RE: **Former Thrifty Oil Co. Station #049**
3400 San Pablo Avenue
Oakland, CA 94612
3rd Quarter 2006, Status Report

Dear Mr. Plunkett:

Presented herein is the 3rd Quarter 2006, Status Report prepared for former Thrifty Oil Co. (Thrifty) Station #049 located at 3400 San Pablo Avenue, Oakland, California (**Figure 1**). This report presents the results of the site monitoring and remedial activities conducted during the third quarter of 2006.

Should you have any questions regarding this report, please contact either Simon Tregurtha or myself at 562 921-3581.

Respectfully submitted,

Chris Panaitescu
General Manager
Environmental Affairs

Summary of Monitoring and Sampling Activities

Thrifty Oil Co. Station #049

Third Quarter 2006

Reporting Period: 7/1/2006 to 9/30/2006

Site Information:

Site address:	TOC SS #049 (ARCO #9535) 3400 San Pablo Avenue Oakland, CA
Global ID No.:	T0600101365
EDF Confirmation No.:	6036525487 / 1006678164
Lead Agency No.:	Local #R00000004 &
Lead Agency:	Alameda County Health Care Services
Agency Contact:	Mr. Steven Plunkett / 510 383-1767
Project Manager:	Simon Tregurtha / 562-921-3581 ext. 404

Field Activity:

Groundwater wells onsite:	8
Groundwater wells offsite:	0
Date(s) monitored:	7/19/2006 / 9/15/2006
Date(s) sampled:	7/19/2006 / 9/15/2006
Groundwater wells gauged:	8 / 4
Groundwater wells sampled:	8 / 4
Purging method:	Bailer / Pump
Treatment / disposal method during sampling event:	Drums – Safety-Kleen pickup
Groundwater wells with free product:	0
Free product thickness (feet):	NA
Free product bailouts other than sampling event:	NA
Treatment / disposal method/free product bailouts:	NA

Site Hydrogeology:

Depth to groundwater (feet bgs):	5.56 to 8.10
Groundwater elevation (feet above mean sea level):	92.06 to 93.29
Groundwater gradient and flow direction:	Southwest at approximately 0.0167 ft./ft.
Consistent with previous quarter:	Consistent with previous quarters

Groundwater Conditions: (Excludes 7/19/2006 results from wells MW-1, MW-3, MW-5, and MW-7)

TPHg concentration (ug/L):	ND<5.6 to 34,500
Benzene concentration (ug/L):	ND<0.32 to 377
Toluene concentration (ug/L):	ND<0.1 to 1,120
Ethyl benzene concentration (ug/L):	ND<0.24 to 627
Total Xylenes concentration (ug/L):	ND<0.3 to 3,950
MTBE concentration (ug/L):	ND<0.63 to 636
DIPE concentration (ug/L):	ND<0.29 to <2.9
ETBE concentration (ug/L):	ND<0.17 to <1.7
TAME concentration (ug/L):	ND<0.28 to 68
TBA concentration (ug/L):	ND<10 to 217

Remediation Activity:

System type:	GWPT
System start-up:	4/8/91 (Upgraded System Start-Up 6/21/04)
Operation this quarter (hrs.):	NA
Cumulative Operation (hrs.):	NA
GW discharge this quarter (gal.):	11,800
Total GW discharge (gal.):	1,609,556 (as of 9/27/2006)
Hydrocarbons extracted this quarter (lbs.):	NA
Total hydrocarbons extracted (lbs.):	NA
Hydrocarbon removal rate (lbs/hour) from startup	NA
Hydrocarbon removal rate (lbs/hour) this quarter	NA

Groundwater Monitoring

Depth to groundwater is measured in each monitoring well on a quarterly basis. A groundwater elevation contour map based on the July 19, 2006 monitoring data is presented in **Figure 2**. Groundwater elevation data indicates that groundwater flow to the southwest under an approximate gradient of 0.0167 feet/foot.

Quarterly Groundwater Sampling

As part of the ongoing groundwater-monitoring program, EMC obtained groundwater samples from monitoring wells MW-1, MW-2R, MW-3, MW-4R, MW-5, MW-6, MW-7, and RW-1R on July 19, 2006. Groundwater wells MW-2 and MW-4 and recovery well RW-1 were abandoned by Advanced GeoEnvironmental (AGE) in January 2004, and replacement wells MW-2R, MW-4R, and RW-1R were installed as part of an upgrade to the groundwater recovery system. Groundwater samples were delivered by EMC in a chilled state following strict Chain-of-Custody procedures to a state-certified laboratory and analyzed for total petroleum hydrocarbons as gasoline (TPHg) by EPA Method 8015M. Volatile organic compounds of benzene, toluene, ethylbenzene, xylenes (BTEX), methyl tert butyl ether (MTBE), and other oxygenates were analyzed by EPA Method 8260B. Laboratory analytical results of groundwater samples collected from monitoring wells MW-1, MW-3, MW-5, and MW-7 indicated TPHg, BTEX, and oxygenates at concentrations significantly higher than those reported in the previous several quarters. Elevated concentrations in these wells are thought to be anomalous and may have been due to technician or laboratory error. Monitoring wells MW-1, MW-3, MW-5, and MW-7 were therefore re-sampled on September 15, 2006, and the groundwater samples were delivered by EMC in a chilled state following strict Chain-of-Custody procedures to a state-certified laboratory and analyzed for TPHg by EPA Method 8015M and BTEX, MTBE, and other oxygenates by EPA Method 8260B. A summary of historical analytical sampling results for TPHg, BTEX, and MTBE is provided in **Table 1** and other oxygenates in **Table 2**. Copies of the EMC Field Data Groundwater Sampling Forms are provided in **Appendix A**, and copies of the laboratory analytical reports are contained in **Appendix B**.

Laboratory results of groundwater samples collected from monitoring wells MW1, MW3, MW5, and MW7 on September 15, 2006 indicated TPHg, benzene and MTBE concentrations significantly lower than those reported in the samples collected from the same wells on July 19, 2006. TPHg, benzene, and MTBE isoconcentration maps in micrograms per liter ($\mu\text{g}/\text{L}$) were prepared using data from the July 19 and September 15, 2006, sampling events and are presented in **Figures 3, 4, and 5**, respectively. These figures incorporated data from the September 15, 2006 re-sampling of monitoring wells MW-1, MW-3, MW-5, and MW-7, as the re-sampling data conformed more closely with the historical data from these wells and therefore appears to be more representative of the site conditions. Laboratory results indicate the maximum concentration of benzene was detected in well RW-1R (55 $\mu\text{g}/\text{L}$). The maximum MTBE was detected in well RW-1R (636 $\mu\text{g}/\text{L}$). The maximum TPHg concentration was detected in well RW-4R (34,500 $\mu\text{g}/\text{L}$).

TPHg, benzene, and MTBE concentrations detected in the groundwater sample collected from up-gradient well MW3 on September 15, 2006 (although significantly lower than the sample collected on July 19, 2006) were significantly higher than those reported in the previous several quarters. Based on fourth quarter 2006 groundwater sampling results, Thrifty will determine the likelihood of a new release at the site.

Benzene and MTBE concentrations decreased significantly from the previous quarter in monitoring well MW-4R. TPHg and MTBE decreased significantly from the previous quarter in monitoring well MW-6. No other significant changes occurred in concentrations reported in the wells sampled this quarter with the exception of increased TPHg, benzene, and MTBE concentrations reported in the groundwater sample collected from up-gradient well MW3. These comparisons to the previous quarter's data exclude the July 19, 2006 data from wells MW-1, MW-3, MW-5, and MW-7 which do not appear to be representative of site conditions.

Remediation Status

Site remedial activities were initiated in April 1991. Originally, the remediation equipment consisted of a Groundwater Treatment System using activated carbon, with groundwater extraction from recovery well RW-1. System operational data is included in **Table 3**. On April 4, 2003, the system was shut off for upgrading activities. As of April 4, 2003, the system treated approximately 1,445,088 gallons of groundwater since start up (April 1991).

Thrifty selected AGE to conduct remedial system upgrade activities including installation of a new treatment compound, installation of new piping, connection of piping to the replacement well network, and the operation and maintenance of the upgraded groundwater pump and treat system. In January 2004, AGE abandoned wells MW-2, MW-4, and RW-1 and replaced them with wells MW-2R, MW-4R, and RW-1R.

The upgraded remediation system was restarted by Advance GeoEnvironmental (AGE) for continuous operation on June 21, 2004. The primary components of the upgraded system within the treatment compound consist of an air compressor, 500 gallon Poly settling tank, control panel, and three 200 pound granular activated carbon canisters (**Figures 6 and 7**). The upgraded system is removing groundwater from extraction wells MW-2R, MW-4R, and RW-1R that are each equipped with downhole submersible pumps.

On November 2, 2004, AGE reported that the pump had been stolen from well MW-4R. Due to the fact that well MW-4R was producing more water than well MW-2R, the pump from well MW-2R was removed and installed in well MW-4R. On February 25, 2005, a new pump was installed in well MW-4R and the pump was replaced in well MW-2R.

On January 12, 2005, system operations and maintenance duties were assumed by EMC from AGE. During the current reporting period, as of September 27, 2006, the upgraded system produced and treated 11,800 gallons of water for a cumulative system total of 1,609,556 gallons (**Table 3**).

On July 11, 2006, Thrifty collected an effluent water sample from the PSP-1 sampling port and submitted the sample for analyses for benzene, toluene, ethylbenzene, and xylenes (BTEX) by EPA Method 8021B and for TPHg by EPA Method 8015M. TPHg and BTEX were not detected above their respective detection limits. Copies of the Field Reports prepared by EMC are provided in **Appendix C** and the system effluent analytical results collected by EMC on July 11, 2006 are provided in **Appendix D**.

Thrifty #049
3rd Quarter 2006
Page 5

Recent Site Investigation

In a transmittal letter dated March 11, 2004, Thrifty submitted preliminary soil and groundwater data from the four offsite soil borings and onsite well replacement activities performed by AGE. On March 18, 2004, Thrifty, AGE, and the Alameda County Health Care Services (ACHCS) met at the site to discuss the location of offsite well MW-8 and the soil and groundwater data provided by Thrifty. In a letter dated March 19, 2004, the ACHCS requested that Thrifty prepare a workplan to address the offsite

Contamination detected during the January 2004 site assessment conducted by AGE. After further discussing the scope of work with the ACHCS in e-mail dated April 27, 2004, Thrifty submitted a workplan to install one onsite and two offsite wells downgradient of the site. The ACHCS responded in an e-mail dated May 4, 2004, requesting additional borings to delineate the plume to the west and southwest of the site. Thrifty submitted a revised Workplan for Additional Offsite Assessment dated May 7, 2004 that included two additional borings to the southwest of the site. In a letter dated May 17, 2004, the ACHCS approved the May 7, 2004, workplan with the request that additional borings be considered if soil and groundwater samples indicate significant hydrocarbon contamination. The ACHCS also suggested moving the location of proposed onsite well MW-10 slightly to the west to be more downgradient of the Shell Station. A map with the final locations of the soil borings and wells approved to be installed at the site is attached (**Figure 8**). Thrifty has selected GeoHydrologic Consultants, Inc. (GHC) to conduct site assessment activities. GHC has obtained well permits and is in the process of obtaining an encroachment permit from the City of Oakland Public Works Department (COPWD).

Planned Activities

The encroachment permit is still being reviewed by the COPWD following comments by Thrifty. Thrifty expects to complete field activities and submit a site assessment report within 75 days following approval of the encroachment permit.

Thrifty will install well MW-10 as soon as soon as the driller and consultants can make the necessary arrangements.

The groundwater monitoring wells will be monitored and sampled during the next quarter. All site monitoring/sampling data generated during the next quarter will be reported in the Fourth Quarter 2006 monitoring report.

Closing Comments

All interpretations expressed in this report are based solely upon data collected by EMC and laboratory analyses conducted by Associated Laboratories.

Sincerely,

Simon Tregurtha
Project Manager

NP = No free hydrocarbon product

" - " = Not analyzed / Not available

Benzene, toluene, ethylbenzene, and xylene analyzed by EPA method 8020.

Total petroleum hydrocarbons (TPH) analyzed by EPA method 8015 modified for gasoline

Methyl-tert Butyl Ether (MTBE) analyzed by EPA method 8020 or 8260

On 7/21/04, 4/08/04, 7/10/03 & 11/14/02, BTEX and MTBE done by 8260B

09/19/06	53,940	1,609,336	42	Restarted system		-	-	-	53,600	59	3,630	4,510	7,400
09/27/06	54,160	1,609,556	28	-	-	-	-	-	-	-	-	-	-

WD PERMIT LIMITS:	NE	5.0	5.0	5.0	5.0
--------------------------	----	-----	-----	-----	-----

Note:

< = less than laboratory detection level indicated

- = no sample / not analyzed

NE = Permit Limit not established

TPH is analyzed by EPA Method 8015 M

BTEX is analyzed by EPA Method 8021 or 8260

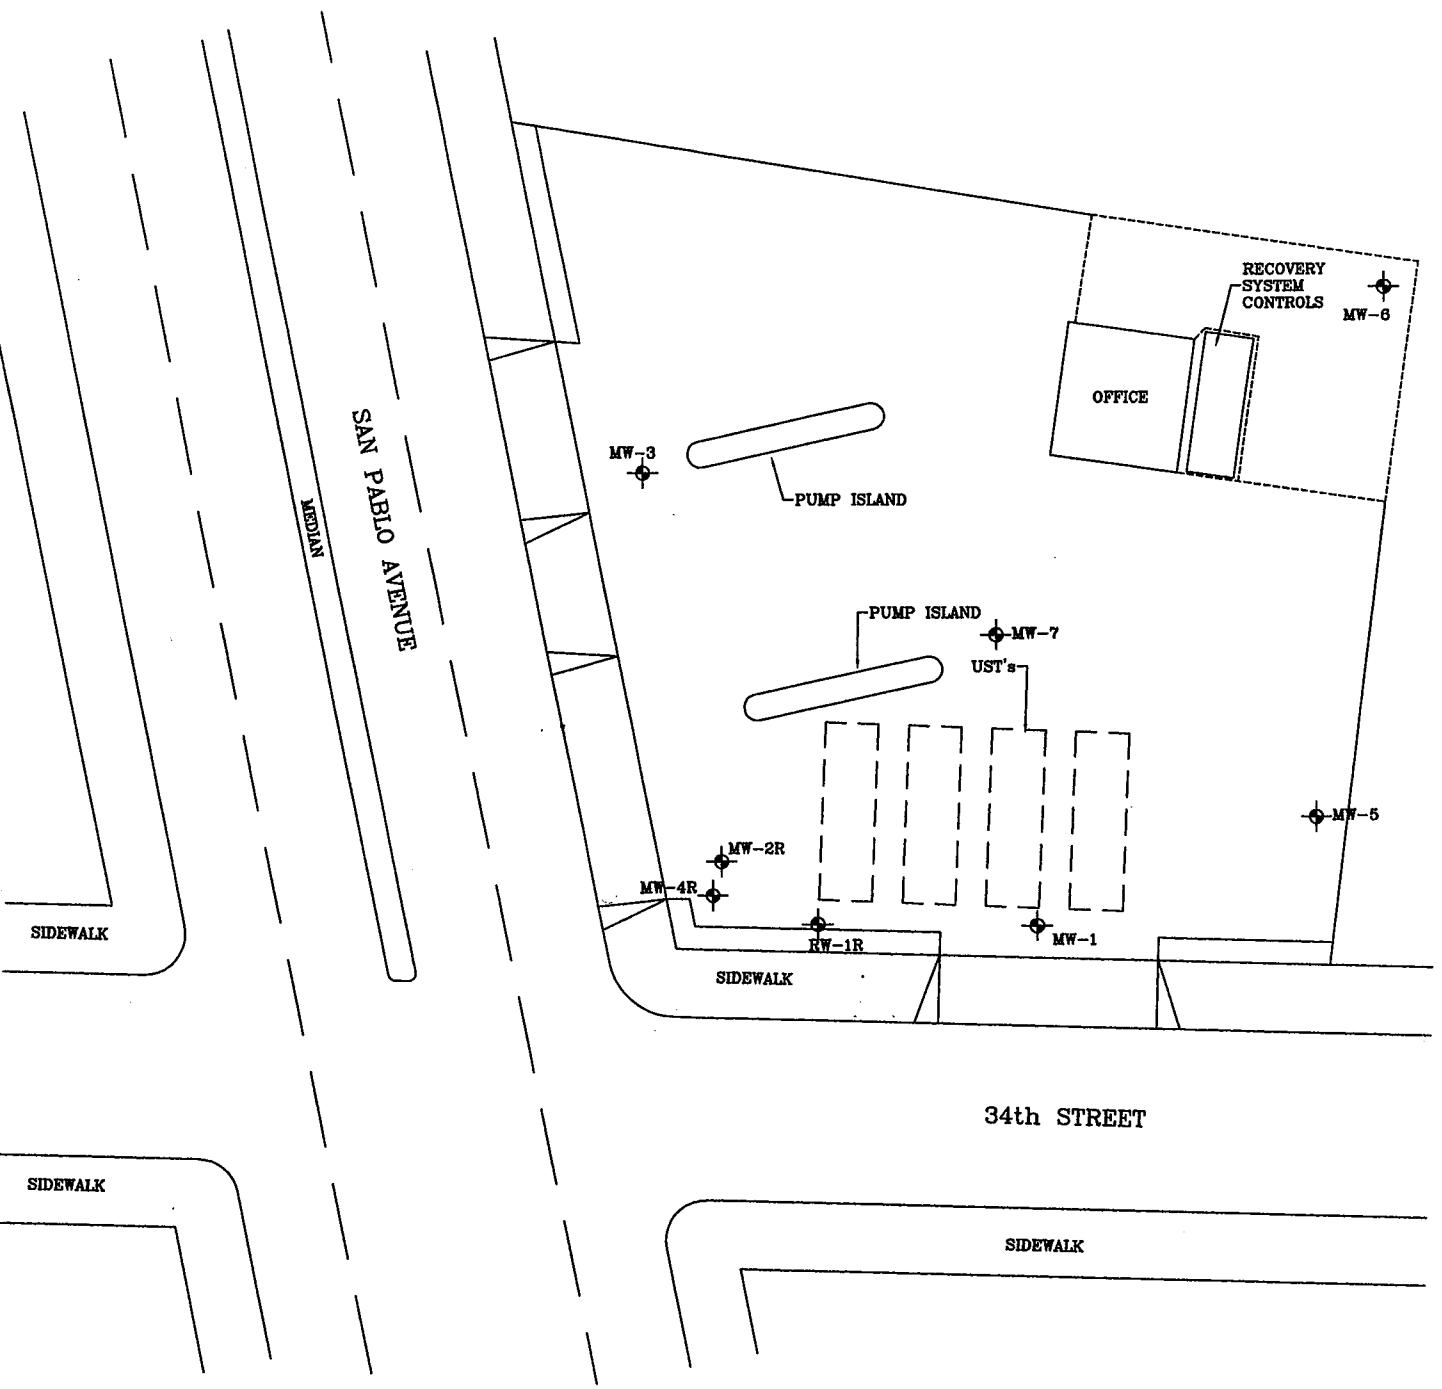

*MTBE by 8021/8260

Total Hydrocarbons Removed = From 4/8/91 to 2/10/92, the influent TPHg is assumed to be 47,000 (3/9/92)

In February 2000, the total cumulative discharge amount was corrected to reflect all system maintenance and flowmeter changeouts since the startup of the system.

The total number may be different from previous versions of this table.

Santa Fe Springs, CA 90670

REPORTED 08/08/2006

PROJECT Station #049
3400 San Pablo Ave., Oakland

SUBMITTER Client

COMMENTS

This laboratory request covers the following listed samples which were analyzed for the parameters indicated on the attached Analytical Result Report. All analyses were conducted using the appropriate methods as indicated on the report. This cover letter is an integral part of the final report.

SAMPLE ACCEPTANCE CHECKLIST

Section 1

Client: thrifly m/c Project: Q.W.S.
Date Received: 7/21/06
Sample(s) received in cooler: Yes No (Skip Section 2)

Section 2

Was the cooler packed with: Ice Ice Packs Bubble Wrap Styrofoam
 Paper None Other _____
Cooler or box temperature: 3.8°C

(Acceptance range is 2 to 6 Deg. C.)

Section 3

	YES	NO	N/A
Was a COC received?	✓		
Were custody seals present?			✓
If Yes - were they intact?			✓
Were all samples sealed in plastic bags?	✓		
Did all samples arrive intact? If no, indicate below.	✓		
Did all bottle labels agree with COC? (ID, dates and times)	✓		
Were correct containers used for the tests required?	✓		
Was a sufficient amount of sample sent for tests indicated?	✓		
No head space in VOA vials?	✓		
Were the correct preservatives used?	✓		
Were the samples scanned for presence of radioactivity?			✓
Was total residual chlorine measured (Fish Bioassay samples only)? *			✓

*: If the answer is no, please inform Fish Bioassay Dept. immediately.

COMMENTS

This laboratory request covers the following listed samples which were analyzed for the parameters indicated on the attached Analytical Result Report. All analyses were conducted using the appropriate methods as indicated on the report. This cover letter is an integral part of the final report.
