Work Plan Amendment  
Supplemental Soil and  
Groundwater Investigation  
2801 MacArthur Boulevard  
Oakland, California

Dear Ms. Chu:

This letter presents an amendment to the Work Plan prepared by Subsurface Consultants, Inc. (SCI) dated April 27, 1994. The work plan and amendment have been prepared and submitted by SCI on behalf of the A.P.A. Fund, Ltd. in response to your letter dated May 2, 1994.

As requested in your letter, we propose to investigate the extent of groundwater contamination by installing one (1) monitoring well on Georgia Street, as shown on the attached Site Plan. Monitoring well installation, development and sampling procedures will be performed as previously outlined in our original work plan. Additionally, the boring on MacArthur Boulevard will not be converted into a monitoring well as previously planned. However, it will be used to obtain soil samples and a grab groundwater sample.

We look forward to your favorable review of our revised work plan. If you have any questions, please call.

Yours very truly,

Subsurface Consultants, Inc.

James P. Bowers  
Geotechnical Engineer 157 (expires 3/31/96)
