Dear Barbara Jakub:

As per our phone conversation today, you will expedite the clean up process in 3-4 months. As you noticed, this clean up began before my child is born. At this time, my child is university graduated and I am retired. I feel that spending over twenty years to wait on the cleanup process is a lot of time in my life. To me, putting some Benzene eating bacteria to the existing test wells, plus the mother nature would be enough for this clean up. However if anything that caused this delay is due to the clean up company or involves Mrs. Aniko Molar, please let me know and I will spend my time to coordinate this matter.

Thank you!

Sincerely,

Raymond Yu
