivery Method:** Accutest Courier **Airbill #'s:**

Cooler Temps (Initial/Adjusted): #1: (4.6/4.6); 0

Cooler Security	Y	or	N		Y	or	N
1. Custody Seals Present:	☐		☑	3. COC Present:	☑		☐
2. Custody Seals Intact:	☐		☐	4. Smpl Dates/Time OK	☑		☐

Cooler Temperature	Y	or	N
1. Temp criteria achieved:	☑		☐
2. Cooler temp verification:	IR Gun		
3. Cooler media:	Ice (Bag)		
4. No. Coolers:	1		

Quality Control Preservation	Y	or	N	N/A
1. Trip Blank present / cooler:	☐		☐	☑
2. Trip Blank listed on COC:	☐		☐	☑
3. Samples preserved properly:	☐		☐	
4. VOCs headspace free:	☐		☐	☑

Sample Integrity - Documentation	Y	or	N
1. Sample labels present on bottles:	☑		☐
2. Container labeling complete:	☑		☐
3. Sample container label / COC agree:	☑		☐

Sample Integrity - Condition	Y	or	N
1. Sample recvd within HT:	☑		☐
2. All containers accounted for:	☑		☐
3. Condition of sample:	Intact		

Sample Integrity - Instructions	Y	or	N	N/A
1. Analysis requested is clear:	☑		☐	
2. Bottles received for unspecified tests	☐		☑	
3. Sufficient volume recvd for analysis:	☑		☐	
4. Compositing instructions clear:	☐		☐	☑
5. Filtering instructions clear:	☐		☐	☑
