PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Mr. Wood:

At your request, ***GeoSolve, Inc.*** has conducted a Phase I Environmental Site Assessment for the above referenced site. The following is a copy of the report, which presents the results of our assessment according to ASTM E1527-2013 standard.

Should you have any questions relating to the contents of this report or require any additional information, please contact our office at your convenience.

Sincerely,
GeoSolve, Inc.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

1.0 INTRODUCTION

1.1 Objective

The purpose of conducting this Phase I Environmental Site Assessment (ESA) is to evaluate the property for contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) 42 U.S.C. §9601 and petroleum products, also known as Recognized Environmental Concerns (RECs). As such, this Phase I ESA is intended to permit a user to satisfy one of the requirements to quality for the innocent landowner, continuous landowner, or bona fide prospective purchaser limitations on CERCLA liability or known as "landowner liability protections" through conducting All Appropriate Inquiries (AAI) into the previous ownership and uses of the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B). ***GeoSolve, Inc.*** has conducted detailed assessment of the past use of the property, historical research, site visit, file reviews and/or file searches and interviews with the site managers/property owners as summarized in this Phase I ESA, which complies with ASTM E1527-2013 for real for secondary potential contaminated sites within a 1-mile radius of the property.

The entire property consists of eight-rectangular and one-square shaped parcels totaling approximately 1.8-acres. Most of the properties are vacant and currently used as parking lots, with the exception of two parcels, which are occupied by apartment buildings. The addresses at the property include 1732-1734 Webster Street, 1750 Webster Street, 1801 Webster Street, 301 19th Street, 1711 Harrison Street, 1801 Harrison Street, 1805 Harrison Street, 1811 Harrison Street, and 1817-1839 Harrison Street in Oakland, California with an Assessor's Parcel Numbers (APNs) APNs 008-0625-016; 008-0625-017; 008-0625-018; 008-0625-002-1; 008-0625-004; 008-0625-005; 008-0625-006; 008-0625-007; and 008-0625-008.

This Phase I Environmental Site Assessment was prepared for the use of our client, Lennar Multifamily Communities (Lennar), who can rely on this report for evaluating the environmental conditions of the property and Lennar can rely on this report until May 6, 2016.

1.2 Scope

GeoSolve, Inc. was authorized by Mr. Tyler Wood of Lennar on October 26, 2015 to perform the following:

a) Perform a field reconnaissance of the subject property for significant surficial signs of hazardous waste release, storage of hazardous materials, and surficial indications for the presence of USTs, and water wells;

b) Off-site research into past land use of the property involving, as applicable, telephone and personal interviews with government personnel and the review of historical documents;

c) A review of available aerial photographs for obvious surficial features indicative of past land use with attention to indicators of hazardous materials or waste use, disposal, or storage;

d) An interview with the current property owner(s);

e) A review of fuel leak and chemical release lists and files for soil and groundwater contamination cases within a 1-mile radius from the subject property as made available through the appropriate Federal and State and local regulatory agencies, if available;

f) Documentation of the site with photographs; and

g) Preparation of this report.

2.0 SITE LOCATION AND DESCRIPTION

2.1 Location

The subject property is situated within the East Bay portion of the greater San Francisco Bay region within Alameda County. The site is located between Webster Street, 19th Street, and Harrison Street with addresses 1732-1734 Webster Street, 1750 Webster Street, 1801 Webster Street, 301 19th Street, 1711 Harrison Street, 1801 Harrison Street, 1805 Harrison Street, 1811 Harrison Street, and 1817-1839 Harrison Street in Oakland, California, and consists of nine parcels totaling approximately 1.80-acres with APNs 008-0625-016; 008-0625-017; 008-0625-018; 008-0625-002-1; 008-0625-004; 008-0625-005; 008-0625-006; 008-0625-007; and 008-0625-008. Most of the property is vacant and being utilized for automobile parking, with the exception of 1805 Harrison Street, which is occupied by Oakland Housing Authority (APN 008-0625-007 and 008-0625-008). 1750 Webster Street (APNs 008-625-016 and 008-0625-017) is situated approximately four feet higher than the remainder of the property. The subject property is bounded by Webster Street to the north, 19th Street to the east, Harrison Street to the south, and apartment

buildings and other structures to the west. The location of the site is shown on Figure 1, Site Vicinity Map and Figure 2, Site Plan.

2.2 Topography and Drainage

The local topography slopes gradually to the northeast. The subject site is relatively flat, with a sharp topographic drop in the middle of the property between 1750 Webster Street and 301 19th Street from approximately 25 feet above mean sea level (msl) to approximately 20 feet msl and slopes to the northeast. Leak Merritt is situated approximately 500 feet northeast of the subject property. Drainage of the property appears to be to the northeast.

2.3 Geology/Hydrogeology

The materials underlying the site are mapped as the Late Pleistocene Merritt Sand (Qps) by Helley and Lajoie (1979), which consists of beach and eolian (dune) sand deposits, which are loose, well-sorted, fine- to medium-grained sand with silt. The Merritt Sand is approximately 50 feet in thickness. The Merritt Sand was deposited by wind eroding and transporting steam sediments during the lower stands of sea level, which occurred approximately 40,000 years ago and may have been reworked by shoreline processes as sea levels rose. The Late Pleistocene Merritt Sand is underlain by Bay Mud and alternating layers of older alluvial deposits to approximately 1 to 2 kilometers (km). The older alluvial deposits are underlain by Cenozoic marine bedrock units.

The active trace of the Hayward Fault is situated approximately 3.4-miles northeast of the site and the Hayward Fault is considered active by the Alquist-Priolo Earthquake Fault Zoning Act (AP-Zone) of 1994, and is listed as a strike-slip fault with right-lateral movement (http://gmw.consrv.ca.gov/shmp/download/quad/OAKLAND_EAST/maps/OKLND_E.PDF). Furthermore, the subject site is not situated within a mapped zone for liquefaction during a moderate to violent earthquake event (http://gmw.consrv.ca.gov/shmp/download/quad/OAKLAND_WEST/maps/ozn_oakw.pdf).

Based on a recent Phase II ESA conducted on the subject site, depth to groundwater varies from 17 feet to 22 feet below ground surface (bgs) and flows toward the northeast along topography.

2.4 Site Visit

A *GeoSolve, Inc.* field geologist visited the site on Wednesday, October 28, 2015, and made the following observations:

- The subject property consists of nine separate parcels between Webster Street, 19th Street and Harrison Street in Oakland, California. Most of the property consists of automobile parking lots, with the exception of 1805 Harrison Street, which is occupied by a multi-story building used by the Oakland Housing Authority. The property located at 1732-1736 Webster, 1750 Webster Street, and 1801 Webster Street (parcels APNs 008-625-015 through 008-0625-018) were approximately 4-feet higher in elevation than the other parcels located at 301 19th Street and along Harrison Street, and was secured by a poorly constructed wire fence. All nine parcels total approximately 1.80-acres and the entire property was paved. Digital photos of the site are shown on Photos 1A through 4B.

- No groundwater wells were observed on the subject property and no significant staining was observed on the pavement, with the exception of de minims petroleum-stains from automobiles on the parking lot. No visual evidence of asbestos-containing materials (ACMs) or lead-based paint (LBP) was observed on the buildings at 1805 Harrison Street.

- No visual evidence for the presence of USTs was ascertained from our site visit. No suspected hazardous substances/hazardous wastes were observed on the property. No staining and/or odors were noted on the property. No visual evidence of sumps, drains or pits were noted at the subject property. No evidence of polychlorinated biphenyls (PCBs) was observed on the subject property. The United States Geological Survey (USGS) considers Alameda County a low exposure potential area for radon.

3.0 SITE HISTORY REVIEW

GeoSolve, Inc. examined twelve (12) aerial photographs, nine (9) historical topographic maps, fourteen (14) Sanborn Maps, and City Directories from 1970. All historical information was provided by Environmental Data Resources, Inc. (EDR). Sanborn maps were not available for the subject property. Data for the photographs and topographic maps are tabulated below.

3.1 Regional and Local History

3.11 Regional History

Ohlone Indians were the first documented inhabitants of the East Bay region. Archeological findings place the Ohlone Indian settlements as early as 8,000 b.c. with up to 40 native villages surrounding the Bay prior to European contact. European presence began with José de Galvez, the visiting-general from New Spain (Mexico), who wanted to increase New Spain's territory for the Spanish crown. Senior Galvez sent a group of Spaniards into Alta California. José Francisco Ortega" scouted the region on behalf of Captain Don Gaspar de Portola and Father Junipero Serra established a chain of Franciscan missions beginning in 1769. By 1797, Mission San Jose de Guadalupe was established and was charged with converting the region's natives to Roman Catholicism. Mexico broke relations with the Spanish crown in 1821 and the only land grant in the East Bay was that of Luis Peralta, a 45,000-acre tract on the site of modern Oakland.

Continued development occurred after 1848 when, as part of the Treaty of Guadalupe Hidalgo following the Mexican-American War, the Mexican government ceded 525,000 square miles (1,360,000 km^2); 55% of its pre-war territory (excluding Texas) to the US in exchange for $15 million. The original settlement in what is now the downtown was initially called "Contra Costa" ("opposite shore", the Spanish name for the lands on the east side of the Bay) and was included in Contra Costa County before Alameda County was established on March 25, 1853. The California state legislature incorporated the town of Oakland on May 4, 1852. In 1853, Jack Coffee Hays, a famous Texas Ranger, was one of the first to establish residence in Oakland while performing his duties as sheriff of San Francisco.

The town and its environs quickly grew with the railroads, becoming a major rail terminal in the late 1860s and 1870s. In 1868, the Central Pacific constructed the Oakland Long Wharf at Oakland Point, the site of today's Port of Oakland. The Long Wharf served as the terminus both for the Transcontinental Railroad and for local commuter trains of the Central (later, Southern) Pacific. The Central Pacific also established one of its largest rail yards and servicing facilities in West Oakland, which continued to be a major local employer under the Southern Pacific well into the 20th century. The principal depot of the Southern Pacific in Oakland was the 16th street station located at 16th and Wood, which is currently being restored as part of a Redevelopment

project. In 1871, Cyrus and Susan Mills paid $5,000 for the Young Ladies' Seminary in Benicia, renamed it Mills College, and moved it to its current location in Oakland, adjacent to what is now Seminary Boulevard. In 1872, the town of Brooklyn was incorporated into Oakland. Brooklyn, a large municipality southeast of Lake Merritt, was part of what was then called the Brooklyn Township.

A number of horsecar and cable car lines were constructed in Oakland during the latter half of the 19th century. The first electric streetcar set out from Oakland to Berkeley in 1891, and other lines were converted and added over the course of the 1890s. The various streetcar companies operating in Oakland were acquired by Francis "Borax" Smith and consolidated into what eventually became known as the Key System, the predecessor of today's publicly owned AC Transit. In addition to its system of streetcars in the East Bay, the Key System also operated commuter trains to its own pier and ferry boats to San Francisco, in competition with the Southern Pacific. Upon completion of the Bay Bridge, both companies ran their commuter trains on the south side of the lower deck, directly to San Francisco. The Key System in its earliest years was actually in part a real estate venture, with the transit part serving to help open up new tracts for buyers. The Key System's investors (incorporated as the "Realty Syndicate") also established two large hotels in Oakland, one of which survives as the Claremont Resort.

During World War II, the East Bay Area was home to many war-related industries. Among these were the Kaiser shipyards in nearby Richmond. The medical system devised for shipyard workers became the basis for the giant Kaiser Permanente HMO, which has a large medical center at MacArthur and Broadway, the first to be established by Kaiser. Oakland's Moore Dry Dock Company expanded its shipbuilding capabilities and built over 100 ships.

Valued at $100 million in 1943, Oakland's canning industry was its second-most-valuable war contribution after shipbuilding. Sited at both a major rail terminus and an important sea port, Oakland was a natural location for food processing plants, whose preserved products fed domestic, foreign, and military consumers. The largest canneries were in the Fruitvale District and included the Josiah Lusk Canning Company, the Oakland Preserving Company (which started the Del Monte brand), and the California Packing Company.

The war attracted tens of thousands of laborers from around the country, though most were poor whites and blacks from Alabama, Arkansas, Georgia, Louisiana, Mississippi, Missouri, South Carolina, Tennessee and Texas— Sharecroppers and tenant Farmers who had been recruited by Henry J. Kaiser to work in his shipyards. These immigrants from the Jim Crow South brought their racial attitudes with them, and the (comparative) racial harmony that Oakland blacks had been accustomed to prior to the war evaporated. Southern whites expected deference from their black co-workers, and initially Southern blacks were conditioned to grant it. As Southern blacks became aware of their more equal standing under California law, they began to reject subservient

roles; the new immigrants prospered, though they were affected by rising racial discrimination and informal post-war neighborhood redlining.

By the end of World War II, blacks constituted about 12% of Oakland's population, and the years following the war saw this percentage rise. There was also an increase in racial tension. Starting in the late 1940s, the Oakland Police Department began recruiting white officers from the South to deal with the expanding black population and changing racial attitudes; many were openly racist, and their repressive police tactics exacerbated racial tensions.

Beginning in the middle 1950's much of West Oakland was destroyed after then Highway 17 (now I-880 or the Nimitz Freeway) was built. Many homes and businesses were destroyed to build the Cypress Viaduct and the rest of the Nimitz Freeway. Also Urban Renewal like the destruction of the area around Market Street and 7th street was destroyed to make way for the Acorn High Rise apartments. This Urban Renewal of West Oakland continued into the 1960's with the Construction of BART and the construction Main Post Office Building on 1675 7th Street. Many families were displaced Out of West Oakland by the Construction of the Nimitz Freeway and the Urban Renewal of West Oakland the Majority of them Black and Latino. Oakland First Latino Community in West Oakland was completely destroyed. This forced many Latinos to relocate to the Fruitvale district and East Oakland, African Americans relocated to East Oakland as well especially the Elmhurst district and surrounding areas.

In 1960, Kaiser Corporation erected its headquarters at the former site of Holy names University, at the corner of 20th and Harrison Streets. It was the largest skyscraper in Oakland, as well as "the largest office tower west of Chicago" up to that time. During this era, the oldest section of Oakland at the foot of Broadway, Jack London square, was Redeveloped into a hotel and outdoor retail district. During the 1960s, the city was home to an innovative funk music scene that produced well-known bands like Sly and the Family Stone, Graham Central Station, Tower of power, Cold Blood, Azteca, and The Headhunters. Larry Graham, the bass player for both Sly and the Family Stone and Graham Central Station, is credited with the creation of the influential *slap and pop* sound still widely used by bassists in many musical idioms today.

By 1966, only 16 of the city's 661 police officers were black. Tensions between the black community and the largely white police force were high, and police malfeasance against blacks was common. The Black Panther party was founded by students Huey Newton and Bobby Seale at Oakland City College (now Merritt College).

In the Late 1960s and Early 1970s the Fruitvale District was part of the Chicano Movement. In 1968 the Oakland Police Murdered a Young Chicano Named Charles (Pinky) De Baca on 35th Avenue in East Oakland a group called Latinos united for Justice organized to combat Police

Brutality after MR De Baca's murder. Chicano Radical militant's like the Chicano Revolutionary Party and the Brown Berets also organized and began doing work in the Fruitvale District to Protect the Chicano and Latino Community from Police Brutality and had a Free Breakfast Program in the Fruitvale area with the help of the Black Panthers.

It was also during the 1960s that the Oakland chapter of the Hells Angels Motorcycle Club began to grow into a formidable motor cycle gang and organized Crime syndicate. The Hells Angels clubhouse is still located on Oakland's Foothill Boulevard (https://localwiki.org/oakland/History).

Oakland became redeveloped in the 1990s, with new construction of high-rises and new business by Mayor Brown, which continued into the 2010s.

3.2 Aerial Photographic Site Features

Historical aerial photographs revealed several changes occurring at the subject property over the past 76 years. In 1939, the subject property was occupied by various structures along Harrison Street and a three-pointed star structure on the 301 19th Street parcel. No structures were observed on the Webster Street parcels, except for a building on the northwestern corner of Webster Street and 19th Street. The elevation drop between the Webster Street and Harrison Street properties was observed. The City of Oakland was well developed in the surrounding area with paved streets and Lake Merritt was observed further to the northeast of the property. By 1946, the 1750 Webster Street address was occupied by a structure and the three-pointed star building previously occupying the 301 19th Street property was replaced by a circular structure and no other changes were observed on the subject site. By 1958, no changes were observed on the property. By 1968, no structures were observed on the subject property, except for the buildings on 1805 Harrison Street. No changes to the subject property was observed from 1974 through 2012. Copies of the aerial photographs are attached to the appendix.

3.3 Historical Topographic Map Site Features

In 1895, the subject site was mapped as developed property between Webster, 19th and Harrison Streets immediately southwest of Lake Merritt and west of Oakland Harbor. Livermore Line of the Southern Pacific Railroad was mapped further south of the property. Oakland was mapped as a developed city with marshland south of the property and Yerba Buena Island was mapped as Goat Island and the Bay Bridge was not mapped. By 1915, no significant changes were mapped on the subject property or in the immediate vicinity. By 1948, the marshland was filled in and the Oakland Inner Harbor was mapped between Oakland and Alameda Island. In addition, the Bay Bridge was mapped further west of the property. The city of Oakland was well developed. No

significant changes were mapped on the subject property or in the immediate vicinity from 1949 through 1993, with the exception of increased development in the outlying areas in Oakland. Copies of the historical topographic maps are attached to the appendix.

3.4 Sanborn Map Features

In 1889, most of the parcels at the subject property were mapped as being occupied by residences, with the exception of 1750 Webster Street, which was mapped as a vacant lot. Webster Street, 19th Street, and Harrison Street were mapped. Residences were mapped south of the subject property. By 1903, no significant changes were mapped on the subject property; however, APN 008-625-017 (part of 1750 Webster Street) was mapped as being occupied by a residence. By 1911, all of the parcels were mapped as being occupied by residences. By 1950, a restaurant circular structure was mapped at 301 19th Street which was listed as reinforced concrete. No structures were mapped at 1750 Webster Street and an apartment building was mapped immediately south of 1750 Webster Street. No significant changes were mapped by 1951 or 1953 at the site. By 1957, a reinforced concrete building was mapped at 1805 Harrison Street with no other changes mapped on the property and no changes were mapped on the property until 1964, which indicated no structures at 301 19th Street or on the parcels immediately south of 301 19th Street. The reinforced concrete structure was still mapped t 1805 Harrison Street and by 1967, another structure was mapped immediately south of 1805 Harrison Street and no other significant changes were mapped through 1969 at the property. Copies of the Sanborn Maps are attached to the Appendix.

3.5 Review of Environmental LienSearch™ Report

The property consists of six deeds as shown on the Table 1 below.

TABLE 1
SUMMARY OF OWNERSHIP OF PARCELS AT THE SITE

APN	Type of Deed	Owner	Received From	Date of Record
008-0625-002-1 008-0625-016 008-0625-017	Deed	Prentiss Property Lake Merritt	Prentis Copley Investments Group	03/10/1999
008-0625-004 008-0625-005	Deed	1811-1817 Harrison St. Partners	Mardikian G Haig	11/19/1999
008-0625-006 008-0625-008	Deed	Oakland Housing Authority	1805 Harrison St Property	02/28/1997
008-0625-007	Deed	Oakland Housing Authority	Joseph, Ben, and Rosalie Zvi	7/19/2006
008-0625-015	Deed	SA Harwal	George and Nazenig Markikian	7/1/1975

008-0625-018	Deed	1810 Webster LLC	Haig Mardikian	4/11/2012

No environmental liens or other activity and use limitations were documented for the parcels. A copy of the EDR Environmental LienSearch™ Report is attached to the appendix.

3.6 Review of EDR City Directory Abstract

City directories were available from 1920 through 2013 and a summary of address listings is detailed in Table 2 below. A copy of the EDR City Directory Abstract is attached to the appendix.

TABLE 2
SUMMARY OF CITY DIRECTORIES

Address	APN	Date	Use/Listing	Source
301 19th Street	008-0625-002-1	1943	R	R.L. Polk & Co.

3.7 EDR Vapor Encroachment Screen

EDR performed a Vapor Encroachment Screen report for the subject site. Based on the data, no sources of vapor intrusion were documented near or beneath the site. A copy of the EDR Vapor Encroachment Screen report is attached to the appendix.

3.8 Review of City and County Records

GeoSolve, Inc. contacted the City of Oakland Building Division to ascertain the past use of the subject site regarding permits and/or files indicating hazardous waste. Permits were available for the subject property and are attached to the appendix and are also saved on the attached flash-drive. Hazardous waste files for the subject property were also identified and are attached to the flash drive and summarized in Section 4.1. A summary of the permits recorded for the subject site are provided Table 3 below.

06/30/1988	1732-1736 Webster Street	08702088	Plumbing

In all permits reviewed, no septic tanks, wells, and/or USTs were identified from the City of Oakland Building Department.

In addition, ***GeoSolve, Inc.*** contacted the Alameda County Building Department and Assessor's Office to ascertain the past use of the property. According to Alameda County, building permits are recorded at the City of Oakland. According to the Alameda County Assessor's Office, the assessed property values are shown on Table 4 below, which was obtained from http://gis.acgov.org/Html5Viewer/index.html?viewer=parcel_viewer.

TABLE 4
ASSESSED PROPERTY VALUES FOR 2015

APN	Address	2015 Assessed Value
008-0625-002-1	301 19TH Street	$2,387,763.00
008-0625-004	1811 Harrison Street	$207,815.00
008-0625-005	1817-1839 Harrison Street	$169,162.00
008-0625-006	1805 Harrison Street	Tax Exempt
008-0625-007	1801 Harrison Street	Tax Exempt
008-0625-008	1711 Harrison Street	Tax Exempt
008-0625-015	1734 Webster Street	$390,275.00
008-0625-016	1750 Webster Street	$625,366.00
008-0625-017	1750 Webster Street	$625,366.00
008-0625-018	1810 Webster Street	$180,957.00

All the properties have a summed area of approximately 1.80 acres.

3.9 Review of Previous Environmental Reports

Multiple environmental reports were prepared for the subject property, namely 1750 Webster Street and 1833 Harrison Street (most likely APN 008-0625-005). All of the environmental reports are saved on the flash drive attached to this report. A summary of results from both properties is provided below.

1833 Harrison Street

One 5,000-gallon gasoline and one 550-gallon motor-oil USTs were removed from this property on September 10, 1991. Approximately 250 cubic yards of soil was over-excavated from the USTs and properly disposed. Analytical results indicated no detectable concentrations of petroleum hydrocarbons from the tank bottom samples collected (JM-01 through JM-06), as reported in the Environmental Assessment for Three Parcels located in Oakland, California (Applied GeoSciences, Inc., January 6, 1993). No other investigations have been conducted to date on this parcel.

On February 7 and 17, 1998, Norcal Geophysical Consultants, Inc. conducted a magnetometer survey of Parcels 008-0625-002-1 and 008-0625-004, which identified a metallic anomaly on the south-central portion of parcel 008-0625-002-1. No other information was revealed during this survey (Norcal Geophysical Consultants, Inc., March 2, 1998).

1750 Webster Street

Multiple environmental investigations were conducted on the 1750 Webster Street property, which identified elevated concentrations of petroleum hydrocarbons reported as gasoline (TPHg) and benzene, toluene, ethyl benzene and total xylenes (BTEX) in groundwater (Applied GeoSciences, Inc., April 1, 1993. Up to 200,000 micrograms per liter (µg/L) of TPHg were detected. The geophysical survey of the property indicated metallic utility lines only. Further investigations included drilling up to twelve borings to groundwater (ATC Associates, Inc. March 19, 1998), in which TPHg was detected up to 760,000 µg/L and trichloroethylene (TCE) was detected up 1o 13 µg/L in borings G-3 and G-6, which are located on the southern and central portions of the property. No USTs were identified on the subject property; therefore, the TPHg, TCE and BTEX originated from an off-site and up-gradient source.

ATC Associates, Inc. drilled and installed three groundwater monitoring wells (A-1 through A-3) in April 1998 (ATC Associates, Inc., September 25, 1998) on the subject property. The groundwater gradient was determined to be toward the northeast at 0.01 foot per feet (ft/ft) and

TPHg was detected up to 84,000 µg/L and benzene was detected up to 12,000 µg/L in wells A-2 and A-1, which were installed on the northern and southern portion of the property. Depth to groundwater was measured at 18 feet to 20 feet bgs.

3.10 Interviews with Property Owner

GeoSolve, Inc. attempted to contact the current property owners; however, the property owners have not completed the Property Owner Questionnaire as of the date of this Phase I ESA.

4.0 REVIEW OF PUBLIC RECORDS OF REGULATORY AGENCIES

4.1 Primary Contamination Sources

GeoSolve, Inc. contacted the Alameda County Health Care Services Agency (ACHCSA) to ascertain if any files were available for review from the site. According to the ACHCSA website, files were available for the subject site (http://www.acgov.org/aceh/lop/findsite.htm) at 1750 Webster Street (http://www.acgov.org/MAPS/deh/InspectionResults/?SITE=LOP), which included a closure letter (http://www.acgov.org/MAPS/DEH/LOPDocuments/RO0002672/CLOS_L_2000-02-16.pdf). Based on review of these files, TPHg and BTEX were detected at elevated concentrations in groundwater and were determined to have originated from an off-site and up-gradient source as discussed in Section 3.9. Details on the most likely source of this petroleum hydrocarbon groundwater contamination is discussed in Section 4.2 below. ***GeoSolve, Inc.*** contacted the California Regional Water Quality Control Board – San Francisco Bay Region (RWQCB) to ascertain if any files and/or environmental assessment and/or spill or leak investigations and cleanups (SLIC) sites were available for the property. One SLIC site was identified for the site at 1750 Webster Street (http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T06019757905), which was listed as closed as of February 16, 2000. All files associated with the subject property are attached to the appendix and are also located on the attached flash-drive.

GeoSolve, Inc. also contacted the California Department of Toxic Substances and Control (DTSC) to ascertain if any files documenting the presence of hazardous wastes and/or hazardous substances were available for the subject site. Only one SLIC file was identified at the site, which was the same site on Geotracker above:
(http://www.envirostor.dtsc.ca.gov/public/mapfull.asp?global_id=&x=-119&y=37&zl=18&ms=640,480&mt=m&findaddress=True&city=1750%20webster%20street,%20oakland,%20ca&zip=&county=&federal_superfund=true&state_response=true&voluntary_cleanup=true&school_cleanup=true&ca

_site=true&tiered_permit=true&evaluation=true&military_evaluation=true&school_investigation=true&operating=true&post_closure=true&non_operating=true).

The following is a summary of the potential Hazardous Substances in connection with identified uses:

ACMs and/or LBP

GeoSolve, Inc. conducted a walk-through of the site and two structures were observed on the southeastern portion of the property at 1711 and 1805 Harrison Street (Oakland Housing Authority). The structures were not painted and were constructed of concrete. No lead-based paint (LBP) was observed on the structures. In addition, no asbestos containing materials (ACMs) were observed on the structures and/or site. However, historic residences once occupied the subject property on every parcel, which were demolished in the late 1940s to early 1950s. Therefore, LBP and ACMs may be in the surficial soil.

Radon Gas

According to the EDR Radius Report, the Federal EPA Radon Zone for Alameda County is 2 and based on that the indoor radon average level is < 2 pCi/L. Radon gas levels exceeding 4 pCi/L within residential buildings is considered by the EPA to be inhabitable without radon gas mitigation.

Facility Storage Tanks (above or below ground)

No USTs were documented or permitted for the subject site and no visual evidence of USTs was identified during our site visit at the site. As stated in Section 3.9, one 5,000 gallon and one 550 gallon gasoline and waste oil USTs were removed from the 1833 Harrison Street property in 1991. No detectable concentrations of petroleum hydrocarbons were detected in the confirmation soil samples collected from beneath the former tanks. A magnetic anomaly was identified by Norcal Geophysical Consultants, Inc. on the south-central portion of 301 19th Street (Norcal Geophysical Consultants, Inc., March 2, 1998).

Transformers or Other Electrical Equipment that uses Dielectric Fluid

No transformers were observed on and/or near the property.

Remediation and Site Closures

One site closure was recorded for 1750 Webster Street as discussed above (http://www.acgov.org/MAPS/DEH/LOPDocuments/RO0002672/CLOS_L_2000-02-16.pdf). Although contamination as TPHg and BTEX were detected in the groundwater beneath the property, the source was determined to be form an off-site and up-gradient source, most likely 1721 Webster Street in Oakland, California.

4.2 Secondary Contamination Source Sites

For the purposes of this investigation, a search was made of 84 State and Federal regulatory agency lists of contaminated or potentially contaminated sites, or properties where transportation, handling, storage, and/or disposal of hazardous materials occurs or has occurred.

In accordance with recently adopted standards by the American Standard for Testing and Materials (ASTM, 2013), details of the 84 databases which were searched are within the attached EDR, Inc. Report. It should be noted that listings reported without location data were found to be more distant than the standard minimum search distance. In addition, some of the databases consist of lists of handlers, transporters, and generators of toxic materials rather than contaminated sites.

Out of all databases searched, thirty-one (31) secondary potential sites were identified within a 0.13-mile radius of the subject site are listed below. Secondary source sites are highlighted in red.

- **Parking Lot, 1750 Webster Street, Oakland** – Located on-site. This facility was listed on the SLIC and Alameda County SC databases for petroleum and TCE groundwater contamination from an up-gradient and off-site source. The site was closed by the ACHCSA in 2000. Douglas Parking Company located at 1721 Webster Street in Oakland, California (http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0600100140) appears to be the source of groundwater contamination migrating from this facility toward the subject property.

- **Kline Harry, 335 19th Street, Oakland** – Located approximately 145 feet north and cross-gradient of the subject site. This facility was listed on the EDR US Hist Cleaners database as a Kline Harry Clothes Pressers and Cleaners in 1933. No other information was available regarding this facility.

- **Kapler Arth, 1825 Webster Street, Oakland** – Located approximately 185 feet west-northwest and cross-gradient of the subject site. This facility was listed on the EDR US

Hist Auto Stat database as John Hook and Arth Kapler gasoline and oil service stations in 1943. No other information was available regarding this facility.

- **Bliss M S, 1839 Harrison Street, Oakland** – Located on-site. This facility was listed on the EDR US Hist Auto Stat database as Bliss M S Gasoline and Oil Service Stations in 1943. This facility coincides with the UST removal project conducted at 1833 Harrison Street in 1991 as discussed in Section 3.9.

- **19th and Harrison Street, Oakland** – Located on-site. This facility was listed on the SWEEPS UST, HIST UST, and CA FID UST databases for the former presence of a 5,000-gallon and 550-gallon gasoline and waste oil USTs, which were removed from the site in 1991, as discussed in Section 3.9 and is most likely associated with the previous listing as Bliss M S Gasoline and Oil Service Stations above.

- **Kapler Arth, 1901 Webster Street, Oakland** – Located approximately 221 feet north-northwest and cross-gradient of the subject site. This facility was listed on the EDR US Hist Auto Stat database as Frank Burrington Gasoline and Oil Service Stations in 1928, and Fred Hildebrand and Arth Kapler Gasoline and Oil Service Stations in 1933. No other information was available.

- **Vacant Lot, 1881 Harrison Street, Oakland** – Located approximately 222 feet east and cross-gradient from the subject-site. This facility was listed on the SWEEPS UST, CA FID UST, and HIST UST databases for the former presence of nine USTs of unknown capacities in 1988. No other information was available.

- **1800 Harrison Street, Oakland** – Located approximately 231 southeast and cross-gradient of the subject-site. This facility was listed on the EDR US Hist Auto Stat database as a Chevron Service Station in 2007 through 2009. No other information was available.

- **Douglas S R, 1901 Webster Street, Oakland** – Located approximately 239 feet north-northwest and cross-gradient from the subject-site. This facility was listed on the EDR US Hist Auto Stat database as Douglas S R Gasoline and Oil Service Stations in 1943. No other information was available.

- **Buttner Property, 1900 Webster Street, Oakland** – Located approximately 255 feet north and cross-gradient from the subject-site. This facility was listed on the LUST and SLIC and EDR US Hist Auto Stat databases for use as a historic gasoline service station known as L F Hackley in 1943. This facility impacted subsurface soil and groundwater with TPHg and diesel contamination is soil and groundwater. Diesel and TPHg

concentrations were detected up to 3,800 µg/L and 6,000 µg/L, respectively. Pollution characterization is on-going.

- **World Savings CTR, 1901 Harrison Street, Oakland** – Located approximately 257 feet east and cross-gradient form the subject-site. This facility was listed on the RCRA NonGen/NLR and FINDS databases for the generation of non-hazardous wastes, including BTEX, acetone, n-butyl alcohol. No violations were recorded for this facility.

- **Beak W J, 293 19th Street, Oakland** – Located approximately 299 feet east and cross-gradient of the subject-site. This facility was listed on the on the EDR US Hist Auto Stat database as Beak W J Gasoline and Oil Service Stations in 1943. No other information was available.

- **Randall Beverly, 1728 Webster Street, Oakland** – Located approximately 313 feet west-southwest and cross-gradient of the subject-site. This facility was listed on the on the EDR US Hist Auto Stat database as Beverly Randall Gasoline and Oil Service Stations in 1943. No other information was available.

- **PG&E East Bay Division Headquarters, 1919 Webster Street, Oakland** – Located approximately 316 feet north and cross-gradient of the subject-site. This facility was listed on the on the HIST UST, SWEEPS UST, CA FID UST, and HIST CORTESE databases. This facility had a 6,000-gallon gasoline UST, which is listed as active. No other information was available.

- **Douglas Parking Company, 1721 Webster Street, Oakland** – Located approximately 319 feet southwest and up-gradient of the subject-site. This facility was listed on the on the LUST, Alameda County CS, SWEEPS UST, CA FID UST, HIST UST and HIST CORTESE databases. This facility is listed as an active soil and groundwater remediation site. One 1,000-gallon and two 500-gallon gasoline USTs were removed from this facility in 1992 and up to 1,500 milligrams per kilogram (mg/Kg) of TPHg and up to 12 mg/Kg benzene were detected in the soil beneath the former USTs. This facility is most likely the source of the TPHg and TCE concentrations detected at 1750 Webster Street. Information on this facility is saved in the attached flash-drive as Conduit Study and File Review (Cambria, August 8, 2000) and Data Gap Site Assessment report (Pangea, January 22, 2014). Up to 350,000 µg/L TPHg and 10,000 µg/L benzene were detected in the groundwater near the former USTs at this facility. Based on the groundwater gradient established at the 1750 Webster Street property in wells A-1 through A-3, the contamination is migrating directly from this facility toward the 1750 Webster Street

property at approximately 0.01 ft/ft gradient (http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0600100140).

- **Kaiser Foundation Health Plan, 1935 Webster Street, Oakland** – Located approximately 396 feet north and cross-gradient of the subject-site. This facility was listed on the on the SWEEPS UST and CA FID UST databases. Two active 5,000-gallon diesel and one 6,000-gallon gasoline USTs are listed for this facility. No other information was available.

- **Perl Benj, 377 19th Street, Oakland** – Located approximately 400 feet northwest and cross-gradient of the subject-site. This facility was listed on the on the EDR US Hist Cleaners database as Perl Benj Cleaners in 1933. No other information was available.

- **Colonial Cleaners and Dryers, 384 19th Street, Oakland** – Located approximately 444 feet northwest and cross-gradient of the subject-site. This facility was listed on the on the EDR US Hist Cleaners as Colonial Cleaners and Dryers in 1933. No other information was available.

- **386 19th Street, Oakland** – Located approximately 458 feet northwest and cross-gradient of the subject-site. This facility was listed on the on the EDR US Hist Cleaners database as Ruth S Knit Shop in 1967 and Drycleaners Image in 2005 and 2006. No other information was available.

- **371 17th Street, Oakland** – Located approximately 466 feet west-southwest and up-gradient of the subject site. This facility was listed on the on the EDR Hist Cleaners database as Multi Save Dry Cleaning Service in 2001. No other information was available.

- **Ratto & Parodi, 1628 Webster Street, Oakland** – Located approximately 544 feet southwest and up-gradient of the subject-site. This facility was listed on the on the EDR US Hist Auto Stat database as Ratto & Parodi Service Station in 1928, 1933, and 1943. No other information was available.

- **Chevron Station 90020, 1633 Harrison Street, Oakland** – Located approximately 550 feet south and cross-gradient of the subject-site. This facility was listed on the on the RCRA-SQG, HAZNET, LUST, Alameda County CS, HIST CORTESE, and EDR US Hist Auto Stat databases. This facility was a historic gasoline station which is undergoing remediation and stores hazardous waste in small quantities. The historical gasoline service station was named Collier A F in 1943.

- **Waller L A, 1619 Webster Avenue, Oakland** – Located approximately 571 feet southwest and up-gradient of the subject-site. This facility was listed on the on the EDR US Hist Auto Stat database as Waller L A Service Station in 1943. No other information was available.

- **West End French Laundry, 1616 Wester Avenue, Oakland** – Located approximately 577 feet southwest and up-gradient of the subject-site. This facility was listed on the on the EDR US Hist Cleaners database as West End French Laundry in 1925, 1928, 1933, and in 1943. No other information was available.

- **Toothman Development, 1736 Franklin Street, Oakland** – Located approximately 593 feet west and cross-gradient of the subject-site. This facility was listed on the on the LUST, Alameda County CS, and HIST CORTESE databases. This facility was a former gasoline leak in soil only and was closed by the RWQCB on November 15, 1996. No other information was available.

- **Fish A D, 1635 Franklin Street, Oakland** – Located approximately 604 feet west and cross-gradient of the subject-site. This facility was listed on the on the EDR US Hist Auto Stat database as Fish A D Station in 1933. No other information was available.

- **Thomas F Parisian Cleaning and Dyeing Works, 1724 Franklin Street, Oakland** – Located approximately 604 feet west and cross-gradient of the subject-site. This facility was listed on the on the EDR US Hist Cleaners database as Thomas F Parisian Cleaning and Dyeing Works in 1933. No other information was available.

- **I D G Architects, 1730 Franklin Street, Oakland** – Located approximately 608 feet west and cross-gradient of the subject-site. This facility was listed on the on the RCRA-SQG and FINDS databases storage of small quantities of hazardous waste. No violations were recorded.

- **Mobil, 1975 Wester Street, Oakland** – Located approximately 615 feet north and cross-gradient of the subject-site. This facility was listed on the on the RCRA-SQG, HAZNET, LUST, Alameda County CS, and HIST CORTESE databases. This facility was a former leaking gasoline UST site, which was closed by the ACHCSA on February 19, 1997.

- **1706 Franklin Street, Oakland** – Located approximately 621 feet west and cross-gradient of the subject-site. This facility was listed on the on the EDR Hist Cleaners database as LE Magic Cleaners in 2001 through 2012. No additional information was available.

- **1999 Harrison Street, Oakland** – Located approximately 642 feet northeast and cross-gradient of the subject-site. This facility was listed on the on the EDR US Hist Auto Stat database as Independent Factor Automotive in 2009. No other information was available.

Additionally, twenty-nine (29) Aquiflow wells were identified within a 0.5-mile radius of the property. Aquiflow wells are used by EDR to provide data on the general direction of groundwater flow at specific points as well as depth to water table information. A summary of the water-wells situated within 0.5-mile are tabulated below.

AQUIFLOW Site ID number	Distance from Site	Measurement Date	Flow Direction	Depth to water (feet bgs)
A1	0 - ⅛ mile, SSW	06/10/1999	East	20.17
A2	0 - ⅛ mile, SSW	01/27/1988	Northeast	13.0
B3	0 - ⅛ mile, West	01/09/1996	Northeast	2.0
B4	0 - ⅛ mile, West	08/23/1995	Northeast	15.0
B5	0 - ⅛ mile, West	06/29/1998	Northeast, East	0.04
6	0 - ⅛ mile, West	03/06/1991	Northeast, North	9.0
7	⅛ - ¼ mile, North	03/18/1993	East	8.0
C8	⅛ - ¼ mile, West	04/02/1996	Southwest	8.5
C9	⅛ - ¼ mile, West	01/28/1991	Southwest	8.5
C10	⅛ - ¼ mile, West	05/26/1994	North, South	11
11	⅛ - ¼ mile, NW	NA	NA	NA
D12	⅛ - ¼ mile, SSW	12/05/1990	Northeast	9.5
D13	⅛ - ¼ mile, North	08/10/1999	West	9.5
14	⅛ - ¼ mile, South	11/15/1991	West	NA
E15	¼ - ½ mile, North	03/03/1989	North	NA
E16	¼ - ½ mile, South	06/26/1996	West	6.0
F17	¼ - ½ mile, North	11/09/1988	Southeast	NA
F18	¼ - ½ mile, North	02/15/1989	Southwest	13
F19	¼ - ½ mile, North	10/07/1992	East, West	NA
20	¼ - ½ mile, North	01/29/1988	Northeast	12
21	¼ - ½ mile, NNW	11/04/1987	Southwest	22.7
22	¼ - ½ mile, West	01/07/1987	East	NA
H23	¼ - ½ mile, NE	09/14/1989	North, West	20
H24	¼ - ½ mile, NE	08/17/1988	North	NA
H25	¼ - ½ mile, NNE	08/11/1993	Varies	20
G26	¼ - ½ mile, NNE	12/01/1988	Southwest	18
27	¼ - ½ mile, WSW	09/02/1987	South	10
28	¼ - ½ mile, NNW	01/11/1996	West	40

NA = Not available

Based on EDR report dated October 14, 2015, the subject site is not situated within a 100- or 500-year FEMA Flood Zone. No Coal Gas site was found in a search of Real Property Scan's ENVIROHAZ database.

5.0 DATA GAPS

The following Data Gaps were recognized:

- ***GeoSolve, Inc.*** did not receive a completed Owner's Interview Form as of the date of this Phase I ESA.

- Thirteen (13) orphan sites were identified in the EDR Radius Map Report; however, none of these sites were situated near the subject site.

These data gaps did not alter our findings and/or recommendations for the site.

6.0 SUMMARY OF FINDINGS

GeoSolve, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-2013 at 1711 Harrison Street, 1801 Harrison Street, 1805 Harrison Street, 1833-1839 Harrison Streets, 301 19th Street, 1732-1736 Webster Street, 1750 Webster Street and 1801 Webster Street in Oakland, California with APNs 008-0625-004; 008-0625-005; 008-0625-006; 008-0625-007; 008-0625-008; 008-0625-002-1; 008-0625-015; 008-0625-016; 008-0625-017; and 008-0625-018 in Alameda County, California, the property. Any exceptions to, or deletions from, this practice are described in Section 5.0 of this report. This assessment has revealed one REC in connection with the property; namely: 1) possible presence of metal and organochloride pesticide residues within the surficial soil at the site.

The following summarizes the assessment of the subject site:

- The subject property is situated within the East Bay portion of the greater San Francisco Bay region within Alameda County. The site is located between Webster Street, 19th Street, and Harrison Street with addresses 1732-1734 Webster Street, 1750 Webster Street, 1801 Webster Street, 301 19th Street, 1711 Harrison Street, 1801 Harrison Street, 1805 Harrison Street, 1811 Harrison Street, and 1817-1839 Harrison Street in Oakland, California, and consists of nine parcels totaling approximately 1.80-acres with APNs 008-0625-016; 008-0625-017; 008-

0625-018; 008-0625-002-1; 008-0625-004; 008-0625-005; 008-0625-006; 008-0625-007; and 008-0625-008. Most of the property is vacant and being utilized for automobile parking, with the exception of 1805 Harrison Street, which is occupied by Oakland Housing Authority (APN 008-0625-007 and 008-0625-008). 1750 Webster Street (APNs 008-625-016 and 008-0625-017) is situated approximately four feet higher than the remainder of the property. The subject property is bounded by Webster Street to the north, 19th Street to the east, Harrison Street to the south, and apartment buildings and other structures to the west. The local topography is relatively flat at approximately 20 to 25 feet above msl, with a sharp topographic drop along the retaining wall in the center of the property.

- Based on site observations, review of historical aerial photographs, topographic maps, Sanborn Maps, and file review information, the property was initially developed prior to 1887 as single family residences, which were demolished in the late 1940s to early 1950s. The Oakland Housing Authority Building on 1801 and 1805 Harrison Street was constructed in the early 1950s and a former restaurant occupied the property at 301 19th Street, which was demolished in the late 1960s. Most of the property has been utilized for automobile parking lots. The apartment building situated at 1732-1736 Webster Street was constructed in 1922 as a brick building (APN 008-0625-015). The source of the retaining wall dividing 1750 Webster Street from 301 19th Street could not be ascertained, but is most likely associated with the initial development of the property. The property located at 1833 and 1839 Harrison Streets was formerly occupied by Bliss M S Service Station in 1991. Two USTs were removed from the subject site in 1991 and no detectable concentrations of TPHg or BTEX were detected from the confirmation soil samples collected from beneath the former USTs.

- Elevated concentrations of TPHg and BTEX, and low concentrations of TCE were detected in groundwater samples collected from 1750 Webster Street (up to 200,000 µg/L TPHg) appears to have migrated from an offsite and up-gradient source at 1724 Webster Street approximately 300 feet northwest of the subject property. A magnetic anomaly was detected on the south-central portion of 301 19th Street by Norcal Geophysical Consultants, Inc. in 1998, and may represent an unknown UST. In addition, no visual evidence to the existence of wells was identified and/or documented in permits at the site. No ponds and/or lagoons, archeological findings or noxious odors were noted at the property.

- Based on the historical use of the property, lead and ACMs maybe present in the surficial soil at the subject property. A former printing facility was situated on 1817 Harrison Street, which may have used metals in their printing.

- Based on EDR information dated October 14, 2015, 31 secondary potential sites were identified within a 0.18-mile radius of the subject property. Of these 31 secondary potential sites, five secondary off-site sources were identified.

- The RECs identified on the subject site include the following: 1) elevated concentrations of TPHg, BTEX and TCE in groundwater beneath the 1750 Webster Street property; 2) the existing of a historic gasoline service station at 1833 and/or 1839 Harrison Street and a third UST maybe present on the south-central portion of the 301 19th Street property; 3) possible elevated concentrations of lead and/or ACMs in the surficial soil based on the historical residences which used to occupy every parcel at the site until the late 1940s to early 1950s; and; 4) a historical printing facility was situated at 1817 Harrison Street, and metal residues maybe within the surficial soil on APN 008-0625-004; and 5) possible up-gradient sources of TPHg, BTEX and other volatile organic compounds (VOCs) from historical uses as gasoline stations and dry cleaner facilities.

7.0 SITE-SPECIFIC RECOMMENDATIONS

In view of the above findings, it is the opinion of ***GeoSolve, Inc.*** additional environmental assessment of the subject property **is warranted**, and should include the following:

- Drilling up to 8 borings using a State-licensed direct-push drilling contractor at random locations over the property to groundwater and collecting soil and groundwater samples from the shallow soil, subsurface soil and groundwater. The shallow soil samples should be analyzed for lead and asbestos using Environmental Protection Agency (EPA) Methods SW846/6010B and CARB 435. The subsurface soil samples and groundwater should be analyzed for TPHg, BTEX and a few groundwater samples should be analyzed for VOCs using EPA Methods SW846/8021 and 8260B. A report of the findings should be prepared and sealed by a Professional Geologist. At least four borings should be advanced along Webster Street and four borings should be drilled along Harrison and 301 19th Streets.

- Isolation of the metallic anomaly should be performed by excavation along the 301 19th Street and APN 008-0625-004 parcel in order to evaluate the source of the anomaly. If an additional UST is discovered, the UST must be properly excavated and disposed in accordance with City of Oakland Fire Department protocols.

8.0 GENERAL RECOMMENDATIONS

In addition, the following recommendations should be considered if any future development of the property is planned:

- During grading activities of the property, soil technicians and operators must be aware of any basements, buried foundations, or reservoir discovered on the property. If any one of these conditions is encountered, then the Soil Engineer must be notified and the specific condition appropriately remedied in accordance with local, county and state requirements.

- During any grading activities of the property, soil technicians and operators must be aware of any unknown USTs, buried debris, or other potential adverse environmental condition which may be discovered on the property. If any one of these conditions is encountered, then the Soil Engineer must be notified and the specific condition appropriately remedied in accordance with the local, county, and state and RWQCB requirements.

- Any water wells and/or septic tanks discovered during grading must be property abandoned through the Alameda County Department of Public Works prior to development of the property.

9.0 LIMITATIONS

This environmental site assessment was performed according to the recommended guidelines established by ASTM designation E1527-2013 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This report has been prepared for the specific application to this project in a manner consistent with the level of care and skill normally exercised by members of the environmental science profession currently practicing under similar conditions in this area. This report contains information reported to ***GeoSolve, Inc.***, by other sources, accordingly, and errors or omissions may be present that ***GeoSolve, Inc.*** cannot be responsible for. The findings of this report apply to the present condition of the subject property only (as of October 28, 2015); the opinions expressed herein are subject to revision in light of new information relevant to the site and/or in its immediate surroundings. Results from Phase I environmental investigations are based on surficial evidence and public records and databases only. Subsurface conditions of the site cannot be properly evaluated without performing a subsurface environmental investigation and actually testing of the soil, and groundwater for potential contaminants.

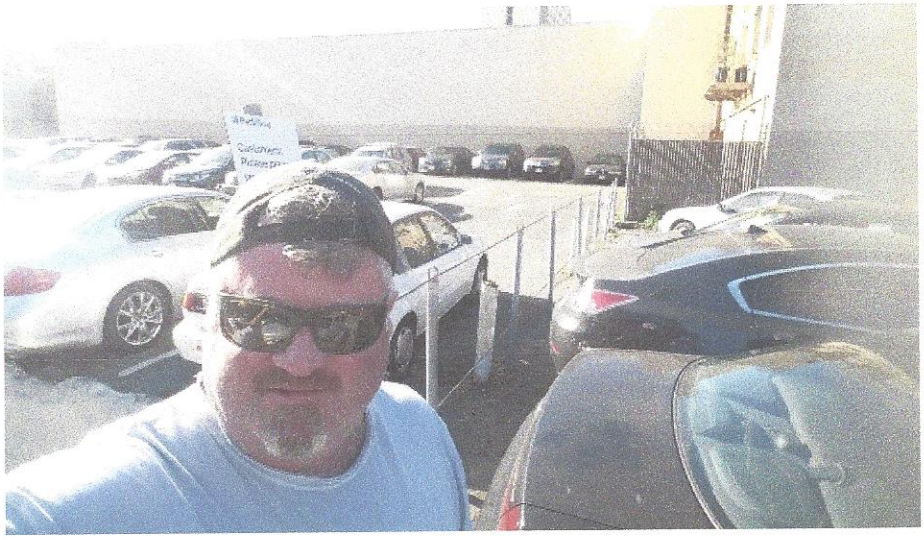
11.0 ENVIRONMENTAL PROFESSIONAL QUALIFICATION

This Phase I Environmental Site Assessment was performed by Mr. Robert D. Campbell, a qualified Environmental Professional as defined in 40 CFR Part 312.10.

Mr. Campbell holds a Baccalaureate degree from U.C. Davis (an accredited institution of higher education) and a Master's of Science degree from C.S.U. East Bay (an accredited institution of higher education) in the discipline of Geology. Mr. Robert D. Campbell holds a valid Professional Geology license in the State of California (6454); a valid Certified Engineering Geology license in the State of California (2089); and a valid Professional Geology license in the State of Arizona.

Mr. Campbell has over 25 years of environmental, geological and hydrogeological experience, more specifically in environmental assessments including Phase I and Phase II Environmental Site Assessments (ESAs), which exceeds the regulatory requirement of three years of relevant experience.

Mr. Campbell remains current in his field and has received 1.6 Continuing Education Units (CEUs) and 12 Professional Development Hours (PDHs) in the previous 12 month period. He is also compliant with OSHA HAZWOPER 8-hour refresher requirements, including medical surveillance. As required in 40 CFR 312.27, Mr. Campbell directly conducted the Field Visit including the visual inspection of the Site, adjacent properties and surrounding areas on October 28, 2015 as shown below.



"All Appropriate Inquiry" was also conducted by Mr. Campbell as were all interviews. The record search, historical photo and topographic map search were conducted by EDR, Inc. The findings, opinions and recommendations of this Phase I Environmental Site Assessment are those of ***GeoSolve, Inc.*** as formulated by Mr. Robert D. Campbell.

Mr. George M. and H. Mardikian
207 Powell Street
San Francisco, California

Dear Mr. & Mrs. Mardikian:

Your property at 1732-34 Webster Street was surveyed on August 30, 1963, by personnel of this Department, Oakland, California. Similar surveys are being conducted throughout the City for the purpose of bringing about a healthier, safer and more pleasing urban environment, by the elimination of undesirable and/or illegal housing and building conditions.

The survey revealed the existence of certain code violations. These violations are listed on the attached page(s) and are numbered 1 through 44.

The attached list of violations includes suggested methods of corrections. Other legal and appropriate means of correcting or abating the cited violations may be used. These matters and any other problems connected with the survey should be discussed with your Urban Renewal Representative, Mr. J. F. Loughery, who may be reached at 273 - 3381 between 8:30 and 9:30 a.m., Monday through Friday. Our office is on the 6th floor of the City Hall, Room 615, Oakland.

Your attention is called to Section 211 of the Oakland Housing Code which provides for your right to appeal to the Housing Advisory and Appeals Board. It is recommended that this matter be fully discussed with your Urban Renewal Representative who will be most happy to fully advise you on the standard operational procedure of application to this Board.

The possession of a valid permit is essential to the satisfactory correction of most building, plumbing, heating and electrical violations.

A progress check of your property will be made on October 12, 1963 or soon afterwards. At this time you will be required to present a reasonable timetable for the elimination of any violations that have not as yet been corrected.

Please do not hesitate to call upon us for further information or assistance.

Sincerely,

ENRICO LABARBERA
Housing Division Official

Re: 1732-34 Webster Street

The four-story type III structure was originally constructed in 1926 as a 26-unit apartment house with stores. Its present occupancy isthe same.

On March 8, 1962 a new section was added to the Oakland Housing Code to provide a reasonable degree of safety to persons living and sleeping in apartment houses and hotels. This section applies to all buildings heretofore erected containing Group "H" occupancies as defined in the Oakland Building Code. The structure is presently in violation of items 1 to 6.

1. Glass panels in doors to apartments 206, 207, 306, 307, 406, and 407. Sections 805.2 OHC. Doors to the apartments are required to be a solid wood door however. The existing glass on the doors may be covered on the hallway side with 5/8" gypsum board.

2. Main entrance door opens inward. Section 801.2 OHC. Doors serving as exits shall open in the direction of exit, and shall be openable from the inside without the use of a key or any special knowledge or effort.

3. Side exterior exitways used as a dual means of egress does not have fire escape signs or red light in the public hallways indicating fire exits. Sections 804.2 OHC. Place or cause to be placed in a conspicuous position over every exit thereof, signs which shall be indicated by letters no less than five (5) inches in height, the location of every fire escape. Near every such sign there shall be placed a red light which must be kept burning from sunset to sunrise.

4. Remove present fire escape signs over the existing glass apartment doors. Section 803.1 OHC. (There are no exits at this point without going through another apartment.)

5. Improper lighting on the service porch and floor exit. Section 1103.4 OHC. Provide hallways and stairways with artificial lighting providing a minimum of one-half ½ watt per square foot evenly distributed over the hallways, floor, or stairway.

6. No occupancy separation between the office area and the apartment house. Section 808.1 OHC. Provide the required occupancy separation.

7. Unapproved electrical cord wiring stapled in the living room and bedroom to energize fixtures and appliances in Apartment 102. In the living room and kitchen in the manager's apartment. In the kitchen, living room, and bedroom of apartment 405. Section 1103.5 OHC. 110 (a) OEC and 400-4 NEC. Remove.

8. No approved pull chain to the electrical fixture over the lavatory in the office at 1734 Webster Street. Sections 1103.5 OHC and 110 (a) OEC. Provide insulating link pull chain.

9. Defective electrical fixture in the storeroom on the first floor. Sections 1103.5 OHC and 110 (a) OEC. Repair or replace.

10. Where electrical fixtures or appliances are to be maintained, approved electrical convenience outlets, necessary service and circuits shall be installed. Section 1103.5 OHC.

Re: 1732-34 Webster Street

11. The electrical fuses in the apartments and office circuit panel are over-fused. Sections 1103.5 OHC, and table 310-12 NEC, 230-1 OEC. Remove 30 and 25 ampere fuses and provide 15 ampere fuses in the circuit panel. (Type S non-tamperable fuses recommended.)

12. Unapproved electrical cord wiring is being used to energize fixtures and appliances in apartments 204, 205, 206, 401, 402, 407, and 408. Sections 1103.5 OHC and 110 (a) OEC and 400-4 NEC. Remove.

13. Unapproved electrical cord wiring running under the rug in apartment 406. Section 1103.5 OHC and 110 (a) OEC. Remove.

14. The use of multiple adapters in the majority of the apartments are prohibited. Sections 1103.5 OHC and 220-3 (b) OEC. Remove multiple adapters.

15. Unapproved wiring attached to legal outlet to energize unapproved outlet in the living room and bedroom of apartment 302. Sections 1103.5 OHC and 110 (a) OEC. Remove. This also applies to the closet in apartment 302.

16. No screws in the coverswitch plate in the kitchen of apartment 205. Section 1105.5 OHC and 110 (a) OEC. Secure plate.

17. No cover on the electrical hall switch in apartment 308. Sections 1103.5 OHC and 110 (a) OEC. This also applies to the outlet in the kitchenette in apartment 202. Provide covers.

18. The non-insulated type metal fixtures in the proximity of the sink in thekitchen of apartment 206 is prohibited. Sections 1103.5 OHC and 110 (a) OEC. Remove.

19. Defective electrical fixture in the closet of apartment 204. Section 1103.5 OHC and 110 (a) OEC. This also applies to the wall fixture and receptacle in the rear bedroom of the manager's apartment. In the hall fixture apartment 303. Sections 1103.5 OHC and 110 (a) OEC.

20. Defective electrical outlet in the dining room andliving room, bedroom of apartment 407. Section 1103.5 OHC and 110 (a) OEC. Repair or replace.

21. Refrigerator attached to closet fixture in apartment 303. Provide approved outlet. Section 1103.5 OHC and 110 (a) OEC.

22. Defective electrical outlets in the office 1734 Webster Street. Section 1103.5 OHC and 110 (a) OEC. Repair or replace.

23. Defective electrical switch in the hallway of apartment 203. Section 1103.5 OHC and 110 (a) OEC. Repair or replace.

24. Vent loose from the collar to thekitchen range in apartment 402. Sections 1102 OHC, and 8-21.15 OPC. Secure vent to collar on the range.

25. No shut-off valve to the kitchen ranges in apartments 405 and 407. Section 1102 OHC and 8-18.37 OPC. Provide required shut-off valve.

Re: 1732-34 Webster Street

26. Defective waste line from the sink to the trap in apartment 405. Section 1102 OHC and 8-603 OPC. Provide approved waste piping.

27. The toilet bowl in apartments 203 and 207 are not properly connected to the drainage pipe and provided with a watertight connection. Sections 1102 OHC and 8-11.10 OPC. Repair or replace.

28. I would suggest a check on all faucets as there appears to be a number in disrepair. Section 1102 OHC. Provide new washers, etc., or replace.

29. The kitchen drainboards are not water proofed. Sections 903.2 OHC, 8-4.28 OPC. The tile in the majority of the kitchen drainboards are in need of regrouting. Also, apartments 202 and 207 have loose tile trim. Properly water proof drainboards and secure loose tile.

30. The kitchen sinks are in need of caulking between the sink and the tile in apartments 102, 203, 208, 304, and 307. This also applies to the tub in apartment 102 and 407. Sections 903.2 OHC, 8-4.28 OPC. Repair and maintain in an approved manner.

31. The wall area around the top of the bathtubs, faucets, or water flow spout is in need of proper maintenance in apartments 201, 205, 207, 208, 301, 302, 303, 304, 305, 308, 404, and 407. Section 1001.1 OHC. Repair and properly maintain.

32. The water flow spout to the bathtub in apartment 302 is loose. Sections 1102 OHC, and 8-11.12, 8-6.06 OPC. Repair or replace.

33. The kitchen floor covering is worn through around the sink in apartment 204. Section 1001.1 OHC. Provide floor covering.

34. Apartments 202, 308, and 407 are in need of a thorough cleaning. Sections 1001.1 OHC and 303.1 OHC. It is the responsibility of the tenant as well as the owner to keep that part of an apartment in which he or she occupies and controls in a clean and sanitary condition. Apartments are to be thoroughly cleaned.

35. Apartment 203 has water leakage in the walls and ceilings and appears to be leaking from the apartment above. There is also an accumulation of water in the storage area which comes from the above leak. Sections 1102 OHC and 1001.1 OHC. Immediately repair the defective water or waste line.

36. The refrigerator in apartment 202 has a defective door latch and will not close. Section 1001.1 OHC. Repair or replace the door latch.

37. The fence in the rear of the apartment house has deteriorated and fallen into the rear yard. Section 1001.8 OHC. Remove and repair.

38. Side exterior stairways are in need of cleaning. Section 1002.4 OHC. Properly clean service porches and stairways.

39. The accumulation of materials, mattresses, furniture is being maintained throughout the basement area and is a potential fire hazard as well as a rodent harborage. Sections 1002.4 and 1002.7 OHC. Remove and maintain.

40. Garbage receptacles are not maintained with close fitting covers and are lacking vertical sliding chute to go over the receptacle. Section 1002.9 OHC. Provide.

41. The front exterior door trim and marble to the office at 1734 Webster Street is deteriorated or loose. Section 1001.1 OHC. Properly maintain.

42. Water leakage damaging office ceiling in 1734 Webster Street. Section 1001.1 OHC. Repair and properly maintain.

43. Water from the roof drain down spout is being diverted into the sanitary drainage system. Section 8-8.07 OPC. Remove and divert water in an approved manner.

44. The bedroom used by the manager lacks the required window area. Section 701.3 OHC. Provide the required window area or discontinue use as a habitable room.

Thank you for your cooperation during the time that the survey was in progress.

The structure is well constructed but has been neglected maintenance-wise throughout.

Dear Mr. & Mrs. Mardikian:

This letter is written to thank you for your cooperation in correcting the majority of conditions described in the original compliance letter pertinent to the subject premise.

The remaining deficiencies are relative to the vacant commercial occupancy and need not be corrected until the unit is tenanted. (See:Original compliance letter, items #6, #22, and #41).

Upon the completion of these conditions a Certificate of Occupancy will be sent to you.

If you have any questions regarding this matter, please direct any such inquiry to the District Urban Renewal Representative, Mr. Robert Andersen, by phone (273-3381) 8:30 to 9:30 A.M., Monday through Friday, 6th Floor, City Hall, Oakland.

SAN FRANCISCO, CA 94108

3/26/76

Dear MR. MARDIKIAN,

Your property at 1732 WEBSTER ST, Oakland, California was partially surveyed on MAR 25, 1976, by personnel of the Housing Division and of the Fire Prevention Bureau. Similar surveys are being conducted throughout the City for the purpose of bringing all multi-storied residential structures into conformity with Title 25 of the Department of Housing and Community Development of the State of California as approved in the Oakland Housing Code, Chapter 8.

Reason for Inspection

Marking of Letter

The survey revealed the existence of the code violations circled, underlined, filled in or otherwise marked on the attached form.

Methods and Our City Contact

The attached list of violations includes methods and alternatives for correcting deficiencies. Other legal and appropriate means of correcting or abating the cited violations may be used. These matters and any other problems connected with the survey should be discussed with your Housing Representative, HARVEY O. KENT, who may be reached at 273-3381 between 8:00 and 9:00 a.m. and 3:30 and 4:15 p.m., Monday through Friday. Our office is on the 6th floor of the City Hall, Room 615, 14th and Washington Streets, Oakland. It is requested that you call before coming in to the office, so that contact may be made with persons familiar with your case.

Your Right of Appeal

Your attention is called to Section H-207(1) of the Oakland Housing Code, which provides for your right to appeal to the Housing Advisory and Appeals Board. It is recommended that this matter be fully discussed with your Housing Representative, who will fully advise you on the procedure for application to this Board.

Permits and Plans

The possession of a valid permit is essential to the correction of the violations listed hereafter. Prior to issuing the permit proper plans must be submitted to the Building Division on the 11th floor of City Hall. Approval of your plans must be obtained from the Fire Marshal and the Housing Division.

Your Time for Completion

A progress check of your property will be made on MAY 24 1976, or soon thereafter. At that time you will be required to present a reasonable timetable for the elimination of any violations which may not have been corrected.

Not a Complete Report

NOTE: This report represents a partial survey of the property. Upon completion of all work listed hereunder a Certificate of Occupancy will not be issued. For a Certificate of Occupancy survey, proper application must be made and the respective fee paid upon request.

Do not hesitate to call us for further information or assistance.

Sincerely,

ENRICO LA BARBERA
Administrator

CALL BACK CARD ✓

1. The exits are not properly marked, lighted, free from obstructions and/or _____. Sections H-804, H-802(d) OHC; Article 10 OFC. Provide, repair, roplace.

2. The building or _____ floors is/are not provided with two approved means of egress. Section H-802(c) OHC. Provide as specified in the Oakland Housing Code. (See item #10 for possible alternative)

3. The following guest rooms or apartments #_____ have unapproved transoms, windows or openings other than doors which open into public hallways. Section H-803(h) OHC. Provide approved covering of no less than three-fourths inch (3/4") plywood or one-half inch (1/2") gypsum wall board or equivalent material.

4. Required handrails are missing at the following location(s): _____. Section H-803(f) OHC. Provide in accordance with the Oakland Building Code.

5. The roof lacks the required means of egress. Section H-803(k). Provide an approved scuttle and ladder or stairway.

6. The fire escape or stairway at _____ used as a means of egress is non-conforming because of construction and/or configuration. Section H-804 OHC. Provide an approved fire escape or other approved means of egress as provided in the Oakland Housing Code.

7. The interior stairway(~~s) and/or corridor located~~ at EACH SIDE MAIN STAIRS are not properly protected by one of the following alternate methods. Section H-805(b) OHC. Provide one of the following:
   a. An interior stairway shall be enclosed with walls and ceilings of not less than one-hour fire-resistive construction. Existing partitions of wood lath and plaster in good condition will be acceptable in lieu of one-hour fire-resistive construction. Doors to such enclosures shall be protected by self-closing three-fourths (3/4) hour labeled doors or solid wood doors not less than one and three-fourths inches (1-3/4") thick. Doors (other than those from private quarters) are to swing in the direction of exit travel and a landing having a minimum horizontal dimension of thirty inches (30") shall be provided at each point of access to the stairway. Enclosures shall include landings between flights and any corridors, passageways or public room necessary for continuous exit to the exterior of the building.
   b. The stairway need not be enclosed in a continuous shaft if cut off at each story by the fire-resistive construction required by this subsection for stairway enclosures.
   c. Enclosures shall not be required if an automatic fire extinguishing system (sprinklers) is provided for all portions of the building except bedrooms, apartments and rooms accessory thereto.

8. The building contains unprotected openings into elevator shafts, ducts, and/or _____ (other vertical openings). Properly enclose as required for interior stairways (item #7 above) or by wire glass set in metal frames.

9. The separation of the residential occupancies above the first floor and the other occupancies such as commercial, assembly, and/or _____ is not of approved fire-resistive construction. Section H-808 OHC. Provide the proper occupancy separations as provided for in the Oakland Building Code. (Note exceptions as provided for in the Housing Code for existing floor assemblies, lobbies and sprinkler systems.)

10. The dead end public hallway(s) at _____ exceed(s) twenty feet (20'). Section H-802 OHC. Provide approved dual means of egress for those rooms which exceed twenty feet (20') from at least two (2) means of egress. An automatic fire extinguishing system (sprinklers) may be used in lieu of said required exits.

11. A Notice to Abate was issued to _____ at the time of inspection for the following observed hazardous condition(s):_____

The date for compliance is _____, and a call back will be made by the Housing Representative on or as soon as possible after that date.

12. There was evidence of the following condition(s) on the premises (which will be outlined if a complete survey is ordered). Correct as stated:
   a. There appears to be an over-use of extension cords in various rooms. Discontinue such use or provide approved receptacles wherever electric appliances are to be maintained, especially units (rooms _____)
   b. Cooking appears to be going on in rooms not so approved. Remove all unapproved cooking facilities and discontinue cooking in areas where not approved.

13. The building contains numerous maintenance and other deficiencies. A full survey will be scheduled in the near future where entry into all accessible areas must be accomplished. Following this survey a letter will be sent to you enumerating all the deficiencies which must be corrected.

OWNER/BUILDER
I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than $500):
☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).
☐ I, as owner of the property, am exempt from the sale requirements of the above due to: (1) I am improving my principal place of residence or appurtenances thereto, (2) the work will be performed prior to sale, (3) I have resided in the residence for the 12 months prior to completion of the work, and (4) I have not claimed exemption in this subdivision on more than two structures more than once during any three-year period. (Sec. 7044, Business and Professions Code).
☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).
☐ I am exempt under Sec. _____, B&P.C. for this reason _____

APPLICANT
I CERTIFY THAT I HAVE READ THIS APPLICATION AND STATE THAT THE INFORMATION GIVEN IS TRUE AND CORRECT. I AGREE TO COMPLY WITH ALL LOCAL ORDINANCES AND STATE LAWS RELATING TO BUILDING CONSTRUCTION AND I MAKE THIS STATEMENT UNDER PENALTY OF LAW. I HEREBY AUTHORIZE REPRESENTATIVES OF THIS CITY TO ENTER UPON THE ABOVE MENTIONED PROPERTY FOR INSPECTION PURPOSES. NOTICE!! THIS PERMIT WILL EXPIRE BY LIMITATION IF WORK IS NOT STARTED IN 180 DAYS OR IF WORK IS ABANDONED FOR MORE THAN 180 DAYS. DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED AND THE INSPECTION IS RECORDED ON THE BACK OF THE JOB COPY OF THE PERMIT. ALL INSPECTION REQUESTS ARE REQUIRED 24 HOURS IN ADVANCE OF THIS PERMIT.
I hereby agree to save, indemnify and keep harmless the City of Oakland, its officers, employees and agents against all liabilities, judgments, costs and expenses which may accrue against the City in consequence of the granting of this permit. Additionally, I certify that I understand and will comply with all provisions of law relating to the construction or occupancy of any sidewalk, street or subsidewalk space, and that I will not occupy or close any sidewalk, street or subsidewalk or otherwise encroach on the public right of way until I have obtained all required permits. I hereby authorize representatives of the City of Oakland to enter onto the above mentioned property for inspection purposes. I certify that I have read the application and state that the above information is correct. I agree to comply with all city ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above mentioned property for inspection purposes. I agree to save, indemnify, and keep harmless the City of Oakland against liabilities, judgments, costs, and expenses which may accrue against the City in consequence of the granting of this permit. Additionally, I understand that I will comply with all applicable laws relating to the construction of, or occupancy of, any building, and that I will not occupy or allow occupancy until a certificate of occupancy has been issued. I understand that I must comply with all regulations relating to installation, construction, occupancy, and maintenance of encroachments into the street right of way. I understand that my failure to comply with any of the above may result in the revocation of my permit and/or other enforcement action. I understand that if I am not the property owner, I must have the property owner's permission to obtain this permit.

OWNER/BUILDER
I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than $500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exempt from the sole requirements of the above due to: (1) I am improving my principal place of residence or appurtenances thereto, (2) the work will be performed prior to sale, (3) I have resided in the residence for the 12 months prior to completion of the work, and (4) I have not claimed exemption in this subdivision on more than two structures more than once during any three-year period. (Sec. 7044, Business and Professions Code).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).

☐ I am exempt under Sec. _____, B&P C. for this reason _____

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business Professions Code: The Contractor's License Law does not apply to an Owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exempt from the sale requirements of the above due to: (1) I am improving my principal place of residence or appurtenances thereto, (2) the work will be performed prior to sale, (3) I have resided in the residence for the 12 months prior to completion of the work, and (4) I have not claimed exemption in this subdivision on more than two structures more than once during any three-year period. (Sec. 7044, Business and Professions Code)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).

☐ I am exempt under Sec _____, B&PC. for this reason _____

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

☐ I am exempt under Sec. ____, B&P.C. for this reason ____

Signature ____ Date ____

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.). 10-1-82

Policy # ____ Company Name ____

☐ Certified copy is hereby furnished.
☒ Certified copy is filed with the city building inspection department.

Signature [signature] Date 8-11-82

(This section need not be completed if the permit is for one hundred dollars ($100) or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation laws of California.

Signature ____ Date ____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

OWNER/BUILDER
I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code), or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than $500)

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business Professions Code: The Contractor's License Law does not apply to an Owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exempt from the sale requirements of the above due to: (1) I am improving my principal place of residence or appurtenances thereto (2) the work will be performed prior to sale, (3) I have resided in the residence for the 12 months prior to completion of the work, and (4) I have not claimed exemption in this subdivision on more than two structures more than once during any three-year period. (Sec. 7044, Business and Professions Code)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

☐ I am exempt under Sec. _____, B&PC for this reason _____

Re: 1803 Harrison Street

Dear Mr. Rubenstein:

A recent inspection by Deputy Building Inspector Demeral of the work being performed at the above address under Building Permit C36284 revealed that the following work is required to be completed:

1. Second handrail required on lower run of front stairs to second floor. Section 3305(g) of the Oakland Building Code.

Please call this office for an inspection when the work as noted above has been completed.

If there are any questions, feel free to call Mr. Demeral, 273-3588, between 8:00 and 9:00 a.m., Monday through Friday.

Very truly yours,

PETER A. CHTCHLOW
Supervising Building Inspector

By
C. N. DEMERAL

CERTIFIED LETTER
RETURN RECEIPT REQUESTED

Louis Rubenstein
2815 San Pablo Avenue
Oakland, California 94608

Re: 1805 Harrison Street

Dear Mr. Rubenstein:

An inspection of the premises at the above address by Deputy Building Inspector Staton revealed that the work has not been completed as required by the Oakland Building Code.

A review of our letters of November 8, 1969 and January 19, 1970 and our conversation of December 9, 1969 will acquaint you with our concern in this matter.

Since the required work has not been done, it now becomes necessary for you or your representative come to the Building Division office, 11th floor, City Hall at 9:00 a.m., on Monday, February 16, 1970 in order that we may review your responsibility and our concern in this matter.

Very truly yours,

PETER A. ORTOLJO
Supervising Building Inspector

By
C. STATON
Deputy Building Inspector

CS:jb

January 19, 1970

Louis Rubenstein
2813 San Pablo Avenue
Oakland, California 94608

Re: 1805 Harrison Street

Dear Mr. Rubenstein:

A reinspection by Deputy Building Inspector Staton of the work being performed at the subject premises under Building Permit C36204 revealed that the work has not been corrected as requested in our letter of November 6, 1968.

Please have the second handrail installed on lower run of front stairs to the second floor in accordance with Section 3305(g) of the Oakland Building Code. This work is to be done within ten days from the date of this letter, after which time the premises will be reinspected for compliance.

If there are any questions, feel free to call Mr. Staton, 273-3586, between 8:00 and 9:00 a.m., Monday through Friday.

Very truly yours,

PETER A. CATOLJO
Supervising Building Inspector

DOCUMENTATION OF UNREASONABLE HARDSHIP/EQUIVALENT FACILITATION FOR HANDICAPPED ACCESS

PROJECT NAME: Rooney, Ida, Nolt & Ahern DATE: November 16, 1983

ADDRESS OF JOB: 1805 Harrison St. BUILDING PERMIT NO.

The above named project has been granted an exception from the requirements of the State of California Title 24 accessibility standards, based upon the following criteria:

1. The cost of the access feature(s) is 5,200.

2. The cost of all construction contemplated is 41,000.

3. (a) The impact of proposed improvements on financial feasibility of the project is Puts project over budget.

(b) The access feature increases the cost of construction by 13 %

4. The accessibility feature(s) which would be gained or lost is Clearance next to door & at urinal height of towel dispenser.

5. Type of facility under construction is office remodel

It is used by the general public for the purpose of

The following persons provided information on the above section:

Sausal Corporation (FIRM)	Rooney, Ida, Nolt & Ahern (FIRM)
422 Whitney St., San Leandro, Ca. 94577 (ADDRESS)	1805 Harrison St., Oakland, Ca. 94612 (ADDRESS)
(SIGNATURE)	Richard D. Clark (SIGNATURE)

The determination of unreasonable hardship and this documentation do not allow a blanket exemption from the access requirements. The exception provided for by this form applies to the following item of the project.

1. Providing 18" clear next to doors at interior of restroom

2. Moving Urinal Screen 5" to obtain 30" clear.

3. Relocating towel dispensers down to 40".

AS SPECIFIED BY TITLE 24 (check one)

( ) 1. Equivalent facilitation will be provided, as specified in Section
( ) 2. Equivalent facilitation will be provided, as determined by this enforcing body. SEE SECTION
( ) 3. No provision of equivalent facilitation is necessary. See Section
( ) 4. The approval of an appeals board is necessary to ratify the determination of unreasonable hardship. See Section and Section 2-105(b) 11D.

This documentation and determination of unreasonable hardship was developed in consultation with:

JAMES W. BARTHMAN
Manager-Chief Building Inspector
Enforcing Official

DATE 12-4-83

Handicapped Review Committee will grant an exception to them totaling complying, if the metal partitions supporting the toilets is removed and the vanity is cut back if possible. This will be considered equal facilitation. Note: Twenty-nine (29) inches should be provied under the vanity.

Signature [signature] Date 1-10-84

(This section need not be completed if the permit is for one hundred dollars ($100) or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Signature Date 1-10-84

Maryann Minton Co-owner

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

LENDERS NAME
LENDERS ADDRESS

I CERTIFY THAT I HAVE READ THIS APPLICATION AND STATE THAT THE INFORMATION GIVEN IS TRUE AND CORRECT. I AGREE TO COMPLY WITH ALL LOCAL ORDINANCES AND STATE LAWS RELATING TO BUILDING CONSTRUCTION AND I MAKE THIS STATEMENT UNDER PENALTY OF LAW. I HEREBY AUTHORIZE REPRESENTATIVES OF THIS CITY TO ENTER UPON THE ABOVE MENTIONED PROPERTY FOR INSPECTION PURPOSES. NOTICE: THIS PERMIT WILL EXPIRE BY LIMITATION IF WORK IS NOT STARTED IN 90 DAYS OR IF WORK IS ABANDONED FOR MORE THAN 90 DAYS. DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED AND THE INSPECTION IS RECORDED ON THE BACK OF THE JOB COPY OF THIS PERMIT. ALL INSPECTION REQUESTS ARE REQUIRED 24 HOURS IN ADVANCE OF THE INSPECTION.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Contact: Rob Campbell

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GeoSolve were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

All that certain real property situated in the City of Oakland, County of Alameda, State of California, described as follows:

Beginning at a point on the northwestern line of Harrison Street, distant thereon North 26° 15' East 1002.38 feet from the point of intersection thereof, with Northeastern line of 14th Street, also distant North 26° 15' East along said line of Harrison Street, 68.76 feet from the point of intersection thereof, with northeastern line of 17th Street, as said streets now exist; running thence North 26° 15' East along said line of Harrison Street, 38.13 feet to a point distant South 26° 15' West 293 feet, 3 inches, from the point of intersection of said line of Harrison Street, with the Southwestern line of 19th Street; thence North 63° 45' west 150 feet; thence South 26° 15' West 38.13 feet to the point of intersection with a line drawn North 63° 45' west from the point of beginning; thence South 63° 45' East 150 feet to the point of beginning.

CERTIFICATE OF ACCEPTANCE

The HOUSING AUTHORITY OF THE CITY OF OAKLAND California, a public body Corporate and politic ("Grantee"), hereby accepts the Grant Deed from Zvi Ben-Joseph and Rosalie Ben-Joseph, Trustees of the Ben-Joseph Family Trust dated 8/10/00, of the *fee simple (or other interest if not fee)* interest in that real property in the City of Oakland, County of Alameda, State of California, more particularly described in the Grant Deed attached hereto and incorporated herein by this reference.

IN WITNESS WHEREOF, Grantee has executed this Certificate of Acceptance by its duly authorized officer this 18th day of July 2006.

GRANTEE:

THE HOUSING AUTHORITY OF THE CITY OF OAKLAND

Date: July 18, 2006

BY: _____
Jon Gresley, Executive Director

THE BOARD OF COMMISSIONERS OF THE HOUSING AUTHORITY OF THE CITY OF OAKLAND, CALIFORNIA

On Motion of Commissioner Terrazas

Seconded by Commissioner Pittman

and approved by the following vote:

AYES: Commissioners Brown, Lee, Pittman, Terrazas and Chair Mayne

NAYS: None

ABSTAIN: None

EXCUSED: Commissioner Taylor

THE FOLLOWING RESOLUTION WAS ADOPTED: NUMBER 3773

ACKNOWLEDGING THE PURCHASE OF THE OFFICE BUILDING AT 1801 HARRISON STREET FOR $1,750,000 OF LOCAL FUNDS AND FINDING THAT THE PURCHASE IS EXEMPT FROM THE CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) PURSUANT TO STATE REGULATIONS AS EXISTING PROPERTY AND AUTHORIZING THE EXECUTIVE DIRECTOR TO FILE A NOTICE OF EXEMPTION WITH THE STATE OF CALIFORNIA

WHEREAS, the Oakland Housing Authority (Authority) has need of additional office space to provide services in support of its mission; and

WHEREAS, the Authority currently owns the office building at 1805 Harrison Street and the parking lot at 1733 Harrison Street and desires to purchase the building at 1801 Harrison Street which is located between two Authority-owned parcels, at a unique location that provides the opportunity for administrative efficiencies to Authority operations; and

WHEREAS, the Board of Commissioners has authorized Authority staff to tender offers to purchase the property at 1801 Harrison Street with $1,750,000 of Local Funds in a closed session on June 14, 2006.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COMMISSIONERS OF THE HOUSING AUTHORITY OF THE CITY OF OAKLAND, CALIFORNIA:

THAT, the purchase of 1801 Harrison Street with Authority Local Funds at a market based price of $1,750,000 as previously approved by the Board is hereby acknowledged and the acquisition of 1801 Harrison Street is exempt from CEQA pursuant to Section 15301 of the California Code of Regulations which applies to existing facilities such as this property; and that the Executive Director, on behalf of the Authority, is hereby authorized to file a Notice of Exemption with the State of California; and

THAT, the Executive Director, on behalf of the Authority, is hereby authorized to take all actions necessary to implement the foregoing resolution.

I certify that the foregoing resolution is a full, true and correct copy of a resolution passed by the Commissioners of the Housing Authority of the City of Oakland, California on June 26, 2006.

Secretary/Executive Director

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILD FAX® PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of GeoSolve on Oct 19, 2015.

TARGET PROPERTY

1750 Webster Street
Oakland, CA 94612

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

EXECUTIVE SUMMARY

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Water

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Tierra

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 6.5 Min: 5.1
2	11 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 7.3 Min: 5.6
3	31 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6

RECORD SOURCES AND CURRENCY

To maintain currency of the following databases, EDR contacts the appropriate agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

PRP: Potentially Responsible Parties
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

A listing of verified Potentially Responsible Parties

Date of Government Version: 10/25/2013
Number of Days to Update: 3
Last EDR Contact :05/14/2015
Source: EPA
Telephone: 202-564-6023

RMP: Risk Management Plans
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

DEED: Deed Restriction Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

ENVIROSTOR: EnviroStor Database

Standard Environmental Record Source: State and tribal - equivalent CERCLIS
Search Distance: 0.333 Mile

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

HAZNET: Facility and Manifest Data

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Standard Environmental Record Source: Federal CERCLIS
Search Distance: 0.333 Mile

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Number of Days to Update: 94 Telephone: 703-412-9810
Last EDR Contact :05/29/2015

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RCRA-SQG: RCRA - Small Quantity Generators

Standard Environmental Record Source: Federal RCRA generators list

Search Distance: Property

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

Standard Environmental Record Source: Federal RCRA TSD facilities list

Search Distance: 0.333 Mile

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

UMTRA: Uranium Mill Tailings Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.25 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: 02/20/2007

RECORD SOURCES AND CURRENCY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

RGA LUST ---------- Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

FRANCIS PLATING OF O	***785 7TH ST***	***WSW 1/2 - 1 (0.913 mi.)***	***297***	***488***

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 13 RCRA-SQG sites within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 08/03/2015 has revealed that there are 3 RESPONSE sites within approximately 1 mile of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 08/03/2015 has revealed that there are 15 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 09/14/2015 has revealed that there are 65 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 09/14/2015 has revealed that there are 6 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 14 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
PG AND E GAS PLANT O	FIRST AND WASHINGTON	SW 1/2 - 1 (0.934 mi.)	299	502

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 48 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 40 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Status Date:	09/20/2012
Lead Agency:	ALAMEDA COUNTY LOP
Case Worker:	KLD
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
LOC Case Number:	RO0003100
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Diesel, Gasoline
Site History:	The Site is currently occupied by the Lake Merritt Dental and Ikon Office Solutions located on the northeast corner of Webster Street and 19th Street in Oakland, Alameda County, California. The property totals approximately 0.138 acre and the building is constructed slab-on grade with no evidence of a basement or other sub-grade areas. The Site is located in a commercial area along Webster Street

BUTTNER PROPERTY (Continued) **S112186515**

in central Oakland and is approximately 0.17-mile west of Lake Merrit. To the north of the Site is a Physical Therapy Innovations company and to the east of the property is an open parking lot that separates the Site from Copymat Oakland. On May 2, 2011 AEI conducted a Phase I Environmental Site Assessment and according to their review the Site was historically occupied by a gasoline service station from approximately 1940 to 1966. The former gasoline service station was demolished and cleared in 1966, but no records were on file with the Oakland Building Department, Alameda County Environmental Health Services Department or Oakland Fire Department regarding removal of the underground storage tanks (USTs). Additionally, no documentation was found whether soil samples were collected and analyzed for presence of petroleum hydrocarbon contamination following the demolition of the station. On July 20, 2011, AEI advanced three soil borings (SB-1 through SB-3) and collected five soil and three groundwater samples from all three locations. Total Petroleum Hydrocarbons as Gasoline (TPH-g) in soil was reported in samples SB-3-16 and SB-3-20 at concentrations of 8.3 milligrams per kilograms (mg/kg) and 42 mg/kg, respectively. Total Petroleum Hydrocarbons as Diesel (TPH-d) in soil was reported in SB-2-16, SB-3-16, SB-3-20 at concentrations of 7.7 mg/kg, 6.5 mg/kg and 8.7 mg/kg, respectively. Total Petroleum Hydrocarbons as Motor Oil (TPH-mo) in soil was reported above laboratory reporting limit in SB-2-16 at a concentration of 25 mg/kg. TPH-g and TPH-d in groundwater samples were reported at 59,000 micrograms per liter (ug/L) and 200,000 "g/L respectively in SB-3. On August 22, 2012, SCHUTZE & Associates, Inc. (SCHUTZE) performed a Limited Phase II Subsurface Investigation by advancing two soil borings to 16.5 and 18 ft bgs in the interior of the south tenant space. TPH-g was detected in groundwater samples B1-18-W and B2-16.5-W at respective concentrations of 400 and 6,000 "g/L. TPH-d was detected in groundwater samples B1-18-W and B-2-16.5-W at respective concentrations of 1,100 and 3,800 ug/L. Ethylbenzene and Xylenes were detected in the groundwater sample from B2-16.5-W at concentrations of 210 and 680 ug/L, respectively. Benzene, toluene and MTBE were not detected in soil and groundwater samples. The results from this Limited Phase II Subsurface Investigation can be found in Appendix B. ACEH has approved a workplan for vapor intrusion assessment and groundwater investigation.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Contaminants of Concern:	Benzene, Gasoline
Site History:	One 1,000-gallon gasoline UST was removed on August 3, 1992 and two 500-gallon USTs were removed on August 6, 1992. The tanks had been located in the sidewalk. Samples collected beneath the tanks. The maximum concentrations were detected near the USTs at 1,500 mg/kg TPHg and 12 mg/kg benzene. Nine soil borings were installed in July 1994 to investigate the extent of the release. Three were converted to monitoring wells.

LOC Case Number: RO0000143
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp. The subject site was used as a service station until 1972 when the site was demolished and the tanks removed. The station building, two dispenser islands, one waste oil UST, and two gasoline USTs were removed. An earlier generation of USTs had previously been removed. Since 1975 it has been used as a parking lot. A soil vapor survey was conducted in 1988 to determine if the site had been impacted, three wells were installed in October 1988, four wells were installed in 1989, four wells were installed offsite in June 1990, two offsite wells were installed in October 1991, and another two wells were installed offsite in late 1992, for a total of 16 wells. Limited soil excavation was conducted in January 1992. An SVE system operated onsite in 1993, but showed minimal effectiveness. In June 2004 the first generation UST pit was investigated and impacts were discovered. In April 2007 four bores were installed to investigate the extent of contamination associated with the first generation

CHEVRON #9-0020 (Continued) **S110060468**

USTs. In June 2007 a vapor survey was conducted and elevated concentrations were detected in all vapor points. In early 2008 105 bucket auger bores were installed to remove impacted soil associated with the first generation USTs. A report on the installation of a post-remediation groundwater monitoring well and the installation of several soil bores to infill a data gap in the downgradient extent of the groundwater plume was generated. Well MW-17 was installed in October 2010. Additional excavation of soil impacted by the second generation USTs and the waste oil UST was conducted between January and June 2011 as part of the redevelopment project for the subject site.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker:	MYM
Local Agency:	Not reported
RB Case Number:	01-0739
LOC Case Number:	RO0000266
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Site investigations were conducted at various times from July 1990 to October 1996. In December 1993, two 1,000-gallon gasoline underground storage tanks were removed from beneath the sidewalk along Harrison Street. In addition, three hydraulic lifts, one vault, one wash rack sump, and associated piping were reportedly excavate and removed from the site. A total of approximately 240 cubic yards of hydrocarbon-impacted soil was reportedly removed from these areas. Soil vapor extraction and air sparging remediation was conducted from December 2001 through April 2005. Not all historic documents for the fuel leak case are available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LOC Case Number:	RO0002992
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Two underground fuel tanks were closed in place beneath the sidewalk at 1424 Harrison Street in 1982. The tanks were filled with cement slurry. Site investgiation activities conducted for a relase from a UST system at the adjacent property at 1432 Harrison Street, detected petroleum hydrocrbons in soil adjacent to and beneath the USTs closed in place at 1424 Harrison Street. Further investigation of the site was requested. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Environmental Interest/Information System
US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

Registry ID: 110014376380

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker:	KLD
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
File Location:	Local Agency
Potential Media Affected:	Under Investigation
Potential Contaminants of Concern:	Heating Oil / Fuel Oil
Site History:	Petroleum hydrocarbons were detected in soil samples collected during the removal of two underground storage tanks (USTs) from the site. The USTs were described as home heating oil tanks. The fuel leak was investigated. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp

LOC Case Number: RO0002984
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Heating Oil / Fuel Oil, Lead
Site History: In 2006, the site was being redeveloped with a multi-story office building. During construction activities, an UST was discovered and subsequently removed. Elevated concentrations of petroleum hydrocarbons were detected at the site. Several borings were installed to delineate the extent of the groundwater contaminant

Description:	The 4.259-acre site is located in Alameda County, CA within the city of Oakland. The Hotel Oakland (former Army Hospital building) has been renovated several times since Department of Defense (DoD) activity was terminated. Current owners of the associated parcels include Hotel Oakland Associates, ICH Associates, and four private owners.
History:	In 1943, the U.S. acquired 12 leases for a total of 4.259 acres. The site was used as a station hospital by the U.S. Army Medical Corps. In 1946, 1.377 acres were transferred to the Veterans Administration

OAKLAND AREA HOSPITAL SITE (Continued) **1007211913**

(VA). In 1947, the remaining acres were transferred to the VA. No potential hazards have been identified at this site.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Lead Agency:	ALAMEDA COUNTY LOP
Case Worker:	KLD
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	NA
LOC Case Number:	RO0002922
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Gasoline
Site History:	The three underground storage tanks (USTs) were removed from operation in May 1986. Four soil samples collected at the time of removal were below the detection limits. However, no groundwater samples were collected at the time. Subsequent sampling beginning in 2001 detected elevated petroleum hydrocarbons in soil and groundwater. In addition, PCE, TCE, cis-1,2-DCE and a%g/L vinyl chloride were detected in water samples collected at the site The site was converted to a condominium building with parking and commercial on the lower floor. SOil vapor sampling and downgradient extent of groundwater contamination sampling requested.

Threat to Water Quality:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Treat To Water:	Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.
Complexity:	Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: June 23, 2006 a phase II environmental assessment was performed. Petroleum hydrocarbons and oxygenates were observed in soil samples. Groundwater samples were not collected. Additional investigation was

SHORE ACRES GAS (Continued) **S108418274**

proposed and approved however, this was not performed. In August 2009, three 12,000-gallon USTs, dispensers and piping were removed from the site. Confirmation samples indicated elevated petroleum hydrocarbon concentrations in soil and groundwater.

Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	NA
LOC Case Number:	RO0002435
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp. In 1986 tank basin soil and a groundwater sample were collected during the replacement of USTs in a pre-existing tank basin; hydrocarbon concentrations were encountered. Sixteen soil vapor wells are reported to have been installed in 1986 and 1987 over the BART tube, located directly below the site; however, no data has been submitted. In 1992 a groundwater sample was collected from a former vadose zone well (VW-2) and concentrations of concern were encountered; however, the location of VW-2-1 is unknown. In July 1994 product lines were removed and upgraded and low hydrocarbon concentrations were encountered. In March 2000 eight hand-augered bores were installed at the site; most bore depths were limited to 10 feet by the presence of the BART tube. In Mach 2002 wells MW-1 to MW-3 were installed on either side of the BART tube and right-of-way. In April 2012 soil bores B-9 to B-12 were installed to define the downgradient extent of the dissolved-phase groundwater plume. Groundwater was collected; however, appeared to define a deeper non-impacted groundwater zone. The groundwater plume was defined using the LTCP groundwater technical justification paper 90th percentile plume length, and conducting a downgradient sensitive receptor survey for water supply wells and potential basements that might encounter the impacted groundwater.

Lead Agency: ALAMEDA COUNTY LOP
Case Worker: MD
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: 01-0210
LOC Case Number: RO0000151
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Benzene, Gasoline
Site History: Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp. On June 16, 1987, three gasoline underground storage tanks (USTs) were removed from the Site and a suspect unauthorized release was confirmed. Two USTs had a capacity of 1,000 gallons and one UST held 550 gallons of gasoline.

BLUE PRINT SERVICE CO. (Continued) **S101624487**

Soil was reportedly excavated to 9 feet bgs, aerated onsite for one month to acceptable levels (no confirmation samples were analyzed), and used as fill material to backfill the UST excavation. Groundwater monitoring wells MW-1 through MW-3 were installed in June 1987 and well MW-1 initially contained 30 inches of free phase floating product. Free product also detected in monitoring well at off-site down-gradient property. Free phase has not been seen recently in site or vicinity wells; however, groundwater concentrations in onsite well MW-1 and off-site well MW-5 are substantially above concentrations that the LTCP Soil Vapor Technical Justification paper states is indirect evidence of free phase. At a minimum substantial residual soil contamination appears to reside at or below the depth of the UST excavation to groundwater, generally encountered at a depth of approximately 22 to 23 feet below surface grade. Not all historic documents for the fuel leak case may be available on GeoTracker. A complete case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Case Type:	LUST Cleanup Site
Status:	Completed - Case Closed
Status Date:	06/30/2010
Lead Agency:	ALAMEDA COUNTY LOP
Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	NA
LOC Case Number:	RO0002947
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Four USTs, located under the sidewalk on 11th Street near the Webster Street intersection were removed from the site in April 1987. Significantly elevated concentrations of soil and groundwater contamination was present at the site. In 1987, borings and monitoring wells were installed at the site. In 1988, a groundwater extraction system began operation. The site was later redeveloped to an multi-story office complex with three floors of sub-grade parking.

Case Worker:	KEN
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	01-0475
LOC Case Number:	RO0000359
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	In August 1990, two gasoline USTs, one waste-oil UST and four dispensers were removed. Maximum soil concentrations detected were 310 mg/kg TPHg, 100 mg/kg TPHd and 0.820 mg/kg benzene from the the gasoline USTs and dispensers. However, free product was observed in groundwater in the waste-oil UST excavation. Subsequent excavation in the waste-oil tank area could not remove the contaminated soil from beneath the building so this was left in place. Monitoring wells were installed in 1994 and were monitored sporadically until 2005 when semi-annual monitoring began. The recent investigation in 2009 indicated groundwater concentrations up to 41,000 a%g/L TPHg, 240,000 a%g/L TPHd, 110,000 a%g/L TPHmo, and 2,800 a%g/L benzene.

Lead Agency Case Number:	2020408
Latitude:	37.80847
Longitude:	-122.273402
Case Type:	Cleanup Program Site
Case Worker:	MS
Local Agency:	Not reported
RB Case Number:	01S0717
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Under Investigation
Potential Contaminants of Concern:	Arsenic, Diesel, Heating Oil / Fuel Oil, Kerosene, Stoddard solvent / Mineral Spriits / Distillates, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	As described in the Limited Phase II Environmental Site Sampling Report dated August 5, 2010, prepared by Basics Environmental, it appears that soil and groundwater contamination at the site consists of petroleum hydrocarbons and heavy metals. The sampling results indicate that diesel, kerosene, motor oil and bunker oil were detected in one grab groundwater sample at concentrations exceeding their respective environmental screening levels (ESLs) for groundwater. Arsenic was detected in two shallow soil samples at concentrations exceeding the ESL for arsenic in shallow soil (0-10 feet).

LOC Case Number:	RO0000358
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Benzene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	A site assessment conducted in 1989 detected 11,000 mg/kg TPHg and 40 mg/kg benzene in soil; 9,500 a%g/L TPHg in groundwater; and 6,100 a%g/L TPHg and 10 a%g/L benzene in soil vapor indicating that a release from the underground storage tanks had occurred. Two gasoline USTs, one diesel UST and one waste-oil UST were replaced in November and December 1991. Soil samples reported up to 10,000 mg/kg TPHg and 130 mg/kg benzene. Groundwater remediation occurred from 1990 to 1993. A 1,000-gallon waste-oil UST was removed on September 22, 1997. Soil samples collected beneath the waste-oil tank were below the detection limits for many constituents with TEPH at 32 mg/kg, TRPH at 120 mg/kg and TTLC lead at 7.2 mg/kg. A P&T groundwater remediation system operated at the site from 1991 until 1996. A dual-phase extraction pilot test was performed 19/11/2001 and found that DPE would be an effective remediation method for the site. An AS/DPE feasibility test was performed in January 2014. The test results indicates focused DPE and/or AS/DPE may be an effective remedial option. Based on the data ACEH suggests preparation and implementation of a CAP using DPE. supplemented by AS if sufficient water is present beneath the site. Groundwater monitoring continues to date.

90019 (Continued) **S101624464**

Potential Contaminants of Concern: Gasoline
Site History: In July 1988 an ATT manhole 300 feet west of the site was found to have gasoline leaking into it, and a request to test the USTs was made. In February 1989 a soil vapor survey (VP-1 to VP-19) was conducted at the site; concentrations indicated a release. In March 1989 wells MW-1 to MW-5 were installed. In June 1990 wells MW-6 to MW-9 were installed offsite. In June 1990 the station was demolished and three 10,000-gallon gasoline USTs and one 1,000-gallon waste oil UST were removed. Well MW-2 was destroyed in the process of overexcavating impacted soil in 1990 and 1991; approximately 1,500 cubic yards were excavated. Of that total approximately 800 cubic yards were aerated and reused onsite. In December 1992 the City of Oakland purchased the property. A parking lot and landscaping was constructed over the western portion of the site and Bay Place was expanded over the eastern portion. In January 1993 a groundwater extraction system was installed in well MW-5. The system was shut down in January 1995 due to low production rates. On December 1, 1995 wells MW-1 and MW-3 were decommissioned. In November 1996 an additional 200 cubic yards of soil was excavated due to the installation of a new storm drain on Montecito Avenue. A one week long two-phase extraction pilot test was conducted on well MW-5 in September 2005. In August 2008 periodic injection of oxygen into well MW-5 was proposed; work was implemented in February 2009.

Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
LOC Case Number:	RO0003138
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Heating Oil / Fuel Oil
Site History:	An underground storage tank (UST) was discovered during excavation on the property near the sidewalk along 21st Street. At the time of discovery, the UST was filled with oily water and low viscosity

CATHEDRAL GARDEN OAKLAND LP IN CARE OF EAH INC (Continued) **S113786072**

petroleum hydrocarbons. The approximately 500-gallon UST was removed from the site on May 20, 2014. Multiple corrosion holes were observed in the middle and bottom of the UST. The soil underneath the UST exhibited a strong petroleum odor. Soil samples collected from the tank pit contained up to 1,100 parts per million (ppm) of total petroleum hydrocarbons (TPH) as diesel (TPHg) and 1,100 ppm TPH as bunker oil. A groundwater sample collected from the tank pit contained 4,600 parts per billion (ppb) of TPH as diesel and 4,700 ppb as bunker oil. Additional soil and groundwater sampling that was completed at the site in July and August 2014 indicated that the residual contamination was generally limited to the area of the former tank pit. The site was evaluated for case closure under the State Water Resources Control Board Low-Threat Underground Storage Tank Closure Policy and was closed on November 25, 2014. Based upon the information available in our files to date, no further investigation or cleanup for the fuel leak case is necessary at this time.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Dichloroethane (DCA), Dichloroethene (DCE), Other Chlorinated Hydrocarbons, Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Arsenic, Lead, Diesel, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	Project is city block bounded by Broadway, 23rd, 24th & Valley Streets. Includes 2301-2345 Broadway; 421-455 24th St.; 444 23rd St.; and 2320-2354 Valley St. The site includes 5 parcels (APN 8-739-2, 8-739-4, 8-739-5, 8-739-7) that have historically been used as commercial facilities including auto dealerships/repair facilities. Associated potential chemical uses, storage, and handling included bulk waste oil in an above ground tanks, hydraulic oil related to lifts, and use of various types of cleaners and lubricants. The site is being redeveloped by Signature Redevopment Group and will include commercial and residential land uses. Phase I and II Environmental Site Assessments have been conducted on different parcels within the redevelopment site since 2001. Soil and groundwater impacts have been identified on four of the five parcels located within the boundaries of the redevelopment proect. Chlorinated and non-chliorinated volatile organic compounds (VOCs) and petroleum hydrocarbons as gasoline, diesel and motor oil have been detected in groundwater. Data indicates that a 1,1-dichloroethane plume exists under the majority of the site. Lead has been detected in shallow soil and at depths up to 13 feet below ground surface. Parcel 8-739-7 is listed as a closed underground storage tank (UST) site (ACEH Fuel Leak Case No. RO0001190 and Geotracker Global ID T06001000957). Two USTs (one 1,000 gallon leaded gasoline UST and one 550 gallon waste oil UST) were removed from the northern portion of the parcel in 1991. Petroleum hydrocarbons and VOCs were detected in confirmation soil

NEGHERBON AUTO CENTER (Continued) **S108751887**

samples collected from the UST pit. One groundwater monitoring well (MW-1) was installed in the tank pit and groundwater monitoring was conducted from 1992 until 1993. The case was closed after four consecutive quarters of non-detects for petroleum hydrocarbons. At the time of closure, low levels of chlorinated VOCs were detected in groundwater. Limiting conditions at the site at the time of the UST removals prevented the over excavation of all impacted soil and thus there may be areas of contaminated soil remaining beneath the building and the sidewalk in the vicinity of the former tanks. Data collected during field investigations conducted in 2006 and 2011 indicate that another source of petroleum hydrocarbons likely exists at the site on parcel 8-739-7. Additional investigation is required to characterize the site including determination of groundwater flow direction, vertical and lateral delineation of contaminants of concern in soil and groundwater, plume stability, and identification of sources of petroeum hydrocarbons and chlorinated VOCs. Electronic submittal of data and documents requested for completeness of database.

Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	The site was redeveloped in 2007 and is currently the site of a Whole Foods Market at the intersections of Bay Place, Harrison Street, and Vernon Street in Oakland, California. The site is approximately 1,000 feet north of Lake Merritt. Surrounding land use is mixed commercial and residential. Two underground storage tanks (USTs) were present at the Site as part of the automobile service facility. The two USTs consisted of a 3,000-gallon waste oil tank, which was removed in December 1988, and a 10,000-gallon gasoline UST, which was removed in January 1994. During the excavation and removal of the 10,000-gallon gasoline UST in January 1994, a hole was observed in the product piping that lead from the UST to the fuel dispenser. Free-phase product was observed on the groundwater surface in the gasoline UST excavation. In June 1994, approximately 100 cubic yards of total petroleum hydrocarbon (TPH) affected soil adjacent to the former gasoline UST and along the western portion of the former product piping route, was excavated and removed. Several soil and groundwater investigations have been conducted at the Site since 1992. The investigations found petroleum contamination in soil and groundwater within the areas of the former USTs and former hydraulic lifts and tanks. Two areas with elevated concentrations of lead were also identified beneath the building. A total of eleven hydraulic lifts along with nine floor drains and associated piping were excavated and removed between June 2005 and November 2005. Approximately 1,010 tons of soil adjacent to the hydraulic lifts was excavated and transported to Waste Managements Altamont Landfill in Livermore, CA for disposal. A total of approximately 285 tons of lead-affected soil was transported to Clean Harbors Class I landfill in Button Willow, CA for disposal. During the period from September 16 to December 16, 2005, a total of approximately 5,000 tons of TPH-affected soil was excavated from the area of the former USTs and transported to Allied Wastes Forward Landfill located in Manteca, CA for disposal. Quarterly and later semiannual groundwater monitoring was conducted at the site between March 1993 and April 2010. The groundwater monitoring data indicate that a plume containing dissolved petroleum hydrocarbons is present in the area of the former USTs and extends beneath Bay Place. The highest concentration of MTBE detected during the most recent sampling event in April 2010 was 1,400 parts per

BILL COX CADILLAC & BUICK (Continued) **S101580351**

billion. No water supply wells or other potential receptors are expected to be affected by the plume. Site investigation and cleanup activities have been completed and it does not appear that the fuel release presents a risk to human health for nearby residents or site workers. Therefore, Alameda County Environmental Health is considering potential closure of the fuel leak case.

LUST REG 2:
Region: 2
Facility Id: 01-0207
Facility Status: Preliminary site assessment underway
Case Number: 494
How Discovered: Tank Closure
Leak Cause: Corrosion
Leak Source: Piping
Date Leak Confirmed: Not reported
Oversight Program: LUST
Prelim. Site Assesment Wokplan Submitted: Not reported
Preliminary Site Assesment Began: 1/2/1965
Pollution Characterization Began: Not reported

BILL COX CADILLAC & BUICK (Continued) **S101580351**

LOC Case Number: RO0000505
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil Vapor
Potential Contaminants of Concern: Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History: The site is a small triangular commercial property located at the intersection of Harrison Street and Bay Place in Oakland, CA. The site was previously a Shell gas station and auto repair facility equipped with three underground storage tanks (USTs), one 550-gallon waste oil tank UST, three dispenser islands, a drive-on hoist, and a station building. The USTs were removed from the center of the property in March 1977, but no records are available that document their removal. Three dispenser islands existed to the west, north, and east of the former USTs. Currently, the site is occupied by a 7-Eleven convenience store and the surrounding area is predominantly a mix of commercial and residential use. During a light pole installation at the site, petroleum impacted soil was observed. Composite stockpile soil samples were collected on November 2, 1992 from the soil generated during the light pole removal and analyzed for Total Petroleum Hydrocarbons as gasoline (TPHg), Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX), lubricating oil, and other heavier petroleum hydrocarbons. The soil sample collected from Soil Pile 1 contained the highest concentrations of 3,200 parts per million (ppm) lubricating oil and 35 ppm Oil and grease (O&G). On March 4, 1993, four soil borings (#1 through #4) were advanced at locations across the site. One soil sample from each boring was analyzed for TPHg, TPHd, BTEX, O&G, Total Petroleum Hydrocarbons as kerosene (TPHk), Total Petroleum Hydrocarbons as mineral spirits (TPHms), and lubricating oil. The maximum concentrations of 7,900 ppm TPHmo and 620 ppm TPHg were detected in the soil sample from boring

7 ELEVEN (Continued) **S102423476**

#4, in the east portion of the site. Six monitoring wells (S-1 through S-6) were installed throughout the site on June 2 through 5, 2008. Soil samples were collected from each boring between 5.5 and 15.5 fbgs, along with one groundwater sample. Groundwater was first encountered at the site between 8.2 and 19 fbgs. The soil samples indicated that the highest concentration of petroleum hydrocarbons occurred in shallow soils between 7 and 10 fbgs. Shallow soils in the southeast portion of the site contained up to 2,300 ppm TPHg, 22,000 ppm TPHd, and 8,600 ppm O&G. Shallow soils near the western-most dispenser contained up to 2,700 ppm TPHg and 270 ppm TPHd. Groundwater samples collected from the former UST area and southeast corner of the site contained TPHg concentrations of 6,500 parts per billion (ppb) and 1,300 ppb, respectively. To investigate the potential for the petroleum plume to extend off-site, two grab groundwater samples (HP-1 and HP-2) were collected down gradient along Harrison Street on May 19 through 21, 2009. The grab groundwater sample collected furthest from the site (HP-2) contained 715,000 ppb O& G, 14,000 ppb TPHg, and 58,000 ppb TPHd, while the closer groundwater sample (HP-1) contained 111,000 ppb O&G. 11,000 ppb TPHg and 36,000 ppb TPHd. The grab groundwater samples indicated the potential for an offsite plume of heavier hydrocarbons. In addition to the off-site samples, four soil borings (B-1 through B-4) were advanced in the former waste oil tank area. The shallow soil sample collected from boring B-1 at 5.5 fbgs contained the highest concentration of O&G at 3,000 ppm. TPHg and TPHd were detected in all borings at maximum concentrations of 920 ppm and 700 ppm, respectively. Three soil vapor probes (SVP-1 through SVP-3) were also installed near the former USTs and waste oil UST and sampled on May 28, 2009. The vapor probes contained up to 530,000 micrograms per cubic meter (a%g/m3) benzene. On February 27, 2010, one soil vapor probe (SVP-2a) and two near sub-slab vapor probes (SVP-4 and SVP-5) were installed. Sampling of the vapor probes on occurred on March 23, 2010. TPHg and benzene were detected in soil vapor near the former USTs at concentrations up to 75,000,000 a%g/m3 and 160,000 a%g/m3, respectively. Soil vapor samples from the two near sub-slab probes did not contain TPHg, benzene, toluene, ethylbenzene, or xylenes (BTEX) at concentrations above the reporting limit. On June 25, 2010, six soil borings (B-5 through B-10) were advanced off-site to investigate contamination south of the site. The investigation revealed a large plume of petroleum hydrocarbons south of the site consisting of O&G, TPHd, and TPHg at maximum groundwater concentrations of 715,000 ppb, 58,000 ppb, and 14,000 ppb, respectively. The highest concentrations were detected along Harrison Street approximately 175 feet southwest of the site The plume does not contain BTEX or other VOCs at concentrations above reporting limits. Since the maximum concentrations within the plume were detected approximately 175 feet downgradient from the site and the types of petroleum hydrocarbons are not consistent with the dissolved phase hydrocarbons detected on site, the plume is most likely from an off-site source. In 2011, a review of historical aerial photos and Sanborn maps identified five potential sources for the off-site heavy petroleum hydrocarbon plume. On March 30, 2011, soil vapor probes SVP-3 through SVP-5 were sampled. Soil vapor probes SVP-1, SVP-2, and SVP-2a could not be sampled due to water in the sampling tubing. Due to anomalous results of up to 190,000 a%g/m3 TPHg in near sub-slab vapor probes SVP-4 and SVP-5, the probes were re-sampled on June 8, 2011. The re-sampling of probes SVP-4 and SVP-5 indicated

7 ELEVEN (Continued) **S102423476**

non-detectable concentrations of TPHg and 2.2 a%g/m3 benzene were present in the near sub-slab wells. Probe SVP-3, located less than five feet north of near sub-slab probe SVP-5, contained 26,000,000 a%g/m3 TPHg, 1,400 a%g/m3 benzene, and 1,700 a%g/m3 xylenes. An air exchange rate test was performed on the existing convenience store building on December 19, 2011. The initial measurements of the air exchange rate indicated an overall average of 3.11 exchanges per hour. Due to a relatively low air exchange rate, the test was followed by system maintenance which increased the HVAC performance to an air exchange rate of 11.49 exchanges per hour. The minimum required air exchange rate was calculated to determine the potential for intrusion of benzene from soil vapor to indoor air to exceed the commercial indoor air Environmental Screening Level (ESL). Using site data and assumptions from EPA and RWQCB documents, the calculated necessary air exchange rate to prevent benzene vapor intrusion at concentrations exceeding the indoor air ESL is 2.3 exchanges per hour. The current air exchange rate is greater than the calculated minimum air exchange rate by a factor of 5.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best

LAKESIDE NON FERROUS METALS (Continued) **S103472374**

management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Description: This site is currently occupied by two buildings and a garage. One building, a two-story fourplex, was used as apartments. The other building is three-stories, with three commercial units on the ground floor and apartments on the upper floors. Harris Dry Cleaners and later Telegraph Dry Cleaners operated in a ground floor commercial unit. Dates of operation and site occupancy for the dry cleaning operations are unknown, but all dry cleaning operations on-site ceased in 1996.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

EUROPEAN MOTORS (Continued) **1000340156**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LA ESCUELITA EDUCATION CENTER (Continued) **S109548309**

Completed Date:	09/08/2010
Comments:	Received additional TEM analytical results for NOA. Additional samples results show non-detect (0.01%) NOA fibers. Fill material from the proposed Doyle Drive borrow source area between Doyle Drive and the Golden Gate Bridge in San Francisco is suitable for fill material. Additionally, DTSC was informed that a second proposed borrow source area, from a quarry in Brisbane, may be used. Additional information and analytical data to be submitted for proposed A/B source area in Brisbane.
Completed Area Name:	PROJECT WIDE

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 06/16/2010
Comments: DTSC responded to comments on the Draft Removal Action Workplan

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Letter - Demand
Completed Date: 03/22/2012
Comments: 1st Collection Letter for Inv. 10SM0895 and 11SM0366.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 06/25/2010
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 05/26/2009
Comments: DTSC received two copies and an e-copy of the Phase I ESA, provided as background information for the project.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Workplan
Completed Date: 08/03/2009
Comments: DTSC conditionally approved the revised PEA workplan. Condition was that gw sample AOC9-B-2 in TPH and VOC analysis.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Oversight Agreement Application
Completed Date: 06/29/2009
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 08/06/2009
Comments: DTSC provided PEA fieldwork oversight.

LA ESCUELITA EDUCATION CENTER (Continued) **S109548309**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Workplan
Completed Date: 12/03/2009
Comments: DTSC approved the SSI workplan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 11/17/2009
Comments: Final Indoor Air Sampling Notice.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Tech Memo
Completed Date: 11/17/2009
Comments: DTSC approved the PEA Technical Memo - Indoor Air Monitoring. Results of the PEA Technical Memo - Indoor Air Monitoring will be reported in the Site PEA investigation report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 11/25/2009
Comments: SSI Field work implemented from Nov 25 through Nov 29, 2009.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 11/23/2009
Comments: Eight hour indoor air monitoring completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/10/2010
Comments: DTSC approved the PEA with a further action determination

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Tech Memo
Completed Date: 12/30/2009
Comments: DTSC approved the SSI Technical Memorandum

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Environmental Oversight Agreement
Completed Date: 06/02/2009
Comments: DTSC approved the Fully Executed Environmental Oversight Agreement with the corrections requested by the Oakland Unified District

Completed Area Name: Phase I OU
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 07/29/2011
Comments: Site certification was issued for the Phase I area (Northwest Area) of the site.

LA ESCUELITA EDUCATION CENTER (Continued) **S109548309**

Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: School Cleanup Agreement
Completed Date: 02/16/2010
Comments: DTSC entered into a SCA with the School District to develop, and implement a Removal Action Workplan, and other activities, under the oversight of DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 04/22/2010
Comments: DTSC approved the SSI report and concurred with the recommendation that a release has occurred and that the response action will be completed in two phases.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 02/01/2010
Comments: PEA public review and comment period ran from December 23, 2009 through February 1, 2010. The Public Hearing was held on January 27, 2010. Based on notice from district, no comments were received from the public during the public review period or at the public hearing. Notice of compliance was provided in the final PEA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 06/28/2010
Comments: DTSC approved for implementation the RAW for the Phase I area.

Completed Area Name: PROJECT WIDE

LA ESCUELITA EDUCATION CENTER (Continued) **S109548309**

Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 05/13/2010
Comments: DTSC finalized the Community Profile Report (CPR). A copy of the CPR is to be placed in the information repositories along with Draft RAW, Draft NOE, Site Fact Sheet, and other related documents.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 05/05/2010
Comments: Not reported

Completed Area Name: Phase I OU
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 05/05/2010
Comments: Draft RAW Phase I published. Draft RAW Phase I public review period will run from May 3, 2010 through June 2, 2010.

Completed Area Name: Phase II OU
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Tech Memo
Completed Date: 05/04/2010
Comments: DTSC approved the SSI Workplan for the Phase II area

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/19/2010
Comments: DTSC provided field oversight of Phase I RAW excavation activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/10/2010
Comments: SSI fieldwork for Phase II area was completed on July 10 and 11, 2010 (Sat. and Sun).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 01/25/2011
Comments: DTSC approved the SSI-II report for the Phase II area of the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 09/08/2010
Comments: Received additional TEM analytical results for NOA. Additional samples results show non-detect (0.01%) NOA fibers. Fill material from the proposed Doyle Drive borrow source area between Doyle Drive and the Golden Gate Bridge in San Francisco is suitable for fill material. Additionally, DTSC was informed that a second proposed borrow source area, from a quarry in Brisbane, may be used. Additional information and analytical data to be submitted for proposed A/B source area in Brisbane.

LA ESCUELITA EDUCATION CENTER (Continued) **S109548309**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 07/19/2011
Comments: DTSC approved the RACR for Phase 1

SLIC:

Region:	STATE
Facility Status:	**Open - Site Assessment**
Status Date:	06/04/2015
Global Id:	T10000007028
Lead Agency:	ALAMEDA COUNTY LOP
Lead Agency Case Number:	RO0003174
Latitude:	37.80227
Longitude:	-122.28173
Case Type:	Cleanup Program Site
Case Worker:	JTW
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium VI
Site History:	This case was formerly part of Alameda County Environmental health case RO0002586 (GeoTracker Global ID SL0600130797). This case applies to the APN parcel 1-223-7, which includes the site building and eastern portion of the former Francis Plating facility. The site was operated as a plating facility from approximately 1957 to 1998. In 1998, the property was found to be abandoned with chemicals and equipment on site. As part of an emergency response action, the U.S. Environmental Protection Agency removed abandoned chemicals and equipment and excavated shallow soil in areas without asphalt or concrete coverings. The site building is currently occupied by a circus and fitness facility. Vapor intrusion evaluations were conducted within the site building in 2013. The property owner has submitted a Site Management Plan and draft Covenant and Environmental Restriction with the intent of obtaining case closure. This case (RO0003174) is under evaluation for closure. Case RO0002586 which applies to the western portion of the former plating facility will require additional investigation and remediation.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Application
Completed Date: 10/17/2014
Comments: DTSC identified as Lead Agency

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/01/1995
Comments: Certificate of completion for removal and disposal of asbestos containing materials.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 04/21/1989
Comments: The report was prepared prior to DTSC's involvement with the site. The report documented soil sampling and/or inspection of drainage ditches, an underground vault, underground pipes, other areas with potential environmental concerns.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 03/13/1990
Comments: This report was prepared prior to DTSC's involvement with the site. The report is an abbreviated Environmental Site Assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 01/28/2015
Comments: The investigation was conducted prior to DTSC's involvement with the site. The report documented investigation of soils for metals and polynuclear aromatic hydrocarbons (PAHs).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 01/05/1995
Comments: The assessment was conducted prior to DTSC's involvement with the

MERRITT TWO SITE (Continued) **S112875990**

site. The report recommended additional characterization of shallow soils for hydrocarbons, asbestos, creosote-related compounds, and lead.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 12/30/1994
Comments: The report was prepared prior to DTSC's involvement with the site. The report documented environmental conditions related to historical operations of environmental concern including a lumber yard, asbestos factory, and a fuel dispenser. Surface soil samples were collected for lead and asbestos analysis. Subsurface soil samples were collected in the area of the suspected former underground storage tank (UST).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 07/25/1995
Comments: The report was prepared prior to DTSC's involvement with the site. The report documented shallow soil testing results for hydrocarbons, polynuclear aromatice hydrocarbons (PAHs), asbestos and lead.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 01/18/2005
Comments: The report was prepared prior to DTSC's involvement with the site. The report documented site conditions after construction of the SAF Keep Storage Facility in 1997.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 10/15/2014
Comments: The report was prepared prior to DTSC's involvement with the site. The report documented site conditions after the SAF Keep Storage facility was constructed in 1997.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/05/2015
Comments: The report was prepared prior to DTSC's involvement with the site. The report documented asbestos containing materials associated with the site buildings.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 03/23/2015
Comments: The Voluntary Cleanup Agreement (VCA) covers tasks for reviewing existing data, reviewing and commenting on a Preliminary Endangerment Assessment (PEA) report, and preparing a Land Use Covenant.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2015

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015

Data Release Frequency: Varies

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/09/2015

Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/01/2015

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

East Map:	5641110 OAKLAND EAST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

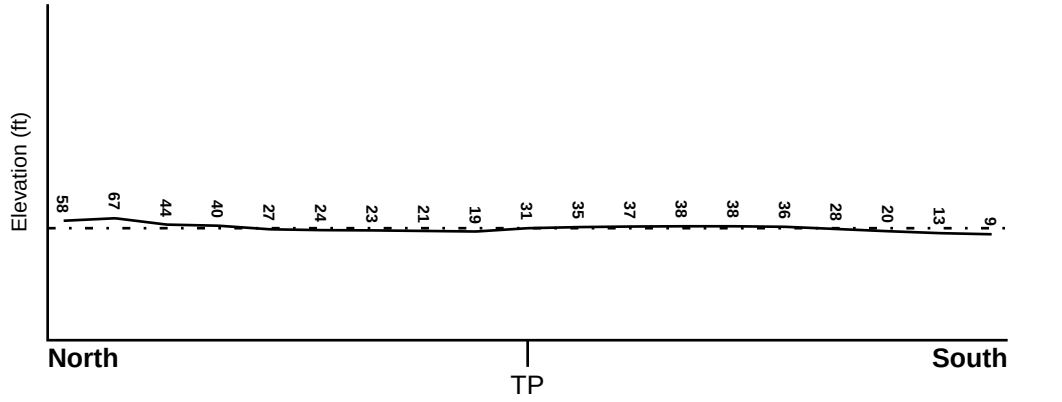
TOPOGRAPHIC INFORMATION

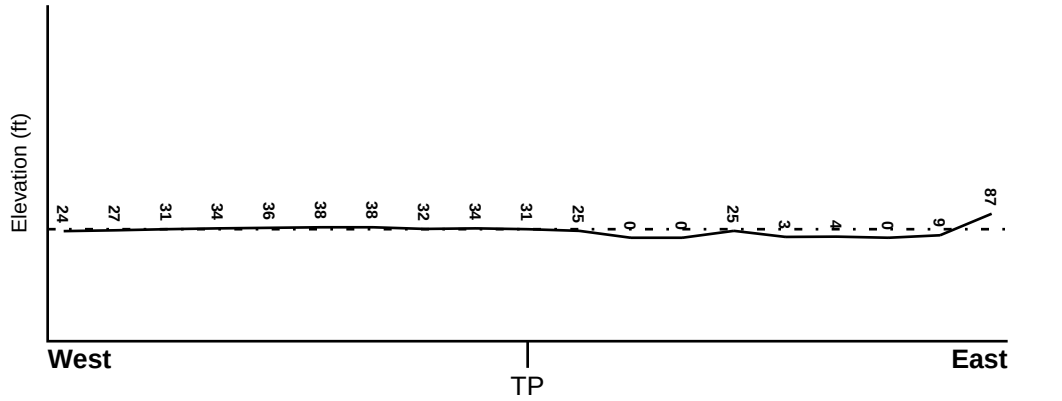
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 31 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
ALAMEDA, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06001C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OAKLAND WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Water

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
