Jan,

I have been away for the Thanksgiving week and am currently going through my messages.

Re your voicemail of 11/22 regarding the GeoTracker denial- the reason for the denial is that not all the data in the October 26, 2016 Tank Removal Report tables agree with the laboratory analysis report. For example, soil sample PJ-1-2 has a concentration of 1,500 mg/kg in the report table yet the lab report (EDF submittal) lists a concentration of 560 mg/kg.

Please review the data, make the appropriate changes and resubmit the updated document. Additionally, the October 26, 2016 Tank Removal Report does not appear to have been received by ACDEH. We request the finalized Tank Removal Report be uploaded to the ACDEH ftp site.

Please upload the updated document(s) by December 16, 2016.

Please give me a call at 510 567-6764 if you have any questions.

Thank you,  
Keith Nowell
