Subject: RO3182 - 1400 Powell St Emeryville Chevron Investigation Status 2/17/16

Hi Mark,

We successfully completed last week the collection of the indoor and ambient air samples with the HVAC off and we successfully completed today 12/17/16 collection of the indoor and ambient air samples and also soil gas samples with the HVAC on. No odors or photoionization detector values were detected from the Vapor Pins following collection of the soil gas samples.

All of the samples have been sent to the laboratory. We should have the sample results back by two weeks from the end of tomorrow. I will let you know once we receive the results.

Please let me know if you have any questions or need any additional information.

Thank you!

Paul
