Re: Phase I Environmental Site Assessment Report

Phase-1 Environmental Services is pleased to submit our report describing the findings of the Phase I Environmental Site Assessment (ESA) at **229 & 255 International Blvd., in Oakland, Alameda County, State of California**. This assessment was prepared in general accordance with the American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation: E-1527-13).

The purpose of the Phase I ESA was to identify, to the extent feasible, recognized environmental concerns in connection with the property. This assessment included a site reconnaissance as well as research and interviews with representatives of the occupants and property management.

"I, Stuart G. Solomon, declare that to the best of my professional knowledge and belief: I meet the definition of Environmental Professional as defined in 312.10 of 40 CFR Part 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed All Appropriate Inquiries (AAI) in conformance with the standards and practices set forth in 40 CFR Part 312."

If you have any questions or require further clarification of the report findings, please contact the undersigned at your convenience. Thank you for the opportunity to be of service.

Yours very truly,

Phase-1 Environmental Services

Stuart G. Solomon
Senior Partner, Assessor
ASTM Qualified Environmental Professional

1) INTRODUCTION

Mr. Ralph Masloff (the Client) engaged Phase-1 Environmental Services (Phase-1 ES) to conduct a Phase I Environmental Site Assessment (ESA) of the property consisting of two parcels located at 229 through 255 International Blvd., in the City of Oakland, County of Alameda, California, subsequently referred to in this report as the "Property". This assessment was prepared in general accordance with the American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation: E-1527-13).

1.1) Purpose

The purpose of the Phase I ESA was to identify, to the extent feasible, recognized environmental conditions (REC's) in connection with the property. This assessment included a site reconnaissance as well as research of past studies performed on the Property, interviews with available representatives of the occupants and property management, and research of various available environmental databases and agencies.

1.2) Scope of Services

The Scope of Services for the performance of this Phase I ESA included the following tasks:

- On-site visual reconnaissance of the Property to evaluate on-site activities in respect to hazardous materials use, storage and disposal activities.
- On-site visual survey of the current uses of the immediately adjacent sites, and surrounding area.
- Review of selected historic documentation for the Property to determine what activities have occurred at the subject site since the Property's first developed use.
- Review of reasonably ascertainable regulatory agency files concerning hazardous material use, storage and disposal at the Property and at adjacent and surrounding sites.
- Acquisition and detailed professional review of a current environmental sites radius report (MapHazardsPro Radius Report).
- Preparation of this report in general accordance with the document entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (The American Society for Testing and Materials [ASTM], Designation E 1527-13).
- Interviews with available Property contacts, regulatory officials and personnel associated with the subject and adjoining properties.

1.3) Deviations

No deviations from the recommended scope of ASTM Standard E 1527-13 were required as part of this Phase I Environmental Site Assessment.

1.4) Significant Assumptions

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the

Property may have occurred which could not be identified. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by the Client. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

1.5) Limitations and Exceptions

This Phase I Environmental Site Assessment does not guarantee the condition of the Property. Phase-1 Environmental Services (Phase-1 ES) is not be responsible for conditions or consequences arising from facts and information that is withheld or concealed, or not fully disclosed at the time this evaluation is performed. Conclusions and recommendations made in the report for the Property aerial imagery in nature and are based wholly upon the data obtained and available information reviewed during the assessment. Phase-1 ES is not responsible for errors or omissions in agency or provided files or databases or non-disclosure by Property owners or representatives. To achieve the study objectives for this project we are required to base Phase-1 ES conclusions and recommendations on the best information available during the period the investigation was conducted. Phase-1 ES professional services are performed using the degree of care and skill ordinarily exercised by environmental consultants practicing in this or similar fields. The findings are mainly based upon examination or historic records and reports, maps, aerial photographs and governmental agencies lists. It should be noted that governmental agencies often do not list all sites with environmental contamination; the lists and data used could be inaccurate and/or incomplete. Recommendations are based on the historic land use of the subject property, as well as features noted during the site inspection.

The absence or potential gross contamination sources, historic or present, does not necessarily imply that the subject property is free of any contamination. This project will not include sampling of materials (for example: soil, water, air, mold, building materials).

This Phase I Site Assessment will not include the mention of: recovery, sampling, or reporting of the nature or extent of Asbestos Containing Materials, the presence of Lead-based Paint or any Mold Issues.

Phase-1 ES does not warrant or guarantee that no significant events, releases or conditions could have arisen during the periods with data gaps (if they exist). The Phase I Site Assessment does not include information or advice relating to any environmental issues, laws or environmentally related business decisions that have not been stated in the above outline. No warranties, therefore, are expressed or implied. Phase-1 ES has no liability towards consequential damages. In some cases, an environmental compliance audit may be necessary for a Property. The information and opinions rendered in the report will exclusively for use by the Client. Phase-1 ES will not distribute or publish the report without the Client's consent except as required by law or court order. Phase-1 ES has no responsibilities or liability whatsoever to persons or entities other than the Client if they so choose to use this report.

1.6) Limitations of Liability

Phase-1 ES' total liability to the client for any and all injuries, claims, losses, expenses or damages whatsoever directly or indirectly arising out of or in any way related to this report from any cause or causes, including but not limited to Phase-1 ES' negligence, errors, omissions, strict liability, or breach of contract shall not exceed the total amount of the contract for this project. Phase-1 ES shall not be liable for latent or hidden conditions,

conditions not actually observed by Phase-1 ES, the potential consequences of observable conditions, conditions of which client had knowledge of at the time of the services, or any unauthorized assignment or reuse of the report. Notwithstanding the prior sentence, in no event shall Phase-1 ES be liable to client for any exemplary, punitive, direct or indirect, incidental special or consequential (including lost profits) damages arising from or in any way connected with its performance or failure to perform under the agreement, even if the affected party has knowledge of the possibility of such damages.

1.7) Reliance and Assignment

The Client may rely on the contents of this report. No other person or entity may rely on this report without the express written consent of Phase-1 ES, and no other third party beneficiaries are intended.

1.8) Special Terms and Conditions

The Client for this project requested no special terms, conditions or extraneous services. Therefore, Phase-1 ES implemented no special terms, conditions or extraneous services for this project. Business Environmental Risk concerns have not been addressed for this project. Controlled substances information has not been included, as it is outside the scope of E 1527-13 unless specifically requested by the Client. The Client did not provide Phase-1 ES with any land title or environmental lien records.

1.9) User Reliance

This report may be distributed and relied upon by Mr. Ralph Masloff, His successors and assigns. Reliance on the information and conclusions in this report by any other person or entity is not authorized without the express written consent of Phase-1 Environmental Services.

2) EXECUTIVE SUMMARY, FINDINGS, and OPINIONS

The Property is in an area of primarily Residential and Commercial properties at 229 through 255 International Blvd., in the City of Oakland, California. Its zoning is D-LM-1 (Urban Residential). The Property consists of a single parcel, Assessor's Parcel Number (APN) 20-127-6-3 (identified as 229 International Blvd.) The parcel is approximately 20,388 sq. ft. There are two buildings on the Property – the first, at 229 is single-story concrete block constructed, and approximately 955 sq. ft. under roof, and the second, at 255 is a tall single-story concrete and brick building totaling approximately 3,700 sq. ft.

The existing 229 International building was originally constructed in 1951 as an auto service garage. It is one story, rectangular plan, on the west central part of the parcel. It has a vehicle access door at its northeastern corner. Exterior walls are concrete block. The foundation is concrete slab-on-grade. The roof is flat and composition. Its present use is unknown.

There is asphalted parking and storage to the northeast of the building toward International Blvd. The lot is strewn with vehicles, trash, auto parts, tires, and various junk. There was an older small RV-camper on site that appears may be currently inhabited. To its southwest is a vacant lot portion of the Property. This section is grown over by weeds and shrubbery. Interior access to the lot(s) and building was not possible. Asphalt in the parking/storage area was in relatively poor condition, with fairly significant cracking and mottling observed. Vehicle oil staining was noted in some areas.

The existing 255 International Blvd. building was originally constructed in 1961. It is a single story, rectangular plan, on the corner of International Blvd. and 3rd Avenue at the east side of the parcel. It has a flat roof, aluminum frame and glass door, and entry near the center along International. Exterior walls are stucco over concrete block. The structure is reinforced concrete on concrete slab-on grade. Its present use and occupancy is unknown.

To the west of the building is asphalted parking and storage. This lot is strewn with mostly wrecked vehicles, trash, auto parts, tires, and various junk. Interior access to the lot and building was not possible. Asphalt in the parking/storage area was in relatively poor condition, with fairly significant cracking and mottling observed. Vehicle oil staining was noted in a number of areas.

20 lb. Propane tanks and 5-gallons or less gasoline containers were noted throughout both of the building lots.

There is bare soil in a number of areas of the Property that could not be inspected during the site visit. There was no evidence noted of chemically distressed vegetation, however, a thorough inspection of the Property was not possible during the visit.

A Site Vicinity Map and Property Site Plan are attached to this report as **Figures 1 and 2**, respectively.

Environmental Radius Search Executive Summary

The Property itself is not, and has never been listed on any environmental regulator database.

There are 45 sites listed on the CSL (potentially Contaminated or Cleanup Sites List) within a mile from the Property. Each of the CSL listings were reviewed. Each of them were either; Closed or No Further Action cases, soils only, down or cross-gradient from the Property, or at too great a distance to be of significant environmental concern to the Property.

There are two SUPERFUND (Federal Government Managed) listings – each of them are down and/or cross-gradient, and of no concern. There are 3 TSD (Treatment, Storage and Disposal) sites between ¼ and ½ mile. None of them have violations, and they are of no significant concern. There are four unused or formerly used Defense Sites (DEFENSE) within 1 mile – not of environmental concern.

There are 31 LUST (Leaking Underground Storage Tank) site cases listed within 1 mile of the Property. Each was researched, and are either; fully Delineated, confined, Closed cases or Eligible for Closure, down or cross-gradient, soils only, or at too great a distance to be of significant environmental threat to the Property.

There are 8 HAZMAT generator sites within 1/4 mile of the Property, and 112 listings on the HAZNET database within 1/8 mile. These records were researched, and none are of environmental concern to the Property.

There are 3 ERNS (Emergency Response Notification System) incidents that occurs in 1993, 1995 and 2005 in the vicinity of the Property. None of these incidents had or have had significant environmental impact to the Property.

It is our professional opinion that none of the cases listed on the environmental regulatory databases, including the site itself, pose any significant environmental concerns or liabilities to the Property.

More details on these cases can be reviewed in [Section 12.3](#) of this ESA, and/or in the complete MapHazardsPro Environmental Database Report in **Attachment F**.

Property photographs can be viewed in **Attachment A**.

3) PROPERTY LOCATION AND LEGAL DESCRIPTION

The Property is in an area of primarily Residential and Commercial properties at 229 through 255 International Blvd. (formerly E. 14th Street), in the City of Oakland, County of Alameda, state of California. Its zoning is D-LM-1 (Urban Residential). The Property consists of a single L-shaped parcel, Assessor's Parcel Numbers (APN) 20-127-6-3 (assigned to 229 International Blvd.) The parcel is approximately 20,388 sq. ft. There are two buildings on the site – the first, at 229 is single-story concrete block constructed, and approximately 955 sq. ft. under roof, and the second, at 255 is a tall single-story concrete and brick building totaling approximately 3,700 sq. ft.

A Site Vicinity Map and Property Site Plan are attached to this report as **Figures 1 and 2**, respectively.

4) SITE AND VICINITY DESCRIPTION AND GENERAL CHARACTERISTICS

4.1) Current Topographic Map Review

The Property is located at an elevation of approximately 20 feet above mean sea level (U.S. Geological Survey "Oakland West", CA MRC: 37122G3 - 7.5 Minute Topographic Quadrangle). The area of the Property is relatively flat. Regionally, the general topographic slope of the area varies, but is generally towards the south. The Topographical Map Overview is attached as **Figure 5**.

4.2) Hydrogeologic Review

Santa Clara Valley Groundwater Basin, East Bay Plain Subbasin

- Groundwater Basin Number: 2-9.04
- County: Alameda, Contra Costa
- Surface Area: 77,800 acres (122 square miles)

Basin Boundaries & Hydrology

The East Bay Plain Subbasin is a northwest trending alluvial plain bounded on the north by San Pablo Bay, on the east by the contact with Franciscan Basement rock, on the south by the Niles Cone Groundwater Basin. The East Bay Plain Basin extends beneath San Francisco Bay to the west. Numerous creeks including San Pablo Creek, Wildcat Creek, San Leandro Creek, and San Lorenzo Creek flow from the western slope of the Coast Ranges westward across the plain and into the San Francisco and San Pablo bays (CRWQCB 1999). Average precipitation in the subbasin ranges from about 17 inches in the southeast to greater than 25 inches along the eastern boundary, most of which occurs between the months of November and March.

Hydrogeologic Information

Water Bearing Formations

The East Bay Plain subbasin aquifer system consists of unconsolidated sediments of Quaternary age. Deposits include the early Pleistocene Santa Clara Formation, the late Pleistocene Alameda Formation, the early Holocene Temescal Formation, and Artificial Fill. The cumulative thickness of the unconsolidated sediments is about 1,000 feet (CRWQCB 1999). The average specific yield of the basin was calculated to be about 6% (DWR 1994).

According to FEMA, the Property is in a Zone X – an area of minimal flooding. No areas of potential wetlands were observed on the site during the inspection.

4.3) Current Use and Occupancy of the Property

The current use of the Property appears to be for storage of wrecked and other vehicles, trash, and various junk and other miscellaneous items. Current occupancy is unknown. It appears that the site may be occupied illegally, by squatters or homeless.

4.4) Description of Structures and Property Improvements

Structures

There are two buildings on the Property – the first, at 229 International Blvd. This is single-story concrete block constructed, and has approximately 955 sq. ft. under roof. It is founded on slab-on-grade concrete, and has a flat composition roof. It was originally built in 1951 as an auto service garage. There is a single vehicle access door at its northeastern corner. There was no indication of central heat or AC. There is no fire sprinkler system. The interior of the building was not accessible.

The second building, at 255 is a tall single-story building totaling approximately 3,700 sq. ft. It was originally constructed in 1961. This has a rectangular plan, and a flat, wood framed, composition roof. There is an aluminum frame and glass door entry near its center along International Blvd. Exterior walls are stucco over concrete block. Structure is reinforced concrete on concrete slab-on grade. There was no indication of central heat or AC. There appears to be no fire sprinkler system. The interior of the building was not accessible.

Roads

There are no roads on the Property.

Solid Waste and Sewage Disposal

Solid waste removal and recycling is available through Waste Management. Sewage disposal is via local City sewer lines.

Source of Potable Water

Potable water to the premises is provided by the municipal City supply.

Wells

There was no evidence of water supply, irrigation, oil, injection, or dry wells observed on the Property, however, most areas could not be accessed for verification.

Storage Tanks

There were no visibly noted above ground or evidence of underground storage tanks at or on the Property, however, most areas could not be accessed for verification.

Stained Soil Or Pavement

Asphalt in the parking/storage areas was in relatively poor condition, with fairly significant cracking and mottling observed. Significant vehicle oil staining was noted in a number of areas. Bare soil areas observed did not appear to be significantly stained, however most areas could not be physically inspected.

Current Uses of Adjoining Properties

- To the north of the Property is International Blvd., across from which are single and multi-family residential properties.
- The Property is bound to the south by 3rd Avenue, across from which is the State Employment Development Department Building.
- The Property is bound to the east by the intersection of 3rd and International, across from which are mostly single and multi-family residences.
- To the west of the Property are single and multi-family residences.

5) RECOGNIZED ENVIRONMENTAL CONDITIONS

The goal of the processes established by the practice for conducting environmental site assessments is to identify Recognized Environmental Conditions (REC’s). RECs are the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the Property or into the ground, ground water, or surface water of the Property. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.

There are RECs and potential RECs associated with the subject Property - relating to its known past occupancies and uses, and the current occupancy and physical conditions at the Property.

Past Known Occupancies and Uses RECs:

229-245/ 255 International Blvd. (previously E. 14th St.)

Street #	Business Name	Dates	Notes	Source(s)
229-245	Auto Service Garage	Built 1951	Addressed in Historic Records as 229, but 245 on Sanborn Maps. Called “Fox (Harry J.) Garage” by Calif. Resources Agency	State of Calif. - The Resources Agency. Oakland City Permit No. B36578 - City Historic Record 1 in Attachment C . 1950 & 1952 Sanborn Maps – listed as 245 E. 14 th St. - “Auto Rep.” Attachment D .
237	Journal Press	1938 to 1948		1938, 1944, 1948 HIG Historic City Directories (Attachment E).
237	Elec Printing	1950 & 1952		1950 & 1952 Sanborn Maps Attachment D
255	Oil and Gas Service Station	Built 1926 – on Sanborn Maps until 1957	State of Calif. The Resources Agency – Historic Report states: Station built in 1926	City Historic Record 2 in Attachment C . 1950 & 1952 Sanborn Maps – 255 E 14 th St. - “Oil & Gas”.

255	A.B. Dick Company	1963 to 1973		1963 to 1973 HIG Historic City Directories - (Attachment E).
-----	-------------------	--------------	--	--

The gas station and auto repair facilities are Recognized Environmental Conditions because; during their years of operations on site, Gas Stations and Auto Service Repair facilities operated with few-to-no regulations regarding petroleum storage, handling, or underground fuel storage tank closure processes or requirements. Tanks may have leaked, but more importantly, tanks may still be in the ground at the site, as they were not legally required to be removed. The presence of previous underground fuel tanks would impede and complicate the Property redevelopment and construction activities. Their possible presence needs to be investigated.

Printing operations (ie; Journal Press, Elec Printing and A.B. Dick Co.) during the years of their occupancy, commonly used inks, solvents and chemicals in their processes (that A.B. Dick Co's also commonly sold) that were hazardous and toxic to humans, and have since been banned by regulation. Because of the time that has lapsed since these printing operations existed at the Property, we do not consider these to be significant RECs, or expect that there are any substantial residuals of the potential contaminants remaining on site. Because the Property is being redeveloped for residential occupancy, and to protect against potential liability exposure, we recommend that pre-construction soil testing include tests for these potential contaminants.

Current Site Conditions and Uses - Potential RECs:

Areas of surface oil and what appeared to be petroleum constituents were observed on and in the parking and storage lots during the cursory site inspection. There are also numerous wrecked vehicles on the premises that are covering the surfaces beneath them, which have REC potential. To properly assess site conditions, these vehicles and the litter and trash on the Property will need to be removed, and the site accessed and properly inspected. The same is true of the buildings on the Property. Without access to them, it is not possible to know if there are RECs. In itself, this situation is not a specific REC, but rather a data gap that prevents determining if RECs exist.

6) USER PROVIDED INFORMATON

TITLE RECORDS, ENVIRONMENTAL LIENS, ACTIVITY AND USE LIMITATIONS, SPECIALIZED KNOWLEDGE, VALUE REDUCTION FOR ENVIRONMENTAL ISSUES, COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION:

Phase-1 ES was not provided with any information regarding liens, activity and use limitations, specialized knowledge, or value reductions for environmental issues on the Property.

7) OWNER, PROPERTY MANAGER AND OCCUPANT INFORMATION

The current owner of the Property is Raymond Zhang. Current occupancy is unknown. It appears that the site may be occupied illegally, by squatters or homeless.

8) PREVIOUS ENVIRONMENTAL REPORTS

An Environmental Transaction Screen was performed on the Property by Converse Consultants on October 20, 2007. No additional previous environmental reports were provided nor were any on file with the researched regulatory agencies. This report was not referenced in this ESA, as it is outdated.

9) SITE RECONNAISSANCE

On May 23, 2017, Phase-1 ES conducted a visual reconnaissance of the Property. Phase-1 ES inspected the external visible areas of the Property during the site reconnaissance.

9.1) Methodology and Limiting Conditions

Phase-1 ES visually inspected the exterior areas of the Property from outside the fenced boundaries, however, did not have access to the parts of the Property within the fenced areas or access to the interiors of the buildings on the Property. Property photographs (**Attachment A**), site plans, and notes were taken during the reconnaissance.

9.2) General Site Setting

The Property is in the Northern California San Francisco Bay area, in the City of Oakland, about 0.9 miles to the southeast from downtown Oakland. The southern tip of Lake Merritt is about 1,000 ft. to the northwest. The Brooklyn Basin is about 4,000 ft. due south from the Property. The immediate surrounding areas consist of residential and sparse commercial properties.

9.3) Exterior Observations

At 229, International Blvd., there is asphalted parking and storage to the northeast of the building toward International Blvd. The lot is strewn with vehicles, trash, auto parts, tires, and various junk. There was an older small RV-camper on site that appears may be currently inhabited. To its southwest is a vacant lot portion of the Property. This section is grown over by weeds and shrubbery. Interior access to the lot(s) and building was not possible. Asphalt in the parking/storage area was in relatively poor condition, with fairly significant cracking and mottling observed. Vehicle oil staining was noted in some areas.

At 255, to the west of the building is asphalted parking and storage. This lot is strewn with mostly wrecked vehicles, trash, auto parts, tires, and various junk. Interior access to the lot and building was not possible. Asphalt in the parking/storage area was in relatively poor condition, with fairly significant cracking and mottling observed. Vehicle oil staining was noted in a number of areas.

20 lb. Propane tanks and small (5-gallons or less) gasoline containers were noted throughout both of the building lots.

There is bare soil in a number of areas of the Property that could not be inspected during the site visit. There was no evidence noted of chemically distressed vegetation, however, a thorough inspection of the Property was not possible during the visit.

9.4) Interior Observations

The building interiors were not accessible during the site inspection.

10) INTERVIEWS AND QUESTIONNAIRES

The current Property owner was tended a Property Owner Environmental Questionnaire, which was not returned by the time of this ESA issuance. No other interviews or questionnaires were conducted.

11) HISTORICAL RECORDS REVIEW FOR THE PROPERTY

Standards developed by ASTM E 1527-05 require that the history of a site be established from the present back to the time the Property was first used for residential, agricultural, commercial, industrial or governmental purposes, or back to 1940, whichever is earlier. Sources of such information are typically: interviews, aerial photographs, Sanborn Fire Insurance (Sanborn) Maps, city directories, and local fire, building and health department files. Other historical sources include internet sites, community organizations, local libraries and historical societies, and current owner/occupants of neighboring property.

Phase-1 ES purchased a complete Environmental Database Report from MapHazardsPro, and reviewed available Topographical and Sanborn Maps, City Directories, and Historical Aerial Photographs. The following information is a compilation that comes from these reports, and agency files.

11.1) Historic Sanborn, Aerial Photographs and Topographical Map Reviews

229 through 255 International Blvd. (formerly E. 14th Street), Oakland, CA

Sanborn Fire Insurance maps from 1903, 1911, 1950, 1952, 1957, 1960, 1965, and 1969 for the Property were purchased from Historic Information Gatherers (HIG). Phase-1 ES reviewed low-altitude, black-and-white and color aerial photographs taken in 1946, 1958, 1968, 1980, 1987, 1988, 1993, 2000, 2002, 2005, 2009, 2010, and 2012 to identify areas of possible environmental concerns related to previous land use at the Site or adjacent properties. Topographical maps from 1949 through 1993 were also reviewed. Aerial Photographs were provided by Historical Aerials (NETR Online). Note that; some of the aerial photographs and topographical maps used in this Phase I may be copyrighted. Interpretations of these materials are represented in writing herein in accordance with ASTM standards. Copies of the actual photographs and topographical maps are not always included unless environmental concerns are noted on them. The observations from the aerial photographs, topographical and Sanborn Maps of the Site and immediate vicinity are interpreted and described below in accordance with current ASTM standards.

1903 through 1969 Sanborn Maps

The **1903** Sanborn Map shows 4 residences on the Property. The configuration of the parcels is not what it is today. Surrounding sites to the north, south, and southeast are developed with residences. In **1911**, there appear to be 5 residences on the Property. In **1950**, there appears to be a residence at the 229 lot, an Electric Printing company just to its east at 237 E. 14th Street, an Auto Repair facility at 245 E. 14th, and a Gas and Oil service station at the 255 E. 14th Street address. The other 2 residences remain on the Property. In the **1952** aerial, nothing has changed. In **1957**, the service station, Auto Repair building, and two residences to the south are not shown. The printing company and one residence at the western end of the lot on E. 14th are still present. This remains the same in **1960**. The **1965** aerial shows the existing building at 255 constructed and occupied by an Office Equipment business, which correlates with the Historic City Directories tenant A.B. Dick Co. during this period at the 255 address. The residence at 229 and printing company building at 237 still exist. In the **1969** aerial photograph, the 229 and 237 buildings no longer exist, and are replaced in that area by what appears to be the building that exists today, however, the building use is not denoted on the map – perhaps indicating that it has just recently been, or is in the process of being constructed. There is a small shed to the south of this building.

No environmental concerns were denoted on any of Sanborn Fire Insurance Maps.

1946 Aerial Photograph

In the 1946 aerial, there appear to be multiple residences at the Property surrounded by mature trees.

No environmental concerns noted.

1958 and 1968 Aerial Photographs

The 1958 aerial photograph shows the Property along E. 14th as a commercial type development, however, buildings are not well distinguishable, as the photo quality is poor. The current building at 229 appears to be constructed. In 1968, the current building at 255 appears constructed – again, a poor resolution photo.

1980, 1987, 1988, 1993, 2000, 2002, 2005, 2009, 2010, & 2012 Aerial Photographs

In 1980, the Property appears developed as it is today. This remains with few changes through the remaining aerial photos through 2012.

No environmental concerns are noted.

Topographical Map Overview

Phase-1 ES reviewed 5 Topographical maps related to the Subject Property starting in from 1915 through 1993 to identify areas of possible environmental concerns, bodies of water and evidence of structures.

The 1915 Topographical Map shows sparse residences in the area of the Property. In 1949, the area is shown as fully developed, with no distinction as to structure types. This remains the same through 1993.

No environmental concerns were noted on any of the topographical maps.

11.2) Historic City Directory Review

City Directories have been published for major cities and towns across the United States since the 18th century. Originally, these Directories, published in the 20th century, also included a street index. For each street address, the Directory lists the name of the resident or business operating from this address during a given year. City Directories are a valuable source of historical information as to site tenancy and use. Directories for rural areas were not often published.

Phase-1 ES purchased and researched historic City directories from Historical Information Gatherers (HIG). The complete HIG Research document is contained in **Attachment E**.

The following was extrapolated from the directories researched:

229 International Boulevard

2011 OAKLD TEST ONLY SMOG CENTER
2006 OAKLD TEST ONLY SMOG CENTER
2001 XXXX
1996 NWARA AUTOMOBILE SV
1991 CAM AUTO SALES
1986 CENTRAL USED CARS
1986 COMPLETE AUTMTV RPR
1981 COMPLETE AUTMTV RPR
1976 XXXX
1973 LEES AUTOMOTIVE RPR
1973 MAYES E L
Earlier Directories - 229:

1973 A B DICK COMPANY
1973 DICK A B COMPANY
Earlier Directories - 255:
1968 A. B. Dick Company
1963 A. B. Dick Company
1953, 48, 38, 33 – No Listings

11.3) Environmental Databases and Agency File Records Reviews

Phase-1 ES obtained an environmental research database report by MapHazardsPro dated October 10, 2016 for the Property and surrounding sites. **The complete MHP report is contained in Attachment F of this ESA.** The Alameda County Department of Environmental Health and Oakland City Building Department records concerning the Property were requested. The Health Department is the Certified Unified Program Agency (CUPA) for the City of Oakland.

11.4) Local City Fire Department Records Review

Because the CUPA Agency for Oakland is now the Alameda County Department of Environmental Health, Fire Department records were not requested for this Property. Please refer to Section 11.6) below.

11.5) Local Building Department Records Review

Oakland City Building Department records were researched. Records included Permit/Complaint histories from 1999 through current 2017, including the plans to construct the 8-story mixed-use 94-unit condominium project that is currently in the works. Complaints include Graffiti, overgrowth in rear yard, and an inhabited RV on the Property. Permits for a smog test station, electrical, remodel, signage, and change of ownership dated back to 1999. No earlier records were in the files, however, there were also two historic records from the State of California – The Resources Agency that describe previous early development that took place at the Property back to 1926. None of the recent records contained any information pertaining to environmental activities or concerns, however, the historic records did. See **Attachment B** for copies of these permits and **Attachment C** for the historic records.

11.6) Local Health Department Records Review

The Alameda County Department of Environmental Health records were requested. The agency indicated in an email to Phase-1 ES dated May 16, 2017 that there were no records on file for the subject Property. (Please see **Attachment C** for a copy of their response).

11.7) Additional File Reviews

The California GeoTracker database was researched for the Property. The GeoTracker Overview is shown on **Figure 6**. The Property is not listed on GeoTracker as any past or present case.

The Department of Toxic Substances Control Manifest records for the Property were researched. There were no records for the Property on file. The DTSC report is contained in **Attachment B**.

11.8) Document Data Gaps

ASTM Standard E 1527-13 requires the ESA report to note any data failure from historical research sources, if any; to give reasons why such sources were excluded; and discuss if data failure significantly affects the ability of the Environmental Professional to identify RECs for the ESI.

There is one area of significant data gap(s) that was discovered during this investigation. Areas of the Property within the fenced perimeter were not accessible, nor were the buildings on the Property. Areas of surface oil and what appeared to be petroleum constituents were observed on and in the parking and storage lots during the cursory site inspection. There are also numerous wrecked vehicles on the premises that are covering the surfaces beneath them, which have REC potential. To properly assess site conditions, these vehicles and the litter and trash on the Property will need to be removed, and the site accessed and properly inspected. The same is true of the buildings on the Property. Without access to them, it is not possible to know if there are any RECs. In itself, this situation is not a specific REC, but rather a data gap for determining if any RECs exist. Corrective recommendations are contained in the Conclusions and Recommendations section of this ESA.

12) REGULATORY AGENCY DATABASES REVIEW

ENVIRONMENTAL DATABASES SEARCH FOR THE PROPERTY AND SURROUNDING SITES WITHIN A ONE-MILE RADIUS

The following is extrapolated from an environmental research database report generated by MapHazardsPro on May 21, 2017 for the Property and surrounding sites. **The complete MHP report is contained in Attachment F of this ESA.**

12.1) List of Environmental Databases Reviewed

(The following pages are excerpted from the full MHP report)

MapHazardsPro Radius Search Report

Searched Databases

NPL: National Priority List Sites

Sites which are found on the NPL database or the Proposed NPL database. NPL sites are a special category among National Superfund (CERCLA) Sites listed in the Environmental Protection Agency's (EPA) CERCLIS database. NPL sites are of serious, high concern and priority based on a national comparison to sites needing investigations and contamination cleanup activities (remediation). These sites, some of the worst in the nation, normally contain high levels of various contaminants that have spread over relatively long distances and usually require long term, highly expensive remediation technologies. Proposed NPL sites are of serious concern and are in the process of being evaluated for categorization as National Priority List sites. Delisted NPL sites have been removed (delisted) from the NPL if no further response or action is appropriate at the site, per EPA guidelines.

- US EPA's Superfund Enterprise Management System Database

CORRACTS: Corrective Action Sites

CORRACTS (Corrective Action Sites) is a subset of data found within the Federal RCRA database (RCRIS) or other state database. RCRA Corrective Action is the process by which areas at a hazardous waste facility are evaluated and, if necessary, are cleaned up. Transportation, Storage and Disposal facilities are often also listed as CORRACTS facilities.

- U.S. Environmental Protection Agency's Corrective Action list

TSD: Treatment, Storage and Disposal Sites

TSDs are subsets of data found within the Federal RCRA database (RCRIS) or other state database. TSD sites treat, store and/or dispose of hazardous materials and are federally permitted. TSD facilities are often also listed as CORRACTS facilities.

- California EPA's CUPA facilities database
- San Francisco Dept of Public Health HMUPA Facilities List
- U.S. Environmental Protection Agency's Treatment, Storage and Disposal list

DEFENSE: FUDS and DOD Sites

These sites are Formerly Used Defense Sites (FUDS) and Department of Defense (DOD sites). The U.S. Army Corps of Engineers and/or the U.S. Department of Defense is actively working or will be taking the necessary steps to address any cleanup activities needed on these properties.

- Army Corps of Engineers' Formerly Used Defense Munition Response Sites Layer
- Army Corps of Engineers' Formerly Used Defense Munitions Response Area Layer
- Army Corps of Engineers' Formerly Used Defense Properties Layer
- California Department of Toxic Substances Control's EnviroStor Formerly Used Defense Sites list
- California State Water Resources Control Board's Geotracker Military Site Cleanup List

BROWN: Brownfields Cleanup and Reuse Database

The U.S. Environmental Protection Agency (EPA) defines a Brownfield site as "real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant." Common examples of Brownfield sites are abandoned gas stations and dry cleaners, railroad properties, factories, and closed military bases. Brownfield sites are located throughout the country, and the U.S. EPA as well as state governments have compiled a listing of these sites. Voluntary Cleanup Program Sites are sometimes also included in this category.

- EPA's Assessment, Cleanup And Redevelopment Exchange System (ACRES) database

MapHazardsPro Radius Search Report

Searched Databases

CSL: Contaminated Sites List

State or Local Contaminated Sites databases. These databases include local and state-designated hazardous waste sites, spill sites, superfund sites, voluntary cleanup program sites and land disposal sites. In general, these sites are currently undergoing remediation for on site contamination, remediation has been completed and/or remediation is proposed. In states where a specific Contaminated Sites database is not maintained, the CERCLIS database will contain applicable information on contaminated sites.

- California Department of Toxic Substances Control's EnviroStor list
- California Department of Toxic Substances Control's Permitted Facilities and Corrective Actions
- California State Water Resources Control Board's Geotracker Cleanup Program Sites
- California State Water Resources Control Board's Geotracker Landfill Cleanups List

DEED: List of Deed Restrictions

The implementation of recorded land use restrictions within property deeds is one of the methods agencies use to protect the public from unsafe exposures to hazardous substances and wastes. Sites with deed restrictions are often contaminated, however levels of contaminants and methods used to control migration of contaminants are controlled and approved by the agency. These are also called Environmental Covenants or Use Restrictions

- California Department of Toxic Substances Control's Deed Restrictions list
- California DTSC's HWMP Land Use Restrictions List

SEMS: Superfund Database

Sites which are found on the Superfund Enterprise Management System (SEMS) database. The SEMS database contains information on hazardous waste sites, site inspections, preliminary assessments, and remediation of hazardous waste sites under CERCLA (Superfund). The database contains general information on sites including location and status. This database includes those SEMS sites not included on the NPL or Proposed NPL databases. This includes archived sites determined to be "No Further Remedial Action Planned (NFRAP) sites are contained within this database. Archived sites may be properties where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require Federal Superfund action. The SEMS database is a newer version of the CERCLIS database and the current SEMS version does not export as much information as the CERCLIS database once did.

- US EPA's Superfund Enterprise Management System Database

CONTROLS: Institutional and Engineering Controls

U.S. EPA's and State Engineering Control Sites List and/or Institutional Control Sites List. The Engineering Control Sites list are facilities that have engineered controls in place, such as capping, containment, slurry walls, extraction wells and/or treatment methods that are intended to manage environmental and health risks by reducing contamination levels at a site, or limiting exposure pathways. The Institutional Control Sites list are administrative or legal devices, such as deed restrictions, to ensure that engineering controls stay in place and/or to ensure that land use restrictions stay in place.

- U.S. Environmental Protection Agency's Engineering Controls list

MapHazardsPro Radius Search Report

Searched Databases

LUST: Leaking Underground Storage Tanks

Leaking Underground Storage Tank records contain an inventory of reported leaking underground fuel storage tank incidents. Thousands of underground storage tanks have leaked within the United States, and both open and closed cases are reported on this list. These leaks can affect subsurface soils and groundwater. Both state and local agencies oversee and track these sites.

HAZNET: Hazardous Waste Information System

HAZNET databases track hazardous materials from "cradle to grave". Some of the sites listed are licensed transportation companies but most are facilities that have had hazardous materials transported off the site or have received hazardous materials

- California Department of Toxic Substance Controls's Hazardous Waste Transportation System 1993-2012 Tanner List. Includes Nationally relevant data!
- California Department of Toxic Substances Control's Hazardous Waste Transporters list
- California DTSC's Hazardous Waste Tracking System's Facilities List
- New Jersey Dept of Environmental Protection's Manifest Database

12.2) Database Executive Summary - Subject Property

The Property itself is not and has never been listed on any regulatory environmental database.

12.3) Database - Surrounding Sites Highlights and Summary

There are 45 sites listed on the CSL (potentially Contaminated or Cleanup Sites List) within a mile from the Property. One is between ¼ and ½ mile of the Property, and 11 are between ½ and 1 mile of the Property. The closest Open CSL case is about 820 ft. to the southwest. This case is a school clean-up involving Indoor Air, Groundwater, Soil, and Soil Vapor. Chemicals of concern include; Arsenic, Chlordane, Lead, Methyl tertbutyl ether (MTBE), DDD, DDE, DDT, Polynuclear aromatic hydrocarbons (PAHs), TPH-diesel, TPH-gas, TPH-MOTOR OIL, Polychlorinated biphenyls (PCBs), and Toxaphene. The site is Under Investigation. Groundwater gradient at this site location is to the southeast, which is down and cross-gradient to the Property. As such, this case is of no significant potential environmental impact or concern to the Property.

Each of the remaining CSL listings were reviewed. Each were either; Closed or No Further Action cases, soils only, down or cross-gradient from the Property, or at too great a distance to be of significant environmental concern to the Property.

There are two SUPERFUND (Federal Government Managed) listings – each of them down and cross-gradient, and of no concern. There are 3 TSD (Treatment, Storage and Disposal) sites between ¼ and ½ mile. None of them have violations, and they are of no concern. There are four unused or formerly used Defense Sites (DEFENSE) within 1 mile – not of any environmental concern.

There are 31 LUST (Leaking Underground Storage Tank) site cases listed within 1 mile of the Property. The closest still Open case is about 515 feet to the south of the Property. This is a fuel groundwater case that is down-gradient from the Property and of no significant environmental impact concern. The next closest Open LUST is about 715 ft. to the northeast. This was a heating oil tank removal in 2014 that impacted soil. Negligible groundwater contamination was discovered. Contamination at this site is confined, and does not pose a significant environmental threat to the Property. Each of the remaining LUST cases are either; Closed cases or Eligible for Closure, down or cross-gradient, or at too great a distance to be of significant environmental threat to the Property.

There are 8 HAZMAT generator sites within 1/4 mile of the Property and 112 on the HAZNET database within 1/8 mile. The HAZNET database tracks hazardous materials from "cradle to grave", as well as hazardous materials incidents. HAZMAT cases record disposal of hazardous materials. The records were researched, and none are of environmental concern to the Property.

There are 3 ERNS (Emergency Response Notification System) incidents that occurs in 1993, 1995 and 2005 in the vicinity of the Property. Two of them involved small quantities of petroleum (15-20 gallons) that were dumped or spilled and got into the storm sewer system. The third was raw sewage spilled into the storm sewer. None of these incidents had or have significant environmental impact to the Property.

It is our professional opinion that none of the cases listed on the environmental regulatory databases, including the site itself, pose any significant environmental concerns or liabilities to the Property.

The following page summarizes the environmental database listings. The complete MapHazardsPro database report is contained in **Attachment F**.

12.4) Supplemental to The MapHazardsPro Database Report

There were no supplements required to the MapHazardsPro Report for this Phase I ESA.

13) CONCLUSIONS AND RECOMMENDATIONS

The Property is not, and has never been listed on any regulatory environmental database. The environmental database radius report revealed no sites in the vicinity of the Property that pose a significant environmental risk or liability to the Property.

The site has been occupied in the past by an oil and gasoline station and auto repair facility. These are Recognized Environmental Conditions because; during their years on site, the Gas Station and Auto Service Repair facilities operated with few-to-no regulations regarding petroleum storage, handling, or underground fuel tank closure processes or requirements. Tanks may have leaked, but more importantly, they may still be buried at the site. The presence of previous underground fuel tanks will impede and complicate the Property redevelopment and construction activities. Their presence needs to be investigated and determined. The gasoline station was positioned where the current 255 International Blvd. building exists. We recommend that a sub-surface investigation for underground metal tanks and piping be conducted across this area of the Property. The most conclusive and effective method to accomplish this is by utilizing a subsurface magnetometer search, after the building and its foundation has been demolished and removed. Attempting to do this where a steel-reinforced concrete slab is present is neither reliable, nor conclusive. Ground Penetrating Radar (GPR) has equal (or greater) limitations.

Printing operations: Journal Press, Elec Printing and A.B. Dick Co. existed at the Property in the past. During the years of their occupancy, commonly used inks, solvents and chemicals in their processes were hazardous and toxic to humans, and have since been banned by regulation. Because of the time that has lapsed since these operations existed at the Property, we do not consider these to be significant RECs, or expect that there are any substantial residuals of the potential contaminants remaining on site. Because the Property is being redeveloped for residential occupancy, and to protect against potential liability exposure, we recommend that pre-construction soil testing include tests for these potential contaminants.

There is an area of significant data gap(s) that was discovered during this investigation. Areas of the Property within the fenced perimeter were not accessible, nor were the buildings on the Property. Areas of surface oil spills/leaks and what appeared to be petroleum constituents were observed on and in the parking and storage lots during the cursory site inspection. There are also numerous wrecked vehicles on the premises that are covering the surfaces beneath them, which may be covering REC(s). To properly assess site conditions, these vehicles and the litter and trash on the Property will need to be removed, and the site fully accessed and properly inspected. The same is true of the buildings on the Property. Without access to them, it is not possible to know if there are RECs within. These are data gaps. We recommend that the site be cleared of the vehicles, litter, trash, junk, and illegal occupants, that it be re-inspected, and this Phase I ESA amended to reflect the findings.

The age of the buildings dictates that they must be tested for Asbestos Building Materials and Lead-Based Paint by qualified, licensed inspectors prior to their demolition and debris disposal.

Other than what has been outlined above, no additional environmental inspection or study is recommended - at this time. More details on how we arrived at our conclusions and recommendations are contained in the Executive Summary of this ESA.

14) STATEMENT OF PROFESSIONAL QUALIFICATIONS

Stuart G. Solomon, Co-Founder, CEO

Environmental Professional

**B.A. Sociology, California REA, California Superior Court; Declared Expert Environmental Witness
Environmental Experience, Management, and History:**

- **Environmental Regulatory compliance consultant - 35 years.**
- **Founder, President/CEO, Environmental Technology and Gen-Tech Environmental; 1980-1992.**
 - ◆ Regulatory compliance A-Engineering contractor. Geotechnical engineers.
 - ◆ Removal of over 3,000 underground fuel and chemical storage tanks between 1980 and 1992.
 - ◆ Soil and groundwater geotechnical investigations at more than 2,000 sites.
 - ◆ Soil and groundwater contamination remedial clean-up services provided at 1,500+ sites.
 - ◆ Partial Client List: Bechtel Corporation, Reliance Steel, Santa Clara University, DiSalvo Trucking, Dan Caputo Construction, Golden Gate Petroleum, Selby Petroleum, Lloyd Wise Auto Dealerships, Western States Oil (Pacific Pride), Quikrete, State of California, Valero.
- **Founder, President, PIERS Environmental Services, San Jose, CA – 1992-1999.**
 - ◆ Phase I Site Assessment Specialists. 3,000+ Phase I ESA's performed.
 - ◆ Partial Client List: Borel Bank, Union Bank, Bank of Santa Clara, Cupertino Bank, Washington Mutual, Fremont Bank, Bank of the West, Silicon Valley Bank.
 - ◆ PIERS was sold to its employees in 1999 and is still a leading Environmental Risk Assessment company in the San Francisco Bay area.
- **Co-founder, President, E-Risk Information Services, Inc. - 1997.** Developed a GIS based database for environmental and natural hazard real estate disclosures - first automated system in America.
 - ◆ E-Risk was acquired by Vista Information Solutions, Inc. in late 1999 and the E-Risk NHD system was subsequently acquired from Vista by Fidelity National Title Co. Fidelity renamed the system, and it is currently called: "Disclosure Source".
- **2000-2007 – Co-Founder Environmental Restoration Services South – President, Environmental Consultant – A-Engineering Contractor - Service Station regulatory compliance, new construction, fueling systems upgrades.**
- **2007-2014 – Research and Development** of environmental emissions reduction and alternative fuel systems for diesel engines. Environmental regulatory consultant.

- **2014-Present – Co-Founder Phase-1 Environmental Services** – Phase I Environmental real estate transactions. Environmental Consulting, project planning and management.

Subject: File Review Requests

Hi Alicia,

For some reason I am having problems again with submitting file review request on the ACGOV website. It keeps on telling me "you entered an invalid email address". Don't know why this keeps on happening?

Either way, can I submit the below addresses for review to you?:

229 & 255 International Blvd, Oakland, CA 94606 – addresses are on the same parcel

1420 Santa Maria Street, San Leandro, CA 94577

I appreciate it, thanks Alicia!

*P3. a. Description (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, etc.):

255 EAST 14TH ST is a mid-20th century commercial building. It is one story, rectangular plan, on a corner lot, on the east part of the parcel. It has a flat roof, aluminum frame and glass door, and entry near the center. Exterior walls are stucco over small concrete block. The left half of the building is slightly set back with 4 glazed panels, and the entry in the fifth panel. There is a recent curved awning above, and a row of small industrial windows on the 3rd Avenue side of the building. Structure is reinforced concrete. Present use is office building, Pacific Center.

It was built in 1961, under permit B93274, for owner Abe R. Doty, designed by Cecil S. Moyer, built by E.A. Douplik, at a cost of \$26,000. It replaced a 1926 service station, which in turn replaced the c.1890 house of builder Robert Smilie. As a 1961 building it is not considered of historic interest, nor does it contribute to a potential historic district.

B9a. Architect: unknown

b. Builder: unknown

*B10. Significance: Theme: residential development

Area: Oakland

Period: 1850-1945 Property Type: house

N.R. Criteria: N/A

(Discuss importance in terms of context as defined by theme, period, and geographic scope. Also address integrity.)

240-42 EAST 14TH ST, the LaBlanc (J.)-Doyle (M.)-Koford house, is a very good example of a Colonial Revival house. It was built in 1905-06, architect and builder unknown. It is dated by assessor's block books, and was originally valued at \$2000. Historically the building reflects pre-1906 development, and tract development and speculative building. The original owners and developers, about 1906-10s, were John and Margaret LaBlanc, LaBlanc Oil Company downtown, developed two houses on site of earlier Chapman house. The property is also associated with M.E. Doyle c.1925, owned LaBlanc houses, unidentified, and residents per WPA Survey c.1936, electrician and unemployed real estate agent.

The Oakland Cultural Heritage Survey rates this property C2+ (C, secondary importance or superior example), particularly for its design quality. It is a contributor to the locally important Clinton Park district (Area of Secondary Importance: 2+). Its Survey rating makes it a historic property under Oakland's Historic Preservation Element. It does not appear individually eligible for the National Register, however, since there are more significant examples.

Historical
Information
Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

City Directory Pages/Abstracts

Research Methodology: A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

Oakland 1938-1953, 1963-2011

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

Research Results: City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

3rd Avenue (1938-2011)

International Boulevard/E. 14th Street (1938-2011)

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIM), real estate atlases and similar maps for the site location and adjoining properties. Maps from the HIG Collection were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

1903, 1911, 1950, 1952, 1957, 1960, 1965, 1969

Disclaimer & Limitation of Liability

All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

Research Summary for City Directory Abstract

229 International Blvd
Oakland, CA

Conducted For

Phase-1 Environmental Services
5216 Harwood Road
San Jose, CA

HIG Project

2005528

Client Project

P4-04-10-17

Date Created

05/18/2017

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

Publication year, publisher and title

2011 Haines Oakland

2006 Haines Oakland

2001 Haines Oakland

1996 Haines Oakland

1991 Haines Oakland

1986 Haines Oakland

1981 Haines Oakland

1976 Haines Oakland

1973 Haines Oakland and East Bay

Abstract Section 1- This section includes the city directory data sorted by address.

Research Summary for City Directory Abstract

Historical
Information
Gatherers

Site Location

229 International Blvd
Oakland, CA

Conducted For

Phase-1 Environmental Services
5216 Harwood Road
San Jose, CA

HIG Project

2005528

Client Project

P4-04-10-17

Date Created

05/18/2017

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

Publication year, publisher and title

2011 Haines Oakland

2006 Haines Oakland

2001 Haines Oakland

1996 Haines Oakland

1991 Haines Oakland

1986 Haines Oakland

1981 Haines Oakland

1976 Haines Oakland

1973 Haines Oakland and East Bay

Abstract Section 1- This section includes the city directory data sorted by address.
