Subject: Phase I Environmental Site Assessment  
24747 Clawiter Road  
Hayward, California  
ACDEH Fuel Leak Case No. RO0003213  
GeoTracker Global ID No. T10000009567

Dear Mr. Nowell:

Basics Environmental, Inc. is pleased to present the enclosed report we prepared for the property located at 24747 Clawiter Road in Hayward, California. The report, titled Phase I Environmental Site Assessment, 24747 Clawiter Road, Hayward, California and dated September 17, 2014, was prepared for Mechanics Bank.

I have read and acknowledge the content, recommendations, and/or conclusions contained in the attached document or report submitted on my behalf to ACDEH's FTP server and the State Water Resource Control Board's GeoTracker website.

Should you have any questions concerning the report or need additional information, please call me at (510) 834-9099.

Sincerely,

Basics Environmental, Inc.

Attention: Mr. Keary Sullivan

**Subject:** Phase I Environmental Site Assessment Report  
24747 Clawiter Road  
Hayward, California 94545

Dear Mr. Sullivan:

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13/AAI of 24747 Clawiter Road in Hayward, California, the property. Any exceptions to, or deletions from, this practice are described in Section 1 of this report. This assessment has revealed obvious evidence of recognized environmental conditions in connection with the property that warrants further investigation and/or documentation at this time.

Should you have any questions regarding this report, please contact the undersigned.

Sincerely,

Basics Environmental, Inc.

### PHASE I ENVIRONMENTAL SITE ASSESSMENT

24747 Clawiter Road

Hayward, California

For

Mechanics Bank

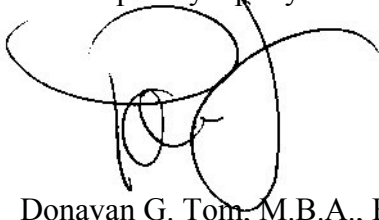

14-ENV3905

September 17, 2014

I declare that, to the best of my professional knowledge and belief, I meet the definition of "Environmental Professional" as defined by the Environmental Protection Agency's Final Rule (40 CFR 312.21). I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting. In performing Phase I Environmental Site Assessments, I develop and perform the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The findings, interpretations of data, recommendations, specifications or professional opinions are presented within the limits prescribed by available information at the time the report was prepared, in accordance with generally accepted professional environmental practice and within the requirements by the Client. There is no other warranty, either expressed or implied. The data and findings of this report are based on the readily available data and information obtained from numerous public and private agencies regarding the subject site and its immediate vicinity. Additional search (at greater cost) may or may not disclose information which may significantly modify the findings of this report. We accept no liability on completeness or accuracy of the information presented and or provided to us, or any conclusions and decisions which may be made by the Client or others regarding the subject site.

This report was prepared solely for the benefit of Basic's Client. Basics consents to the release of this report to third parties involved in the transaction for which the report was prepared, including without limitation, lenders, title companies, public institutions, attorneys, and other consultants. However, any use of or reliance upon this report shall be solely at the risk of such party and without legal recourse against Basics, or its subcontractors, affiliates, or their respective employees, officers, or directors, regardless of whether the action in which recovery of damage is sought is based upon contract, tort (including the sole, concurrent or other negligence and strict liability of Basics), statute or otherwise. This report shall not be used or relied upon by a party that does not agree to be bound by the above statements.

Donavan G. Tom, M.B.A., E.P., R.E.P.A.  
Principal Consultant

## 1.0 INTRODUCTION

### 1.1 Purpose of Investigation

Basics Environmental, Inc. (Basics) has performed this Phase I Environmental Site Assessment (ESA) for Mechanics Bank pursuant to our signed agreement on September 4, 2014. The "subject site" is at 24747 Clawiter Road, Hayward, California (APN 439-020-003-2). The purpose of this ESA is to:

- Observe site conditions at the property in accordance with the protocols set forth by the *American Society for Testing and Materials (ASTM) Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and *U.S. Environmental Protection Agency's All Appropriate Inquiry (AAI) Final Rule 40 CFR Part 312*, except where modified by the proposal;
- Identify to the extent feasible recognized environmental conditions in connection with the subject site. The ESA is intended to evaluate the potential for the presence of hazardous or toxic chemicals in the soil and/or groundwater resulting from past and present land use activities. To the extent possible, potential sources of hazardous or toxic chemicals from adjacent off-site operations will also be evaluated; and
- Render findings and professional opinion regarding the potential for adverse environmental impacts on or adjacent to the site.

### 1.2 Scope of Work

The scope of work performed for this ESA consisted of the following tasks:

- Field reconnaissance and personal interviews to evaluate environmental land-use conditions on the subject site and view adjacent properties;
- Aerial photograph, City Directory and/or Fire Insurance/Topographic Map review (typically back to 1940 or first developed use of the property) to evaluate former environmental land-use conditions on the subject site and adjacent properties;
- Review of federal, state and county files and environmental database search report obtained from a commercial service providing up to date and current information;

- Evaluation of the physical setting (geomorphic, geologic and hydrogeologic) of the subject site property; and
- Preparation of this ESA report to present the findings and professional opinions regarding potential recognized environmental conditions on the site.

The work for this ESA was performed within the client approved scope of work and budget for the investigation.

### 1.3 Special Terms and Conditions

The goal of this ESA is to identify recognized environmental conditions indicating the presence or likely presence of any hazardous substances or petroleum hydrocarbons in structures, ground, groundwater, or surface water of the property. Recognized environmental conditions are not intended to include *de minimus* conditions that do not present risks to public health or environment and that would not be subject to enforcement actions by government agencies.

### 1.4 Limitations and Exceptions

This ESA only includes a visual evaluation of the presence of asbestos, lead paint, radon, or mold, if applicable. In addition, this ESA does not include the results of any sampling, monitoring, or other types of field and/or laboratory testing or investigation.

### 1.5 User Responsibilities

The user of this ESA will be responsible for: (1) determining the relationship of the purchase price to the value of the property; (2) disclosure of specialized knowledge, experience or information which may effect the environmental condition of the subject site; and (3) disclosure of any environmental cleanup liens against the property within recorded land title records, if applicable. None of the above was provided by the client for our review.

## 2.0 SITE DESCRIPTION AND RECONNAISSANCE

### 2.1 Site Description and Uses

#### 2.1.1 Interviews

A Basics representative visited the subject site on September 10, 2014. Basics observed the various facilities and operations conducted at the site and also noted the land-use in the vicinity of the site. Mr. Cliff Schuch, Treasurer and Chief Financial Officer for D W Nicholson Corporation, and Mr. Thomas S. Reed Jr., Safety and Purchasing Manager for D W Nicholson Corporation, allowed access to available areas. Mr. Schuch and Mr. Reed were also interviewed during the site visit. Discussions with Mr. Schuch and Mr. Reed revealed that D W Nicholson Corporation has occupied the site since 1984. Additional information obtained from interviews of onsite representatives is incorporated within the appropriate sections of this report.

#### 2.1.2 Site Description and Uses

The subject site is located in Hayward along the western side of Clawiter Road approximately 620 feet southwest of the intersection of Clawiter Road and Industrial Boulevard (See Drawings 1 and 2). The subject site consists of an approximately 3.99-acre “trapezoidal” shaped parcel of land improved with an approximately 56,466-square foot partial two-story industrial warehouse/office building, and associated paved areas (See Photos 1 - 24).

The partial two-story industrial warehouse/office building is constructed of wood and steel framing on a concrete slab foundation with sheet metal (warehouse) and concrete masonry (office) exterior walls. Interior building materials include sheet metal (warehouse) and sheet rock (office) interior walls, high steel-beamed (warehouse) and “drop style” (office) ceilings, and carpet, tile, and concrete floors.

Utilities including water, electric, and sewage service are publicly supplied. Electrical transformers are not located at the property. Information obtained from the site inspection indicated no evidence that PCB-containing equipment is now used or has been used in connection with the property.

The general area surrounding the property is developed commercial and industrial. A site plan illustrating the site and adjacent properties is shown in Drawing 3.

The subject site is currently occupied by D W Nicholson Corporation and utilized as a fabricator of rigging machinery, material handling equipment, piping, and structural framing and electrical contractor.

### 2.1.3 Environmental Land-Use Conditions

The subject site was evaluated for the use and storage of hazardous substances and petroleum products; use of aboveground and underground storage tanks, storage and disposal of hazardous wastes; evidence of releases from hazardous materials, and identification of conduits to the subsurface.

Partial Two-Story Industrial Warehouse/Office Building (24747 Clawiter Road) (circa 1966-1968) – The partial two-story warehouse/office building occupies the center portion of the subject site parcel. The building is segregated into an office and warehouse area. The main entrance is located on the eastern portion of the building providing access to the office area. Personnel doors and roll-up doors are located along the northern, southern, and western portions of the building. (See Photos 1 – 4).

Office Area – The office area occupies the southeastern portion of the building. An interior staircase along the northeastern portion of the office area, and two exterior staircases along the northeastern and southeastern portion of the building, provide access to the second floor office area. The office area is segregated into a reception area, conference room, break room, computer lab, a series of offices, and restrooms. Located throughout the office area are typical office furniture and equipment (See Photos 5 - 6). Visual observations of the office area and restrooms appeared to be in good condition and did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the carpet and tile floors within the office area did not reveal any obvious evidence of drains, sumps, cracks, or other conduits to the subsurface.

Warehouse Area – The warehouse area occupies the majority of the building. The warehouse area is segregated into tool crib, electrical warehouse, mechanical warehouse, fabrication shop, and equipment repair area.

*Tool Crib* – The tool crib is located along the center eastern portion the warehouse area. Located within the tool crib are multiple flammable cabinets and tools (See Photos 7 - 8). Visual observations of the concrete floor in this area revealed evidence of discoloration from years of usage. Visual observations of the concrete floors within the tool crib did not reveal any obvious evidence of drains, sumps, cracks, or other conduits to the subsurface.

*Electrical Warehouse* – The electrical warehouse is located along the northeastern portion of the warehouse area. Located within the electrical warehouse are multiple spools of electrical wiring and typical electrical equipment (See Photo 9). Visual observations of the electrical warehouse appeared to be in good condition and did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the concrete floors within the electrical warehouse did not reveal any obvious evidence of drains, sumps, cracks, or other conduits to the subsurface.

*Mechanical Warehouse* – The mechanical warehouse is located within the center portion of the warehouse area. Located within the mechanical warehouse is an underground hydraulic lift for loading trucks (See Photo 10). Also located within the mechanical warehouse is storage of full and empty cylinders of welding gases (See Photo 11). Visual observations of the concrete floor in this area revealed evidence of discoloration from years of usage. Visual observations of the concrete floors within the mechanical warehouse did not reveal any obvious evidence of drains, sumps, cracks, or other conduits to the subsurface.

*Fabrication Shop* – The fabrication shop is located along the western portion of the warehouse. Located within the fabrication shop area multiple metal fabricating work benches (See Photo 12). Cylinders of welding gases are located near the each work bench. Additional storage of welding gases is located along the northwestern portion of the fabrication shop. A spray booth is located along the western portion of the fabrication shop (See Photo 13). Visual observations of the concrete floor in this area revealed evidence of discoloration from years of usage. Visual observations of the concrete floors within the fabrication shop did not reveal any

obvious evidence of drains, sumps, cracks, or other conduits to the subsurface.

*Equipment Repair Area* – The equipment repair area is located along the northwestern portion of the warehouse. Located within the equipment repair area is one aboveground hydraulic lift, welding gas cart, and typical auto repair equipment (See Photo 14). Visual observations of the concrete floor in this area revealed evidence of discoloration from years of usage. Visual observations of the concrete floors within the fabrication shop did not reveal any obvious evidence of drains, sumps, cracks, or other conduits to the subsurface.

Also located within this area are hazardous materials storage. Located along the northeastern portion of the repair area are two 55-gallon drums of waste oil and one 55-gallon drum of waste antifreeze (See Photo 15). Secondary containment was noted beneath the 55-gallon drums. Two 55-gallon drums of new oil were also located within this area. Secondary containment was not noted beneath the drums. A 100-gallon waste oil above ground storage tank is located along the southern center portion of the repair area. One 55-gallon drum of transmission fluid, one 55-gallon drum of hydraulic oil, one 55-gallon drum of engine coolant, and one 55-gallon drum of salvage were also located along the southern portion of the equipment repair area (See Photo 16). Secondary containment was noted beneath the drums. At least two parts washers were noted within the equipment repair area. In addition, three 55-gallon drums of gasoline were located just outside of the equipment repair area, however discussions with Mr. Reed revealed the drums were empty (See Photo 17). Visual observations of the concrete floor in this area revealed evidence of discoloration from years of usage. Visual observations of the concrete floors within the fabrication shop did not reveal any obvious evidence of drains, sumps, cracks, or other conduits to the subsurface.

A sandblasting booth is located along the northwestern portion of the repair area (See Photo 18). Visual observations of the sandblasting booth appeared to be in good condition and did not reveal any obvious evidence of hazardous materials, stains or spills. Visual observations of the floor beneath the sandblasting booth appeared to be a sump to collect sand blasting dust.

Associated Paved and Landscaped Areas – The associated paved areas consist of a paved storage yards along the northern, southern, and western portions of the subject site. A paved parking area is located along the northeastern portion of the subject site. The paved parking area is paved with asphalt and accessible by two driveways along Clawiter Road to the east. The paved storage area along the southern portion of the subject site is also utilized for parking and is accessible by a paved driveway along Clawiter Road to the east. Associated landscaped areas are interspersed between paved areas, sidewalk, and subject site boundaries (See Photos 19 - 20).

Located throughout the paved storage areas are raw materials and equipment for fabricating. Shipping containers containing storage are located along the northern center portion of the subject site. Equipment storage (generators, trucks, forklifts, etc.) is located along the northwestern portion of the subject site (See Photo 21). General observations of the shipping containers and equipment storage area did not reveal obvious evidence of hazardous materials, stains or spills.

Located within the center of northern paved storage area is a gasoline and diesel dispenser island. One 6,000-gallon diesel underground storage tank and one 10,000-gallon unleaded gasoline storage tank is located within this area (See Photo 22). The tanks were reported to have been installed in 1985 for D W Nicholson Corporation. General observations of the underground storage tanks did not reveal obvious evidence of stains or spills.

An approximately 500-gallon liquid propane gas aboveground storage tank is located to the southwest of the gasoline and diesel dispenser (See Photo 23). General observations of the propane above ground storage tank did not reveal obvious evidence of stains or spills.

Empty 55-gallon drum storage is located to the east of the propane above ground storage tank. General observations of the empty 55-gallon drum storage did not reveal obvious evidence of hazardous materials, stains or spills.

Located along the western portion of the paved area is a shipping container utilized for paint storage. One 55-gallon drum of paint thinner is located within the shipping container. Secondary containment was noted beneath the drum of paint thinner. Two 55-gallon drums of new paint thinner were located nearby the paint storage area (See Photo 24). Secondary Containment were not noted underneath the drums. General observations of the paint storage

area did not reveal obvious evidence of stains or spills.

A dust collector is located along the northwestern portion of the building attached to the sandblast area within the equipment maintenance area. General observations of the dust collector did not reveal obvious evidence of stains or spills.

A generator is located along the southern portion of the buildings within the paved area. General observations of the generator did not reveal obvious evidence of hazardous materials, stains or spills.

At least three storm water runoff drains are located throughout the northern, northeastern, and western paved areas. Visual observations of the storm drains did not reveal any obvious evidence of hazardous materials (odors, floating product, stains, etc.).

Visual observations of the rest of the associated paved and undeveloped areas did not reveal any other obvious signs of hazardous materials, stains, or spills, other than oil stains common to all parking lots. No obvious evidence of underground storage tanks, distressed vegetation, or other surface impoundments were observed throughout the site during the inspection.

## 2.2 Adjacent Properties

### 2.2.1 Immediate Adjacent Properties

Sites in the vicinity of the subject site were observed during the site reconnaissance to evaluate conditions or businesses indicative of hazardous or potentially toxic materials use.

The following are the uses of the adjoining properties.

- North - One-Story Commercial Building – Vacant (24701 Clawiter Road)
- South - Storage Yard - Pipe Supply Inc. (24785 Clawiter Road)
- East - Clawiter Road and beyond Multi-Tenant Commercial Building – Industrial Auto Plaza (24603-24649 Industrial Boulevard)
- West - Commercial Building – Hayward Industrial Park (23783 Eichler Street)

Visual observations of the immediate adjacent properties revealed obvious business activity indicative to the use, storage and/or treatment of hazardous materials. However, no obvious evidence was noted at the immediate adjacent properties that would represent a significant environmental concern to the subject site.

## 2.2.2 Wells

No obvious evidence of wells, such as water supply wells and/or groundwater monitoring wells, were noted on or nearby the subject site.

## 2.3 Non-ASTM E1527 Considerations

### 2.3.1 Asbestos Containing Construction Materials

An asbestos survey was not conducted at the property as part of this assessment. However, the subject site building was confirmed to have been constructed before 1979, the year asbestos containing construction materials was banned, thus, asbestos may have been utilized in its construction. No obvious evidence of friable or non-friable suspect asbestos containing materials was observed within easily accessible areas of the structure. However, original building materials not easily accessible including, but not limited to, flooring and masting materials, sheet rock muds and taping compounds, ceiling and roofing materials, and ducting and surfacing materials may contain ACCMs. To confirm if any asbestos materials are contained within the structures on the subject site, an asbestos survey should be performed by an AHERA trained asbestos professional. As part of renovation activities, an asbestos inspection should have been required, pursuant to the National Emission Standards for Hazardous Air Pollutant (NESHAPs).

### 2.3.2 Lead-Based Paint

A lead-based paint survey was not conducted at the property as a part of this assessment. However, the subject site building was confirmed to have been constructed before the ban on lead-based paints in 1978, thus, lead-based paints may have been utilized in its construction.

Lead-based paint is any paint, varnish, stain, or other applied coating that has 1 mg per square cm (or 5,000 µg/g by dry weight) or more of lead. In Section 1017 of the Housing and Urban Development Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", states that a lead-based paint hazard is "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-

contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact lead-based paint on most walls and ceilings would not be considered a “hazard,” although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard.

### 2.3.3 Radon

Radon testing was not conducted at the property as a part of this assessment. However, based on the Map of Radon Zones provided by the United States Environmental Protection Agency (EPA), there is a low potential that radon concentrations at, or above, 4 picocuries per liter (pCi/l) are present at the site. Concentrations at, or above, 4 pCi/l are considered to be concentrations of concern per Cal-EPA and EPA. Based on the map, radon has been detected in Alameda County at average levels between 2 pCi/l and 4 pCi/l. Additional information can also be obtained from the California Department of Public Health’s Radon Program which provides a list of radon test results from throughout the state which are sorted by zip code.

Radon is a naturally occurring radioactive gas that is odorless, invisible, and without taste. It is released during the natural decay of uranium, which is present in most rock, soil and water. Its occurrence in the state is influenced primarily by geology. Radon can be found throughout California because uranium exists in all rock and soil. Although certain areas of the state are more likely to contain higher radon levels than others, radon is a house-to-house issue. You may live in an area of low radon potential yet your house can have elevated radon but your neighbor's house has a low radon level. Radon, in its natural state cannot be detected with the human senses. To confirm if any radon is contained within the structure on the subject site, testing should be performed by an EPA-authorized state certified radon testing professional.

### 2.3.4 Mold

A mold survey was not conducted at the property as a part of this assessment. However, no structures were located at the subject site. However, no obvious evidence of mold or water damaged materials were observed within easily accessible areas of the structure.

In general, mold is a subset of the fungi family. Fungi are common and found in most ecosystems. Fungi is needed to help recycle organic material to sustain plant and animal life. In order to reproduce, mold release tiny spores into the air, which eventually attach onto surfaces favorable for growth. A class of fungi, molds have been found to cause a variety of health problems in humans, including allergic, toxicological, and infectious responses. Molds are decomposers of organic materials, and thrive in humid environments, and produce spores to reproduce as plants produce seeds. When mold spores land on a damp spot indoors, they may begin growing and digesting whatever they are growing on in order to survive. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problems remain undiscovered or not addressed.

Currently, there are no established “sound, science-based Permissible Exposure Limits (PELs) for indoor molds at this time”. As mold becomes a more prevalent issue, building owners will need to stay informed on the subject. There are dozens of Internet web sites geared to the topic, and increased litigation in this area is also fueling increased interest. With any new trend there often is misinformation, incorrect conclusions, and conflicting information. Those involved in the building industry should consider the source and weight of information carefully before drawing conclusions and making decisions.

To confirm if any mold is present within the structure on the subject site, laboratory test and sampling can be performed by a qualified industrial hygienist for various species of fungi such as *Aspergillus*, *Cladosporium*, *Stachybotris* and other mycotoxins, and bacteria families such as *Legionella*, etc. However, the only types of evidence that have been related consistently to adverse health effects are the presence of current or past water damage, damp materials, visible mold, and mold odor, *not* the number or type of mold spores nor the presence of other markers of mold in indoor air or dust.

### 3.0 PHYSICAL SITE SETTING

#### 3.1 Geomorphic Description

The subject site is within the Coast Ranges geomorphic province of California within the southern end of the East Bay Plain, on the eastern flank of the San Francisco Bay structural trough. The regional topography in the subject site area is located within the three topographic-structural units of the Union City area: the Bay Plains, the Front Hills, and the Middle Hills. The property site is situated approximately 25 feet above mean sea level, on a relatively flat topography on the East Bay Plain, and approximately one mile east of the eastern edge of the present Bay. The structural depression that underlies the San Francisco Bay has accumulated up to 1100 feet of poorly consolidated sediment (Alameda County, 1988). The trough is filled with approximately 950 feet of alluvial fan deposits, characterized by lenticular beds of poorly sorted gravel, sand, silt, and clay that exhibit wide variations in bed thickness and grain size over short distances.

#### 3.2 Geologic Setting

The structure of the San Francisco Bay trough is controlled by interaction between the San Andreas and Calaveras/Hayward fault zones. The alluvial and marine sediments filling the structural basin underlying the San Francisco Bay have been sub-divided based on their dominant modes of deposition and geologic age. Regionally, the subject site area is located within the fore bay margin of the Niles Cone groundwater basin of the East Bay Plain (ACFCWCD, 1988). The site is situated within the Niles Cone, which is one of three coalescing alluvial fans comprising the Bay Plain. The Niles Cone, along with the San Leandro Cone and the San Lorenzo Cone, consist of several hundred feet of unconsolidated Quaternary alluvial sediments. The upper 400 feet of sediment typically consist predominately of blue or yellow silt and clay with variable sand and gravel content.

Information regarding soil lithology was researched at the California Water Resources Control Board's website at <https://geotracker.waterboards.ca.gov/>. Based on previous subsurface investigations performed for the former White Cap Facility located two parcels to the north at 24493 Clawiter Road, the underlying soil is described as unconsolidated, moderately sorted sand forming alluvial plains. The medium-grained alluvium interfingers with fine and coarse grained alluvium and locally may contain thin beds of clay, silt, and gravel. Previous subsurface conditions indicate that a laterally-continuous lean silty clay is present at a depth up to approximately 5 feet bgs which is, in turn, underlain by clayey sand and silt and high plasticity clays at greater depths (Golder Associates, 2013).

### 3.3 Hydrogeologic Setting

Information regarding first depth to groundwater and flow direction were researched at the California Water Resources Control Board's website at [https://geotracker.waterboards.ca.gov](https://geotracker.waterboards.ca.gov/). Regionally, the groundwater flow direction is to the southwest in the direction of the San Francisco Bay. Locally, topography slopes southwesterly towards the San Francisco Bay roughly illustrating ground water flow direction. Based on previous subsurface investigations performed for the former White Cap Facility located two parcels to the north at 24493 Clawiter Road, the shallow groundwater has been encountered at approximately 8-15 feet below grade and inferred to flow in the southwest direction with an average horizontal groundwater gradient of 0.004 ft/ft. (Golder Associates 2013). Seasonal variations, hillside runoff, tides, or other factors may influence ground water levels and flow direction.

#### 4.0 HISTORICAL REVIEW

Site historical information was obtained from a review of Sanborn Fire Insurance Maps, United States Geological Survey (U.S.G.S.) Topographic Maps, aerial photographs, Polk and Haines City Directories. In addition, local building department records were also reviewed. The following Sanborn maps, topographic maps, and city directories were reviewed on September 9, 2014, within the libraries maintained by the University of California in Berkeley, California and City of Oakland, in Oakland, California. The aerial photographs were reviewed online within the sites maintained by National Environmental Title Research, LLC, TerraServer, and Google Earth.

**Note:** Copies of supporting aerials, city directories and topographic are not included in the report. The historical references are reviewed within local public libraries and are copyright protected and cannot be reproduced without the consent of the owner. As such, our reports properly cite and reference the historical reference in accordance with ASTM E1527-13/AAI protocols. Any incorporation of these documents without the permission of the owner would be against the law.

In the Hayward Sanborn Fire Insurance Maps of 1888, 1893, 1896, 1903, 1907, 1923, 1948, 1950, 1953, 1956, 1957, and 1966, the subject site and surrounding area falls beyond the area of coverage and no site-specific map is available.

In the topographic maps of 1899 and 1915, the subject site and surrounding area is shown undeveloped. The Southern Pacific Railroad is shown adjacent to the west.

In the topographic maps of 1941, 1942, and 1946, the subject site is shown undeveloped. During this time, bordering the subject site is two non-descript buildings to the north, a non-descript building to the south, Clawiter Road and beyond non-descript buildings to the east, and the Southern Pacific Railroad and beyond undeveloped land to the west.

In the aerial photographs of 1946 and 1958, the subject site appears developed with a portion of a residential dwelling along the northwestern portion of the subject site. During this time, bordering the subject site is what appears to be a residential dwelling and associated farm buildings to the north, what appears to be a commercial building and storage yard to the south, a road and beyond what appears to be multiple farm buildings to the east, and railroad tracks and beyond what appears to be undeveloped land to the west.

In the topographic maps of 1947 and 1950, the subject site is shown undeveloped. During this time, bordering the subject site is an unpaved road and two non-descript buildings to the north, a non-descript building to the south, Clawiter Road and beyond two non-descript buildings to the east, and the Southern Pacific Railroad and beyond undeveloped land to the west.

In the city directories of 1948, 1951, 1956, and 1959, neither the subject site, nor Clawiter Road is listed.

In the topographic map of 1959, the subject site is shown developed with a portion of a structure along the northwestern portion of the subject site. During this time, bordering the subject site is an unpaved road and non-descript building to the north, a non-descript building to the south, Clawiter Road and beyond two non-descript buildings to the east, and the Southern Pacific Railroad and beyond undeveloped land to the west. Highway-17 (Interstate-880) is show nearby to the east.

In the city directories of 1965, the subject site is listed as vacant.

In the aerial photographs of 1966 and 1968, the subject site appears redeveloped with a portion of the current one-story commercial building along the southern portion of the subject site and storage yard along the northern portion of the subject site. During this time, bordering the subject site is what appear to be two commercial buildings and storage yard to the north, what appears to be a commercial building and storage yard to the south, Clawiter Road and beyond what appear to be commercial buildings to the east, and railroad tracks and beyond what appears to be undeveloped land to the west.

In the topographic maps of 1968, 1973, and 1980, the subject site is shown developed with the current commercial building. During this time, bordering the subject site are two non-descript commercial buildings to the north, a non-descript building to the south, Clawiter Road and beyond two non-descript buildings to the east, and the Southern Pacific Railroad and beyond undeveloped land to the west. Highway-92 is shown nearby to the south. Interstate-880 is shown nearby to the east.

In the city directory of 1970, the subject site is listed as Anchor Valve Company.

In the city directory of 1975, the subject site is listed as Anchor Equipment Company and Anchor Valve Company.

In the city directory of 1980, the subject site is listed as Anchor Darling Valve.

In the aerial photograph of 1980, the subject site appears developed with the current one-story warehouse building as it appears today, with additions along the eastern portion of the building, along the southern portion of the subject site and storage yard along the northern portion of the subject site. During this time, bordering the subject site is what appears to be two commercial buildings and a storage yard to the north, what appears to be a commercial building and storage yard to the south, Clawiter Road and beyond what appears to be commercial buildings to the east, and railroad tracks and beyond what appears to be a commercial building and storage yard to the west.

In the city directory of 1984, the subject site is listed as vacant.

In the aerial photograph of 1987, the subject site appears developed with the current one-story warehouse building as it appears today, with additions along the eastern portion of the building, along the southern portion of the subject site and storage yard along the northern portion of the subject site. During this time, bordering the subject site is what appears to be two commercial buildings and a storage yard to the north, what appears to be a commercial building and storage yard to the south, Clawiter Road and beyond what appears to be a commercial building and parcel graded for development to the east, and railroad tracks and beyond what appears to be a commercial building and storage yard to the west.

In the city directories of 1988, 1993, 1998, 2003, 2008, and 2013, the subject site is listed as DW Nicholson Corporation.

In the aerial photographs of 1991, 1993, 2000, 2002, and 2005, the subject site appears developed with the current one-story warehouse building along the southern portion of the subject site and storage yard along the northern portion of the subject site. During this time, bordering the subject site is what appears to be two commercial buildings and a storage yard to the north, what appears to be a commercial building and storage yard to the south, Clawiter Road and beyond what appear to be two commercial buildings to the east, and railroad tracks and beyond what appears to be a commercial building and storage yard to the west.

## 5.0 ENVIRONMENTAL DATABASE REVIEW

### 5.1 Agency Record Review

Environmental Data Resources, Inc. (EDR) was contracted to compile data from available government agency databases on locations of actual and potentially impacted sites within a one-mile radius of the subject property. Copies of the environmental database lists and the location map for the subject site are included in Appendix A.

The results of the database search by EDR revealed 190 mapped sites and 42 unmapped sites within a one-mile radius, of which 72 mapped sites are within a one-eighth mile radius of the subject site. Based on distance from the subject property and regional hydrogeology the following selected site(s) identified by EDR were deemed to have the highest potential to impact the subject site. In addition, a Tier 1 Vapor Encroachment Screen (VES) pursuant to ASTM E2600-10 was performed on the following selected site(s) to assess whether a potential vapor encroachment condition (VEC) exists at the subject property caused by the release of vapors from contaminated soil or groundwater either on or near the subject site.

- **D.W. Nicholson Corporation** – 24747 Clawiter Road, Hayward  
Located along the western portion of the parcel and perceived up/cross gradient to the subject site. Listed on the FINDS, CA FID UST, UST, SWEEPS UST, RCRA-SQG, EMI and HAZNET databases.

According to the information provided by EDR, the subject site is equipped with one 10,000-gallon regular gasoline underground storage tank (UST) and one 6,000-gallon diesel UST installed in 1992. This site has an active air permit from at least 1999 to 2012. This site is listed as manifesting hydrocarbon solvents (benzene, hexane, Stoddard, etc., aqueous solutions with total organic residues less than 10 percent, waste oil and mixed oil, other organic solids, oxygenated solvents (acetone, hexane, ethyl acetate, etc.), unspecified organic liquid mixture, polychlorinated biphenyls and material containing PCBS, other inorganic solid waste, other still bottom waste, off-specification, aged or surplus organics, unspecified oil-containing waste, unspecified solvent mixture, liquids with halogenated compounds  $\geq 1,000\text{Mg/L}$ , from at least 1993 to 2012 (CAL EPA#CAD981367535). No reports of spills or unauthorized releases were reported for this site by EDR. According to the information provided by the CAL EPA DTSC EnviroStor and RWQCB GeoTracker online databases, this site is not listed as an active or inactive leak case.

- **SMA Equipment Co Inc./Nixon-EGLI Equipment Co** – 24701 Clawiter Road, Hayward. Located adjacent to the north and perceived up/cross gradient to the subject site. Listed on the CA FID UST, SWEEPS UST, and HAZNET databases.

According to the information provided by EDR, this site is listed as having a 1,000-gallon gasoline underground storage tank. This site is also listed as manifesting unspecified organic liquid mixture, unspecified oil-containing waste, waste oil and mixed oil, and aqueous solution with total organic residues less than 10 percent from at least 1993 to 2002 (CAL EPA# CAL000229546 and CAD981384125). No reports of spills or unauthorized releases were reported for this site by EDR. According to the information provided by the CAL EPA DTSC EnviroStor and RWQCB GeoTracker online databases, this site is not listed as an active or inactive leak case. Based on this information, the probability of a subsurface environmental impact and/or potential vapor encroachment from this site to the subject site is low.

- **New Performance Automotive** – 24603 Industrial Boulevard, Hayward. Located across Clawiter Road to the east and perceived up/cross gradient to the subject site. Listed on the HAZNET database.

According to the information provided by EDR, this site is listed as manifesting aqueous solution with total organic residues less than 10 percent from at least 1995 to 1998 (CAL EPA # CAL000138325). No reports of spills or unauthorized releases were reported for this site by EDR. According to the information provided by the CAL EPA DTSC EnviroStor and RWQCB GeoTracker online databases, this site is not listed as an active or inactive leak case. Based on this information, the probability of a subsurface environmental impact and/or potential vapor encroachment from this site to the subject site is low.

- **All Tune & Lube/Daniel's All Tune & Lube** – 24609 Industrial Boulevard, Hayward. Located across Clawiter Road to the east and perceived up/cross gradient to the subject site. Listed on the HAZNET database.

According to the information provided by EDR, this site is listed as manifesting aqueous solution with total organic residues less than 10 percent, unspecified oil-containing waste, and unspecified solvent mixture from at least 1995 to 2011 (CAL EPA # CAL000131056, CAL000160123). No reports of spills or unauthorized releases were reported for this site by EDR. According to the information provided by the CAL EPA DTSC EnviroStor and RWQCB GeoTracker online databases, this site is not listed as an active or inactive leak case. Based on this information, the probability of a subsurface environmental impact and/or potential vapor encroachment from this site to the subject site is low.

- **Collision Doctor Auto Body Shop/East Bay Auto Body & Repair Shop Inc./Collision Dr.** – 24625 Industrial Boulevard, Hayward. Located across Clawiter Road to the east and perceived up/cross gradient to the subject site. Listed on the HAZNET database.

According to the information provided by EDR, this site is listed as manifesting unspecified solvent mixture, aqueous solution with totally organic residues 10 percent or more, other organic solids, oxygenated solvents (acetone, butanol, ethyl acetate, etc.), and aqueous solution with total organic residues less than 10 percent from at least 1995 to 2012 (CAL EPA # CAL000339305, CAL000148819, and CAL000319585). No reports of spills or unauthorized releases were reported for this site by EDR. According to the information provided by the CAL EPA DTSC EnviroStor and RWQCB GeoTracker online databases, this site is not listed as an active or inactive leak case. Based on this information, the probability of a subsurface environmental impact and/or potential vapor encroachment from this site to the subject site is low.

- **H & F Properties** – 24641 Industrial Boulevard, Hayward. Located across Clawiter Road to the east and perceived up/cross gradient to the subject site. Listed on the HAZNET database.

According to the information provided by EDR, this site is listed as manifesting unspecified organic liquid mixture in at least 2001 (CAL EPA # CAC002380615). No reports of spills or unauthorized releases were reported for this site by EDR. According to the information provided by the CAL EPA DTSC EnviroStor and RWQCB GeoTracker online databases, this site is not listed as an active or inactive leak case. Based on this information, the probability of a subsurface environmental impact and/or potential vapor encroachment from this site to the subject site is low.

- **Bremco Inc./Epstein Investments/Sierra Pacific Steel/Laidlaw Transit Services Inc./Industrial Passenger Service** – 24785 Clawiter Road, Hayward. Located adjacent to the south and perceived down/cross gradient to the subject site. Listed on the CA FID UST, SWEEPS UST, HAZNET, HIST CORTESE, LUST, and RGA LUST databases.

According to the information provided by EDR, this site is listed as having a 3,000-gallon diesel underground storage tank and 5,000-gallon gasoline underground storage tank. This site is also listed as manifesting waste oil and mixed oil, unspecified organic liquid mixture, organic liquids with metals (alkaline solution (pH  $\geq$ 12.5) with metals), and aqueous solution with total organic residues less than 10 percent from at least 1993 to 2005 (CAL EPA# CAC002587391, CAL000216846, and CAL000108067).

According to Geotracker, the soil was impacted with diesel on February 28, 1992. No remedial action was reported. This site has been considered case closed since October 24, 1996. Based on this information, the probability of a subsurface environmental impact and/or potential vapor encroachment from this site to the subject site is low.

- **Senco Products** – 23783 Eichler Road Unit D, Hayward.  
Located across Southern Pacific Railroad to the west and perceived down/cross gradient to the subject site. Listed on the FINDS, RCRA-SQG, and HAZNET databases.

According to the information provided by EDR, this site is listed as manifesting laboratory waste chemicals, liquids with halogenated organic compounds  $\geq 1,000$  Mg/L, and oxygenated solvents (acetone, butanol, ethyl acetate, etc.) from at least 1993 to 1995 (CAL EPA # CAD981634553). No reports of spills or unauthorized releases were reported for this site by EDR. According to the information provided by the CAL EPA DTSC EnviroStor and RWQCB GeoTracker online databases, this site is not listed as an active or inactive leak case. Based on this information, the probability of a subsurface environmental impact and/or potential vapor encroachment from this site to the subject site is low.

## 5.2 Local Agency File Review

On September 4, 2014, a Basics representative contacted the California EPA - Department of Toxic Substance Control (CAL EPA DTSC) in Berkeley, California, in regards to any information concerning the subject site.

- **24747 Clawiter Road, Hayward**  
The subject site.

No information regarding the subject site was available within the CAL EPA DTSC files or EnviroStor online database. No information regarding hazardous materials, underground storage tanks or unauthorized releases was available for the subject site.

On September 4, 2014, a Basics representative contacted the Regional Water Quality Control Board (RWQCB) in Oakland, California, in regards to any information concerning the subject site.

- **24747 Clawiter Road, Hayward**  
The subject site.

No information regarding the subject site was available within the RWQCB files or Geotracker online database. No information regarding hazardous materials, underground storage tanks or unauthorized releases was available for the subject site.

On September 4, 2014, a Basics representative contacted the Alameda County Water District (ACWD) in Fremont, California, in regards to any information concerning the subject site.

- **24747 Clawiter Road, Hayward**  
The subject site.

No information regarding the subject site was available within the ACWD files. No information regarding hazardous materials, underground storage tanks or unauthorized releases was available for the subject site.

On September 4, 2014, a Basics representative contacted the Alameda County Department of Environmental Health Services (ACDEHS) in Alameda, California, in regards to any information concerning the subject site:

- **24747 Clawiter Road, Hayward**

The subject site.

No information regarding the subject site was available within the ACDEHS files and Local Oversight Program online database. No information regarding hazardous materials, underground storage tanks or unauthorized releases was available for the subject site.

On September 10, 2014, a Basics representative reviewed the files maintained by the City of Hayward Fire Prevention Bureau (HFPB) in Hayward, California, in regards to any information concerning the subject site:

- **24747 Clawiter Road, Hayward**  
The subject site.

Information from the HFPB files revealed two files for the subject site:

D W Nicholson Corporation

CUPA Permits issued to D W Nicholson between 1985 and 2013.

Permits to install one 6,000-gallon diesel and one 10,000-gallon gasoline underground storage tanks were issued in 1985.

Underground storage tank permits, inspections, and tank tightness testing for the underground storage tanks testing tight from 1985 to 2013.

*D W Nicholson Corporation Hazardous Materials Inspection and Inventory (1991):*

Stock/Supplies Room:

2 x welding carts oxygen/acetylene  
5 x small cylinders of acetylene for use in field  
10 x 1-gallon containers of assorted coatings – paint, epoxy, enamel  
5 x 1.5-gallon container polyurethane sealant  
Multiple aerosol spray cans

Machine Shop next to stock room:

1 x parts washer  
4 x 1-gallon coatings and thinners

Outside stock room:

Gas cylinders  
15 x 25—cubic feet oxygen  
2 x 250-cubic feet oxygen empty  
6 x 500-cubic feet acetylene  
1 x 500-cubic feet acetylene empty  
6 x 250-cubic feet acetylene

Outside:

1 x 55-gallon metal drum no label, possible waste paint  
1 x 30-gallon metal drum no label  
1 x 20-foot shipping container labeled “flammable” contains 4 x 55-gallon oils with dispensing pumps, empty metal and plastic buckets, assortment of 5-gallon and 1 –gallon containers of oils/solvents and safety gas cans, 5 – gallon cap.  
1 x 6,000-gallon UST  
1 x 10,000-gallon UST  
1 x 500- gallon liquid petroleum gas tank  
13 propane cylinders

Automotive/Mechanical Shop:

1 x 400-gallon waste oil tank  
1 x 55-gallon drum oil/water  
1 x parts washer  
1 x welding cart  
2 x 55-gallon drums oils  
1 x 400-gallon bulk storage oil

Fabricating/Assembly Plant:  
Welding and punching operations  
15 x welding cart

1 x Pallet flammable materials:  
25 x 5-gallon primer  
15 x 5-gallon other liquids  
1 x spray gun  
1 x 55-gallon waste paint/thinner  
12 x cylinders of carbon dioxide

Backyard:  
1 x 20 foot container labeled flammable contains approximately 150-gallons of paints/  
thinners  
3 x 55-gallon empty drums  
Assorted 1-gallon and 5-gallon containers

*D W Nicholson Corporation Hazardous Materials Inventories (1985-2012):*

1 x 6,000-gallon underground storage tank of diesel (1985-Present)  
1 x 10,000-gallon underground storage tank of unleaded gasoline (1985-Present)  
1 x 2,180-pound above ground storage tank of propane (1987-Present)  
8 x 5-gallon can of paints and related solvent (1993)  
5 x 1-gallon container of anti-freeze (1993)  
1 x 55-gallon drum paint sludge (1993)  
8 x 250-cubic feet cylinder of compressed oxygen (1993)  
8 x 350-cubic feet cylinder of acetylene (1993)  
1 x 30-gallon steel drum solvent (1993)  
3 x 380-cubic feet cylinder of carbon dioxide/argon mixture (1993)  
1 x 400-gallon above ground tank of motor oil (1993-January 1998)  
1 x 55-gallon drum of toluene (1993-2004)  
1 x 5-gallon can of industrial coating paint (1997-2004)  
1 x 270-cubic feet of carbon dioxide/argon mixture (1997-2004)  
1 x 55-gallon drum of solvent (1997-2004)  
7 x 285-cubic feet compressed oxygen (1997-2004)  
2 x 150-pounds of acetylene (1997-2004)  
1 x 55-gallon drum of anti-freeze (1997 - Present)  
1 x 110-gallon above ground storage tank of motor oil (1997 - Present)  
11 x 23-pound cylinder of acetylene (January 1998)  
1 x 20-gallon steel drum of solvent (January 1998)  
1 x 55-gallon drum of motor oil (January 1998-2004)  
2 x 150-pounds cylinder acetylene (March 1998)  
1 x 55-gallon drum auto transmission fluid (2005-Present)  
1 x 55-gallon drum hydraulic oil (2005- Present)

1 x 55-gallon drum floor sweep (2012)

*D W Nicholson Corporation Hazardous Waste Inventories (1993-Present)*

1 x 55-gallon drum waste oil (1993-Present)

1 x 55-gallon drum waste anti-freeze (1993 – Present)

1 x 55-gallon drum waste oil filters (2005-Present)

An inspection on September 9, 1998, stated labeling and secondary containment needed for all hazardous materials. Subsequent inspections have shown no major spills or violations.

Installation of new piping, new piping sumps, and UDC issued in 2003.

According to a soil sample report of 2003, collection of environmental samples from beneath existing dispenser locations on fuel island concurrent with piping upgrade/modification project.

After breakout and removal of existing concrete fuel island, followed by the excavation of san backfill from around existing concrete containment sumps and 3 inch diameter fiberglass containment piping for two inch diameter steel product and vapor recovery pipelines located beneath fuel dispensers, that upon inspection of same a very faint fuel odor was present however, no holes or failure points were found, nor any indication or evidence of soil contamination observed or discovered.

Three soil samples were taken. Sample #1 was obtained from approximately three feet below grade from soil lying below former concrete containment sump and double-contained product pipeline beneath diesel dispenser location. Sample #2 was obtained from approximately three feet below grade from soil lying below former concrete containment sump and double contained product and vapor recovery pipelines beneath unleaded dispenser location. Sample #3 was collected from stockpiled sand backfill removed from around former concrete containment sumps and three inch fiberglass containment piping beneath both dispenser locations.

Diesel and BTEX was non-detect in sample #1, MTBE was found in Sample #2 at 0.026 mg/kg.

Sprint Nextel

CUPA Permits were issued for a Sprint Nextel Cell Site from 2004-2011.

Inspections for the Nextel Cell Site revealed four trays of lead battery gel cells. Exempt from having a hazardous materials business plan.

A facility closure notification form issued for the Nextel Cell Site in 2013.

According to Hugh Murphy of Hayward Fire, California CUPAs now utilize the California Environmental Reporting System (CERS) to document current Hazardous Materials Business Plans and Tank Monitoring information. At this time, the most recent information is not easily ascertainable from the CERS online database for consultants.

No additional information regarding hazardous materials, underground storage tanks or unauthorized releases was available for the subject site.

On September 4, 2014, a Basics representative contacted the City of Hayward Building Department (HBD) in Hayward, California, in regards to any information concerning the subject site:

- **24747 Clawiter Road, Hayward**  
The subject site.

Discussions with a site representative with the HBD indicated the file review request for the subject site would take as long as 30 days. As such, this information was not reasonably ascertainable within the time frame of this report, thus representing a “data gap.” Based on the findings of our investigation, it is our opinion that this data gap does not appear significant at this time. However, if information regarding the subject site, if any, becomes available for review, a follow up file review should be conducted.

## 6.0 CONCLUSIONS AND RECOMMENDATIONS

### 6.1 Conclusions

These conclusions are based on the data collected during performance of this ESA and are therefore subject to the time limitations associated with accessing governmental and site data. The purpose of this assessment was to evaluate the likelihood of soil and ground water degradation as a result of the use, storage, treatment, and/or disposal of hazardous materials/waste on the subject site and sites located within a one-mile radius. Findings are based on a geological and hydrogeological information study, and an evaluation of historical and present property use (historical resource review, regulatory agency database and file review, personal interviews and site reconnaissance study).

#### 6.1.1 Data Gaps

A data gap is the failure to obtain information required by the standard despite good faith efforts by the environmental professional to gather the information. During the course of this assessment the following data gaps were identified:

- (1) Discussions with a site representative with the HBD indicated the file review request for the subject site would take as long as 30 days. As such, this information was not reasonably ascertainable within the time frame of this report, thus representing a “data gap.” Based on the findings of our investigation, it is our opinion that this data gap does not appear significant at this time. However, if information regarding the subject site, if any, becomes available for review, a follow up file review should be conducted.

#### 6.1.2 Environmental Issues/*De Minimus* Conditions

*De Minimis* Conditions are defined by the ASTM Standard Practice E1527-13 as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. On the basis of the information compiled and reviewed by Basics, our findings indicate the following *de minimus* conditions:

- (1) By 1946, the subject site appears developed with a portion of residential dwelling along the northwestern portion of the subject site. Prior to this time, the subject site appeared to be undeveloped.

The use as residential during this time frame does not have an obvious high potential business activity indicative to the storage, treatment or disposal of hazardous or potentially toxic materials. In addition, no information regarding the use of hazardous materials was uncovered during this time frame within the scope of work performed.

- (2) Sometime between 1966 and 1968, the subject site appears developed with a portion of the subject site warehouse. Prior to this time, the subject site appears undeveloped.

By 1980, the office portion of the building along the eastern side of the building has been developed.

Based on historical references reviewed, the subject site has been occupied by Anchor Valve Company (1970-1980), Anchor Equipment Company (1975), D W Nicholson Corporation (1984-Present), and Nextel (2004-2103).

#### Anchor Valve Company/Anchor Equipment Company (1970s - 1980s)

According to a google search, Anchor Valve Company specialized in nuclear valve manufacturing. The prior use as nuclear valve manufacturing facility has a high potential for business activities indicative to the use, storage and/or treatment of hazardous materials. However, no information regarding the use of hazardous materials as part of tractor sales and service operations was uncovered within the local regulatory agency files reviewed. See Section 6.1.3 - Recognized Environmental Conditions (RECs) below.

#### D W Nicholson Corporation (1984-Present)

D W Nicholson Corporation is a fabricator of rigging machinery, material handling equipment, piping, and structural framing and electrical contractor. As part of onsite operations appreciable amounts of hazardous materials as well as underground fuel storage tanks are utilized onsite. See Section 6.1.3 - Recognized Environmental Conditions (RECs) below.

#### Nextel (2004 – 2013)

Nextel utilized the subject site a cellular antennae. Four trays of lead battery gel cells were utilized as part of cellular operations. The amount of batteries was reported as exempt from having a hazardous materials business plan.

A notification for closure was issued to Nextel in 2013. Hazardous materials (i.e. back up batteries for generators) were most likely utilized as part the cell antennae operations. These materials are typically below the threshold requiring a permit.

Because ultimately it remains the user who accepts the liability for having entered into a chain of title, it remains important that the user recognize that the “risk tolerance” of a regulatory agency could change, as could be the case if information is later uncovered to suggest that the *de minimus* conditions (i.e., those that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies) are of greater significance than once thought. In addition, no compelling evidence was discovered that a hazardous substance has been released from its operation onto (or into) the surface.

### 6.1.3 Recognized Environmental Conditions (RECs)

Recognized Environmental Conditions (RECs) are defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. Based on the findings of our investigation, it is our opinion that there are apparent obvious RECs on site that warrant further investigation or documentation at this time.

- (1) Perform environmental baseline sampling to assess potential subsurface environmental impacts from the past and present use of hazardous materials onsite.

Sometime between 1966 and 1968, the subject site appears developed with a portion of the subject site warehouse. Prior to this time, the subject site appears undeveloped.

By 1980, the office portion of the building along the eastern side of the building has been developed.

Based on historical references reviewed, the subject site has been occupied by Anchor Valve Company (1970-1980), Anchor Equipment Company (1975), D W Nicholson Corporation (1984-Present), and Nextel (2004-2103).

Areas of concern include the following:

#### Underground Fuel Storage Tanks

As a part of gasoline/diesel fuel station operations, one 12,000-gallon gasoline UST, two 10,000-gallon gasoline USTs, and one 6,000-gallon diesel UST have been in use at the subject site since 1985.

**Note:** The current underground storage tanks appear to be in compliance with all current state requirements pertaining to tank and equipment testing. In addition, the underground storage tanks and monitoring systems have tested tight and no reports of major violations, spills or unauthorized releases in regards to the operation of the underground storage tanks were noted within the local regulatory enforcing agency files reviewed.

According to a soil sample report of 2003, soil samples were collected from beneath the existing dispenser locations during a piping upgrade/modification project.

Three soil samples were taken. Sample #1 was obtained from approximately three feet below grade from soil lying below former concrete containment sump and double-contained product pipeline beneath diesel dispenser location. Sample #2 was obtained from approximately three feet below grade from soil lying below former concrete containment sump and double contained product and vapor recovery pipelines beneath unleaded dispenser location. Sample #3 was collected from stockpiled sand backfill removed from around former concrete containment sumps and three inch fiberglass containment piping beneath both dispenser locations.

The soil samples were analyzed for total petroleum hydrocarbons as gasoline, diesel and its constituents (MTBEX). MTBE was found in Sample #2 at 0.026 mg/kg. No other detectable levels of total petroleum hydrocarbons as gasoline, diesel or its constituents (MTBEX) was detected in the soil samples.

Although, a previous limited subsurface investigation have been conducted at the site, samples were limited to three shallow soil samples collected below the dispensers, piping and sump. In addition, no samples were collected below the underground storage tanks. Furthermore, contamination is not necessarily evenly distributed across the subsurface soil and ground water. Therefore, impacts from underground storage tanks such as this can easily remain undetected.

The subject site is not currently listed as a contaminated facility. However, the use of appreciable amounts of hazardous materials as part of onsite gasoline and diesel dispensing operations for approximately the last 29 years or so has been deemed a “Recognized Environmental Condition” at this time.

#### Fabrication Shop

As part of past nuclear valve manufacturing and present metal fabricating activities appreciable amounts of hazardous materials (heavy metals, lubricating oils, etc.) are utilized within the fabrication shop.

The subject site is not currently listed as a contaminated facility. However, given the documented long history of the site utilizing appreciable amounts of hazardous materials for an extended period of time (1970s-Present) this would represent a “recognized environmental condition” at this time.

#### Equipment Repair Area

As part of the present truck and equipment maintenance and repair activities appreciable amounts of hazardous materials (lubricating oils, paints, antifreeze, solvents etc.) are utilized within the equipment repair area.

The subject site is not currently listed as a contaminated facility. However, given the documented long history of the site utilizing appreciable amounts of hazardous materials for an extended period of time (1985-Present) this would represent a “recognized environmental condition”.

It is conceivable that soil and/or groundwater may have been impacted. Inadvertent discharges of hazardous materials to the subsurface are not always evident. However, the use of (1) appreciable amounts of hazardous materials over an extended period of time; (2) use of an underground hydraulic lifts; and (3) presence of underground storage tanks increases the potential of inadvertent discharges to the subsurface.

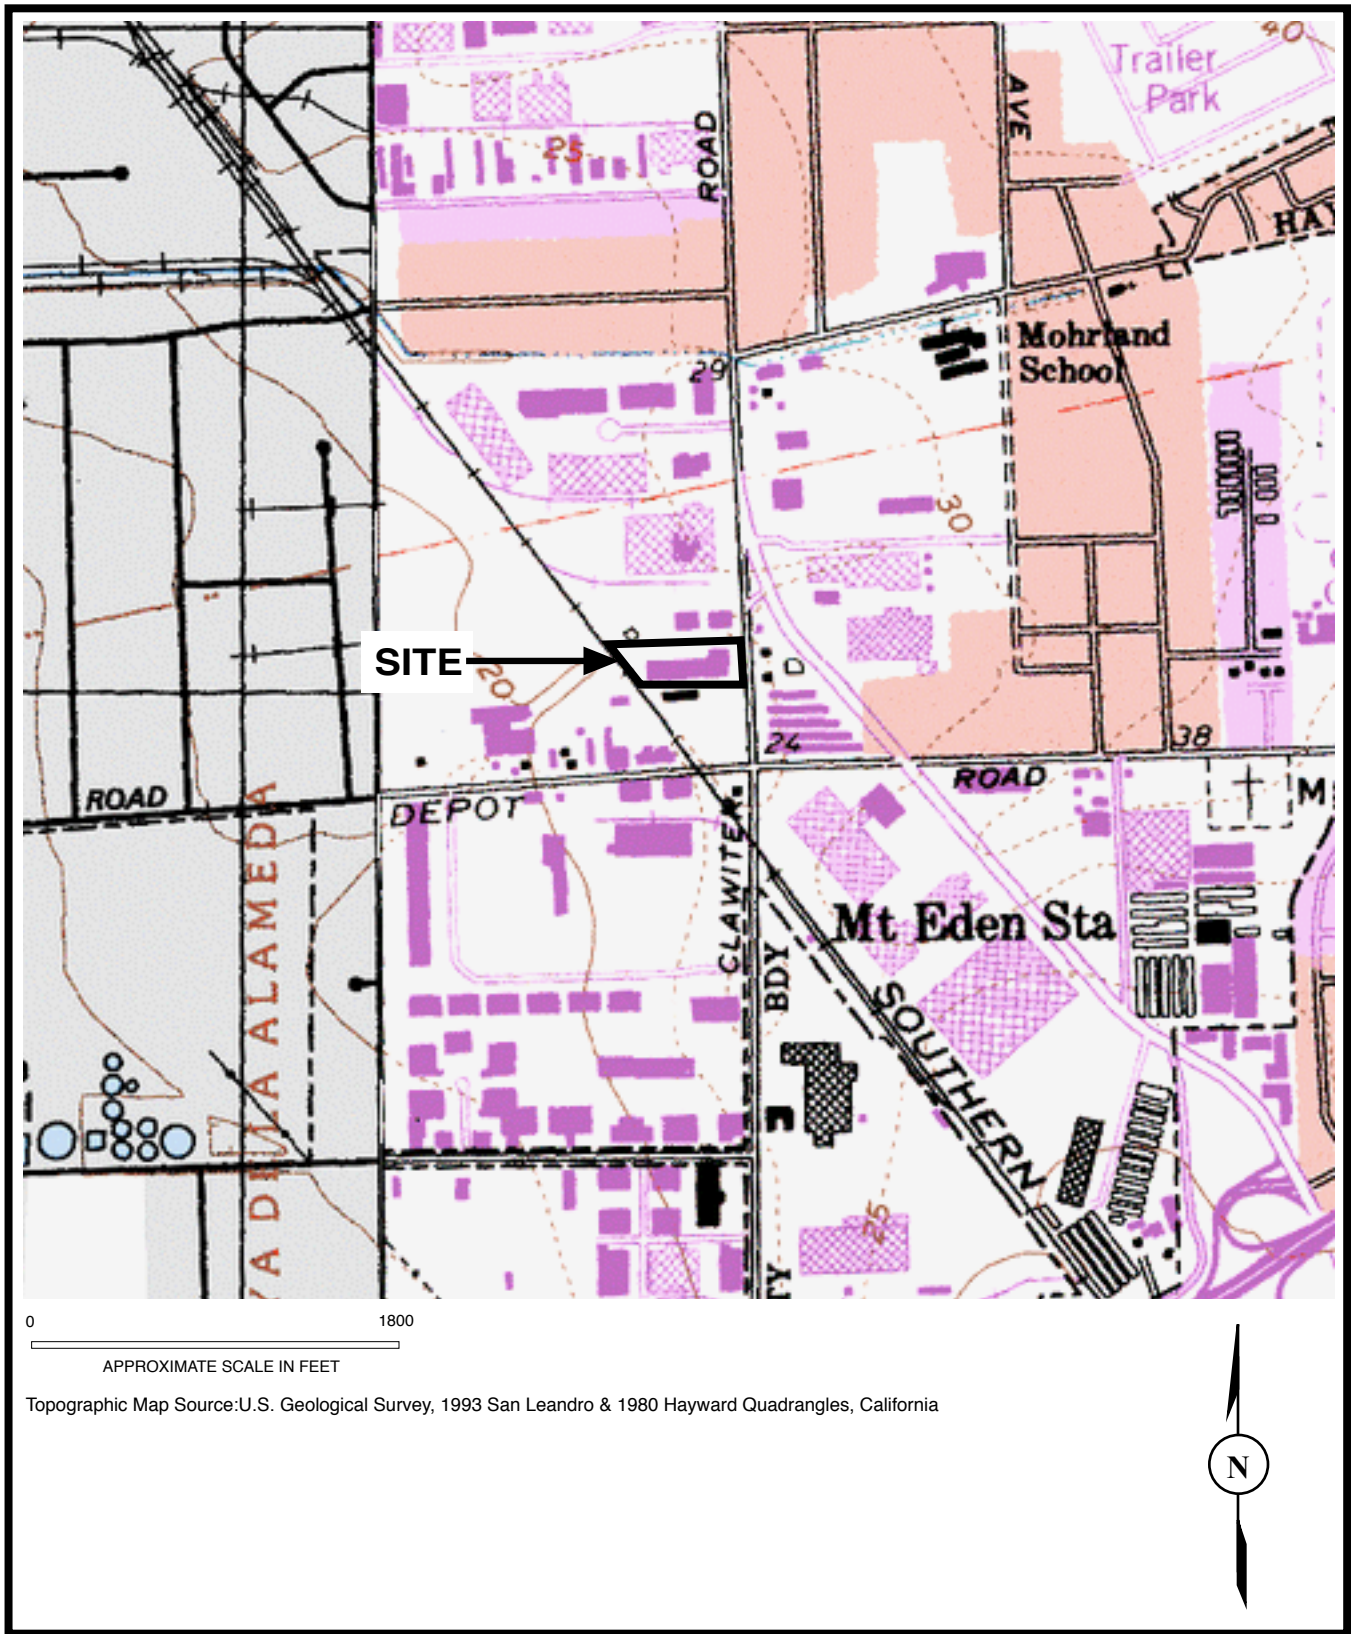

#### 6.1.4 Controlled Recognized Environmental Conditions (CRECs)

Controlled Recognized Environmental Conditions (CRECs) are defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of

required controls. Based on the findings of our investigation, no apparent CRECs were identified onsite.

#### 6.1.5 Historical Recognized Environmental Conditions (HRECs)

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. Based on the findings of our investigation, no apparent HRECs were identified onsite.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal CERCLIS NFRAP site List***

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a

## EXECUTIVE SUMMARY

recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 3 CERC-NFRAP sites within approximately 0.5 miles of the target property.

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 13 RCRA-SQG sites within approximately 0.25 miles of the target property.

### **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 06/05/2014 has revealed that there are 16 ENVIROSTOR sites within approximately 1 mile of the target property.

### **State and tribal leaking storage tank lists**

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 07/30/2014 has revealed that there are 40 LUST sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

Alameda County CS: A listing of contaminated sites overseen by the Toxic Release Program (oil and groundwater contamination from chemical releases and spills) and the Leaking Underground Storage Tank Program (soil and ground water contamination from leaking petroleum USTs).

A review of the Alameda County CS list, as provided by EDR, and dated 04/22/2014 has revealed that there are 12 Alameda County CS sites within approximately 0.5 miles of the target property.

### **State and tribal registered storage tank lists**

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 07/30/2014 has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

Notify 65: Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

A review of the Notify 65 list, as provided by EDR, and dated 10/21/1993 has revealed that there are 4 Notify 65 sites within approximately 1 mile of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2012 has revealed that there are 38 HAZNET sites within approximately 0.125 miles of the target property.

### EDR RECOVERED GOVERNMENT ARCHIVES

#### ***Exclusive Recovered Govt. Archives***

RGA LF: The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Resources Recycling and Recovery in California.

A review of the RGA LF list, as provided by EDR, has revealed that there is 1 RGA LF site within approximately 0.5 miles of the target property.

**Handler Activities Summary:**

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: Yes  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Violation Status: No violations found

**FINDS:**

Registry ID: 110002682133

**Environmental Interest/Information System**

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Historical Generators:

Date form received by agency: 08/09/2002  
Site name: CELL GENESYS INC  
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011  
Waste name: SILVER

Waste code: D022  
Waste name: CHLOROFORM

Waste code: F002  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

**Hazardous Waste Summary:**

Waste code: 331  
Waste name: 331

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste code: 214  
Waste name: 214

Waste code: 352  
Waste name: 352

Waste code: 791  
Waste name: 791

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007  
Waste name: CHROMIUM

Waste code: F003  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Potential Media Affected: Under Investigation  
Potential Contaminants of Concern: \* Solvents  
Site History: From 1963 to 1997, White Cap (formerly Continental White Cap) manufactured container closures at 24493 Clawiter Road. The manufactured products consisted of metal caps, typically for glass food and beverage containers. Hazardous materials were managed and released during this period, including paint thinners. The site is currently operated by Con-X-Tech to fabricate structural steel. Areas of soil impact were primarily associated with releases of paint thinners from six underground tanks and a dry sump. Shallow groundwater was impacted in the areas of soil contamination, extending a short distance in the direction of groundwater flow (southwest). Chemicals of concern include xylenes and ethylbenzene. In 1990 and 1991, White Cap removed all six underground tanks and the dry sump from the site and overexcavated contaminated soil. Since 1991, White Cap has operated soil vapor and groundwater extraction and treatment systems. Since 2000, the White Cap has conducted insitu (in-place) bioremediation treatment at various portions of the site. White Cap continues to operate soil vapor and groundwater extraction and treatment systems, along with insitu bioremediation systems, at the release areas on the northern portion of the site. White Cap continues to conduct periodic monitoring at the site. It is expected that these activities will continue until drinking water standards are reestablished in onsite groundwater and Water Board concurrence is provided to terminate treatment and monitoring. Treatment activities are anticipated to be completed in 2011.

Waste code: 731  
Waste name: 731

Waste code: 741  
Waste name: 741

Waste code: 791  
Waste name: 791

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003  
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D004  
Waste name: ARSENIC

Waste code: D005  
Waste name: BARIUM

Waste code: D035  
Waste name: METHYL ETHYL KETONE

Waste code: D039  
Waste name: TETRACHLOROETHYLENE

Waste code: D040  
Waste name: TRICHLOROETHYLENE

Waste code: F001  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F004  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: CRESOLS AND CRESYLIC ACID, AND NITROBENZENE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride, Gasoline  
Site History: The site is located at 3111 Depot Road in Hayward, California, near the intersection of Depot Road and Clawiter Road. Land use in this area is industrial and commercial. A site map is attached. Beginning in 1970, East Bay Oil Company used the site as a distribution facility for various refinery products such as alcohols, ketones, and petroleum distillates. Products were stored at the site in underground storage tanks (USTs) and in 55-gallon drums, and re-packaged into retail-sized containers. Bulk storage of chemical products in USTs was phased out in the 1980s, and re-packaging was almost entirely phased out in the 1990s. All site USTs were removed

during the late 1980s and 1990s. Current operations consist only of the storage and distribution of petroleum products in their original containers and limited ethyl alcohol re-packaging.

Hazardous Waste Summary:

Waste code: D001  
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**EXIDE CORP HAYWARD BRANCH (Continued)**

**1004675705**

Contact country: US  
Contact telephone: (510) 785-5055  
Contact email: Not reported  
EPA Region: 09  
Classification: Small Small Quantity Generator  
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

**Owner/Operator Summary:**

Owner/operator name: EXIDE CORP  
Owner/operator address: 645 PENN ST  
READING, PA 19612  
Owner/operator country: Not reported  
Owner/operator telephone: (510) 785-5055  
Legal status: Private  
Owner/Operator Type: Owner  
Owner/Op start date: Not reported  
Owner/Op end date: Not reported

**Handler Activities Summary:**

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

**Hazardous Waste Summary:**

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008  
Waste name: LEAD

Violation Status: No violations found

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007  
Waste name: CHROMIUM

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Design Flow: 0  
Baseline Flow: 0  
Reclamation: No reclamation requirements associated with this facility.  
POTW: The facility is not a POTW.  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Lead Agency Case Number: RO0002629  
 Latitude: 37.636807  
 Longitude: -122.129648  
 Case Type: Cleanup Program Site  
 Case Worker: MD  
 Local Agency: ALAMEDA COUNTY LOP  
 RB Case Number: NA  
 File Location: Stored electronically as an E-file  
 Potential Media Affected: Under Investigation  
 Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating  
 Site History: A site inspection found a number of improperly stored 55-gallon drums of waste oil and smaller waste containers with evident surface spillage. Three USTs were also located and removed; confirmation soil samples do not appear to have been collected / submitted. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: <http://ehgis.acgov.org/dehpublic/dehpublic.jsp>.

Registry ID: 110002654949

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Baseline Flow: 0  
Reclamation: Not reported  
POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 Design Flow: 0  
 Baseline Flow: 0  
 Reclamation: No reclamation requirements associated with this facility.  
 POTW: The facility is not a POTW.  
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste code: 791  
Waste name: 791

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003  
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D006  
Waste name: CADMIUM

Waste code: F006  
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

**FINDS:**

Registry ID: 110055719003

Environmental Interest/Information System  
Registry ID: 110000861381

**Environmental Interest/Information System**

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**HAZARDOUS WASTE BIENNIAL REPORTER**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

cubic yards of soil. Soil containing diesel and motor oil at concentrations above site cleanup goals will be excavated and disposed offsite to protect the groundwater. Soil containing tetrachloroethene and 1,4-dioxane in soil gas at concentrations above site cleanup goals will be excavated and disposed offsite to protect the indoor air of future residents. The excavated soil will be transported to a licensed disposal facility. A land use restriction will be recorded to prevent future use of the shallow groundwater containing low levels of volatile organic compounds until drinking water standards are achieved.

Completed Document Type: Long Term Monitoring Report  
Completed Date: 10/01/2007  
Comments: No problems noted; results similar to previous sampling results.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Long Term Monitoring Report  
Completed Date: 11/20/2007  
Comments: MW-1, MW-3 and MW-4 have been damaged and need to be replaced. MW-2 and MW-5 are intact and will be sampled in December 2007. They will measure the depth to the bottom of the MW-2 and MW-5 to ensure that they were not impacted by ongoing redevelopment activities at the Site. The well casing in MW-2 appears to have been lowered. However, the top of casing has been resurveyed. Final grade should be achieved (barring significant rain) along North Lane and the curbs and gutters installed by the end of December 2007. Because the majority of redevelopment work affecting the soil at the Site should be completed by the end of December 2007, the damaged wells shall be replaced in early January 2007 to minimize the potential for subsequent damage to the wells.

wells in the next quarter.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Long Term Monitoring Report  
Completed Date: 09/16/2008  
Comments: Consultant indicated that they reanalyzed the groundwater flow direction input parameters for 1Q08 and concluded that the top of casing elevation data for MW-5 was probably erroneous. The top of casing elevation was reported as 40.452 feet above mean sea level at MW-5 during the 1Q08. Without any changes to this well, it was resurveyed as 38.930 feet above mean sea level during 2Q08. Therefore, it is likely that the top of casing elevation of MW-5 was altered during the installation of a sidewalk and they were not notified of this change. The potentially incorrect elevation data for MW-5 resulted in the groundwater flow direction being depicted to the east instead of the west.

Completed Area Name: PROJECT WIDE

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The

Alternate Address: 1525 WEST WINTON AVENUE  
Alternate City,St,Zip: HAYWARD, CA 94545  
Background Info: \*\*\* SITE SPECIFIC DESCRIPTION \*\*\* Hayward Air National Guard Station (HANGS) is located on a portion of the former Hayward Army Airfield (HAA). The HAA came into operation in the early 1940s, with the entry of the United States into World War II. The HANGS consists of numerous buildings that house office, vehicles, and equipment. The areas surrounding the buildings generally consist of paved parking and unimproved land. Activities resulting in the generation of hazardous materials at HANGS have included maintenance of aircraft, vehicles, and aerospace ground equipment, activities related to the application of pesticides, leaks from electrical equipment, and non-destructive inspection testing. \*\*\* OPERABLE UNIT/SITE DESCRIPTIONS \*\*\* IRP04 - Leaking Vehicle Maintenance Underground Storage Tank (UST); COCs: metals, pesticides, TPH, PCBs, dioxins/furans, SVOCs, VOCs. IRP05 - Abandoned Jet Fuel USTs; COCs: metals, pesticides, TPH, PCBs, dioxins/furans, SVOCs, VOCs. IRP06 - Area D - Former Aircraft Wash Rack; COCs: metals, pesticides, TPH, PCBs, dioxins/furans, SVOCs, VOCs. IRP07 - Area E - Former Aircraft Parking Apron; COCs: TPH, SVOCs. IRP08 - Area F - Former Petroleum, Oil, and Lubricants facility; COCs: TPH, SVOCs. IRP09 - Area G - Equipment Maintenance Area; COCs: metals, TPH, SVOCs. AREAH - Area H - Southwest Corner of Station; COCs: metals, pesticides, TPH, PCBs, SVOCs. AREAI - West Side of Hangar; COCs: TPH, PCBs. IRP10 - Area J - Former Transformer Location J; COCs: TPH, PCBs. IRP11 - Area K - Former Transformer Location K; COCs: TPH, PCBs. AREAL - Area L - Former Transformer Location L; COCs: TPH, PCBs. AREAM - Area M - Former Transformer Location M; COCs: TPH, PCBs. AREAN - Area N - Former Transformer Location N; COCs: TPH, PCBs. SD - Storm Drains; COCs, metals, SVOCs. \*\*\* COMMITMENT DESCRIPTION \*\*\* BASWD - Basewide activity means it covers the area currently under control of Hayward Air National Guard.

Completed Date: 06/29/2010  
Comments: DTSC supports the City of Hayward 's efforts to reuse the HANGS site,

MAP FINDINGS

**USANG CA HAYWARD BASE (Continued)**

**1000435174**

but is concerned the ANG's environmental remediation activities may stall should the proposed lease termination take place. Such has been the case with the northern portion of AOC G and Fire Practice Area 3. The ANG and USACE need to provide legal assurances the ANG will complete all environmental investigations (including sites the ANG has not designated as "ERP") once the lease has been terminated. The EA relies upon the EBS-2 findings to conclude the HANGS closure and partial lease termination would not have a significant impact on the quality of the human or natural environment or generate significant controversy. The EBS-2, in turn, relies upon the 2004 EBS (EBS-1) as a primary source of documentation. DTSC provided comments on the EBS-1 by letter dated September 17, 2004, but has not received a reply from the ANG. DTSC determined the ANG addressed several DTSC comments in the revised EBS-2, but left other issues unresolved. In some cases, the ANG simply deleted any reference to the issue DTSC commented on.

Completed Area Name: Former UST Sites  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Monitoring Report  
 Completed Date: 08/14/2008  
 Comments: Further investigation, including a revised site-wide groundwater monitoring plan, is needed.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Remedial Investigation Workplan  
 Completed Date: 10/06/2009  
 Comments: DTSC concurred on the proposed workplan, but did identify the need to address the three Fire Training Areas. We also request additional insight into DoD activities on this property prior to ANG operations.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Remedial Investigation Workplan  
 Completed Date: 04/05/2010  
 Comments: Since DTSC has not received a comprehensive data package, it is unknown whether the scope of work outlined in the Work Plan is adequate to complete the remedial investigation. Further, DTSC understands current funding constraints necessarily limit the scope and nature of the proposed investigation. Nonetheless, DTSC agrees the investigation proposed in the Work Plan will further advance our understanding of site conditions, and recommends several changes to the Work Plan.

Completed Area Name: Transfer Parcels  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Reuse NEPA  
 Completed Date: 09/23/2010  
 Comments: DTSC provided comments on the Draft EA, the EBS-2, and the HRR by letter dated June 29, 2010. Since the ANG neither addressed DTSC's concerns in the EA nor provided a response to DTSC's comments, the issues remain unresolved. DTSC is working with the ANG Environmental Restoration Program to resolve all concerns, including those presented in DTSC's June 29 letter, prior to adopting a final remedy for HANGS.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation Report  
Completed Date: 02/10/2012  
Comments: This RIA Report summarizes activities implemented to characterize subsurface conditions, including the results of soil and screening-level groundwater samples collected, and groundwater monitoring conducted at the Station from October 2009 through January 2011. Based on the information provided in this RIA Report, it concluded that ERP Sites 1, 4, 5, 6, and 7, and AOCs F, H, I, J, K, L, M, and N have been adequately characterized for RI purposes.

**USANG CA HAYWARD BASE (Continued)**

**1000435174**

Comments: This Proposed Plan (PP) identifies the preferred alternatives for cleaning up the environmental contamination in Station-wide soil and groundwater. The ANG is required under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 117(a) to issue this PP and seek public comment and participation under Section 300.430(f)(2) of the National Oil and Hazardous Substances Pollution Contingency Plan. The preferred remedy for soil is soil excavation to achieve conditions suitable for commercial/industrial property use. The preferred remedy for groundwater is chemical oxidation injection with enhanced attenuation. Not reported

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Record of Decision

Completed Date: 12/31/2012

Comments: This Record of Decision (ROD) presents the selected response actions (RAs) for ERP Sites 1, 4, 5, 6, 7 and AOCs F, H, I, J, K, L, M, N, O, Building 8, Base Exchange UST, and Boiler House UST located at the Hayward ANG Station, in Hayward, California. The selected RA for soils is a combination of soil excavation with off-site disposal and institutional controls (if needed). The selected RA for groundwater includes injection of chemical oxidants into the shallow groundwater aquifer in targeted hot-spot areas to reduce residual sorbed concentrations, combined with injection of oxygen releasing compound over the broader impacted area to enhance ongoing aerobic biological degradation of the TPH compounds in situ.

Comments: Field work is complete. DTSC expect RDIP the first week of October 2013.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Feasibility Study Report  
Completed Date: 02/10/2012  
Comments: The purpose of the FFS is to present and document the process used to assess potential remedial technologies for treating contaminants of concern in soil and groundwater at the Station. The preferred soil remedy, Alternative 3, Excavation to Commercial Standards, will remove soil with concentrations that exceed RBALs for commercial/industrial land use or that pose a risk to groundwater. In addition, a Land Use Covenant would be established, allowing site development for commercial/industrial use. The preferred groundwater remedy is Alternative B combined with longterm monitoring.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Well Installation Workplan  
Completed Date: 03/10/2011  
Comments: DTSC comments on the Final Hydrant System Infrastructure Remedial Action and Soil and Groundwater Data Gap Investigation Workplan will be addressed in the RI Report.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Public Participation Plan / Community Relations Plan  
Completed Date: 02/10/2012  
Comments: This CIP is designed to facilitate two-way communication between the ANG and the communities surrounding the Station regarding its environmental cleanup program. The 162nd CCG will utilize the community involvement activities outlined in this plan to keep residents informed of environmental conditions on site and to provide the opportunity for public involvement.

Comments: From the Executive Summary: The 216th EIS and the 234th CCSQ have used hazardous materials and generated small amounts of wastes in mission-oriented operations and maintenance at the Station since 1982. Operations that have involved the use of hazardous materials and the disposal of hazardous wastes include vehicle maintenance and maintenance of aerospace ground equipment (AGE). The hazardous wastes disposed of through these operations include varying quantities of fuels, acids, paints, thinners, strippers, solvents, and oils. The field surveys and interviews resulted in three sites being identified that exhibit the potential for contaminant presence and migration. It has been concluded there are three sites where a potential for contaminant presence exists. These are as follows: Site No. 1 - FTA at City Fire Station (HAS - 84); Site No. 2 - FTA at the Industrial Park (HAS - 84); Site No. 3 - FTA at End of Runway (HAS - 75). Further work under the IRP is recommended for the three identified sites to determine the presence or absence of contamination.

Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 02/01/1994  
Comments: From the Report Abstract: A wastewater characterization survey was conducted at Hayward ANG, California, from 29 March - 7 April 1993 by personnel from the Water Quality Branch of Armstrong Laboratory. The purpose of the survey was to identify and characterize the wastewater, analyze sediments from oil/water separators for hazardous waste characteristics, and perform dye studies at the Vehicle Maintenance Battery shop and washrack. During the period of the survey, the station's discharge to the city of Hayward had significant levels of chloroform and 1,4-dichlorobenzene. With the exception of chloroform and 1,4-dichlorobenzene, all quantifiable levels of pollutants discharged to the city of Hayward were below the maximum discharge requirements.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Environmental Baseline Survey  
Completed Date: 06/29/2010  
Comments: DTSC supports the City of Hayward 's efforts to reuse the HANGS site, but is concerned the ANG's environmental remediation activities may stall should the proposed lease termination take place. Such has been the case with the northern portion of AOC G and Fire Practice Area 3. The ANG and USACE need to provide legal assurances the ANG will complete all environmental investigations (including sites the ANG has not designated as "ERP") once the lease has been terminated. The EA relies upon the EBS-2 findings to conclude the HANGS closure and partial lease termination would not have a significant impact on the quality of the human or natural environment or generate significant controversy. The EBS-2, in turn, relies upon the 2004 EBS (EBS-1) as a primary source of documentation. DTSC provided comments on the EBS-1 by letter dated September 17, 2004, but has not received a reply from the ANG. DTSC determined the ANG addressed several DTSC comments in the revised EBS-2, but left other issues unresolved. In some cases, the ANG simply deleted any reference to the issue DTSC commented on.

Completed Area Name: Former UST Sites  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 08/14/2008  
Comments: Further investigation, including a revised site-wide groundwater monitoring plan, is needed.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation Workplan  
Completed Date: 10/06/2009  
Comments: DTSC concurred on the proposed workplan, but did identify the need to address the three Fire Training Areas. We also request additional insight into DoD activities on this property prior to ANG operations.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation Workplan  
Completed Date: 04/05/2010  
Comments: Since DTSC has not received a comprehensive data package, it is unknown whether the scope of work outlined in the Work Plan is adequate to complete the remedial investigation. Further, DTSC understands current funding constraints necessarily limit the scope and nature of the proposed investigation. Nonetheless, DTSC agrees the investigation proposed in the Work Plan will further advance our understanding of site conditions, and recommends several changes to the Work Plan.

Completed Area Name: Transfer Parcels  
Completed Sub Area Name: Not reported  
Completed Document Type: Reuse NEPA  
Completed Date: 09/23/2010  
Comments: DTSC provided comments on the Draft EA, the EBS-2, and the HRR by letter dated June 29, 2010. Since the ANG neither addressed DTSC's concerns in the EA nor provided a response to DTSC's comments, the

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Proposed Plan  
Completed Date: 02/10/2012  
Comments: This Proposed Plan (PP) identifies the preferred alternatives for cleaning up the environmental contamination in Station-wide soil and groundwater. The ANG is required under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 117(a) to issue this PP and seek public comment and participation under Section 300.430(f)(2) of the National Oil and Hazardous Substances Pollution Contingency Plan. The preferred remedy for soil is soil excavation to achieve conditions suitable for commercial/industrial property use. The preferred remedy for groundwater is chemical oxidation injection with enhanced attenuation.  
Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Record of Decision  
Completed Date: 12/31/2012  
Comments: This Record of Decision (ROD) presents the selected response actions (RAs) for ERP Sites 1, 4, 5, 6, 7 and AOCs F, H, I, J, K, L, M, N, O, Building 8, Base Exchange UST, and Boiler House UST located at the Hayward ANG Station, in Hayward, California. The selected RA for soils is a combination of soil excavation with off-site disposal and institutional controls (if needed). The selected RA for groundwater includes injection of chemical oxidants into the shallow groundwater aquifer in targeted hot-spot areas to reduce residual sorbed concentrations, combined with injection of oxygen releasing compound over the broader impacted area to enhance ongoing aerobic biological degradation of the TPH compounds in situ.

Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 11/03/2010  
Comments: DTSC recommends the ANG include the Disturbed Areas, the Farm Buildings, and possibly Revetment 19 in the list of sites ANG has scheduled for a PA/SI in 2011. This PA/SI investigation should include review of the existing analytical data, along with a geophysical survey and soil sampling. Groundwater sampling may also be needed.

**Hazardous Waste Summary:**

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F006

Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

**Biennial Reports:**

Last Biennial Reporting Year: 2013

**Annual Waste Handled:**

Waste code: D001

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Completed Sub Area Name: Not reported  
Completed Document Type: Land Use Restriction - Site Inspection/Visit  
Completed Date: 08/09/2011  
Comments: The Site currently complies with the Land Use Covenant requirements and there was no evidence of any activities prohibited by the Land Use Covenant.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Annual Oversight Cost Estimate  
Completed Date: 09/13/2012  
Comments: Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Annual Oversight Cost Estimate  
Completed Date: 12/18/2013  
Comments: The letter transmits an estimate of DTSC's oversight costs for fiscal year 2013/2014.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Letter - Demand  
Completed Date: 01/24/2012  
Comments: Demand letter #1 re-mailed to Williams.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Supplemental Site Investigation Workplan  
Completed Date: 11/13/2008  
Comments: DTSC approved the Workplan. The supplemental site characterization activities under the Workplan include drilling of five soil borings to 20 feet below ground surface and collection of grab groundwater samples and analysis for metals.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 11/17/2009  
Comments: VOCs and nickel were found in groundwater at concentrations that exceed maximum contaminant levels. Because these contaminants will remain at the site, DTSC will require a land use covenant to restrict the use of groundwater so that it can not be used as a drinking water source.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2013	Source: EPA

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## ***State- and tribal - equivalent CERCLIS***

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 06/05/2014	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 06/06/2014	Telephone: 916-323-3400

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 07/01/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/03/2014	Telephone: 202-566-2777

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **Local Lists of Hazardous waste / Contaminated Sites**

### **US CDL: Clandestine Drug Labs**

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/28/2014	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 06/20/2014	Telephone: 202-307-1000
Date Made Active in Reports: 07/15/2014	Last EDR Contact: 09/03/2014
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/15/2014
	Data Release Frequency: Quarterly

### **HIST CAL-SITES: Calsites Database**

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

### **SCH: School Property Evaluation Program**

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 06/05/2014	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 06/06/2014	Telephone: 916-323-3400

Number of Days to Update: 8	Next Scheduled EDR Contact: 12/15/2014
	Data Release Frequency: Annually

### HIST UST: Hazardous Substance Storage Container Database

The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990	Source: State Water Resources Control Board
Date Data Arrived at EDR: 01/25/1991	Telephone: 916-341-5851
Date Made Active in Reports: 02/12/1991	Last EDR Contact: 07/26/2001
Number of Days to Update: 18	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994	Source: State Water Resources Control Board
Date Data Arrived at EDR: 07/07/2005	Telephone: N/A
Date Made Active in Reports: 08/11/2005	Last EDR Contact: 06/03/2005
Number of Days to Update: 35	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **Local Land Records**

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

## DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/11/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/13/2014	Telephone: (415) 495-8895

Next Scheduled EDR Contact: 09/22/2014  
Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 12/10/2010	Telephone: 202-564-4203
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 07/22/2014
Number of Days to Update: 77	Next Scheduled EDR Contact: 11/10/2014
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 05/06/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/16/2014	Telephone: 202-564-5088
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 10/09/2014
Number of Days to Update: 32	Next Scheduled EDR Contact: 10/27/2014
	Data Release Frequency: Quarterly

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 06/01/2013	Source: EPA
Date Data Arrived at EDR: 07/17/2013	Telephone: 202-566-0500
Date Made Active in Reports: 11/01/2013	Last EDR Contact: 07/18/2014
Number of Days to Update: 107	Next Scheduled EDR Contact: 10/27/2014
	Data Release Frequency: Annually

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 07/22/2013	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 08/02/2013	Telephone: 301-415-7169

Number of Days to Update: 91	Next Scheduled EDR Contact: 09/22/2014
	Data Release Frequency: Quarterly

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/07/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/10/2014	Telephone: 202-343-9775
Date Made Active in Reports: 07/28/2014	Last EDR Contact: 07/10/2014
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/20/2014
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 11/18/2013	Source: EPA
Date Data Arrived at EDR: 02/27/2014	Telephone: (415) 947-8000
Date Made Active in Reports: 03/12/2014	Last EDR Contact: 06/13/2014
Number of Days to Update: 13	Next Scheduled EDR Contact: 09/22/2014
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/2012	Source: California Environmental Protection Agency

	Data Release Frequency: Varies

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 11/11/2011	Source: Environmental Protection Agency

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013  
Date Data Arrived at EDR: 08/19/2013  
Date Made Active in Reports: 10/03/2013  
Number of Days to Update: 45

Source: Department of Energy & Environmental Protection

## WI MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2013

Date Data Arrived at EDR: 06/20/2014

Date Made Active in Reports: 08/07/2014

Number of Days to Update: 48

Source: Department of Natural Resources

Telephone: N/A

Last EDR Contact: 06/16/2014

Next Scheduled EDR Contact: 09/29/2014

Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.
