PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Posada de Colores
2221 Fruitvale Avenue
Oakland, California 94601

Report Date: June 27, 2017
Partner Project No. 17-189294.1

Prepared for:

The Unity Council
1900 Fruitvale Avenue, Suite 2A
Oakland, California 94601

PARTNER
Engineering and Science, Inc.

June 27, 2017

Ms. Erin Patch
The Unity Council
1900 Fruitvale Avenue, Suite 2A
Oakland, California 94601

Subject: Phase I Environmental Site Assessment
Posada de Colores
2221 Fruitvale Avenue
Oakland, California 94601
Partner Project No. 17-189294.1

Dear Ms. Patch:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in general conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (714) 397-3103.

Sincerely,

Gavin S. Jones, EP
Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by The Unity Council for the property located at 2221 Fruitvale Avenue in the City of Oakland, Alameda County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide The Unity Council with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the southwest corner of Fruitvale Avenue and East 23rd Street within a mixed commercial and residential area of Alameda County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address:	2221 Fruitvale Avenue, Oakland, California
Historical Addresses:	2201, 2203, 2207, 2209, 2215, 2223, 2225, 2227 and 2231 Fruitvale Avenue; 3016, 3022, 3030, 3030A 3038 and 3050 East 22nd Street; and 2927, 2931, 2949 and 3049 East 23rd Street
Property Use:	Senior Living
Land Acreage (Ac):	0.87 Ac
Number of Buildings:	1
Number of Floors:	8
Gross Building Area (SF):	81,571 SF
Date of Construction:	1979
Assessor's Parcel Number (APN):	26-750-31-3
Type of Construction:	Concrete Tilt-Up
Current Tenants:	Posada de Colores with 100 residential units
Site Assessment Performed By:	Michel Helou of Partner
Site Assessment Conducted On:	June 22, 2017

The subject property is currently occupied by Posada de Colores for independent senior living use. On-site operations consist of typical living activities and routine property maintenance. Amenities include a laundry room, recreational/TV rooms, and kitchen area. The subject property consists of an eight-story building located on the east side of the property. In addition to the current structure, the subject property is also improved with asphalt-paved parking area/driveway on the west side, perimeter/gated fencing and landscaped areas.

According to available historical sources, the subject property was formerly vacant land as early as 1903, developed with residential and commercial properties as early as 1912 through circa 1974, vacant between circa 1974 and 1978, and developed with the current structure in 1979. Tenants on the subject property included various markets/grocery stores, residential occupants, dry cleaners businesses, and a doctor's office.

The immediately surrounding properties consist of residences to the north across East 23rd Street; residences to the south across East 22nd Street; residences and commercial properties to the east across Fruitvale Avenue; and residences to the west.

According to online information obtained from the Regional Water Quality Control Board GeoTracker database and topographic map interpretation, the depth and direction of groundwater in the vicinity of the subject property is anticipated to be approximately 15 and 23 feet below ground surface (bgs) and flows toward the southwest.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- According to a review of historical sources and the regulatory database report, the subject property was formerly occupied by a drycleaner business from at least 1950 to circa 1972. Additionally, building records indicated a dry cleaning machine was installed in at the subject property in 1969. Since the 1930s, dry cleaning operations have typically used chlorinated solvents, particularly tetrachloroethylene (PCE), during the dry cleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. No additional pertinent information regarding the former drycleaner was encountered during the course of this assessment. No evidence of a release at the subject property was identified in the regulatory records reviewed for this assessment. However, it should be noted that this business operated during a time of little to no regulatory oversight, which would account for the lack of regulatory records available for review. Based on the use of the subject property as a drycleaner for approximately 22 years and the nature of dry cleaning solvents, this former on-site drycleaner represents a REC.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria

established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Due to the age of the subject property building, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint (LBP) are present. Overall, suspect ACMs and painted surfaces were observed in good condition and do not appear to pose a health and safety concern to the occupants of the subject property at this time.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2221 Fruitvale Avenue in the City of Oakland, Alameda County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions and environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- A limited subsurface investigation should be conducted to determine the presence or absence of soil and/or groundwater contamination due to the historical use of the subject property.
- An Operations and Maintenance (O&M) Program should be implemented to safely manage the suspect ACMs and LBP located at the subject property.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 2221 Fruitvale Avenue in the City of Oakland, Alameda County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential

exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

The Unity Council engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of The Unity Council. Either verbally

or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted the Terms and Conditions for which this report was completed. A copy of Partner's standard Terms and Conditions can be found at http://www.partneresi.com/terms-and-conditions.php.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens and a title search from the Report User. This information was not provided at the time of the assessment.
- Partner was unable to determine the property use at 5-year intervals, which constitutes a data gap. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.
- Partner observed approximately 10% of all interior units and all common areas. Based on the size and nature of use of the unobserved units (residential), this limited method of survey is not expected to alter the overall findings of this assessment.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 2221 Fruitvale Avenue in Oakland, California is located on the southwest corner of Fruitvale Avenue and East 23rd Street. According to the Alameda County Assessor, the subject property is legally described as Assessor Parcel Number 26-750-31-3, and ownership is currently vested in The Unity Council since 1978.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by Posada de Colores for independent senior living use. On-site operations consist of typical living activities and routine property maintenance. Amenities include a laundry room, recreational/TV rooms, and kitchen area. The subject property consists of an eight-story building located on the east side of the property. In addition to the current structure, the subject property is also improved with asphalt-paved parking area/driveway on the west side, perimeter/gated fencing and landscaped areas.

The subject property is designated for residential development by the City of Oakland.

The subject property was identified as a Facility and Manifest (HAZNET) and EDR Historical Cleaner (EDR Hist Cleaner) site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and residential area of Alameda County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties	
North:	East 23rd Street beyond which are residences (2317 Fruitvale Avenue and 2918-2934 East 23rd Street)
South:	East 22nd Street beyond which are residences (2129 Fruitvale Avenue and 3001-3015 East 22nd Street)
East:	Fruitvale Avenue beyond which are residences (2134, 2200 and 2300-2306 Fruitvale Avenue, and 3204-3210 East 23rd Street) and a multi-tenant commercial building including K & Nancy's Nails, Celeste's Beauty Salon and Best Cleaners (2206-2210 Fruitvale Avenue)
West:	Residences (3008 East 22nd Street and 2919 East 23rd Street)

The adjacent property to the east at 2210 Fruitvale Avenue was identified on the EDR Hist Cleaner in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Oakland East, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 90 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the southwest. No structures or anomalies are depicted on the 2015 topographic map.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater in the vicinity of the subject property is inferred to flow toward the southwest. The nearest surface water in the vicinity of the subject property is the Sausal Creek located approximately 700-feet west of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the East Bay Municipal Utilities District (EBMUD) serves the subject property vicinity. Shallow groundwater beneath the vicinity of the subject property is not utilized for domestic purposes. The sources of public water for EBMUD are surface water from the Mokelumne River watershed in the Sierra Nevada Mountains, which accounts for 90% of the utility's water supply, with the remaining 10% obtained from local surface water sources.

According to online information obtained from the Regional Water Quality Control Board GeoTracker database, the depth of groundwater in the vicinity of the subject property is anticipated to be approximately 15 and 23 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is situated within the San Francisco Bay Plain. The area occupies a late Pliocene structural depression that has been flooded several times in response to Pleistocene glacial cycles. A thick Plio-Pleistocene deposit (the Merced formation) occurs here, of which the lower 4,500 feet are marine and the upper 500 feet are mostly non-marine. The portion contains heavy minerals, indicating locally derived sediment. Approximately 100 feet above the marine-non-marine transition, the mineral assemblage changes abruptly to one identical with that carried by the Sacramento River system and derived primarily from the Sierra Nevada. The subject property is underlain by up to 50 feet of unconsolidated to weakly consolidated Pleistocene and Holocene beach sand, marine muds, alluvium, and artificial fill interbedded with marine and marsh deposits. Alluvium overlies Quaternary and Tertiary sedimentary rocks.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urban land-Tierra complex. The Tierra series consists of moderately well drained, loam, to clay, to sandy clay loam soils at a depth of 60 inches. The parent material consists of alluvium. These soils are on fan terraces and slopes range from 2 to 5 percent. The Urban land series are soils in which the soil's original structure and content have been so altered by

human activities it has lost its original characteristics and is thus unidentifiable. Urban soils consist of nearly level to moderately steep areas where the soils have been altered or obscured by urban works and structures. Buildings and pavement typically cover more than 85 percent of the surface.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06001C0086G, dated August 3, 2009, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

A copy of the reviewed flood map is included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	**Source**	**Description/Use**
1903-1912	Sanborn Maps	Vacant
1912-1979	Aerial Photographs, Sanborn Maps, City Directories, Building Records	Residential and Commercial
1979-Present	Aerial Photographs, City Directories, Building Records, Interviews, On-site Observations, Sanborn Maps	Senior Living

According to a review of historical sources and the regulatory database report, the subject property was formerly occupied by a drycleaner business from at least 1950 to circa 1972. Additionally, building records indicated a dry cleaning machine was installed in at the subject property in 1969. Since the 1930s, dry cleaning operations have typically used chlorinated solvents, particularly tetrachloroethylene (PCE), during the dry cleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. No additional pertinent information regarding the former drycleaner was encountered during the course of this assessment. No evidence of a release at the subject property was identified in the regulatory records reviewed for this assessment. However, it should be noted that this business operated during a time of little to no regulatory oversight, which would account for the lack of regulatory records available for review. Based on the use of the subject property as a drycleaner for approximately 22 years and the nature of dry cleaning solvents, this former on-site drycleaner represents a REC.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on June 8, 2017. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date:	***1939, 1946, 1958***	***Scale:***	***1"=500'***
Subject Property:	Appears densely developed with several residential- and commercial-type buildings		
North:	Appears densely developed with residential-type buildings beyond East 23rd Street		
South:	Appears densely developed with residential-type buildings beyond East 22rd Street		
East:	Appears densely developed with residential-type buildings beyond Fruitvale Avenue		
West:	Appears densely developed with residential-type buildings		

Date:	***1963, 1968***	***Scale:***	***1"=500'***
Subject Property:	The central lot appears vacant; no other significant changes are visible		
North:	No significant changes visible		

Date: 1963, 1968		*Scale: 1"=500'*
South:	No significant changes visible	
East:	No significant changes visible	
West:	No significant changes visible	

Date: 1974		*Scale: 1"=500'*
Subject Property:	Appears predominantly vacant with the exception of two residential-type buildings in the southern portion	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible	
West:	No significant changes visible	

Date: 1982, 1993, 1998, 2005, 2009, 2010, 2012		*Scale: 1"=500'*
Subject Property:	Appears developed with the current improvements	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible	
West:	No significant changes visible	

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from EDR on June 8, 2017. The following observations were noted to be depicted on the subject property and adjacent properties during the fire insurance map review:

Date: 1903	
Subject Property:	Depicted vacant
North:	Depicted vacant
South:	Depicted vacant beyond Saunders Street
East:	Depicted developed with an orchard beyond Fruitvale Avenue
West:	Depicted vacant

Date: 1912	
Subject Property:	Depicted developed with seven dwellings throughout the parcel (addressed as 2201, 2203, 2207, 2209, 2215 and 2225 Fruitvale Avenue, 2927, 2931 and 3049 East 23rd Street, and 3016, 3038 and 3050 East 22nd Street), two store buildings on the northeast portion (2217, 2219, 2229 and 2231 Fruitvale Avenue), and auxiliary structures
North:	Depicted developed with Fruitvale Christian Church and dwellings beyond East 23rd Street)
South:	Depicted developed with dwellings beyond East 22nd Street)
East:	Depicted developed with an office building and dwelling towards the east-northeast and undeveloped towards the east-southeast beyond Fruitvale Avenue
West:	Depicted developed with dwellings

Date: 1928	
Subject Property:	Depicted improved with a flats building on the northeast portion and a dwelling on the south portion (addresses include 3016, 3022 and 3038 East 22nd Street, 2203, 2209, 2215, 2221, 2223, 2225, 2227 and 2231 Fruitvale Avenue, and 2927, 2931 and 2949 East 23rd Street); no other significant changes depicted
North:	Depicted improved with an apartment building beyond East 23rd Street; no other significant changes depicted
South:	Depicted improved with dwellings beyond East 22nd Street; no other significant changes depicted
East:	Depicted improved with flats buildings towards the east-northeast; no other significant changes depicted
West:	No significant changes depicted

Date: 1950	
Subject Property:	Depicted improved with a doctor's office building in the southeast portion; no other significant changes depicted (an additional address includes 3030 East 22nd Street)
North:	No significant changes depicted
South:	No significant changes depicted
East:	Depicted improved with a gas & oil station and dwellings towards the east-southeast beyond Fruitvale Avenue
West:	No significant changes depicted

Date: 1957	
Subject Property:	An additional address include 3030A East 22nd Street; no other significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted

1940	No listings
1943	Residential listings (2221 Fruitvale Avenue); physician listing (2201 Fruitvale Avenue); residential listings (2209 Fruitvale Avenue); residential listings (2215 Fruitvale Avenue);

City Directory Search for 2201-2231 Fruitvale Avenue, 3016-3030 East 22nd Street, 2927-2931 East 23rd Street (Subject Property)	
Year(s)	**Occupant Listed**
	residential listings (2223 Fruitvale Avenue); residential listings (2225 Fruitvale Avenue); Curtois Grocery (2231 Fruitvale Avenue); residential listings (3016 East 22nd Street); residential listings (3022 East 22nd Street); residential listings (3030 East 22nd Street); residential listings (2927 East 23rd Street); residential listings (2931 East 23rd Street)
1945	Doctor office listing (2201 Fruitvale Avenue); residential listings (2209 Fruitvale Avenue); residential listings (2223 Fruitvale Avenue); residential listings (2225 Fruitvale Avenue); residential listings (3030 East 22nd Street)
1946	No listings
1950	Residential listings (2221 Fruitvale Avenue); doctor office listing (2201 Fruitvale Avenue); residential listings (2209 Fruitvale Avenue); residential listings (2215 Fruitvale Avenue); residential listings (2223 Fruitvale Avenue); residential listings (2225 Fruitvale Avenue); **Scotch Cleaners & Dyers (2231 Fruitvale Avenue)**; residential listings (3016 East 22nd Street); residential listings (3022 East 22nd Street); residential listings (3030 East 22nd Street); residential listings (2927 East 23rd Street); residential listings (2931 East 23rd Street)
1951, 1954	No listings
1955	Residential listings (2221 Fruitvale Avenue); doctor office listing (2201 Fruitvale Avenue); residential listings (2209 Fruitvale Avenue); residential listings (2215 Fruitvale Avenue); residential listings (2225 Fruitvale Avenue); **Scotch Cleaners & Dyers (2231 Fruitvale Avenue)**; residential listings (3016 East 22nd Street); residential listings (3022 East 22nd Street); residential listings (3030 East 22nd Street); residential listings (2927 East 23rd Street); residential listings (2931 East 23rd Street)
1956, 1959, 1960	No listings
1962	Doctor office listing (2201 Fruitvale Avenue); residential listings (2209 Fruitvale Avenue); residential listings (2223 Fruitvale Avenue); residential listings (2225 Fruitvale Avenue); Breier Equipment Co. (2227 Fruitvale Avenue); **Scotch Cleaners & Dyers (2231 Fruitvale Avenue)**; residential listings (3016 East 22nd Street); residential listings (2927 East 23rd Street)
1965	No listings
1967	Residential listings (2221 Fruitvale Avenue); doctor office listing (2201 Fruitvale Avenue); residential listings (2209 Fruitvale Avenue); residential listings (2223 Fruitvale Avenue); residential listings (2225 Fruitvale Avenue); Dotty's Den Tavern (2227 Fruitvale Avenue); **Scotch Cleaners & Dyers (2231 Fruitvale Avenue)**
1970	Residential listings (2221 Fruitvale Avenue); doctor office listing (2201 Fruitvale Avenue); residential listings (2209 Fruitvale Avenue); residential listings (2225 Fruitvale Avenue); Dotty's Den Tavern (2227 Fruitvale Avenue); **Scotch Cleaners & Dyers (2231 Fruitvale Avenue)**; residential listings (3030 East 22nd Street); residential listings (2927 East 23rd Street); residential listings (2931 East 23rd Street)
1973, 1975, 1976, 1979	No listings
1980	Posada de Colores with residential listings (2221 Fruitvale Avenue); residential listings (2223 Fruitvale Avenue)

City Directory Search for 2201-2231 Fruitvale Avenue, 3016-3030 East 22nd Street, 2927-2931 East 23rd Street (Subject Property)

Year(s)	Occupant Listed
1982, 1984	No listings
1986, 1991, 1992	Posada de Colores with residential listings (2221 Fruitvale Avenue)
1993	No listings
1996, 2000	Posada de Colores with residential listings (2221 Fruitvale Avenue)
2002	No listings
2006	Posada de Colores with residential listings (2221 Fruitvale Avenue)
2010, 2014	Christian Church Homes of Northern California Spanish Speaking Unity Council (2221 Fruitvale Avenue)

According to the city directory review, the subject property was formerly occupied by various residential and commercial buildings, including a market/grocery store, doctor's office and dry cleaners. The subject property was occupied with a dry cleaners business, known as Scotch Cleaners & Dyers as early as 1950 until 1970. As previously discussed in Section 3.0, the former on-site drycleaner represents a REC.

Based on the city directory review, no other environmentally sensitive listings were identified for the subject property addresses.

According to the city directory review, the adjacent properties have been occupied by residential and commercial properties. The adjacent property addressed at 2208 Fruitvale Avenue was reportedly occupied by a gasoline service station in 1945. No service station listings were identified post-1945. The adjacent property addressed at 2210 Fruitvale Avenue was reportedly occupied by dry cleaner businesses from 1967 to 2006. This listing is discussed in further detail in Section 4.2.

Based on the city directory review, no other environmentally sensitive listings were identified for the adjacent property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on June 8, 2017. The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date:	***1915***
Subject Property:	Depicted developed with structures along the north, south and east perimeters
North:	Depicted densely developed with structures beyond East 23rd Street
South:	Depicted densely developed with structures beyond East 22nd Street
East:	Depicted densely developed with structures beyond Fruitvale Avenue
West:	Depicted densely developed with structures

Date:	***1949, 1959, 1968, 1973, 1980, 1997***
Subject Property:	Shaded to depict dense development
North:	Shaded to depict dense development beyond East 23rd Street
South:	Shaded to depict dense development beyond East 22nd Street
East:	Shaded to depict dense development beyond Fruitvale Avenue
West:	Shaded to depict dense development

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Health Department

Regulatory Agency Data	
Name of Agency:	Alameda County Department of Environmental Health (ACDEH) Hazardous Materials/Waste (CUPA) and Local Oversight Program (LOP)
Point of Contact:	Ms. Yvonne Cummings Online LOP Records: http://gis.acgov.org/DEH/InspectionResults/
Agency Address:	1131 Harbor Bay Parkway, Alameda, CA 94502
Agency Phone Number:	(510) 567-6700
Date of Contact:	June 16, 2017
Method of Communication:	Email/Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the ACDEH.

4.1.2 Fire Department

Regulatory Agency Data	
Name of Agency:	City of Oakland Fire Department (OFD)
Point of Contact:	OFD Website: http://www2.oaklandnet.com/government/o/OFD/s/HAZMAT/index.htm
Agency Address:	150 Frank H. Ogawa Plaza, Oakland, CA 94612
Agency Phone Number:	(510) 238-3856
Date of Contact:	June 16, 2017
Method of Communication:	Online
Summary of Communication:	According to the OFD website, no records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the OFD.

4.1.3 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Bay Area Air Quality Management District (BAAQMD)
Point of Contact:	Rochelle Reed, Public Records Section Public Records Portal: https://cwp-baaqmd.secureprtportal.com/
Agency Address:	969 Ellis Street, San Francisco, California 94109

Summary of Communication:	According to records reviewed, the subject property is zoned RM-4 for residential development by the City of Oakland.

A copy of pertinent documents is included in Appendix B of this report.

4.1.8 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact:	Well Finder Map: http://maps.conservation.ca.gov/doggr/#close
Agency Address:	801 K Street, Sacramento, California 95814
Agency Phone Number:	(916) 322-1110
Date of Contact:	June 16, 2017
Method of Communication:	Online
Summary of Communication:	According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

4.1.9 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Alameda County Assessor (ACA)
Point of Contact:	Assessor Clerk Parcel Viewer: http://gis.acgov.org/Html5Viewer/index.html?viewer=parcel_viewer Planning and Zoning Map:

Regulatory Agency Data	
	http://www2.oaklandnet.com/oakca1/groups/ceda/documents/report/oak059232.pdf
Agency Address:	1221 Oak Street, Suite 145, Oakland, California 94612
Agency Phone Number:	(510) 272-3787
Date of Contact:	June 16, 2017
Method of Communication:	Online/Telephone
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 26-750-31-3 and is currently owned by The Unity Council since 1979. The current building was constructed in 1979 and totals approximately 81,571 square-feet on a 0.87 acre lot.

A copy of pertinent documents is included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	N	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	--	--
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	N	N

Radius Report Data				
Database	**Search Radius (mile)**	**Subject Property**	**Adjacent Properties**	**Sites of Concern**
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N

4.2.2 Subject Property Listings

The following subject property listings are identified in the regulatory database report, as discussed below:

- **EHRET COMPANY PLUMBING & HEATING** at 2221 Fruitvale Avenue is identified on the Facility and Manifest (HAZNET) database. Information provided in the database indicates 0.8 tons of asbestos-containing waste was generated under EPA ID # CAC002660019 in 2010. No additional information is provided in the database. Partner was provided with a *Limited Asbestos and Lead Survey* conducted in 2010, as discussed in Section 5.2.6, and presumes the generation of asbestos-containing waste is associated with this report. Based on the removal of asbestos-containing waste, this listing is not expected to represent a significant environmental concern.
- **POSADA DE COLORES** at 2221 Fruitvale Avenue is identified on the HAZNET database. Information provided in the database indicates 0.4 tons of asbestos-containing waste was generated under EPA ID # CAC002651786 in 2010 and 0.4 tons asbestos-containing waste was generated under EPA ID # CAC00270932 in 2012. No additional information is provided in the database. Based on the removal of asbestos-containing waste, this listing is not expected to represent a significant environmental concern.
- **SCOTCH CLEANERS** at 2231 Fruitvale Avenue is identified on the EDR Historical Cleaner (EDR Hist Cleaner) database. Information provided in the database indicates the subject property was occupied by a dry cleaners business known as Scotch Cleaners in 1967, 1970, 1971 and 1972. No additional information is provided in the database. As previously discussed in Section 3.0, the former on-site drycleaner represents a REC for the subject property.

4.2.3 Adjacent Property Listings

The following adjacent property listing is identified in the regulatory database report, as discussed below:

- The address **2210 FRUITVALE AVENUE** is located adjacent to the east and hydrologically cross-gradient of the subject property. This site is identified on the EDR Hist Cleaner database. Information provided in the database indicates this site was occupied by various dry cleaning businesses from 1967 to 2014. No violation or releases were noted and no additional information

is provided. Based on the relative proximity beyond Fruitvale Avenue and cross-gradient positioning with respect to groundwater flow, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory agency file review would alter the overall findings of this assessment.

Based on the findings, vapor migration in association with the adjoining properties is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from The Unity Council (User of this report).

User Responsibilities				
Item	**Provided By User**	**Not Provided By User**	**Discussed Below**	**Does Not Apply**
Environmental Pre-Survey Questionnaire		**X**		
Title Records, Environmental Liens, and AULs		**X**		
Specialized Knowledge		**X**		
Actual Knowledge		**X**		
Valuation Reduction for Environmental Issues		**X**		
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports			**X**	
Other				**X**

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property since 1978, identified as The Unity Council, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User.

5.1.3 Interview with Key Site Manager

Ms. Dimitra Siderakis, key site manager, indicated that she had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Ms. Siderakis, the subject property was developed in 1978 for residential use. Ms. Siderakis further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of her knowledge.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Limited Asbestos and Lead Survey, ACC Environmental Consultants, August 18, 2010

ACC Environmental Consultants (ACC) prepared this report on behalf of Christian Church Homes. The survey was performed to identify suspect asbestos-containing materials (ACMs) and lead-based paint (LBP) that may be impacted during planned renovation activities. A total of 101 samples were analyzed for ACMs. Results indicated ACMs were detected in the following building materials: beige floor tiles in Units 314 and 512, kitchens, bathrooms, Unit 809 bathroom, 2nd floor trash rooms and possible other area; yellow mosaic sheet vinyl flooring in the 1st floor laundry room and other possible areas; and roof patching compound on roof penetrations. A total of 3 samples were analyzed for LBP. Results indicated none of the samples detected LBP. ACC recommended that additional sampling should be conducted for ACMs prior to any disturbance.

Copies of pertinent pages reviewed are included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Michel Helou
Site Assessment Conducted On:	June 22, 2017

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 2221 Fruitvale Avenue (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Ms. Dimitra Siderakis	Key Site Manager	(510) 534-6200	Yes
Mr. Sergio Hidalgo	Lead Maintenance Technician	(510) 534-6200	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No potential environmental concerns were identified during the on-site reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters and bins located north on the subject property. An independent solid waste disposal contractor, Waste Management, removes solid waste from the subject property. According to property personnel, only household trash is collected in the on-site solid waste dumpsters. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Oakland services the subject property vicinity. No wastewater treatment facilities or septic systems are observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. Site storm water from roofs, landscaped areas, and paved areas is directed to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface

impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by natural gas provided by Pacific Gas & Electric Company (PG&E). Heating and hot water is provided by natural gas-powered boiler units and a closed loop system with interior air-handlers. No cooling is provided.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

Partner observed an approximately 100-gallon diesel fuel belly tank (AST) associated with an emergency generator on the subject property. The belly tank is located north portion of the subject property. According to Mr. Hidalgo, the belly tank was installed in 1978. No staining, leaks or spills were noted in the vicinity of the ASTs, and no releases have been reported. Based on the lack of evidence of releases, the on-site AST is not expected to represent a significant environmental concern.

No other evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "*Non-PCB;*" 2) 50 ppm-500 ppm – "*PCB-Contaminated;*" and, 3) Greater than 500 ppm – "*PCB-Containing.*" The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. One pad-mounted transformer was observed on the subject property. The transformer is not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformer. Partner contacted a customer service representative of PG&E, who confirmed that PG&E maintains ownership and operational responsibility for the transformer.

PCB contaminated transformers, like most potential environmental concerns, can be maintained in place by use of a periodic monitoring program. The unit should be periodically inspected for potential leakage. If leakage is visible, the subject property should contact PG&E's customer service department who will remediate the situation. Furthermore, should any type of leakage be detected or should the unit have to be replaced, PG&E is financially responsible, provided the cause is equipment failure, not customer related. Based on the good condition of the equipment and the identification of a responsible party (PG&E), the transformer is not expected to represent a significant environmental concern.

Additionally, Partner observed a hydraulic compactor in the compactor room of the building. No staining or leakage was observed in the vicinity of the hydraulic equipment. Based on the good condition of the equipment, the hydraulic compactor is not expected to represent a significant environmental concern.

No other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

Interior floor drains were observed in the bathroom and maintenance areas of the subject buildings. The interior floor drains are reportedly connected to the municipal sanitary sewer system. No additional drains, sumps or clarifiers, other than those associated with storm water removal, were observed on the subject property.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property buildings were constructed in 1978. Partner has conducted a limited, visual evaluation of accessible areas for the presence of suspect ACMs at the subject property. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACMs:

Suspect ACMs

Suspect ACM	Location	Friable Yes/No	Physical Condition
Drywall systems	Throughout Building Interior	No	Good
Vinyl floor tiles & associated mastic	Throughout Building Interior	No	Good
Ceramic floor tiles & associated grout			
Spray-applied acoustical material	Throughout Building Interior	No	Good
Ceiling tiles	Throughout Building Interior	Yes	Good
Stucco	Throughout Building Exterior	No	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM. Partner reviewed a *Limited Asbestos and Lead Survey,* discussed in Section 5.2.6.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the subject property building (pre-1978), there is a potential that LBP is present. Interior and exterior painted surfaces were observed in good condition and therefore not expected to represent a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated.

Partner reviewed a *Limited Asbestos and Lead Survey,* discussed in Section 5.2.6.

Actual material samples would need to be collected in order to determine if LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the East Bay Municipal Utilities District (EBMUD) serves the subject property vicinity. Shallow groundwater directly beneath the vicinity of the subject property is not utilized for domestic purposes. The sources of public water for EBMUD are surface water from the Mokelumne River watershed in the Sierra Nevada Mountains, which accounts for 90% of the utility's water supply, with the remaining 10% obtained from local surface water sources. According to the 2016 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- According to a review of historical sources and the regulatory database report, the subject property was formerly occupied by a drycleaner business from at least 1950 to circa 1972. Additionally, building records indicated a dry cleaning machine was installed in at the subject property in 1969. Since the 1930s, dry cleaning operations have typically used chlorinated solvents, particularly tetrachloroethylene (PCE), during the dry cleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and migrate to groundwater beneath a facility. No additional pertinent information regarding the former drycleaner was encountered during the course of this assessment. No evidence of a release at the subject property was identified in the regulatory records reviewed for this assessment. However, it should be noted that this business operated during a time of little to no regulatory oversight, which would account for the lack of regulatory records available for review. Based on the use of the subject property as a drycleaner for approximately 22 years and the nature of dry cleaning solvents, this former on-site drycleaner represents a REC.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Due to the age of the subject property building, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint (LBP) are present. Overall, suspect ACMs and painted surfaces were observed in good condition and do not appear to pose a health and safety concern to the occupants of the subject property at this time.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2221 Fruitvale Avenue in the City of Oakland, Alameda County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions and environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- A limited subsurface investigation should be conducted to determine the presence or absence of soil and/or groundwater contamination due to the historical use of the subject property.
- An Operations and Maintenance (O&M) Program should be implemented to safely manage the suspect ACMs and LBP located at the subject property.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 2221 Fruitvale Avenue in the City of Oakland, Alameda County, California in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EAST BAY MUNICIPAL UTILITY DISTRICT

2016 ANNUAL WATER QUALITY REPORT

EBMUD is pleased to report that in 2016, your drinking water met or surpassed every state and federal public health requirement.

PROTECTED SOURCE

In the East Bay, 1.4 million customers rely on high-quality EBMUD water. Almost all of EBMUD's water comes from the 577-square mile watershed of the Mokelumne River on the western slope of the Sierra Nevada. This area is mostly national forest, EBMUD-owned lands and other undeveloped lands little affected by human activity.

The Mokelumne watershed collects snowmelt from Alpine, Amador and Calaveras counties, which flows into Pardee Reservoir near the town of Valley Springs. Three large aqueducts carry water 90 miles from Pardee Reservoir to the East Bay. During times of drought, high water demand, system maintenance or for operational needs, EBMUD may draw water from other watersheds (like the Sacramento River) or from local watersheds here in the East Bay.

EBMUD's network of reservoirs, pipelines, pumps and water treatment plants are put to work to provide reliable drinking water every day, as reflected in this report.

END OF DROUGHT EMERGENCY

With our reservoirs refilling and water supply projections sufficient to meet demand, EBMUD declared an end to our drought emergency on May 10, 2016. Because of investments in conservation, recycling and supplemental supplies, EBMUD and our customers rose to the challenge to meet the East Bay's water needs during a historic four-year drought. In fact, water demand in 2016 was at its lowest since 1978. Our customers made lasting conservation changes, boosting our reservoir levels and preparing us for the next drought — whenever it occurs.

HOW WE MANAGE WATER QUALITY

Regardless of the source, all water is treated at one of six EBMUD water treatment plants before it reaches your tap. EBMUD takes many steps to ensure high water quality including managing watershed lands and reservoirs, treating the water, operating a complex distribution system, maintaining facilities and addressing customer concerns.

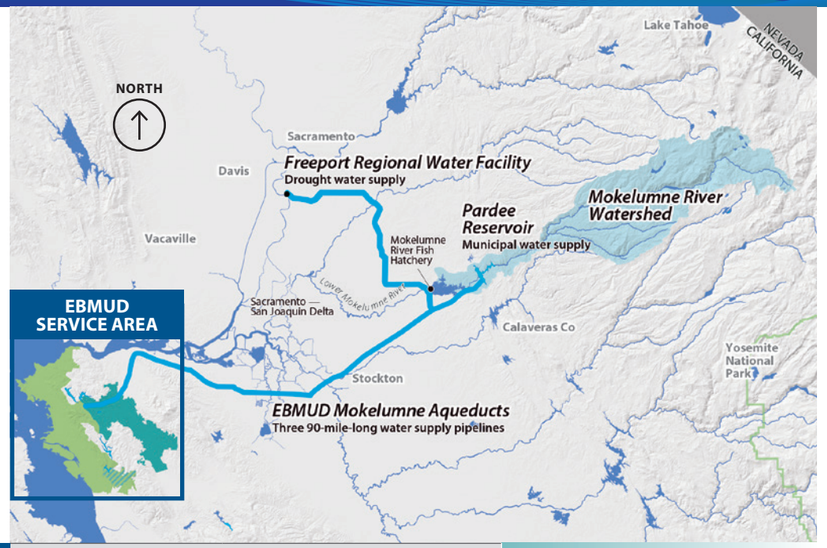

In laboratories and in the field, EBMUD samples and tests your water extensively to ensure it is safe to drink. We look for more than 100 substances including microorganisms, pesticides, herbicides, asbestos, lead, copper, petroleum products and by-products of industrial and water treatment processes. More than 20,000 laboratory tests each year ensure the safety of your drinking water.

EBMUD

WHERE YOUR WATER IS TREATED

EBMUD's water system is built to be redundant so customers can count on us to deliver clean drinking water when you need it. Our water typically comes from the Mokelumne River watershed in the Sierra Nevada foothills.

Before reaching your tap, EBMUD water is treated at one of six water treatment plants in the East Bay. Some customers receive water from different treatment plants at different times of the year. The taste and smell of your tap water may fluctuate throughout the year because of operational changes (such as when a treatment plant is down for maintenance) or due to drought-related changes at the source.

WHAT WAS DETECTED AND REPORTED

In 2016, EBMUD treated raw water from multiple sources, including the Sacramento River, and consistently provided high-quality drinking water, meeting or surpassing every public health requirement set by the State Water Resources Control Board (State Board) and the U.S. Environmental Protection Agency (USEPA).

The tables on the following pages show the measured amounts of contaminants detected in 2016 or in the most recent year sampling was required. Samples were collected in EBMUD's source waters, at water treatment plants, in the distribution system or at customers' taps.

Although EBMUD tests for more than 100 substances, this report only lists those detected at or above the state or federal level required for reporting. In this case, no news is good news!

Table 1 – Regulated for public health

These contaminants are regulated to protect your health. They have maximum contaminant levels, known as primary MCLs, set by the State Board or the USEPA. These levels are set as close to the established public health goals as is economically and technologically feasible.

Table 2 – Regulated for drinking water aesthetics

These contaminants are regulated to maintain aesthetic qualities such as smell, taste and appearance of drinking water. They have maximum contaminant levels, also known as secondary MCLs, set by the State Board.

Table 3 – Unregulated contaminants

The first five listed contaminants must be reported, if detected, under the federal Unregulated Contaminant Monitoring Rule 3 (UCMR3). The last three listed contaminants have state notification levels and water systems are encouraged, but not required, to report results to consumers.

Table 4 – Other parameters of interest to customers

These water measurements, such as pH, hardness and alkalinity, may be of interest to customers.

HOW TO READ THE WATER QUALITY TABLE

Find your location on the map on page 2. Note which water treatment plant(s) serve that area.

1. Go to the table on page 4 to find the contaminant you are interested in. Remember – no news is good news!
2. Column two lists the most recent year the contaminant was tested.
3. Column three lists the state or federal goal. At that amount or lower, there is no known or expected risk to health from its presence in drinking water. Not all listed contaminants have state or federal goals.
4. Column four notes the highest amount that the State Board or the USEPA allows. This amount is usually not as low as the public health goal in column three.
5. Column five lists the average amount detected across the EBMUD service area or at designated locations.
6. Find the column that corresponds to the water treatment plant or plants that serve you. This is the amount of the contaminant detected in your area's water.
7. The last column lists how the contaminant typically gets into your drinking water.

EBMUD 2016 ANNUAL WATER QUALITY REPORT

In 2016, your drinking water was consistently the highest quality, surpassing every public health requirement set by the State Water Resources Control Board (State Board) Division of Drinking Water and the U.S. Environmental Protection Agency (USEPA).

KEY TERMS

AL Regulatory action level. The concentration which, if exceeded, triggers treatment or other requirements that a water system must follow.

DBP Disinfection by-products. These are formed when chlorine and/or ozone reacts with natural constituents in water. Trihalomethanes (THMs), haloacetic acids (HAAs), chlorate, and bromate are disinfection by-products.

D/DBPs Disinfection by-products, disinfection residuals and disinfection by-product precursors.

level 1 assessment A study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.

MCL Maximum contaminant level. The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs or MCLGs as is economically and technologically feasible. Secondary MCLs address odor, taste and appearance of drinking water.

MCLG Maximum contaminant level goal. The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the USEPA.

MRDL Maximum residual disinfectant level. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

MRDLG Maximum residual disinfectant level goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

NA Not applicable.

notification level A health-based advisory level established by the State Board for contaminants in drinking water that lack MCLs.

primary drinking water standard These standards regulate contaminants that affect health by setting MCLs and MRDLs along with their monitoring, reporting and water treatment requirements.

PHG Public health goal. The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California EPA.

TOC Total organic carbon. A measure of organic content in the water.

turbidity A measure of the cloudiness of water. Turbidity is monitored because it is a good indication of the effectiveness of our filtration systems.

TT Treatment technique. A required process intended to reduce the level of a contaminant in drinking water.

90th percentile A measure that indicates 90 percent of the samples had a lower result.

UNITS

gpg grains per gallon

NTU nephelometric turbidity unit, a measure of the cloudiness of water

ppm parts per million. One ppm is like 32 seconds in one year. (mg/L)

ppb parts per billion. One ppb is like 3 seconds in 100 years. (µg/L)

ppt parts per trillion. One ppt is like 3 seconds in 100,000 years. (ng/L)

TON threshold odor number, a measure of odor in water

µS/cm microsiemens per centimeter, a measure of electrical conductance

1 Regulated for public health *Primary MCL (Unit)*

			Year sampled	State or federal goal *PHG, MCLG or MRDLG*	Highest amount allowed *MCL, MRDL or AL*	System average	Water treatment plants: Walnut Creek	Lafayette	Orinda	Sobrante	Upper San Leandro	San Pablo	Typical sources

NOTES

a) See page 7 for additional information about fluoride in drinking water. **b)** See Page 7 for additional information about lead in drinking water. **c)** Highest running annual average. **d)** Chloramine residuals in the distribution system are measured as an equivalent quantity of chlorine. When the chloramine residual cannot be detected, the sample is further analyzed to ensure that microbiological water quality is in compliance with regulations. **e)** Highest locational running annual average. **f)** Hexavalent chromium has a California MCL of 10 ppb and all sample results are well below the MCL. **g)** San Pablo Water Treatment Plant is a standby plant and was not in operation during the required UCMR3 monitoring period. NDMA monitoring is not required. **h)** Sampling locations are chosen to represent worst case scenarios. **i)** Parameters with a Notification Level.

* Grains per gallon (gpg) is a measure of water hardness. Knowing the amount can help improve the function of dishwashers, cooling equipment and other industrial processes. Refer to your appliance manufacturer's instruction manual for the optimum grains per gallon level.

WATER QUALITY REGULATIONS

This report reflects changes in drinking water regulatory requirements during 2016. In order to ensure that tap water is safe to drink, the USEPA and the State Board prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. California Department of Public Health (CDPH) and United States Food and Drug Administration regulations establish limits for contaminants in bottled water that provide the same protection for public health. Additional information on bottled water is available on the CDPH website at www.cdph.ca.gov/PROGRAMS/Pages/fdbBVW.aspx.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

Microbial contaminants, such as viruses, bacteria and protozoa, such as *Cryptosporidium*, that may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.

Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.

Pesticides and herbicides that may come from a variety of sources, such as agriculture, urban stormwater runoff and residential uses.

Organic chemical contaminants, including synthetic and volatile organic chemicals, that are by-products of industrial processes and petroleum production and can also come from gas stations, urban stormwater runoff, agricultural application and septic systems.

Radioactive contaminants that can be naturally occurring or be the result of oil and gas production and mining activities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects is available from the USEPA's Safe Drinking Water Hotline at 800-426-4791 or online at www.epa.gov/safewater. Contact your healthcare provider or visit the Centers for Disease Control and Prevention (CDC) website for guidelines on using tap water for health or medical purposes.

Coliforms
Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially harmful, waterborne pathogens may be present or that a potential pathway exists through which contamination may enter the drinking water distribution system.

All water systems are required to comply with the state Total Coliform Rule. Beginning April 1, 2016, all water systems are also required to comply with the federal Revised Total Coliform Rule. The new federal rule maintains the purpose to protect public health by ensuring the integrity of the drinking water distribution system and monitoring for the presence of microbials (i.e., total coliform and *E. coli* bacteria). Water systems that exceed a specified frequency of total coliform occurrences are required to conduct an assessment to determine if any sanitary defects exist. If found, these must be corrected by the water system.

EBMUD found coliforms in 2016, indicating the need to look for potential problems in water treatment or distribution. When this occurred, we were required to conduct assessments to identify problems and to correct any problems that were found during these assessments. During the past year, we were required to conduct one Level 1 assessment and required to take one corrective action, which we completed.

USEPA anticipates greater public health protection as the new rule requires water systems that are vulnerable to microbial contamination to identify and fix problems.

Cryptosporidium
Cryptosporidium is a microbial contaminant found in surface water throughout the United States. Although filtration is highly effective in removing *Cryptosporidium*, the most commonly used filtration methods cannot guarantee 100 percent removal.

Our monitoring indicates the presence of these organisms in one of our source waters. Current test methods cannot determine if the organisms are dead or are capable of causing disease. Ingestion of *Cryptosporidium* may cause abdominal infection with symptoms including nausea, diarrhea and abdominal cramps.

Cryptosporidium must be ingested to cause disease, and it may be spread through means other than drinking water. Most healthy individuals can overcome the disease within a few weeks. However, immuno-compromised people, infants and small children, and the elderly are at greater risk of developing life-threatening illness. We encourage these individuals to consult their physician regarding appropriate precautions to take to avoid infection.

Populations with low resistance
Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly and some infants can be particularly at risk from infections.

These people should seek advice about drinking water from their health care providers. USEPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the USEPA Safe Drinking Water Hotline at 800-426-4791 or www.epa.gov/safewater.

Lead in drinking water
If present, elevated levels of lead can cause serious health problems. Pregnant women, infants and young children are typically more vulnerable to lead in drinking water than the general population.

Lead in drinking water is primarily from materials and components associated with lead in water distribution pipes and home plumbing. EBMUD replaced all known lead service pipes in its service area in the 1990s and continues to actively seek and replace lead materials wherever they are found. We maintain an aggressive corrosion control program to reduce lead leaching from our water mains. Still, you may have lead in your home plumbing. It is possible that lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. According to USEPA, homes built before 1986 are more likely to have lead pipes, fixtures and solder.

If you suspect you have lead in your fixtures and if your water has been sitting for several hours, you can minimize the potential for lead exposure by running your faucet for 30 seconds to 2 minutes before using water for drinking or cooking. Capture and reuse this water for other uses such as watering ornamental plants.

EBMUD samples and tests your water in accordance with all state and federal drinking water requirements, and will provide a list of results upon request. If you are concerned about elevated lead levels in your home's water, you may wish to have your water tested. In 2017, EBMUD started a new program to provide our customers with lead testing for their water; call 866-403-2683 for more information.

Information on lead in drinking water, testing methods and steps you can take to minimize exposure is available at www.ebmud.com/lead and from the USEPA Safe Drinking Water Hotline at 800-426-4791 or online at www.epa.gov/safewater/lead.

REPORT A WATER QUALITY CONCERN

Do you have a question or concern about your water quality? Call 866-403-2683. EBMUD inspectors respond to calls within one business day regarding water which appears dirty, colored, or has foreign particles or unusual taste or odor.

Fluoridation
EBMUD is required by state law to add fluoride to drinking water to help prevent dental decay in consumers. Current regulations require fluoride levels in the treated water be maintained between 0.6 to 1.2 ppm with an optimum dose of 0.7 ppm. Our monitoring showed that fluoride levels in the treated water distribution system averaged 0.7 ppm.

According to the American Dental Association and CDC, it is safe to use optimally fluoridated water for preparing infant formula. If an infant is primarily fed infant formula prepared with fluoridated water, there may be an increased chance for mild enamel fluorosis, but enamel fluorosis does not affect the health of the infant or the health of the infant's teeth. To lessen this chance, deionized, purified, distilled or demineralized bottled water can be used.

If you have additional questions about fluoride, contact your health provider. Additional information can be found at the State Board www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/Fluoridation.shtml or the CDC www.cdc.gov/fluoridation websites.

HOW TO CONTACT EBMUD

For more information about water quality or to report a water quality concern, call 866-403-2683 or visit www.ebmud.com/waterquality.

If you would like this report mailed to you, email customerservice@ebmud.com or call 510-986-7555. View this report online at www.ebmud.com/wqr.

EBMUD encourages public participation in decisions affecting drinking water quality and other matters at its Board of Directors meeting held the second and fourth Tuesdays of each month at 1:15 pm, 375 Eleventh Street, 2nd Floor, Oakland.

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations shown on this map apply only landward of 0.0' North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations tables in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations tables should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was Universal Transverse Mercator (UTM) Zone 10. The **horizontal datum** was NAD 83, GRS80 spheroid. Differences in datum, spheroid, projection or UTM zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same **vertical datum**. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at http://www.ngs.noaa.gov or contact the National Geodetic Survey at the following address:

NGS Information Services
NOAA, N/NGS12
National Geodetic Survey
SSMC-3, #9202
1315 East-West Highway
Silver Spring, Maryland 20910-3282
(301) 713-3242

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at **(301) 713-3242**, or visit its website at http://www.ngs.noaa.gov.

Base map information shown on this FIRM was derived from multiple sources. Within the City of Livermore, base map information was derived from digital orthophotos provided by the City of Livermore Engineering Department. This information was produced at scales of 1:1,200 and 1:2,400 with 1-foot pixel resolution from photography dated May 7, 2001. Within the City of San Leandro, base map information was derived from digital orthophotos provided by the City of San Leandro Information Services Department. This information was produced at a scale of 1:2,400 with 1-foot pixel resolution from photography dated April 19, 2003. Additional information was derived from U.S. Geological Survey Digital Orthophoto Quadrangles produced at a scale of 1:12,000 from photography dated 1991 or later.

This map reflects more detailed and up-to-date **stream channel configurations** than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to conform to these new stream channel configurations. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study Report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed **Map Index** for an overview map showing the layout of map panels; community map repository addresses; and a Listing of Communities table containing National Flood Insurance Program dates for each community as well as a listing of the panels on which each community is located.

Contact the **FEMA Map Service Center** at 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at http://msc.fema.gov.

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard include Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

ZONE A	No Base Flood Elevations determined.
ZONE AE	Base Flood Elevations determined.
ZONE AH	Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.
ZONE AO	Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.
ZONE AR	Special Flood Hazard Area formerly protected from the 1% annual chance flood by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.
ZONE A99	Area to be protected from 1% annual chance flood by a Federal flood protection system under construction; no Base Flood Elevations determined.
ZONE V	Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined.
ZONE VE	Coastal flood zone with velocity hazard (wave action); Base Flood Elevations determined.

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

OTHER FLOOD AREAS

ZONE X	Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS

ZONE X	Areas determined to be outside the 0.2% annual chance floodplain.
ZONE D	Areas in which flood hazards are undetermined, but possible.

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAs)

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas.

- 1% annual chance floodplain boundary
- 0.2% annual chance floodplain boundary
- Floodway boundary
- Zone D boundary
- CBRS and OPA boundary
- Boundary dividing Special Flood Hazard Area Zones and boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.
- 513 — Base Flood Elevation line and value; elevation in feet*
- (EL 987) — Base Flood Elevation value where uniform within zone; elevation in feet*

Re: Limited Asbestos and Lead Survey
Posada De Colores Apartments
2221 Fruitvale Avenue, Oakland, California
ACC Project No. 1299-007.00

Dear Mr. Jackson:

Per your request, ACC Environmental Consultants, Inc. (ACC) performed an asbestos and lead survey of the above referenced site on July 23, 2010. The survey of the site was performed to identify suspect asbestos-containing building materials and loose & peeling lead-containing paint that may be impacted during planned renovation activities. Common suspect asbestos-containing building materials that may be impacted during typical renovation projects may include but are not limited to, the following materials:

- Flooring & Associated Adhesives
- Baseboard & Associated Adhesives
- Gypsum Wallboard, Taping/Joint Compounds, & Texturing Compounds
- Plaster Wall & Ceiling Systems
- Spray Applied Acoustical Material
- Fireproofing
- Pipe, Pipe Elbows & Pipe Fitting Insulation
- Boiler & Flue Insulation
- HVAC Duct Insulation
- HVAC Joint Mudding & Duct Tape
- Sink Undercoating
- Asbestos-cement (Transite) Flues, Panels & Shingles
- Ceramic Tile Grout and Underlayment
- Interior & Exterior Stucco
- Brick Mortar
- Roofing Materials

Furthermore, lead sampling was conducted to identify suspect lead-containing coatings that may be disturbed by project activities for the purpose of compliance with Cal-OSHA's Lead in Construction Standard and is not

intended to be a "Lead Inspection" or "Lead Risk Assessment" as defined by the California Department of Public Health.

Asbestos Bulk Sample Results

Mr. Matt Chin, a Cal/OSHA Certified Asbestos Consultant (CAC #08-4332) with ACC, performed limited bulk sampling of suspect asbestos-containing materials on July 23, 2010. One hundred and one (101) samples of suspect materials were submitted for analysis. Copies of the laboratory results are attached.

The samples were delivered to EMSL Analytical Laboratories, of San Leandro, California; an independent laboratory that participates in the bulk sample proficiency analysis program conducted by the United States Environmental Protection Agency (EPA) and is accredited by the National Voluntary Laboratory Accreditation Program (NVLAP). The samples were analyzed using Polarized Light Microscopy (PLM) with dispersion staining to estimate percent composition by volume. Samples with less than 1% (<1%) asbestos are designated as "Trace asbestos." Samples with no observable asbestiform minerals are designated as "no asbestos detected."

Summary of Asbestos Bulk Sample Results

Sample No.	Material Description	Location Description	Results	Approx. Quantity[4]	NESHAPS Category[1]	OSHA Class[2]
SA-01-01, 02, 03, 04, 05, 06, 07, 08, 09	Sprayed Acoustical Ceiling Material	Throughout Units	No Asbestos Detected	N/Q	Friable	1
JC-02-01, 02, 03, 04, 05, 06, 07, 08, 09	Drywall and Joint Compound	Throughout Units, Hallways & Common Areas	No Asbestos Detected	N/Q	Friable	2
WT-03-01, 02, 03, 04, 05, 06, 07, 08, 09	Wall Texturing Compound	Throughout Units, Hallways & Common Areas	No Asbestos Detected	N/Q	Category II	2
FA-04-01, 02, 03	12" X 12" Beige Floor Tile and Adhesive	Units #314 & #512, Kitchens & Bathrooms; Unit #809 Bathroom; 2nd Floor Trash Rooms and Possible Other Areas	Floor Tile: <1% Chrysotile Asbestos Adhesive: No Asbestos Detected	N/Q	Category I	2
BA-05-01	4" Brown Baseboard & Brown Baseboard Adhesive	Unit #314 Bathroom	No Asbestos Detected	N/Q	Category II	2
CA-06-01, 02, 03	Carpet Adhesive	Common Areas Below Carpet	No Asbestos Detected	N/Q	Category II	2
CT-07-01, 02, 03	2' x 4' Pinhole Ceiling Tiles	Unit #512, #208 & #809 Kitchens and Possible other Areas	No Asbestos Detected	N/Q	Friable	2
TG-08-01	4" Brown Wall Tile & Tile Grout	1st Floor Restrooms and Possible Other Area	Not sampled due to resulting damage	160 SF	Category II	2
CU-09-01	2" Ceramic Floor Tile and Underlayment	1st Floor Restrooms and Possible Other Area	Not sampled due to resulting damage	200 SF	Category II	2
CT-10-01, 02, 03	2' x 4' Pinhole Texture Ceiling Tile	1st Floor Common Areas	No Asbestos Detected	N/Q	Friable	2

Sample No.	Material Description	Location Description	Results	Approx. Quantity*	NESHAPS Category[1]	OSHA Class[2]
CT-11-01, 02, 03, 04, 05	2' x 4' Pinhole Fissure Ceiling Tile	Recreation Room and Common Areas Throughout	No Asbestos Detected	N/Q	Friable	2
SV-12-01	Grey Mosaic Sheet Vinyl Flooring	1st Floor Laundry Room and Possible Other Areas Throughout	No Asbestos Detected	N/Q	Category I	2
SV-13-01	Yellow Mosaic Sheet Vinyl Flooring (Below SV-12)	1st Floor Laundry Room and Possible Other Areas	Backing Paper: 80 % Chrysotile Asbestos Sheet Vinyl Flooring: No Asbestos Detected	550	Category I	2
FP-14-01, 02, 03, 04, 05, 06, 07	Fireproofing	Above Ceiling	No Asbestos Detected	N/Q	Friable	1
PE-15-01, 02, 03	4" Pipe Elbow Insulation	Boiler Room, 1st Floor above Ceiling and Possible Other Areas	No Asbestos Detected	N/Q	Friable	1
PI-16-01, 02, 03	4" Pipe Insulation	Boiler Room 1st Floor above Ceiling and Possible Other Areas	No Asbestos Detected	N/Q	Friable	1
IB-17-01, 02, 03	Interior Boiler Room	Boiler Room	No Asbestos Detected	60 SF	Friable	1
Assumed	Ceramic Tile Grout	1st Floor Kitchen and Other Possible Area	Sample Prior to Disturbance	75 SF	Friable	1
Assumed	12" White Tile w/Ceramic Tile Underlayment	1st Floor Kitchen and Other Possible Areas	Sample Prior to Disturbance	75 SF	Friable	1
Assumed	Rust & Tan Patterned Floor Tile and Adhesive	Lobby, 1st Floor Hallways, Recreation Room	Sample Prior to Disturbance	N/Q	Category I	2
CR-21-01, 02, 03	Composite Roofing	Roof	No Asbestos Detected	N/Q	Category I	2
RP-22-01	Roof Patching Compound	Roof Penetrations	Roof Patching Compound: <1% Chrysotile	15 SF	Category I	2
ES-23-01, 02, 03, 04, 05	Exterior Stucco	Exterior of Building	No Asbestos Detected	2500 SF	Category II	2
JC-24-01, 02, 03, 04, 05, 06, 07, 08, 09, 10	Drywall & Joint Compound	Throughout Building	No Asbestos Detected	N/Q	Friable	2
WT-25-01, 02, 03, 04, 05, 06, 07, 08, 09, 10	Wall Texturing Compound	Throughout Building	No Asbestos Detected	N/Q	Category II	2
SA-26-01, 02, 03, 04, 05, 06, 07, 08, 09, 10	Sprayed Acoustical Ceiling	Throughout Building	No Asbestos Detected	N/Q	Friable	1

**Approximate quantities should be verified during any project planning as the building was occupied during the survey and ACC was unable to perform a fully destructive investigation to identify all concealed conditions.*

[1] EPA's NESHAPS regulations define categories of asbestos-containing materials (ACM) based on their potential of asbestos fiber release when disturbed:

- *Friable - Any material containing more than 1 percent asbestos that, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure.*

- *Category I Non-friable ACM (Cat 1 NF) - Asbestos-containing packings, gaskets, resilient floor covering and asphalt roofing products containing more than 1 percent asbestos.*
- *Category II Non-friable ACM (Cat II NF) - Any material, excluding Category I non-friable ACM containing more than 1 percent asbestos as determined using the methods specified under AHERA, when dry, cannot be crumbled, pulverized, or reduced to powder by hand pressure.*

[2]OSHA's Asbestos in Construction Standard (Federal - 29 CFR 1926.1101 and California – 8 CCR 1529) define specific "Classes" of work based on the risk of exposure to employees with the potential for disturbance of asbestos-containing materials. The classes of work are defined as

- *Class 1 - Asbestos-related activities involving the removal of thermal systems insulation (TSI) and surfacing ACM or presumed ACM.*
- *Class 2 - Asbestos-related activities involving the removal of ACM, which are not TSI, or surfacing ACM.*

Of the three samples collected, none were reported to contain lead above 0.5%, 5,000 parts per million (weight by weight), or 1.0 mg/cm^2 which is the definition for lead based paint by the Environmental Protection Agency (EPA) and the California Department of Public Health (CDPH). Of the three samples collected, none were found to have detectable amounts of lead. Ceramic wall and floor tiles are assumed to contain lead and should be sampled to and disturbance. The OSHA Lead in Construction Standard requires the use of special work practices during the disturbance of paint with any detectable amounts of lead. See attached OSHA Lead Regulation Summary. Lead containing waste materials with a concentration greater than 0.1%, for total lead, is considered hazardous waste in the State of California. Lead containing waste materials with a total lead concentration between 0.005% (50 ppm) and 0.10% (1000 ppm) must be re-analyzed using the waste extraction test (WET) method to determine the soluble lead content for waste disposal requirements.

Contractors are also required to notify the Division of Occupational Safety and Health (DOSH) prior to disturbing greater than 100 square feet or 100 linear feet of material containing lead greater than 0.5% by weight, 5000 parts per million (ppm) or 1.0 milligram per square centimeter (mg/cm^2).

OSHA Lead Regulation Summary

The Federal Occupational Safety and Health Administration (OSHA), has enacted a lead standard, which was adopted by the Cal/OSHA as 8 CCR 1532.1. The purpose of both standards is to protect construction workers from exposure to lead. OSHA is primarily concerned with activities that disturb paints with any detectable amounts of lead. Lead was used in most paints until the mid 1950's and was banned in amounts in excess of 0.06% by weight in 1978 for most non-industrial paints by the Consumer Product Safety Commission (CPSC).

The Cal/OSHA standard requires contractors and employers to notify the State of California Division of Occupational Safety and Health (DOSH) prior to disturbing greater than 100 square feet or 100 linear feet of material containing lead greater than 0.5%, 5,000 parts per million (weight by weight), or 1.0 mg/cm^2. The Cal/OSHA standard also requires contractors and employers who perform paint removal activities to monitor their employees to determine whether they are being exposed in excess of the action level of 30 micrograms per cubic meter of air (µg/m^3) over an eight-hour time weighted average (TWA) or the "Permissible Exposure Limit" (PEL) of 50 µg/m^3 TWA. Monitoring is performed by personal air sampling.

Even when concentrations are below the action level, an employer must provide employees with High Efficiency Particulate Air (HEPA) filtered vacuums, wetting agents and hand-washing facilities. If the exposure exceeds the action level or the PEL, other procedures such as containing the area, local exhaust ventilation, respiratory and worker protection, worker training, decontamination facilities and medical monitoring are required.

OSHA has identified several work practices that pose varying levels of lead exposure to laborers disturbing lead-containing paint. Estimated exposure levels of lead are founded on the activity itself, rather than the concentrations of lead present in paint. Therefore, as an example, paint that contains 0.5% versus 15% of lead by weight or 0.8 mg/cm^2 versus 3.5 mg/cm^2 of lead in paint could pose the same exposure levels to workers depending on the activities that cause the disturbance and the administrative and engineering controls that are followed.

The following is a summary of work activities that disturb paint, the expected exposure and the respiratory protection requirements that result as outlined in the OSHA standards:

Based on the sample results, the planned renovation project may impact asbestos-containing materials. The final scope of work should be reviewed against the asbestos survey information. If asbestos-containing materials will be disturbed during the projects, licensed asbestos abatement contractors working under standard asbestos program requirements should perform all work.

A review of all other asbestos survey information available for the property in conjunction with these results should be conducted prior to proceeding with project activities and when a change in the project scope is developed. If suspect asbestos-containing materials will be impacted that are not addressed in this survey or in the historical survey records, additional sampling should be conducted prior to disturbance.

Historical records (typically predating 1995) have limited value for project planning and should be verified with confirmatory inspection and additional sampling.

Lead Sample Results

Mr. Matt Chin, a California Department of Public Health Lead Inspector/Assessor with ACC, collected three (3) bulk samples to establish lead-paint concentration for clean up and disposal requirements. Samples with detectable amounts of lead must be properly removed and disposed of according to local, state and federal regulations. Lead sampling was conducted to identify suspect lead-containing coatings that may be disturbed by project activities for the purpose of compliance with Cal-OSHA's Lead in Construction Standard and is not intended to be a "Lead Inspection" or "Lead Risk Assessment" as defined by the California Department of Public Health.

The bulk samples were obtained from suspect lead-containing building materials identified at the building. Paint sampling was limited to major paint colors on interior walls and may not represent all accent or trim colors found at the property. Paint colors and/or descriptions are identified based on the surface color observed by ACC at the time of the survey and does not necessarily identify paint descriptions underlying the surface coat.

The samples were delivered to EMSL Analytical Laboratories, of San Leandro, California; an independent American Industrial Hygiene Association (AIHA) accredited laboratories, for analysis. Samples were analyzed by Atomic Absorption (AA) Spectroscopy in accordance with the EPA 3050B/7420 Method. The colors, locations, and lead contents of these paints are listed below.

Summary of Lead Bulk Sample Results

Sample No.	Material Description	Material Location	Lead Content (wt% unless otherwise noted)	Approximate Quantity*
LBP-01-01, 02	White Paint	Throughout Walls	<0.010	N/A
LBP-02-01	Off-White w/Pink Paint	Hallway Walls	<0.010	N/A
Assumed	4" Brown Wall Ceramic Tile	Restrooms	Assumed Lead Containing; Sampling Would Cause Significant Damage	N/A
Assumed	2" Ceramic Floor Tile	Restrooms	Assumed Lead Containing; Sampling Would Cause Significant Damage	N/A

Quantity for "paint" reflects approximate area of loose & peeling only, not all painted surfaces

part of the project. ACC can provide further detail on regulatory requirements related to naturally occurring asbestos in soils.

Quantities identified may not represent entire quantities of each material in the building based on the scope of the survey.

The analyzing laboratory quantifies asbestos concentrations by calibrated visual estimation using standard PLM methodology; with detection of asbestos is material/matrix dependent. Detection of trace asbestos (<1%) may not be reliable or reproducible by PLM and percentage of asbestos weight cannot be determined with standard PLM methodology. Confirmation of asbestos concentrations within complex matrices (i.e. plaster, gypsum wallboard/taping/joint compounds, stucco, resilient flooring, roofing) or when asbestos concentrations are 1% or less may warrant additional analysis by PLM point counting, gravimetric reduction or Transmission Electron Microscopy for proper characterization of asbestos-containing materials and/or waste-stream analysis.

This report is prepared for the express use of Christian Church Homes, its agents and employees. The information in this report or portions thereof may be required to be included in notifications to employees, occupants, contractors, vendors or other visitors to the building. This report is *not* intended to be used as a specification or work plan for removal of asbestos-containing or other hazardous materials identified in the report or for any work suggested by the report.

Please contact me at (510) 638-8400 ext. 104 if you have any questions.

Sincerely,

Mark Sanchez
Senior Project Manager
Cal/OSHA Certified Asbestos Consultant (CAC #98-0082)

/mp:ms

Activities	Potential Exposure	Minimum Respiratory Protection
Class I activities include: Manual demolition, manual scraping, manual sanding, heat gun applications, general cleanup, power tool cleaning with dust collection systems and spray painting activities	50 µg/m³ to 500 µg/m³	Half mask air purifying respirator equipped with HEPA filters having a protection factor of 10
Class II activities include: Using lead-containing mortars, lead burning, lead riveting, rivet busting, power tool cleaning without dust collection systems, cleanup of dry expendable abrasives and abrasive blasting	500 µg/m³ to 2,500 µg/m³	Full face powered air purifying respirators equipped with HEPA filters having a protection factor of 100
Class III activities include: Abrasive blasting, welding, cutting and torch burning on steel structures	Greater than 2,500 µg/m³	Full face supplied air respirator operated in pressure demand mode or other positive pressure mode (type "C")

Limitations

ACC conducted the limited survey with the standard of care ordinarily exercised by qualified and reputable members of the environmental/industrial hygiene profession based on conditions and practices observed at the property and information provided to ACC related to the project and/or purpose of the survey at the time of the investigation. The survey was limited to specific project areas and was not intended to identify all suspect asbestos-containing materials within the building. Areas and materials not included in the survey should be inspected and sampled prior to any renovation, maintenance, demolition or other activity that may cause disturbance to the materials. This report does not intend to identify all hazards or unsafe practices, nor to indicate that other hazards or unsafe conditions do not exist at the property.

ACC encountered the following inaccessible areas in addition to general concealed conditions (i.e. within wall cavities, above/below solid ceilings or flooring/sub-flooring materials, etc.) and are excluded from the scope of the survey. These areas should be inspected and any suspect materials and sampled accordingly prior to any renovation, maintenance, demolition or other activity that may cause disturbance to the materials.

Inaccessible Areas

- No inaccessible areas/equipment were identified within the provided project areas

Materials that would require intrusive or destructive sampling were generally not sampled as part of the project unless written direction was provided to ACC to perform intrusive and/or destructive sampling on specific building systems, the area was unoccupied at the time of the survey and by performing intrusive/destructive sampling would not create an unsafe condition. Furthermore, ACC shall not be responsible for identifying and/or sampling suspect materials concealed within walls, columns, beneath flooring, above solid ceilings, underground or in any other concealed areas. ACC shall not be responsible for identification, sampling and/or characterization of lead-containing materials, PCB and lighting/mercury wastes, and water or mold impacted materials. General observations may be noted if ACC observed suspect conditions to the client either separately or within this report.

ACC excludes sampling concrete and asphalt paving as suspect asbestos-containing materials. Aggregate found in these materials may contain asbestos if supplied from quarries located in known ultra-mafic areas. It is possible that prior to recycling and/or disposal, recycling agents or landfills may require sampling of these materials to determine the presence of asbestos prior to acceptance.

ACC excludes characterization of soils in areas on known ultramafic rock (where naturally occurring asbestos may be found in soils) as part of the scope of work. If the project area is located within a known ultramafic rock area, provisions should be made to address regulatory requirements for any planned excavation and grading as

Due to magnification limitations inherent in PLM, asbestos fibers in dimensions below the resolution capability of PLM may not be detected. Samples reported as <1% or none detected may require additional testing by TEM to confirm asbestos quantities. The above test report relates only to the items tested and may not be reproduced in any form without the express written approval of EMSL Analytical, Inc. EMSL's liability is limited to the cost of analysis. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client.Samples received in good condition unless otherwise noted.

Due to magnification limitations inherent in PLM, asbestos fibers in dimensions below the resolution capability of PLM may not be detected. Samples reported as <1% or none detected may require additional testing by TEM to confirm asbestos quantities. The above test report relates only to the items tested and may not be reproduced in any form without the express written approval of EMSL Analytical, Inc. EMSL's liability is limited to the cost of analysis. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client.Samples received in good condition unless otherwise noted.

CERTIFICATE OF COMPLETION
NEW CLOTHES CLEANING ESTABLISHMENT

SBDC Lic. No. applied for Date Jan. 30, 1970 File No. ALA 23911F CP

This is to certify that

Mr. Ralph H. Torigian
Scotch Cleaners
2231 Fruitvale Avenue
Oakland, Calif. 94612

has completed the installation of a clothes cleaning establishment as per approved plans and/or permit dated October 15, 1969 and the arrangement of machinery, equipment and devices is in accordance with Chapter 2, Part 2, Division 12 of the Health and Safety Code, and Chapter 1, Title 19, California Administrative Code.

This establishment shall be maintained fully in accordance with the provisions of the documents set forth above, together with all other applicable state, county, or local laws and ordinances. No changes or additions in construction or equipment shall be undertaken without the express approval of the State Fire Marshal.

NOTE: Pursuant to the provisions of the Business and Professions Code, a state license for operation, together with a "new establishment" fee may be required by the State Board of Dry Cleaners. See enclosed notice from the State Board of Dry Cleaners (FM-1).

Gentlemen:

THIS COMMUNICATION IS A PERMIT FOR:

(X) establishment of
( ) construction of a building or room in
( ) additional construction in
( ) reconstruction of
( ) installation of machinery in
( ) addition of machinery in
( ) machinery rearrangement in
( ) machinery replacement in ;
( )

RECEIVED
OCT 17 1969
Industrial Housing Department
Boiler Division

a clothes cleaning establishment at the above address.

Your attention is called to local ordinances, rules and regulations, and restrictions by zoning and planning commissions and agencies. Local requirements more stringent than those administered by this office shall apply. This permit is not a guarantee that local authorities will sanction the proposal, and you are therefore cautioned to investigate thoroughly before continuing further with this undertaking.

In areas where a local or county building permit is required, the enclosed plan approved Oct. 16, 1969, should be submitted to the building authority.

NOTE: Prior to the operation of a NEW dry cleaning plant, a license is required by the State Board of Dry Cleaners.

Certificate of Completion is contingent upon satisfactory compliance with the following:

Form CP-2

CONTINUED:

This permit shall cover only the installation of one (1) Marvel #20 DC Unit Mod "W", one (1) Huebsch Reclaimer #30, one (1) Par Flex Filter/Cooker 1000.

1. All processes consisting of washing, extracting, and deodorizing, solvent cleaned garments shall take place in equipment approved for that purpose by the State Fire Marshal.

2. The State Fire Marshal reserves the right to require a ventilated enclosure around cleaning equipment in the event a toxic concentration of vapor develops.

3. The exhaust fans of the cleaning and reclaiming units shall be automatic in operation whenever the doors are opened. Exhaust fans, when operating as provided above, shall automatically exhaust vapors to the ventilation duct provided therefor.

4. Exhaust ducts shall terminate on the exterior of the building, not less than eight feet (8') from any opening in any building.

5. In the event muck is removed or handled in a wet condition, floor level ventilation or an approved type breathing mask shall be provided.

6. Attention is directed to the operational clearance requirements of the Division of Industrial Safety, Electrical Section.

7. This permit shall become automatically null and void if any construction it authorizes is commenced subsequent to the expiration of 60 days from and after the date on which it was issued.

8. The installation shall be made in accordance with accepted standards of good workmanship.

9. The transfer of reclaimed solvent from the Hucbach Reclaimer, Per Corbo Filter/Cooker to the cleaning system shall be made through an approved piping system by means of pump or gravity flow. In no case shall the reclaimed solvent be circulated or transferred by air pressure or open container.

10. An approved class 2A:BC rated fire extinguisher shall be installed. Extinguisher location shall be determined at field inspection. Fire extinguishers shall be serviced or weighed yearly in accordance with manufacturer's instructions printed on each extinguisher.

11. The Cooker-Still unit shall be vented to the exterior.

12. The water seperator shall be capped and vented to the exterior or to an exhaust system leading to the exterior.

Final acceptance subject to field inspection and tests. Upon completion of the installation authorized by this permit, please contact this office.

Yours very truly,

ALBERT E. NOLL
State Fire Marshal

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
AMERICAN NATIONAL CA	***3801 E 8TH ST***	***S 1/2 - 1 (0.926 mi.)***	***49***	***95***

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

HALLMARK CLEANERS	***3241 FOOTHILL BLVD***	***S 0 - 1/8 (0.113 mi.)***	***D21***	***27***

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

WALGREENS #1537	3232 FOOTHILL BLVD	SSE 0 - 1/8 (0.095 mi.)	D11	17

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2017 has revealed that there are 9 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 9 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there

are 7 HIST CORTESE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 10 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

WALT'S TRANSMISSION (Continued) **S112274173**

Case Type:	Cleanup Program Site
Case Worker:	REL
Local Agency:	Not reported
RB Case Number:	01S0736
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Gasoline
Site History:	It is unknown when the USTs were removed, but elevated levels of contamination were detected during preliminary site assessment performed in December 1999. Further site characterization performed in March 2001 detected chlorinated hydrocarbons in groundwater. ACEH requested site characterization work; however, the requested work was not implemented. Currently, the extent of contamination is undefined. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp.

Longitude:	-122.216033935547
Case Type:	LUST Cleanup Site
Status:	Open - Assessment & Interim Remedial Action
Status Date:	05/22/2014
Lead Agency:	ALAMEDA COUNTY LOP
Case Worker:	MD
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	NA
LOC Case Number:	RO0002945
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Nickel, Chromium, Gasoline, Stoddard solvent / Mineral Spriits / Distillates
Site History:	A Phase I ESA found the site had been previously used as an auto repair and service station between the 1930s and the early 1970s. The ESA found that two 500-gallon gasoline USTs were removed in 1984, but no records exist. An attempt to remove a waste oil UST was permitted in 1999; however, no UST was found. Four soil bores were installed in February 2007 to investigate subsurface conditions around the perimeter of what the previous owner had identified as the former location of the gasoline USTs. A work plan for additional work was submitted in November 2007, and additional work was requested; however, no further submittals or work appears to have occurred at the site.

Case Worker:	KS
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	01-1400
LOC Case Number:	RO0000357
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Stoddard solvent / Mineral Spriits / Distillates
Site History:	Site investigation activities have detected petroleum hydrocarbons as Stoddard solvent, PCE, and other volatile organic compounds (VOCs) that are breakdown products of PCE, in soil, soil vapor, and groundwater in the area of the former dry cleaning operations and six underground storage tanks. Prior to removal of the tanks in August 1990, the tanks were located beneath the sidewalk adjacent to Davis Street on the south side of the property. During the most recent site investigation activities, the results of which are presented in a report entitled, Subsurface Investigation Report (SG1-SG18, B12, B15-B19, B21-B32, C1-C5, MW3 and MW4), dated August 19, 2009, petroleum hydrocarbons as Stoddard solvent, PCE, and other VOCs were detected in soil, soil vapor, and groundwater beneath the site and extending off-site. Soil vapor, crawl space, and ambient air sampling was conducted at both on-site and off-site buildings in 2010. Further crawl space and ambient air sampling has been requested by ACEH. Results from the additional crawl space and ambient air sampling are to be submitted no later than May 10, 2016. A soil vapor extraction (SVE) system was installed at the site and began operation in January 2014. However, the SVE system was shut down and has not operated since February 28, 2014. ACEH has requested that the SVE system resume operation no later than February 23, 2016.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker: JTW
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: 01-2309
LOC Case Number: RO0000396
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: The site is currently a vacant lot located on the southwest corner of East 27th Street and 26th Avenue in Oakland, California. Surrounding land use is residential. Planned development for the site consists of two residential housing units. A gasoline service station and repair garage operated at the site from 1927 through 1994. On August 30 and 31, 1994, four 500-gallon gasoline USTs and one 100-galllon waste oil

THORPE PROPERTY GAS STATION (Continued) **S104396764**

UST were removed. Soil sample results from the bottom of the tank pit excavations contained TPH as gasoline at concentrations up to 930 ppm. Petroleum hydrocarbons were not detected in soil samples collected beneath the former dispenser islands. Upon completion of the soil sampling, the excavations were lined with plastic and backfilled with the stockpiled soil removed from the excavation. According to the tank removal report, backfilling of the tank pit excavations with contaminated soil was meant as a temporary measure to protect the stability of excavation sidewalls and adjacent streets. Re-excavation and off-site disposal of the contaminated backfill was recommended but not implemented until excavation in 2006. Despite requests for work by ACEH, no investigation or remediation was conducted at the site between the tank removal in 1994 and the preparation of a Phase I Environmental Site Assessment in 2001. Notices of Violation were issued on May 25, 1995 and May 13, 1996. A Pre-Enforcement Review Hearing was held on September 4, 1996. The case was referred to the Alameda County District Attorneys office for enforcement on September 22, 1999. On June 19, 2002 three soil borings (EB-1, EB-2, and EB-3) were advanced in each of the three former tank pits for soil and groundwater sampling. The borings were converted into monitoring wells; however, the wells were destroyed after one sampling event. TPHg was detected in soil from the two soil borings in the former gasoline tank pits at concentrations up to 1,800 ppm. TPHg was detected in groundwater from one of the three wells (EB-2) at a concentration of 93 ppb. TPHd was detected in groundwater from each of the three wells at concentrations ranging from 56 to 360 ppb. Benzene was detected in one of three groundwater samples at a concentration of 0.97 ppb. MTBE was not detected in any soil or groundwater samples. In January 2005, ten soil borings (SB-1 through SB-10) were advanced at the site for collection of soil and groundwater samples. The maximum concentrations of TPHg and TPHd detected in soil from the ten borings were 61 ppm and 52 ppm, respectively. Grab groundwater samples collected from the borings contained up to 90,000 ppb of TPHg and 750,000 ppb of TPHd. The maximum concentration of benzene detected in grab groundwater samples was 140 ppb. In February 2006, an additional 14 soil borings (SB-11 through SB-24) were advanced both on-site and off-site. Soil samples were collected at 2-foot intervals and a grab groundwater sample was collected from each soil boring. The maximum concentrations of TPHg and TPHd detected in soil from the 14 borings were 250 ppm and 490 ppm, respectively. TPHg was detected in 3 of the 14 grab groundwater samples at concentrations ranging from 51 to 1,500 ppb. Benzene was not detected in any of the grab groundwater samples. TPHd was detected in 9 of the 14 grab groundwater samples at concentrations ranging from 89 to 3,600 ppb. TPH as motor oil was detected in 8 of the 14 grab groundwater samples at concentrations ranging from 310 to 28,000 ppb. One soil boring (SB-25) was advanced to a depth of 27 feet bgs to collect depth-discrete grab groundwater samples to define the vertical extent of contamination on September 20, 2006. Based on the results from SB-25, no further assessment of the vertical extent of contamination was proposed. Approximately 396 tons of contaminated soil was excavated on December 1 and 2, 2006. The excavations were backfilled with clean, imported fill. Attwo locations, the concentration of TPHg in sidewall confirmation soil samples exceeded the target cleanup level of 100 ppm. Excavation was reportedly not continued at these two locations due to the proximity of the excavation to the sidewalk along East 27th Street and instability of

THORPE PROPERTY GAS STATION (Continued) **S104396764**

the excavation walls. In response to ACEH concerns regarding the extent and effectiveness of the excavation, eight soil borings (CS-1 through CS-8) were advanced outside the excavation walls to confirm the effectiveness of the soil removal. TPHg, TPHd, and BTEX were not detected at concentrations exceeding reporting limits in soil samples from confirmation borings CS-1 through CS-8. To assess the potential for vapor intrusion to indoor air, soil vapor samples were collected from six locations (SV-1 through SV-6), three from the footprint of each planned residence in February 2008. Although petroleum hydrocarbons were not detected at concentrations exceeding screening levels, trichloroethene (TCE) was detected at a concentration of 5.7 micrograms per liter (a%g/L) in one soil vapor sample (SV-4). In March 2010, soil vapor samples were collected from six locations (SV-8 through SV-13) adjacent to or surrounding SV-4. TCE was not detected above a reporting limit of 0.1 a%g/L in any of the soil vapor samples collected in March 2010.

Status:	Open - Site Assessment
Status Date:	05/22/2008
Lead Agency:	ALAMEDA COUNTY LOP
Case Worker:	KLD
Local Agency:	ALAMEDA COUNTY LOP
RB Case Number:	NA
LOC Case Number:	RO0000307
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	A former ARCO station operated at the site. The site was subsequently sold and redeveloped. In July 1998, borings were installed at the site. Soil and groundwater contamination was detected at the site. In 1999, geophysical surveys to locate former USTs and additional borings were installed. In 2002, monitoring wells were installed and in 2002, additional borings were installed.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: PA completed which identified 2 SWMUs and 2 AOC DRUM STORAGE AREA-This unit consists of a bermed concrete pad with a design capacity of 256 drums measuring approximately 20 feet by 40 feet that is enclosed by a chain-link fence. Drums of waste solvent were formerly stored here until 1988. This unit was located outside in the yard near the product storage building. According to the closure plan, this unit was used for hazardous waste storage beginning in September 1983 and has not been used to store wastes since 1988 At the time of the FIT site visit no drummed wastes were present and this unit was being steam-cleaned. Waste Managed: Drummed waste liquids including waste machine oil, spent solvent, paint sludge, waste hydrochloric acid solution, and waste copper sulfate (liquid) were stored here. Among the constituents in these wastes were methyl ethyl ketone, aromatic hydrocarbons, isopropanol, toluene, benzene, methanol, ethanol, copper sulfate, and hydrogen chloride. This unit is a bermed (6 inches) concrete pad surrounded by a chain-link fence (2,14). A removable plug at one end of the unit was used to drain rainwater. Drums were stored within the area on wooden pallets. No releases are known to have occurred from this unit. No sampling has been performed to determine whether or not there have been releases.

AMERICAN NATIONAL CAN CO (Continued) **1007156428**

SOLDER DROSS STORAGE AREA - The solder dross storage area is a section of the concrete railroad platform that is cordoned off with a chain-link fence. This unbermed unit has a design capacity of approximately 100 drums and measures approximately 40 feet by 8 feet (2,14). A raised roof (no walls) affords some protection from the elements for this unit. According to the closure plan, this unit was first used in 1983. This unit was being steam-cleaned at the time of the FIT site visit. Waste Managed: This unit was used to store drummed lead solder dross and baghouse dust which have a composition of 97 percent lead and 3 percent tin and antimony. The solder dross storage area is part of a converted railroad platform. There are no apparent release controls. No releases are known to have occurred from this unit. No sampling is known to have been performed to determine whether or not releases have occurred. AREA OF CONCERN - OLD BOILER FUEL TANK This area of concern is located on the east side of the property in a small area between the edge of the property and the building foundation. The old boiler fuel tank was installed probably before World War II. Fuel product is floating on the aquifer in this area and is being pumped out and disposed of by a contractor. This unit was filled with concrete instead of being removed because its awkward physical location (between the building foundation and East 8th Street) precluded removal. AREA OF CONCERN - SOLVENT PRODUCT TANK FARM Located on the west side of the property just south of the product storage building were six underground storage tanks that were removed in 1986 and 1987. Non-chlorinated solvents (including methyl ethyl ketone, toluene and xylene) used in the can coatings were stored in these tanks. Solvent-contaminated soil was excavated from the surrounding area during removal. Although according to ANCC post-removal sampling was conducted, specific information about the event does not appear to exist.

FINDS:

Registry ID: 110000844686

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/05/2017

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/05/2017

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/30/2016

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board?s review found that more than one-third of the region?s active disposal pits are operating without permission.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Longitude (West):	122.222498 - 122° 13' 20.99''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	568463.2
UTM Y (Meters):	4182085.2
Elevation:	90 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5641110 OAKLAND EAST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

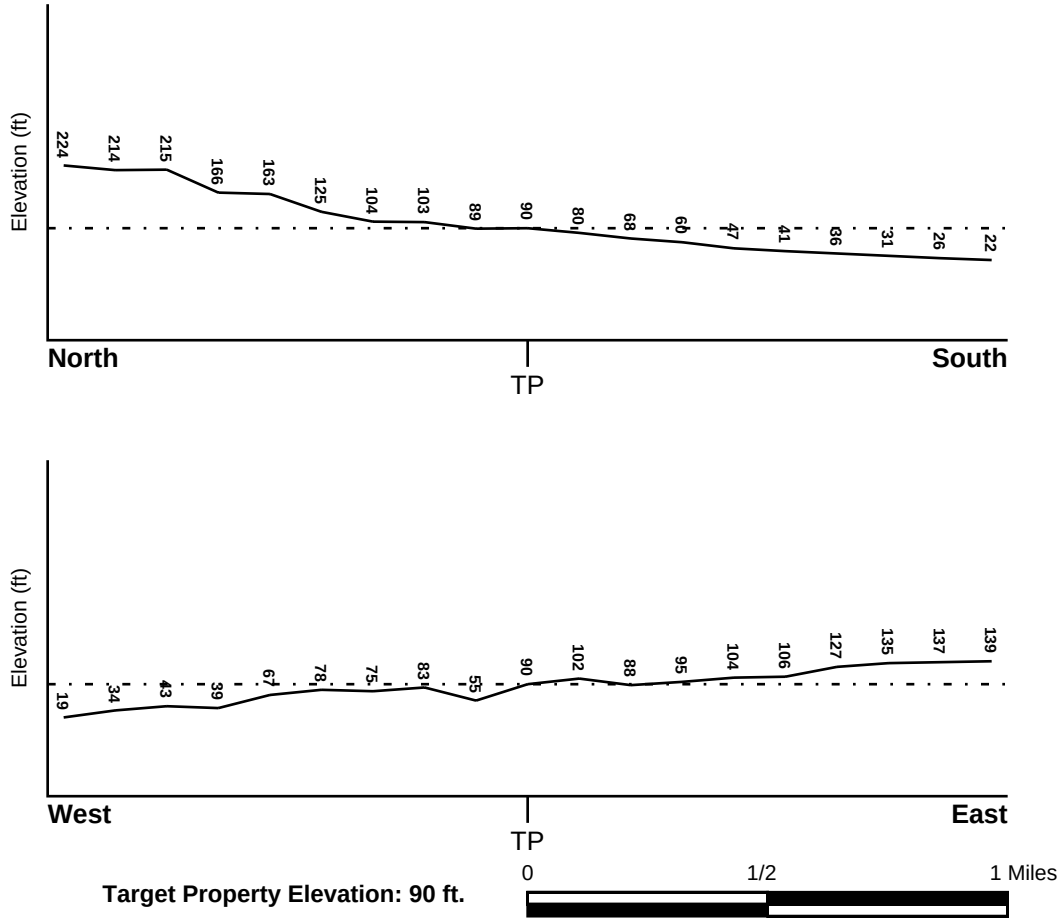

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06001C0086G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06001C0089G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OAKLAND EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Tierra

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 5.1
2	11 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 7.3 Min: 5.6
3	31 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6

Soil Map ID: 2

Soil Component Name: Tierra

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 6.5 Min: 5.1

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Training

40-Hour OSHA HAZWAPOR Certification

Highlights

2 years in the environmental consulting/due diligence field
2 years the environmental health and safety consulting field
Experience performing due diligence assessments including Phase I Environmental Site Assessments, Phase II Subsurface Investigations, as well as HUD and Fannie Mae assessments
Mentor to entry-level/junior staff

Experience Summary

Mr. Helou currently holds the role of a Staff Assessor at Partner Engineering and Science, Inc. (Partner) and is responsible for thorough site assessment and technical report writing in line with the American Society of Testing and Materials (ASTM) standard and US Environmental Protection Agency's All Appropriate Inquiry (AAI) as well as customized client formats. Mr. Helou is capable of performing HUD and Fannie Mae Phase I assessments. In addition, Mr. Helou performs limited Phase II projects, asbestos and lead-based paint screenings, and radon testing as required per scope of work.

Mr. Helou has worked on several large scoped due diligence projects throughout Northern California, including a portfolio for numerous Lucky Supermarkets that had an extensive historical use with numerous gas stations, auto repair facilities, dry cleaning facilities, and extensive subsurface investigations and remedial activities. Mr. Helou is persistent and timely-oriented to meet his project deadlines. Mr. Helou has recently began working on Phase II projects in the Northern California area for commercial and industrial properties. Mr. Helou has also worked on uniquely scoped projects assessing multi-family apartments which consisted of over 80 residential structures in a 3-mile radius in Providence, Rhode Island. As part of the scope, preliminary asbestos and lead-based paint screenings were also included. Mr. Helou has also aided with HUD and Fannie Mae assessments.

Prior to joining Partner, Mr. Helou has worked in the environmental health and safety services field primarily focusing in hazardous waste management for life science, industrial, healthcare, and high education niches. His roles included executing compliance audits and inspections for laboratory and healthcare facilities, chemical inventory, segregation, consolidation and packing under RCRA, OSHA and DOT regulations, advise and conduct Health and Safety Plans (HASPs) and Safety Operation Plans (SOPs) for facilities, emergency response services and DuPont STOP Audit training to identify internal safety hazards including hazard communication components. His two years of experience in this industry contributes to identifying and evaluating potential environmental and safety concerns as well as proper storage and disposal of hazardous materials and/or wastes.

Project Experience

Mr. Helou has experience performing due diligence assessments for a variety of property types including multi-family residences, commercial and medical office buildings, retail shopping centers, gas stations, self-

storage facilities, manufacturing facilities, and packaging and distribution facilities. For each assessment he performs he reviews the condition of the building structure and systems and develops a thorough report.

Warehouse; Norton, Massachusetts. Mr. Helou performed a Phase I Environmental Site Assessment for an 18 acre packaging and distribution warehouse facility.

11-Story Commercial High-Rise; San Francisco, California. Mr. Helou performed a Phase I Environmental Site Assessment for an 11-story commercial high-rise building.

Light-industrial; Attleboro, Massachusetts. Mr. Helou performed a Phase I Environmental Site Assessment for a 13.74 acre industrial facility with light-manufacturing processes.

Skilled Nursing Facility; Sacramento, California. Mr. Helou performed a HUD Phase I Environmental Site Assessment for a 127 unit Skilled Nursing Facility.

Retail shopping center; Waterford, Connecticut. Mr. Helou performed a Phase I Environmental Site Assessment for an equity level, 56.5 acre shopping center.

Self-storage facility; Manchester, New Hampshire. Mr. Helou performed a Phase I Environmental Site Assessment for a 424-unit self-storage facility.

Medical office buildings; Chicago, Illinois. Mr. Helou performed a Phase I Environmental Site Assessment for 3 medical office buildings located throughout the Chicago area.

Two professional office buildings; East Hartford, Connecticut. Mr. Helou performed a Phase I Environmental Site Assessment for 7- and 9-story professional office structures attached with a multi-level parking garage.

Village of Johnsonville, residential and commercial; East Haddam, Connecticut. Mr. Helou performed a Phase I Environmental Site Assessment for a 67 acre abandoned property which had an extensive history as a twine mill and existing buildings dated back to the circa 1760.

Warehouse Distribution; Rancho Cordova, California. Mr. Helou performed an equity level Phase II Subsurface Investigation for a former distribution warehouse.

Multi-family apartments consisting of over 80 residential structures over a 3-mile radius; Providence, Rhode Island. Mr. Helou performed a Phase I Environmental Site Assessment for multi-family apartments which included both asbestos and lead-based paint screenings.

Education

Bachelor of Science, Biology, Arizona State University

Training

Hazardous Waste Operations and Emergency Response (HAZWOPER) 40-hour (with First Aid, CPR)
Asbestos Hazard and Emergency Response Act (AHERA) Asbestos Building Inspector
EPA Method 9 Visible Emissions
AGC/ADOT Erosion Control Coordinator

Highlights

Over 10 years of experience performing due diligence assessments and subsurface investigations
Over 10 years of experience in soil and groundwater remediation
Over 10 years conducting industrial hygiene assessments such as asbestos, lead, radon, and mold surveys

Experience Summary

Mr. Bailey serves as a Senior Project Manager, overseeing and managing all aspects of multi-scope projects including Phase I ESAs in accordance with EPA's All Appropriate Inquiry (AAI), Property Condition Assessments (PCAs), Sub-specialist Reports, Zoning Reports, Seismic Assessments, and Industrial Hygiene-related projects.

Mr. Bailey has significant experience in due diligence assessments for a variety of property types and the needs and requirements of a variety of reporting standards, including ASTM standards, EPA's AAI, Freddie Mac, Fannie Mae, and customized client formats. Specifically, Mr. Bailey has performed Phase I Environmental Site Assessments (ESAs), Environmental Transaction Screens, Database Reviews, Phase II Subsurface Investigations, Stormwater Pollution Prevention Plans (SWPPs), Spill Prevention, Control, and Countermeasure (SPCC) Plans, Geotechnical Evaluations, Soil and Groundwater Remediation, Regulatory Compliance Assessments, Asbestos Surveys, Lead-based Paint Surveys, Radon Surveys, and Mold Assessments.

Environmental Assessments

Duties included performing site visits; gathering zoning, ownership, building permits, fire records, and groundwater well information; geology research; UST and leaking underground storage tank (LUST) file review; aerial photograph interpretation; Resource Conservation Recovery Act (RCRA), Water Quality Assurance Revolving Fund (WQARF), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) database and city directory review; personal interviews; and preparation of technical reports.

Subsurface Investigations

Mr. Bailey has extensive experience in conducting Phase II Subsurface Investigations on industrial manufacturing facilities, plating facilities, DOT yards, gas stations, auto repair facilities, multi-family residential properties, shopping centers, and undeveloped land. Mr. Bailey has conducted soil and soil gas sampling, groundwater sampling, oversight of underground storage tank (UST) removal activities, drywell investigations, and extensive soil and groundwater remediation activities at former plating facilities, former military airport, and aggregate mines.

Industrial Hygiene Surveys

Mr. Bailey has served as a Project Scientist and Project Manager on numerous industrial hygiene related projects. Projects included asbestos, microbial remediation, lead-based paint, and industrial hygiene (plating and paint mixing facilities) related projects, including sampling, report preparation, and senior review for a variety of clients throughout the United States. In addition, Mr. Bailey has provided asbestos and microbial abatement oversight activities at private, commercial, and school facilities.

Geotechnical Evaluations

Mr. Bailey's field experience includes logging and sampling geotechnical borings for civil engineering and future construction projects. Duties included placing boring locations via GPS coordinates, logging borings, collection of soil samples, classification of soils in accordance with Unified Soil Classification System (USCS), and supervision and coordination of drilling and utility locating companies.

Project Experience

Former Semi-Conductor Plating Facility, Phoenix, Arizona. Mr. Bailey served as the field team leader for the decommissioning of a former semi-conductor plating facility. He conducted numerous subsurface investigations and provided technical oversight during remedial activities and post-remedial clearance sampling.

Various High Profile Acquisition Properties, Various locations throughout the United States. Mr. Bailey has managed numerous multi-scope equity projects on high profile and historic hotel/resort properties, with scopes of work including Phase I ESAs, PCAs, Sub-specialist Reports, Zoning Reports, Seismic Assessments, and Industrial Hygiene-related sampling.

Various Freddie Mac and Fannie Mae Multifamily Properties, Various locations throughout the United States. Mr. Bailey has managed and staffed numerous Freddie Mac and Fannie Mae scope projects throughout the United States. Scopes include Phase I ESAs, PCAs, and Seismic Assessments.

Former Aggregate Mine, Salt River Pima-Maricopa Indian Community, Arizona. Mr. Bailey served as the field team leader for the decommissioning of a former aggregate mine on Tribal Lands. He conducted numerous subsurface investigations and provided technical oversight during remedial activities, UST removal operations, septic system removals, well abandonment, and post-remedial clearance sampling.

Department of Defense Cleanup, Mesa, Arizona. Mr. Bailey was subcontracted to provide general technical operation assistance and routine compliance sampling at a Thermally-Enhanced Soil Vapor Extraction pilot test for a former Air Force jet fueling compound and active Superfund Site.

Soil and groundwater contamination investigations and remediation.
Regulatory compliance projects.
Ordnance Removal Engineering Studies.

Experience Summary

Mr. Jones currently serves as a National Client Manager for Partner Engineering & Science, Inc. providing solutions to clients' physical condition and environmental due diligence and engineering needs. He is responsible for ensuring consistency and quality and on-time report delivery of due diligence and engineering services provided by Partner. Current day to day responsibilities include project oversight, staff supervision, problem solving, report review, and client management.

Mr. Jones has served as an environmental scientist, project manager, or senior author for projects associated with over 7,000 real estate transactions. Mr. Jones is familiar with the due diligence requirements of a varied number of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), Fannie Mae DUS, HUD, and Freddie Mac. He also has experience with fulfilling numerous customized client scopes of work. Mr. Jones' due diligence resume includes experience at all levels including advising traditional and agency lenders, real estate investors, and other client types through the following product types: Phase I Environmental Site Assessments, Environmental Transaction Screens, Phase II Subsurface Investigations, Remedial Cost Estimates, Remediation Design, Property Condition Assessments, Probable Maximum Loss Assessments, asbestos, lead-based paint, lead-in water, radon, mold surveys, geophysical surveys, regulatory compliance projects, Engineering Evaluation/Cost Analysis projects, and Preliminary Endangerment Assessments. His specialty is performing engineering and environmental due diligence for lenders, real estate investors, attorneys, and government entities.

Additionally, over the course of his career, as a staff scientist, project manager, senior project manager and client manager, Mr. Jones has significant relevant project experience relating to investigation and cleanup of soil, soil vapor, and groundwater contamination. The investigations and cleanup projects have occurred at current and former gas stations and dry cleaning facilities, agricultural properties, industrial and

manufacturing facilities, and military installations. Investigation and cleanup projects have been as the result of releases from underground storage tanks, dry cleaning equipment, and from spills and/or dumping activities. Media that has been investigated and remediated has included dry cleaning chemicals and wastes, gasoline, diesel, and other fuel types, and PCA and TCE plumes. In addition, Mr. Jones was often the point of contact for regulatory agencies, and produced work plans, bid documents, contracts, specifications, and the documents that detailed the investigation, long-term groundwater monitoring, and/or soil and groundwater cleanup activities.

Project Experience

Acquisition Assessments, LAX Marriott. Mr. Jones led a team of specialty consultants who evaluated the physical condition of the LAX Marriott hotel. A generalist specializing in management of equity PCAs worked with a team of specialists under Mr. Jones' direction, including the following scopes and disciplines: Mechanical, Engineering, and Plumbing / Fire Life Safety (MEP/FLS) assessments, elevator assessment, roof assessment, accessibility survey, and curtain wall evaluation. Additionally, the team performed a Phase I Environmental Site Assessment (ESA), Phase II ESA, site characterization due to contaminants identified from historic manufacturing uses, a seismic risk assessment, and an ALTA survey. Mr. Jones' team worked with several attorneys and the client's acquisitions team to provide a detailed account of problematic issues and associated costs for their consideration in order to help determine whether the acquisition should occur.

Acquisition Property Condition Assessments, Tustin Center I & II, Santa Ana, CA; 235 Pine Street, San Francisco, CA; Park 80 West, Saddle Brook, NJ; United Plaza, Philadelphia, PA; California Plaza, Walnut Creek, CA; Stadium Gateway. Mr. Jones led a team of specialty consultants who evaluated the physical condition of the above mid to high-rise office building properties. A generalist specializing in management of equity PCAs worked with a team of specialists under Mr. Jones' direction, including but not limited to the following scopes and disciplines: Mechanical, Engineering, and Plumbing / Fire Life Safety (MEP/FLS) assessments, elevator assessments, roof assessments, curtain wall evaluations, structural engineering evaluations, microbiological influenced corrosion (MIC) testing, and water intrusion assessment and testing. Mr. Jones' team worked with the client's acquisitions team to provide a detailed account of problematic issues and associated costs for their consideration in order to help determine whether the acquisitions should occur.

Acquisition Property Condition Assessments (PCAs) and Phase I Environmental Assessments (ESAs) for Medical Office Buildings. Mr. Jones led a team of specialty consultants who evaluated the physical and environmental condition of hundreds of medical office building properties across the United States. The due diligence work was associated with both portfolios of medical office buildings as well as individual properties. A generalist specializing in management of equity PCAs worked with a team of specialists under Mr. Jones' direction, including but not limited to the following scopes and disciplines: Mechanical, Engineering, and Plumbing / Fire Life Safety (MEP/FLS) assessments, elevator assessments, roof assessments, curtain wall evaluations, and structural engineering evaluations. Phase I ESAs and in many cases Seismic Risk Assessments were also performed. Mr. Jones' team worked with the client's acquisitions team and their attorneys to provide a detailed account of problematic issues and associated costs for their consideration in order to help determine whether the acquisitions should occur.

Fannie Mae and Freddie Mac ESAs and PCAs. Mr. Jones' team has performed hundreds of Phase I Environmental Site Assessments and Property Condition Assessments for Fannie Mae and Freddie Mac

agency lenders. The multi-family developments evaluated by Mr. Jones and his team have been located all across the United States.

PEAs, Beaumont and Coachella, CA School Districts. Mr. Jones' team has performed several Preliminary Endangerment Assessments on agricultural properties to determine whether the sites were impacted with agricultural chemicals and to determine if the properties were suitable locations for public schools to be developed. The analysis included developing a protocol for pesticide and herbicide testing, performing the sampling in accordance with said protocol, and an evaluation of the sampling results.

EBS' at U.S. Air Force Bases. Mr. Jones has been part of a team that performed numerous Environmental Baseline Surveys (EBS') at United States Air Force Bases across the country. The EBS document was a comprehensive survey or assessment that was essentially a very detailed account of the environmental issues and status at the Air Force Base and on properties that adjoined the Air Force Base. The document contained information including but not limited to: aboveground and underground storage tanks, oil water separators, hazardous materials use and hazardous waste storage locations, chemical inventories, buildings with known or suspected PCBs, asbestos, and/or lead based paint, contamination sites, and sites with radioactive materials or wastes.

EE/CA, Fort Ord, Monterey Bay, CA. Mr. Jones was the Deputy Task Order Manager for an Engineering Evaluation/Cost Analysis study at the former Fort Ord, California. The study identified and documented both newly discovered and known ordnance sites at the former Fort Ord. The types of ordnance at each site were determined as well as the expected depths of penetration upon impact. The costs associated with removing the ordnance was also determined and recommendations were made as to what depths below ground surface the ordnance removals should occur at each site.

Subsurface Investigation, Ogden, UT. Mr. Jones performed a large scale investigation to determine if any soil or groundwater contamination was present at numerous locations where fuel was stored in underground and aboveground storage tanks at the U.S. Army Defense Depot Ogden. When contaminants were identified, the sites were then characterized to determine extent of impact to soil and groundwater.

Environmental Compliance Audit, Atchison, KS. Mr. Jones performed an Environmental Compliance Audit (ECA) of numerous environmental resource management protocols at the Atchison Facility for the Federal Defense Logistics Agency in Atchison, Kansas.
