Report 0735.R1

Mr. Scott Williams
Patriot Environmental Services
255 Parr Boulevard
Richmond, CA 94801

SUBJECT: UST REMOVAL REPORT
3900 Adeline Street
Oakland, California

Dear Mr. Williams:

P&D Environmental, Inc. (P&D) has prepared this report documenting the removal of one single-walled bare steel 575 gallon capacity underground storage tank (UST) from the subject site. Based on the type of petroleum hydrocarbons detected in soil samples collected from under the former UST and in the soil removed from on top of and around the former UST, the UST formerly contained a diesel-range heating oil. The UST was discovered on November 16, 2015 adjacent to 39th Street and directly beneath a 6-inch diameter East Bay Municipal Utility District (EBMUD) water pipe during landscaping activities for construction of tree wells associated with development of the property, and following the completion of permitting was removed from the site on November 25, 2015.

A Site Location Map (Figure 1), a Site Plan Aerial Photograph showing the UST location, and a Site Plan Detail showing the former UST and soil sample collection location (Figure 3) are attached with this report. All work was performed under the direct supervision of a California professional geologist.

FIELD ACTIVITIES

Prior to UST removal activities, P&D personnel obtained an UST closure permit from the Alameda County Department of Environmental Health (ACDEH), and personnel from Patriot Environmental Services, Inc. (Patriot) of Richmond, California obtained a building permit for removal of the UST from the City of Emeryville. A copy of the ACDEH UST Closure plan is attached with this report as Appendix A and a copy of the City of Emeryville building permit is attached with this report as Appendix B. Although the UST capacity is identified in the Operating Permit Application in Appendix A as 700 gallons, this capacity was an estimated capacity, and the actual UST capacity was verified based on the UST dimensions obtained on the day that the UST was removed.

Notification to Underground Service Alert for location of underground utilities had been provided prior to discovery of the UST associated with construction for development of the site.

December 10, 2015
Report 0735.R1

The UST was discovered on November 16, 2015 during excavation to a depth of 3.0 feet for construction of a tree well adjacent to 39th Street. No piping was discovered associated with the UST. Rainwater associated with a precipitation event during the weekend prior to discovery of the UST had accumulated in a portion of the tree well that had been excavated prior November 16, 2015.

UST Liquid Characterization and Disposal

On November 16, 2015 Patriot personnel removed approximately 30 gallons of petroleum from the UST, and approximately 700 gallons of rainwater that had accumulated in the portion of the tree well prior to November 16, 2015. The liquids were stored in labeled 55-gallon drums at the site pending appropriate disposal.

Samples of the liquids in the drums were collected by P&D personnel and were delivered to Seaport Refining & Environmental (Seaport), of Redwood City, California for in-house analysis to determine if the liquids met facility acceptance criteria. Based on the in-house analysis of the liquid samples, Seaport approved the drummed rainwater for disposal at their Redwood City facility. The drummed rainwater was subsequently pumped from the drums into a truck and disposed of at the Seaport facility in Redwood City on November 25, 2015. A copy of the Non-Hazardous Water Transport Form used to transport the rainwater to the Seaport facility is attached with this report as Appendix C

The drum containing petroleum that was pumped from the UST was removed from the site on December 2, 2015 for disposal as oily water at the Crosby & Overton facility in Long Beach, California. A copy of Uniform Hazardous Waste Manifest 014477279 for the disposal of the petroleum that was pumped from the UST with a volume of 50 gallons identified on the manifest is attached with this report as Appendix D.

UST Removal and Soil Sample Collection

On November 17, 2015 soil surrounding the central portion of the UST and the east end of the UST was removed by Patriot and placed into a 20-cubic yard roll off bin pending appropriate disposal. The soil surrounding the west end of the UST was not removed because of the presence of EBMUD water pipes above the west end of the UST. P&D personnel collected one discrete soil sample designated as BIN 1 into a stainless steel tube from the soil in the 20-cubic yard roll off bin on November 17, 2015 for disposal characterization purposes using procedures described below. Image 1 in Appendix E of this report shows the east end of the UST on November 17, 2015 after it was exposed. The date shown on the digital image is not accurate.

Prior to removal of the UST on November 25, 2015 the UST atmosphere was inerted using dry ice. Following verification that the UST atmosphere oxygen and lower explosive limit concentrations were each below 10 percent the UST was removed from the UST pit by Patriot using a backhoe. The measured depth to the top of the UST was approximately 3.5 feet below the ground surface (bgs), and the bottom of the UST was at a depth of approximately 7.0 feet bgs. ACDEH Inspector Barbara Jakub and Alameda County Fire District (ACFD) Inspector Bonnie Terra were on site to observe removal of the UST from the UST pit.

December 10, 2015

Report 0735.R1

Following removal of the UST from the pit, the UST was visually inspected. The UST was measured to be 8.0 feet long and 3.5 feet in diameter with a calculated volume of approximately 575 gallons. The UST was constructed of single wall bare steel with welded seams. Minor rusting was observed on the exterior of the UST. Following removal of dirt and scale from the UST exterior the UST was inspected for evidence of holes, cracks and corrosion. Image 2 in Appendix E shows the UST after removal and also shows a hole measuring less than 0.25 inches in diameter located on the north side in the upper half on the west half of the UST, and Image 3 in Appendix E is a close-up image of the same hole. Image 4 in Appendix E is a close-up image of a hole measuring less than 0.1-inches in diameter identified at the bottom of the west end of the UST.

Following inspection the UST was loaded onto a truck for transportation from the site (see Appendix E Image 5). The UST was transported by Patriot to the Ecology Control Industries (ECI) facility in Richmond, California as hazardous waste for destruction. A copy of Uniform Hazardous Waste Manifest 013897131 JJK for the disposal of the UST is attached with this report as Appendix F and a copy of the UST Certificate of destruction is attached with this report as Appendix G.

Following removal of the UST from the UST pit, soil was excavated from the bottom of the UST pit to a depth of approximately 9.0 feet bgs at a location as far west in the UST pit as possible. Excavation at the west end of the UST pit was limited based on the presence of the EBMUD water pipes above the UST pit (see Appendix E Image 6). On November 25, 2015 one UST pit confirmation soil sample designated as T1-9.0 was collected from underneath the UST near the center of the UST pit (see Figure 3) at a depth of 2.0 feet below the bottom of the UST (9.0 feet bgs) from relatively undisturbed soil in the backhoe bucket near the teeth of the bucket into a 6-inch long, 2-inch diameter stainless steel tube using procedures described below. The soil encountered in the UST pit consisted of black silty clay to a depth of approximately 3.0 feet bgs, which was underlain by brown gravelly silty fine to coarse sand from the ground surface to the maximum depth of exploration of 9.0 feet bgs.

Although a petroleum odor was observed from some of the soil in the UST pit that had been in contact with the UST, no evidence of petroleum odor, staining or discoloration were detected in soil in the backhoe bucket that was collected at a depth of 9.0 feet bgs (see Appendix E Image 7). Evaluation of the soil with a photoionization detector that was equipped with a 10.6 eV bulb and that was calibrated with a 100 parts per million (ppm) isobutylene standard showed that no organic vapors were detected. ACDEH Inspector Barbara Jakub was on site to observe excavation of the bottom of the UST pit and collection of the confirmation soil sample from below the UST. No groundwater was encountered in the UST pit.

Following collection of UST pit soil sample T1-9.0, loose soil in the bottom of the UST pit was excavated by Patriot and stockpiled with soil that had been excavated on the morning of November 25, 2015 for additional exposure of the UST in reparation for UST removal. A total of four soil samples were collected from the soil stockpile at various depths prior to transfer of the soil stockpile into a 20-cubic yard roll off bin. The soil samples were collected using methods described below, and were designated as BIN 2.

All soil samples were collected in the following manner. The stainless steel tube was completely filled to ensure that no head space was present in the tube. The ends of the tube were then

December 10, 2015
Report 0735.R1

sequentially covered with aluminum foil and plastic end caps, and the tube was then labeled and stored in a cooler with ice pending delivery to the laboratory. Chain of custody procedures were observed for all sample handling.

Excavated Soil Disposal

On December 2 and 3, 2015 the two roll off bins were transported to the Potrero Hills Landfill in Suisun, California using Non-Hazardous Waste Manifests both numbered PHLF-15-730 for disposal of the soil in the bins. A total of 16.72 tons of soil was disposed of. Copies of the manifest for soil disposal are attached with this report as Appendix H and a copy of the landfill weighmaster certificates are attached with this report as Appendix I.

GEOLOGY AND HYDROGEOLOGY

Based on review of regional geologic maps from U. S. Geological Survey Professional Paper 943, "Flatland Deposits - Their Geology and Engineering Properties and Their Importance to Comprehensive Planning," by E. J. Helley and K. R. Lajoie, 1979, the subject site is at the interface of underlying materials consisting of Late Pleistocene alluvium (Qpa) and Medium-Grained Alluvium (Qham). Late Pleistocene alluvium is described as weakly consolidated, slightly weathered, poorly sorted, irregularly interbedded clay, silt, sand, and gravel. Medium-Grained Alluvium is described as unconsolidated, moderately sorted, permeable fine sand, silt, and clayey silt with a few thin beds of coarse sand.

The soil encountered in the UST pit consisted of black silty clay to a depth of approximately 3.0 feet bgs, which was underlain by brown gravelly silty fine to coarse sand from the ground surface to the maximum depth of exploration of 9.0 feet bgs. Groundwater was not encountered in the UST pit. The depth to groundwater and the groundwater flow direction at the site are unknown.

San Francisco Bay is located approximately 4,600 feet to the west of the subject site. Review of documents on the internet site GeoTracker identified a site located approximately 270 feet to the southwest of the subject site former UST at 3800 San Pablo Avenue where the depth to groundwater in groundwater monitoring wells ranged from approximately 8.5 to 11.0 feet bgs and the groundwater flow direction was reported to be to the northwest.

LABORATORY ANALYSIS

Soil samples T1-9.0, BIN 1, and BIN 2 were analyzed at McCampbell Analytical, Inc. (McCampbell) of Pittsburg, California. All three soil samples were analyzed for Total Petroleum Hydrocarbons as Gasoline (TPH-G) using EPA Method 8021B in conjunction with modified EPA Method 8015B, for Total Petroleum Hydrocarbons as Diesel (TPH-D) and Total Petroleum Hydrocarbons as Motor Oil (TPH-MO) using EPA Method 8015B, for Volatile Organic Compounds (VOCs) including methyl-tert-Butyl Ether (MTBE), benzene, toluene, ethylbenzene, total xylenes (BTEX), fuel oxygenates, lead scavengers, and naphthalene by EPA Method 8260B, and for Semi-Volatile Organic Compounds (VOCs) using EPA Method 8270C. Soil samples T1-9.0 and BIN 1 were additionally analyzed for Polychlorinated Biphenyls (PCBs) using EPA Method 8082 and for CAM 17 Metals using EPA Method 6020. Soil sample BIN 1 was also analyzed for Organochlorine Pesticides (OCPs) using EPA Method 8081A. The four

discrete soil samples designated as BIN 2 were composited by the laboratory prior to analysis. The tank pit bottom soil sample results are summarized in Table 1A and Table 1B, and the excavated soil sample results are summarized in Tables 2A and Table 2B. Copies of the laboratory reports and chain of custody documentation are attached with this report as Appendix J.

Review of the UST pit bottom soil sample T1-9.0 results in Table 1A shows that no petroleum hydrocarbons, VOCs, SVOCs, or PCBs were detected, and review of Table 1B shows that the only detected metal concentration exceeding a December 2013 San Francisco Bay Regional Water Quality Control Board (SFRWQCB) Table A-1 shallow soil Environmental Screening Level (ESL) was arsenic. The detected arsenic concentration of 9.6 milligrams per kilogram (mg/kg) exceeds the Table A-1 shallow soil screening level for a residential land use of 0.39 mg/kg.

Review of Table 2A shows that TPH-G was detected in excavated soil samples BIN 1 and BIN 2 at concentrations of 40 and 2.1 mg/kg, respectively, TPH-D was detected at concentrations of 560 and 13 mg/kg, respectively, and TPH-MO was detected at concentrations of 210 and 19 mg/kg, respectively. MTBE, BTEX, PCBs, and pesticides were not detected in any of the soil samples. The only additionally detected analytes were naphthalene and 1,2,4-Trimethylbenzene using EPA Method 8260B in soil sample BIN 1 at concentrations of 0.68 and 0.30 mg/kg, respectively, and naphthalene, 2-methylnaphthalene, and phenanthrene using EPA Method 8270C, also in soil sample BIN 1, at concentrations of 1.4, 8.3, and 1.7 mg/kg, respectively. Review of Table 2B shows that similar to sample T1-9.0 the only detected metal concentration which exceeds its respective December 2013 RWQCB ESL was arsenic.

Further review of the laboratory analytical reports show that the laboratory described the TPH-G results for samples BIN 1 and BIN2 as consisting of strongly aged gasoline or diesel-range compounds, described the TPH-D and TPH-MO results for sample BIN 1 as consisting of diesel-range compounds, and described the TPH-D and TPH-MO results for sample BIN 2 as consisting of both diesel- and oil-range compounds.

DISCUSSION AND RECOMMENDATIONS

The subject property is located in Emeryville, California where arsenic is a naturally occurring metal in the soil. In accordance with the December 2011 document 'Establishing Background Arsenic in Soil of the Urbanized San Francisco Bay Region' an upper estimate for background arsenic concentrations within undifferentiated urbanized flatland soils in the San Francisco Bay Area was determined to be 11 mg/kg. This regional arsenic evaluation was conducted at the suggestion of the SFRWQCB in collaboration with San Francisco State University. In accordance with the March 2008 'Determination of a Southern California Regional Background Arsenic Concentration in Soil' document prepared by the California Department of Toxic Substances Control (DTSC), the upper-bound concentration of 12 mg/kg was established for arsenic in southern California. The DTSC currently uses this value for both Northern and Southern California. Although detected arsenic concentrations at the site exceed SFRWQCB ESL values, the detected arsenic concentrations are considered to be representative of background concentrations, and are therefore not a concern.

December 10, 2015
Report 0735.R1

Based on the absence of petroleum in the soil sample collected from below the bottom of the UST, P&D recommends that no further action be performed.

DISTRIBUTION

A copy of this report should be sent to Ms. Barbara Jakub at the ACDEH.

LIMITATIONS

This report was prepared solely for the use of Patriot Environmental Services. The content and conclusions provided by P&D in this assessment are based on information collected during our investigation, which may include, but not be limited to, visual site inspections; interviews with the site owner, regulatory agencies and other pertinent individuals; review of available public documents; subsurface exploration and our professional judgment based on said information at the time of preparation of this document. Any subsurface sample results and observations presented herein are considered to be representative of the area of investigation; however, geological conditions may vary between borings and may not necessarily apply to the general site as a whole. If future subsurface or other conditions are revealed which vary from these findings, the newly revealed conditions must be evaluated and may invalidate the findings of this report.

This report is issued with the understanding that it is the responsibility of the owner, or his representative, to ensure that the information contained herein is brought to the attention of the appropriate regulatory agencies, where required by law. Additionally, it is the sole responsibility of the owner to properly dispose of any hazardous materials or hazardous wastes left onsite, in accordance with existing laws and regulations.

This report has been prepared in accordance with generally accepted practices using standards of care and diligence normally practiced by recognized consulting firms performing services of a similar nature. P&D is not responsible for the accuracy or completeness of information provided by other individuals or entities which is used in this report. This report presents our professional judgment based upon data and findings identified in this report and interpretation of such data based upon our experience and background, and no warranty, either express or implied, is made. The conclusions presented are based upon the current regulatory climate and may require revision if future regulatory changes occur.

ACCEPTED

Underground Storage Tank Closure Permit Applications
Alameda County Division of Hazardous Materials
1131 Harbor Bay Parkway, Suite 250
Alameda, CA 94512-6577

These submitted plans have been reviewed and found to be acceptable and substantially meet the requirements of State and Local Health Laws. Changes to your closure plan indicated by this Department are to assure compliance with State and local laws. This project proposed herein is now released for issuance of any required building permits for construction/demolition.

One copy of the accepted plans must be on the job and available to all contractors and craftsmen involved with the removal.

Any changes or alterations of these plans and specifications must be submitted to this Department and to the Fire and Building Inspectors Department to determine if such changes meet the requirements of State and local laws. Notify this Department at least 72 hours prior to the following required inspections:

- Removal of Tank(s) and Piping
 Sampling
 Final Inspection

I issuance of a) permit to operate, b) permanent site closure, is dependent on compliance with accepted plans and all applicable laws and regulations.

THEFRE IS A FINANCIAL PENALTY FOR
NOT OBTAINING THESE INSPECTIONS:

If yes, describe: _____

14. Describe method(s) to be used for rendering tank(s) inert:

Excavate, inert UST atmosphere using dry ice. Verify UST atmosphere is less than 10% LEL and less than 10% oxygen. Remove UST. Collect soil samples and groundwater sample if groundwater is present.

Before tank(s) are pumped out and inerted, all associated piping must be flushed back into the tank(s). All accessible piping must then be removed. Inaccessible piping must be permanently plugged using grout.

The Bay Area Air Quality Management District, (415) 771-6000, along with local Fire and Building Departments, must also be contacted for tank removal permits. Fire departments typically require the use of a combustible gas indicator to verify tank inertness. **It is the contractor's responsibility to have a functional combustible gas indicator on-site to verify that the tank(s) is inerted.**

15. Tank History and Sampling Information *(See Instructions)*****

Tank		Material to be sampled (tank contents, soil, groundwater)	Location and Depth of Sample(s)
Capacity (gallons)	Use History include date last used (estimated)		
700	unknown	2 soil samples to be collected from beneath the UST (one at each end). There is no piping, so no sample collection beneath piping. One soil sample to be collected from the bin where excavated soil is stored. One groundwater sample to be collected if groundwater is encountered in the UST pit. Liquid samples were collected from the liquid that was pumped from the UST into drums that are currently stored on site.	Soil samples collected from beneath UST to be collected at a depth of 108 inches (bottom of UST is at 84 inches below ground surface, soil samples to be collected 24 inches below bottom of UST)

One soil sample must be collected for every 20 linear feet of underground piping that is removed. A groundwater sample must be collected if any groundwater is present in the excavation.

Excavated/Stockpiled Soil	
Stockpiled Soil Volume (estimated)	Sampling Plan
15 cubic yards	Collect one discrete representative sample of relatively undisturbed soil into a 2-inch diameter, 6-inch long stainless steel tube. Cover the ends of the tube sequentially with aluminum foil and plastic endcaps. Label the tube and place it into a cooler with ice. Chain of custody documentation to be observed for all sample handling.

Stockpiled soil must be placed on bermed plastic and must be completely covered by plastic sheeting.

Will the excavated soil be returned to the excavation immediately after tank removal?

[] yes [X] no [] unknown

If yes, explain reasoning _____

If unknown at this point in time, please be aware that **excavated soil may not be returned to the excavation without prior approval from this office. This means that the contractor, consultant, or responsible party must communicate with the Specialist IN ADVANCE of backfilling activities.**

16. Chemical methods and associated detection limits to be used for analyzing sample(s):

The Tri-Regional Board recommended minimum verification analyses and practical quantitation reporting limits shall be followed.

See Table 2, Recommended Minimum Verification Analyses for Underground Tank Leaks.

Contaminant Sought	EPA or Other Sample Preparation Method Number	EPA or Other Analysis Method Number	Method Detection Limit Soil (mg/kg)/ Water ug/L
Unknown Oil			
TPH as gasoline	SOIL EPA 8260B/C	WATER EPA 8260B/C	SOIL/WATER 0.25/ 50

VOCs (full scan including BTEX, MTBE, TBA, naphthalene, and chlorinated hydrocarbons	EPA 8260B/C full scan	EPA 8260B/C full scan	0.005/ 0.5
Metals Cd, Cr, Pb, Ni, Zn	EPA 6010	EPA 6010	1.5 (Pb &Zn 5)/ NA
PCBs	EPA 8082A	EPA 8082A	0.05/ 0.5
SVOCs (including PAHs, Pentachlorphenol, and creosote)	EPA 8270	EPA 8270	0.25/ 2

17. Submit Site Health and Safety Plan (See Instructions)

18. Submit Worker's Compensation Certificate copy

Name of Insurer Federal Insurance Company

19. Submit Plot Plan *****(See Instructions)*****

20. Enclose Deposit (See Instructions)

- 21. Report all leaks or contamination to this office within 5 days of discovery.**
The written report shall be made on an Underground Storage Tank Unauthorized Leak/Contamination Site Report (URL) form.
- 22. Submit a closure report to this office within 60 days of the tank removal. The closure report must contain all information listed in item 22 of the instructions.**
- 23. Submit State (Underground Storage Tank Permit Application) Forms A and B (one-B form for each UST to be removed) (mark box 8 for "tank removed" in the upper right hand corner).**

I declare that to the best of my knowledge and belief that the statements and information provided above are correct and true.

I understand that information, in addition to that provided above, may be needed in order to obtain approval from the Environmental Protection Division and that no work is to begin on this project until this plan has been approved.

I understand that any changes in design, materials, or equipment will void this plan if prior approval is not obtained.

I understand that all work performed during this project will be done in compliance with all applicable OSHA (Occupational Safety and Health Administration) requirements concerning personnel health and safety. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared nor assumed by the County of Alameda.

Once I have received my stamped, accepted closure plan, I will contact the project Hazardous Materials Specialist at least three working days in advance of site work to schedule the required inspections.

Name of Business Madison Park

Name of Individual Bob Huff

Signature B. Huff Date 11/17/15

Subject: Conditions for Approval of Closure Plan

The following items are included in the Conditions of Approval by Item #:

14. No liquid is to be introduced into the tank while it is in the tank pit. The tank cannot be rinsed or washed while it is in the tank pit. Please remove the tank, place it on bermed plastic sheeting before introducing liquids. Ensure that all liquids are captured within the bermed area and appropriately disposed.
15. One soil sample to be collected from native soil beneath the bottom of each tank. As Stated, if water is encountered in the tank pit, a water sample will be collected. If product piping is encountered, collect one soil sample for every 20 feet of piping.

Hazardous Waste Tank Closure Certification – This form is attached. Please complete in order to transport the tank to a scrap metal facility. A copy will be submitted with the hauler and one will be submitted to ACDEH.

LICENSED CONTRACTOR'S DECLARATION:
I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

LICENSE CLASS: _____ **LIC. NO.** _____
DATE: _____ **CONTRACTOR:** _____

OWNER-BUILDER DECLARATION:
I hereby affirm under penalty of perjury that I am exempt from the Contractors' State License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county that requires a permit to construct, alter, improve, demolish, or repair any structure prior to its issuance, also requires the applicant for the permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors' State License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis of the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).:

() I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors' State License Law does not apply to an owner of property who builds or improves thereon, and who does the work himself or herself or through his or her own employees provided that the improvements are not offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

() I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors' State License Law does not apply to an owner of a property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors' State License Law.).

() I am exempt under Sec. _____, B & P.C. for this reason:

Date: _____ **Owner:** _____
WORKERS' COMPENSATION DECLARATION:
I hereby affirm under penalty of perjury one of the following declarations:
 I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: _____ **Policy No.:** _____
 I certify that, in the performance of the work for which this permit I issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that, if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

CONTRACTOR:

OWNER-BUILDER DECLARATION:

I hereby affirm under penalty of perjury that I am exempt from the Contractors' State License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county that requires a permit to construct, alter, improve, demolish, or repair any structure prior to its issuance, also requires the applicant for the permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors' State License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis of the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).:

() I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors' State License Law does not apply to an owner of property who builds or improves thereon, and who does the work himself or herself or through his or her own employees provided that the improvements are not offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

() I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors' State License Law does not apply to an owner of a property who builds or improves theron, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors' State License Law.).

() I am exempt under Sec. B & P.C. for this reason:

Date: Owner:

WORKERS' COMPENSATION DECLARATION:

I hereby affirm under penalty of perjury one of the following declarations:

I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: Policy No.:

I certify that, in the performance of the work for which this permit I issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that, if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3705 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

Date: Applicant:

CONSTRUCTION LENDING AGENCY:

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name:

Lender's Address:

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this county to enter upon the above mentioned property for inspection purposes.

UST Certificate of Destruction

**CERTIFICATE
CERTIFIED SERVICES COMPANY**

255 Parr Boulevard · Richmond, California 94801
Phone # 510-235-1393

CUSTOMER: PATRIOT ENVIRONMENTAL INC

JOB NO: 52T4970

GENERATOR: MADISON PARK

3900 ADELINE STREET EMERYVILLE CA 94608

FOR: ECOLOGY CONTROL INDUSTRIES

TANK NO.: 34688

LOCATION: RICHMOND

DATE: 12/02/2015

LAST PRODUCT: DIESEL

TEST METHOD: VISUAL GASTECH/1314 SMPN

This is to certify that I have personally determined that this is in accordance with the American Petroleum Institute and have found the condition to be in accordance with its assigned designation. This certificate is based on conditions existing at the time the inspection herein set forth was completed and is issued subject to compliance with all qualifications and instructions.

TANK SIZE: 750 GALLONS

CONDITION: SAFE FOR FIRE

REMARKS:

OXYGEN 20.9% LOWER EXPLOSIVE LIMIT LESS THAN 0.1% ECOLOGY CONTROL INDUSTRIES

HEREBY CERTIFIES THAT THE ABOVE NUMBERED TANK HAS BEEN CUT OPEN, PROCESSED

AND THEREFORE, DESTROYED AT OUR PERMITTED HAZARDOUS WASTE FACILITY.

ECOLOGY CONTROL INDUSTRIES HAS THE APPROPRIATE PERMITS FOR AND HAS ACCEPTED

THE TANK SHIPPED TO US FOR PROCESSING.

In the event of any physical or atmospheric changes affecting the gas-free conditions of the above tanks, or if in any doubt, immediately stop all hot work and contact the undersigned. This permit is valid for 24 hours if no physical or atmospheric changes occur.

STANDARD SAFETY DESIGNATION

SAFE FOR MEN: Means that in the compartment or space so designated (a) The oxygen content of the atmosphere is at least 19.5 percent by volume; and that (b) Toxic materials in the atmosphere are within permissible concentrations; and (c) In the judgment of the Inspector's certificate.

SAFE FOR FIRE: Means that in the compartment so designated (a) The concentration of flammable materials in the atmosphere is below 10 percent of the lower explosive limit; and that (b) In the judgment of the Inspector, the residues are not capable of producing a higher concentration than permitted under existing atmospheric conditions in the presence of fire and while maintained as directed on the Inspector's certificate, and further, (c) All adjacent spaces have either been cleaned sufficiently to prevent the spread of fire, are satisfactorily inerted, or in the case of fuel tanks, have been treated as deemed necessary by the Inspector.

The undersigned representative acknowledges receipt of this certificate and understands the conditions and limitations under which it was issued.

Project P.O.:

Project Name: 0735; 3900 Adeline St. Emeryville

Project Received: 11/25/2015

Analytical Report reviewed & approved for release on 12/04/2015 by:

Angela Rydelius,
Laboratory Manager

*The report shall not be reproduced except in full, without the written approval of the laboratory.
The analytical results relate only to the items tested. Results reported conform to the most
current NELAP standards, where applicable, unless otherwise stated in the case narrative.*

Glossary of Terms & Qualifier Definitions

Client: P & D Environmental
Project: 0735; 3900 Adeline St. Emeryville
WorkOrder: 1511B05

Glossary Abbreviation

95% Interval	95% Confident Interval
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test
DUP	Duplicate
EDL	Estimated Detection Limit
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Analytical Qualifiers

h4 sulfuric acid permanganate (EPA 3665) cleanup

Quality Control Qualifiers

F1 MS/MSD recovery and/or RPD is out of acceptance criteria; LCS validated the prep batch.

Analytical Report

WorkOrder: 1511716

Report Created for: P & D Environmental

55 Santa Clara, Ste.240
Oakland, CA 94610

Project Contact: Michael Deschenes

Project P.O.:

Project Name: 0735; 3900 Adeline St. Oakland, CA

Project Received: 11/17/2015

Analytical Report reviewed & approved for release on 11/19/2015 by:

Angela Rydelius,
Laboratory Manager

*The report shall not be reproduced except in full, without the written approval of the laboratory.
The analytical results relate only to the items tested. Results reported conform to the most
current NELAP standards, where applicable, unless otherwise stated in the case narrative.*

Glossary of Terms & Qualifier Definitions

Client: P & D Environmental
Project: 0735; 3900 Adeline St. Oakland, CA
WorkOrder: 1511716

Glossary Abbreviation

95% Interval	95% Confident Interval
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test
DUP	Duplicate
EDL	Estimated Detection Limit
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Glossary of Terms & Qualifier Definitions

Client: P & D Environmental
Project: 0735; 3900 Adeline St. Oakland, CA
WorkOrder: 1511716

Analytical Qualifiers

- S spike recovery outside accepted recovery limits
a3 sample diluted due to high organic content.
c7 Surrogate value diluted out of range
d7 strongly aged gasoline or diesel range compounds are significant in the TPH(g) chromatogram
e1 unmodified or weakly modified diesel is significant

Quality Control Qualifiers

- F1 MS/MSD recovery and/or RPD is out of acceptance criteria; LCS validated the prep batch.
F8 MS/MSD recovery and/or RPD was out of acceptance criteria; PDS validated the prep batch. If PDS recovery was out of acceptance criteria, DLT validated the prep batch.

Glossary of Terms & Qualifier Definitions

Client: P & D Environmental
Project: 0735; 3900 Adeline St. Emeryville
WorkOrder: 1511B04

Glossary Abbreviation

95% Interval	95% Confident Interval
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test
DUP	Duplicate
EDL	Estimated Detection Limit
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Analytical Qualifiers

- a3 sample diluted due to high organic content.
- d7 strongly aged gasoline or diesel range compounds are significant in the TPH(g) chromatogram
- e1 unmodified or weakly modified diesel is significant
- e7 oil range compounds are significant
