**Subject:** RO0003205 - 1919 Market Street, Oakland, CA - Complaint for December 12, 2016

Dear Ms. Cook,

This is to bring to your attention that we have received a complaint from Mr. William Daniel Cooper (addressed as Lichen) on December 14, 2016. Lichen called me this morning and reported the following:

- It was brought to his attention by his neighbor Ms. Ella Radford who lives across the site that she noticed welding type work associated with torches and noise occurring at the site in the morning of December 12, 2016.
- It is his and Ms. Radford's understanding that there is no construction type work to be performed at the site.
- They would like to know what was being done and why.

Alameda County Department of Environmental Health had already indicated to Mr. Danny Haber, the current property owner that no construction type work is to be performed at the site until further notice and approval. It is our understanding that this issue is related to activities under the jurisdiction of the City of Oakland and as such, please follow up and address this issue with the appropriate individuals and departments as soon as possible. Thank you.

If you have any questions, please let us know.

**Kit Soo, PG**
