RE: **Former Thrifty Oil Co. Station #063**
ARCO Products Company Station #9542
6125 Telegraph Avenue
Oakland, CA
Fourth Quarter 2008, Status Report

Dear Mr. Plunkett:

Presented herein is the Fourth Quarter 2008, Status Report prepared for former Thrifty Oil Co. (Thrifty) Station #063 located at 6125 Telegraph Avenue, Oakland, California (**Figure 1**). Presented in this report are the results of the quarterly groundwater-monitoring program and ongoing remediation conducted during the Fourth Quarter 2008. Thrifty has retained the services of Earth Management Company (EMC) to conduct quarterly monitoring and sampling, and remediation system operation and maintenance activities at this site.

On September 2, 2008, Thrifty submitted a Remedial Action Plan (RAP) to perform a five consecutive day (24-hours/day) multi-phase extraction (MPE) event to reduce the hydrocarbon concentrations beneath the site. The MPE event will utilize a mobile soil vapor extraction system in combination with the existing groundwater treatment system. In a letter dated December 29, 2008 the Alameda County Health Care Services (ACHCS) indicated that they would not approve the RAP until several outstanding issues have been addressed, including delineating the downgradient extent of the contamination plume and evaluating the associated human health risks. As the ACHCS requested, Thrifty will submit a Workplan to address these items, but respectfully requests the ACHCS provide Thrifty approval to immediately proceed with the remediation activities proposed in the RAP.

13116 Imperial Hwy, Santa Fe Springs, CA 90670-0138 • Ph: (562)921-3581

Should you have any questions regarding this report, please contact Simon Tregurtha (562) 921-3581 Ext. 260 or the undersigned at Ext 390.

Respectfully submitted,

Chris Panaitescu
General Manager
Environmental Affairs

Summary of Monitoring and Sampling Activities

Thrifty Oil Co. Station #063

Fourth Quarter 2008

Reporting Period: 09/24/2008 to 12/31/2008

Site Information:

Site address:	TOC SS #063 (ARCO #9542) 6125 Telegraph Avenue Oakland, CA
Global ID No.:	T0600101366
EDF Confirmation No.:	5815495371
Lead Agency No.:	Local #RO0000005
Lead Agency:	Alameda County Health Care Services
Agency Contact:	Mr. Steven Plunkett / 510 383-1767
Project Manager:	Simon Tregurtha / 562-921-3581 ext. 260

Field Activity:

Groundwater wells onsite:	5
Groundwater wells offsite:	2
Date(s) monitored:	October 29, 2008
Date(s) sampled:	October 29, 2008
Groundwater wells gauged:	7
Groundwater wells sampled:	7
Purging method:	Bailer / Pump
Treatment / disposal method during sampling event:	Existing groundwater treatment system
Groundwater wells with free product:	0
Free product thickness (feet):	NA
Free product bailouts other than sampling event:	NA
Treatment / disposal method/free product bailouts:	NA

Site Hydrogeology:

Depth to groundwater (feet bgs):	12.51 to 16.47
Groundwater elevation (feet above mean sea level):	133.15 to 135.87
Groundwater gradient and flow direction:	West-northwest at approximately 0.03 ft./ft.
Consistent with previous quarter:	Similar to previous quarter

Groundwater Conditions:

TPHg concentration (ug/L):	ND<6.6 to 31,500
Benzene concentration (ug/L):	ND<0.18 to 130
Toluene concentration (ug/L):	ND<0.24 to 1,870
Ethyl benzene concentration (ug/L):	ND<0.21 to 926
Total Xylenes concentration (ug/L):	ND<0.45 to 5,510
MTBE concentration (ug/L):	ND<0.19 to 28
DIPE concentration (ug/L):	ND<0.20 to ND <20
ETBE concentration (ug/L):	ND<0.23 to ND <23
TAME concentration (ug/L):	ND<0.19 to ND <19
TBA concentration (ug/L):	ND<5.2 to 81

Remediation Activity:

System type:	GWPT
System start-up:	4/8/1991
GW discharge this quarter (gal.):	95,550 (09/24/08 to 12/23/08)
Total GW discharge (gal.):	3,218,529 (through December 23, 2008)

Groundwater Monitoring

Depth to groundwater is measured in each monitoring well on a quarterly basis. Groundwater monitoring well locations are presented in **Figure 1**. A groundwater elevation contour map based on the October 29, 2008, groundwater monitoring data is presented in **Figure 2**. The groundwater flow direction is to the west-northwest at an approximate gradient of 0.03 feet/foot.

Quarterly Groundwater Sampling

As part of the ongoing groundwater-monitoring program, groundwater samples were obtained from monitoring wells MW-1, MW-3, MW-4, MW-5, MW-6, MW-7, and MW-8 on October 29, 2008. Groundwater samples were collected by Earth Management Company (EMC) and delivered in a chilled state following strict Chain-of-Custody procedure to a state-certified laboratory. The samples were analyzed for total petroleum hydrocarbons as gasoline (TPHg) by EPA Method 8015B, and for benzene, toluene, ethylbenzene, xylenes (BTEX) and methyl tert-butyl ether (MTBE) and other oxygenates by EPA Method 8260B. Laboratory analytical results are provided in **Table 1** and **Table 2**. Copies of the Field Status Reports for groundwater sampling are presented in **Appendix A**, and copies of the laboratory analytical reports are contained in **Appendix B**.

TPHg, benzene, MTBE, and TBA concentration results are presented in **Figures 3, 4, 5, and 6**, respectively. Laboratory results indicate that the highest concentrations of TPHg and benzene were detected in well MW-4 at 31,500 micrograms per liter ($\mu\text{g}/\text{L}$) and 130 $\mu\text{g}/\text{L}$, respectively. MTBE and TBA were only detected in one well (MW-3) at 28 $\mu\text{g}/\text{L}$ and 81 $\mu\text{g}/\text{L}$, respectively. All other oxygenated compounds were not detected at or above laboratory detection limits in any of the wells.

Significant increases in the concentrations of petroleum hydrocarbons in wells MW-3, MW-4 and MW-7 were noted this quarter when compared to the third quarter 2008. The increased concentrations could be

due laboratory or technician error or the result of the rising groundwater table (in wells MW-3, MW-4 and MW-7) which may have caused groundwater to come into contact with adsorbed-phase petroleum hydrocarbons remaining in the subsurface soils in the source area. The increased concentrations in wells MW-3 and MW-4 could also be due to dissolved hydrocarbons being drawn toward these wells during operation of the groundwater treatment system (wells MW-3 and MW-4 are the system extraction wells).

Remediation Status

Site remedial activities were initiated in April 1991. Currently, the remediation system consists of a Groundwater Treatment System that extracts groundwater from monitoring wells MW-3 and MW-4 with treatment utilizing activated carbon. System operational data is included in **Table 3** and **Appendix C**. System inlet and outlet laboratory analytical data is presented in **Appendix D**. During the current reporting period (from September 24 through December 23, 2008), the groundwater treatment system processed approximately 95,550 gallons of groundwater and has treated approximately 3,218,529 gallons of groundwater since start-up (April 1991). The system was upgraded in the 2nd Quarter 2005, when a pump was replaced in well MW-3 and MW-4 was added to the extraction well array.

Other Activities

In a letter received by Thrifty dated December 7, 2005, the Alameda County Health Care Services (ACHCS) requested site information including depth to water, groundwater flow direction, dissolved constituents concentrations, well screen levels, plume stability, and if active remediation was occurring onsite. Thrifty provided the requested information on January 10, 2006. The ACHCS also requested that a site conceptual model (SCM) be prepared for the site; Thrifty uploaded the SCM to the ACHCS FTP website and to Geotracker on April 26, 2006.

In a letter received by Thrifty dated October 24, 2006, the ACHCS requested a Revised SCM (RSCM) and an offsite investigation workplan (Workplan). On behalf of Thrifty, Equipoise Corporation uploaded the RSCM and Workplan to the California Geotracker website and the ACHCS FTP website on November 29, 2006. Subsequently, the ACHCS sent a letter to Thrifty dated December 21, 2006 approving the Workplan for down-gradient off-site assessment.

On February 22, 2007, two downgradient groundwater monitoring wells (MW-7 and MW-8) were installed on the adjacent property located to the south of the Site by Test America of Rancho Cordova, California under the supervision of Equipoise Corporation. Results of the additional site assessment were presented in a *Site Assessment/Well Installation Report*, submitted to ACHCS on April 5, 2007.

Proposed Interim Remedial Action

Historical groundwater analytical data indicates an overall general decrease in dissolved-phase petroleum hydrocarbons at the site which Thrifty believes are a result of the operation of the groundwater remediation system and natural attenuation. In order to reduce the remaining residual dissolved-phase petroleum hydrocarbon contamination in the soil and groundwater beneath the site and to move the site towards closure, Thrifty proposed the implementation of a continuous 5-day high vacuum dual-phase extraction (HVDPE) event (with possible additional events to be performed based upon results). The HVDPE was proposed in the Second Quarter 2008 Status Report dated July 2, 2008 and at that time Thrifty indicated that it would submit a workplan detailing the proposed Interim Remedial Action upon your approval. The

ACEHS did not respond to Thrifty's proposal and on September 2, 2008 (after waiting 60-days and under the 60-day rule) Thrifty submitted a Remedial Action Plan (RAP).

As an alternative to the HVDPE event proposed in the Second Quarter 2008 Status Report, the RAP proposes to utilize the existing groundwater treatment system in combination with a mobile soil vapor extraction (SVE) unit to perform a 5 consecutive day (24 hour/day) multi-phase extraction (MPE) event. The MPE event will be as technically effective as the HVDPE and much more cost-effective by utilizing the existing system for treatment and discharge of groundwater to the sewer (rather than incurring Baker Tank and offsite disposal costs).

In a letter dated December 29, 2008 the Alameda County Health Care Services (ACHCS) indicated that they would not approve the RAP until several outstanding issues have been addressed, including delineating the downgradient extent of the contamination plume and evaluating the associated human health risks. As the ACHCS requested, Thrifty will submit a Workplan to address these items, but respectfully requests the ACHCS provide Thrifty approval to immediately proceed with the remediation activities proposed in the RAP.

Activities Planned for First Quarter 2009

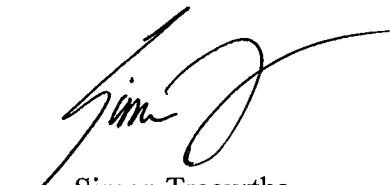

The following activities are planned for next reporting period (First Quarter 2009):

- Submit the Workplan as requested by the ACHCS;
- Continue groundwater monitoring and sampling;
- Continue operations of the groundwater remediation system; and
- Upon your approval, Thrifty will implement the September 2, 2008 RAP.

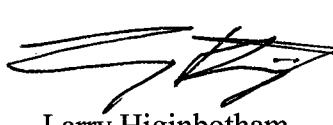

Closing Comments

Interpretations expressed herein are based solely upon data collected and provided by EMC and Associated Laboratories. Should you have any questions regarding this report or require any additional information, please contact Simon Tregurtha at 562-921-3581, Ext. 260.

TABLE 1
GROUNDWATER DATA
THRIFTY OIL STATION #063, OAKLAND, CA

NOTE: Monitoring wells MW-1 through MW-8 were surveyed on 3/5/2007

^a Top of casing elevation estimated to be 6 inches below well rim

NP = No free hydrocarbon product

" - " = Not analyzed / Not available

* MTBE 8020 / 8260

Benzene, toluene, ethylbenzene, and xylene analyzed by EPA method 8020/8021B

Total petroleum hydrocarbons (TPH) analyzed by EPA method 8015 modified for gasoline.

Methyl-tert Butyl Ether (MTBE) analyzed by EPA method 8030/8031B

On 10/8/03 & 7/14/2003, BTEX and MTBE analyzed by 8360B

Beginning 4/14/2004, BTEX and MTBE analyzed by 8260B

TABLE 2
OXYGENATE DATA IN GROUNDWATER
THRIFTY OIL STATION # 063, OAKLAND, CA.

DATE SAMPLED	OXYGENATES

WD PERMIT LIMITS: NE 5.0 5.0 5.0 5.0 NE

Note:

< = less than laboratory detection level indicated

TPH is analyzed by EPA Method 8015 M

- = no sample / not analyzed

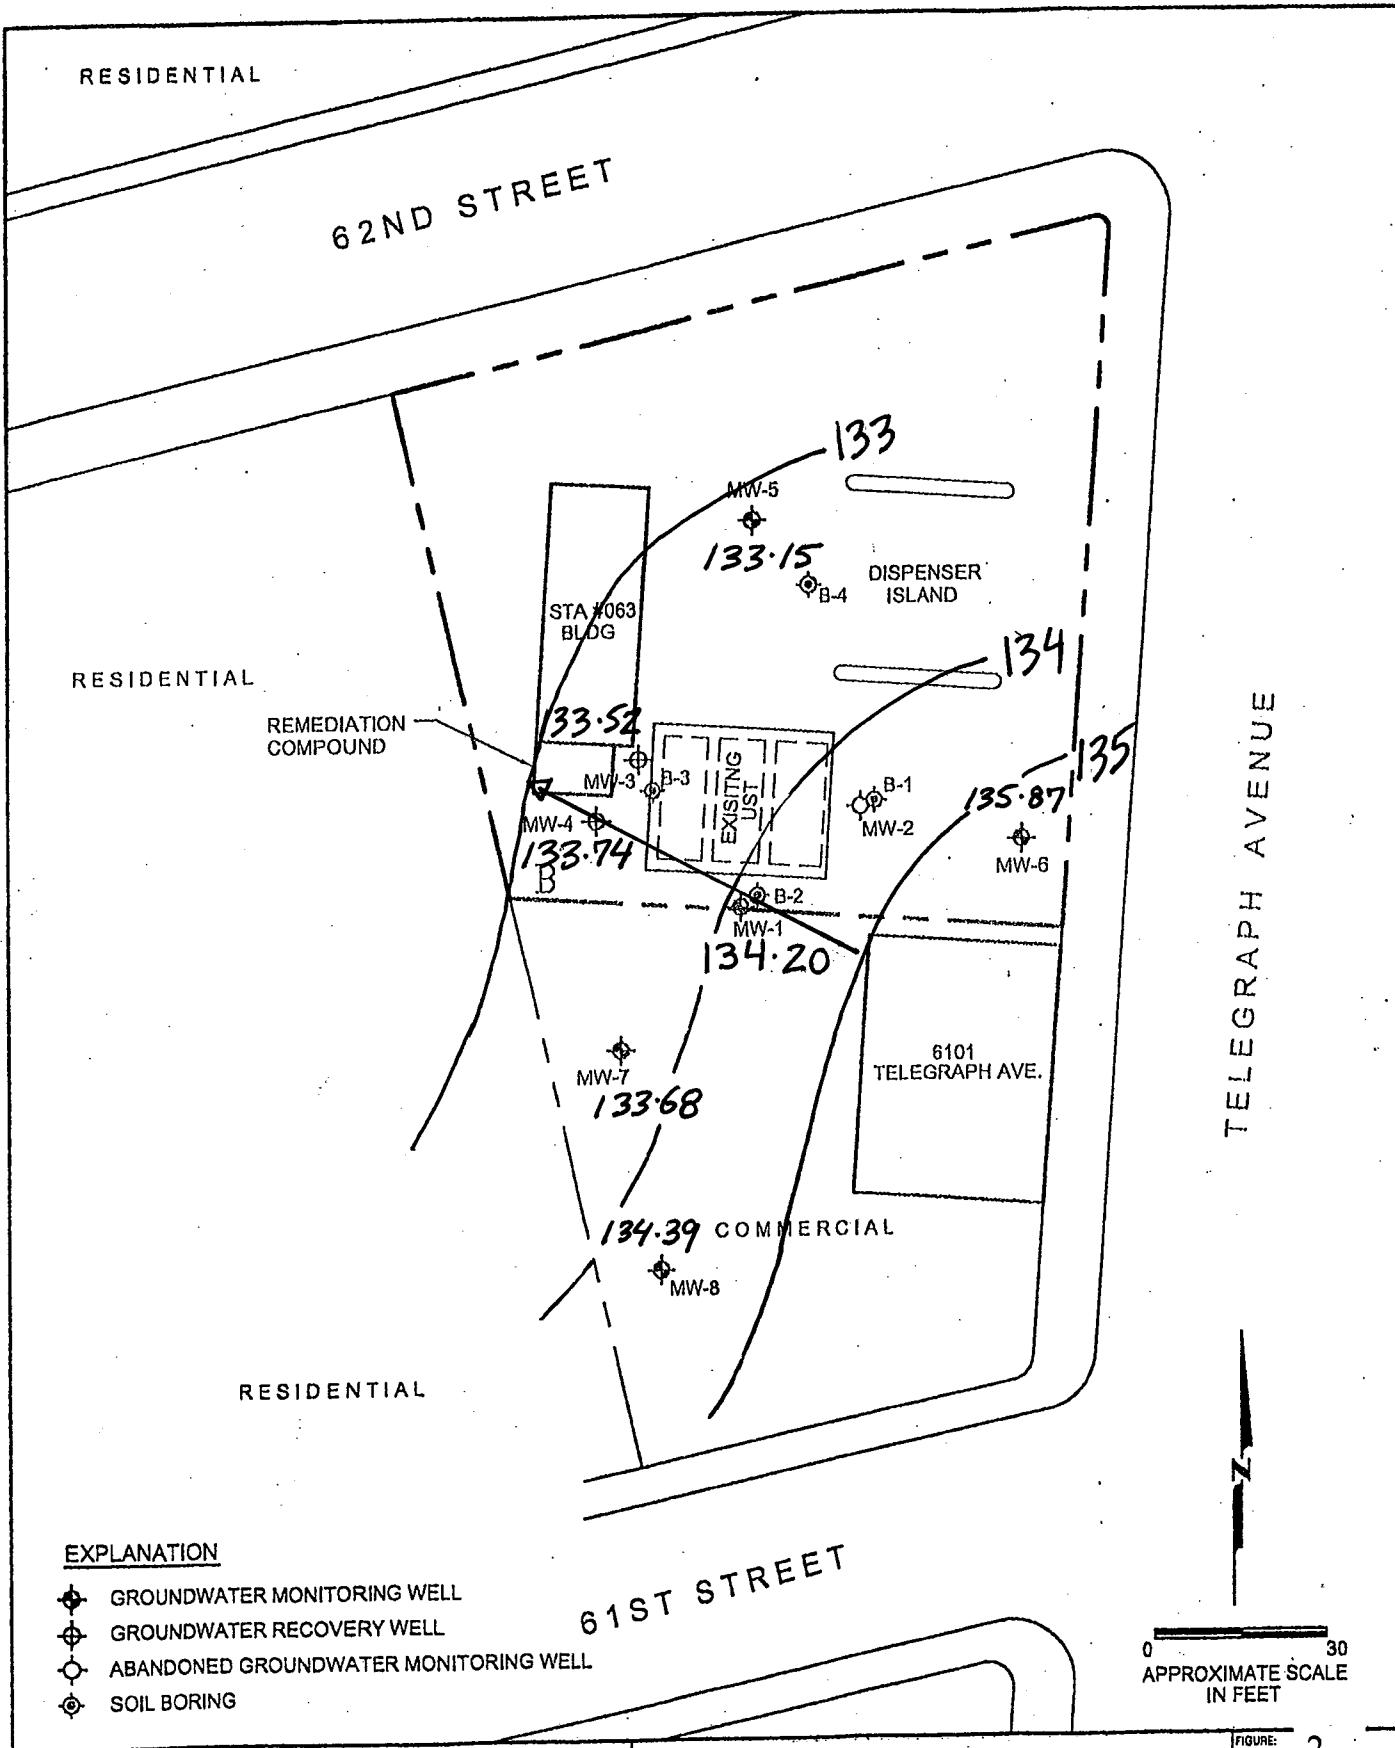

NE = Permit Limit not established

BTEX is analyzed by EPA Method 8021 or 8260

*MTBE by 8020 / 8260

In February 2000, the total cumulative discharge amount was corrected to reflect all system maintenance and flowmeter changeouts since the startup of the system. The total number may be different from previous versions of this table.

FIGURES

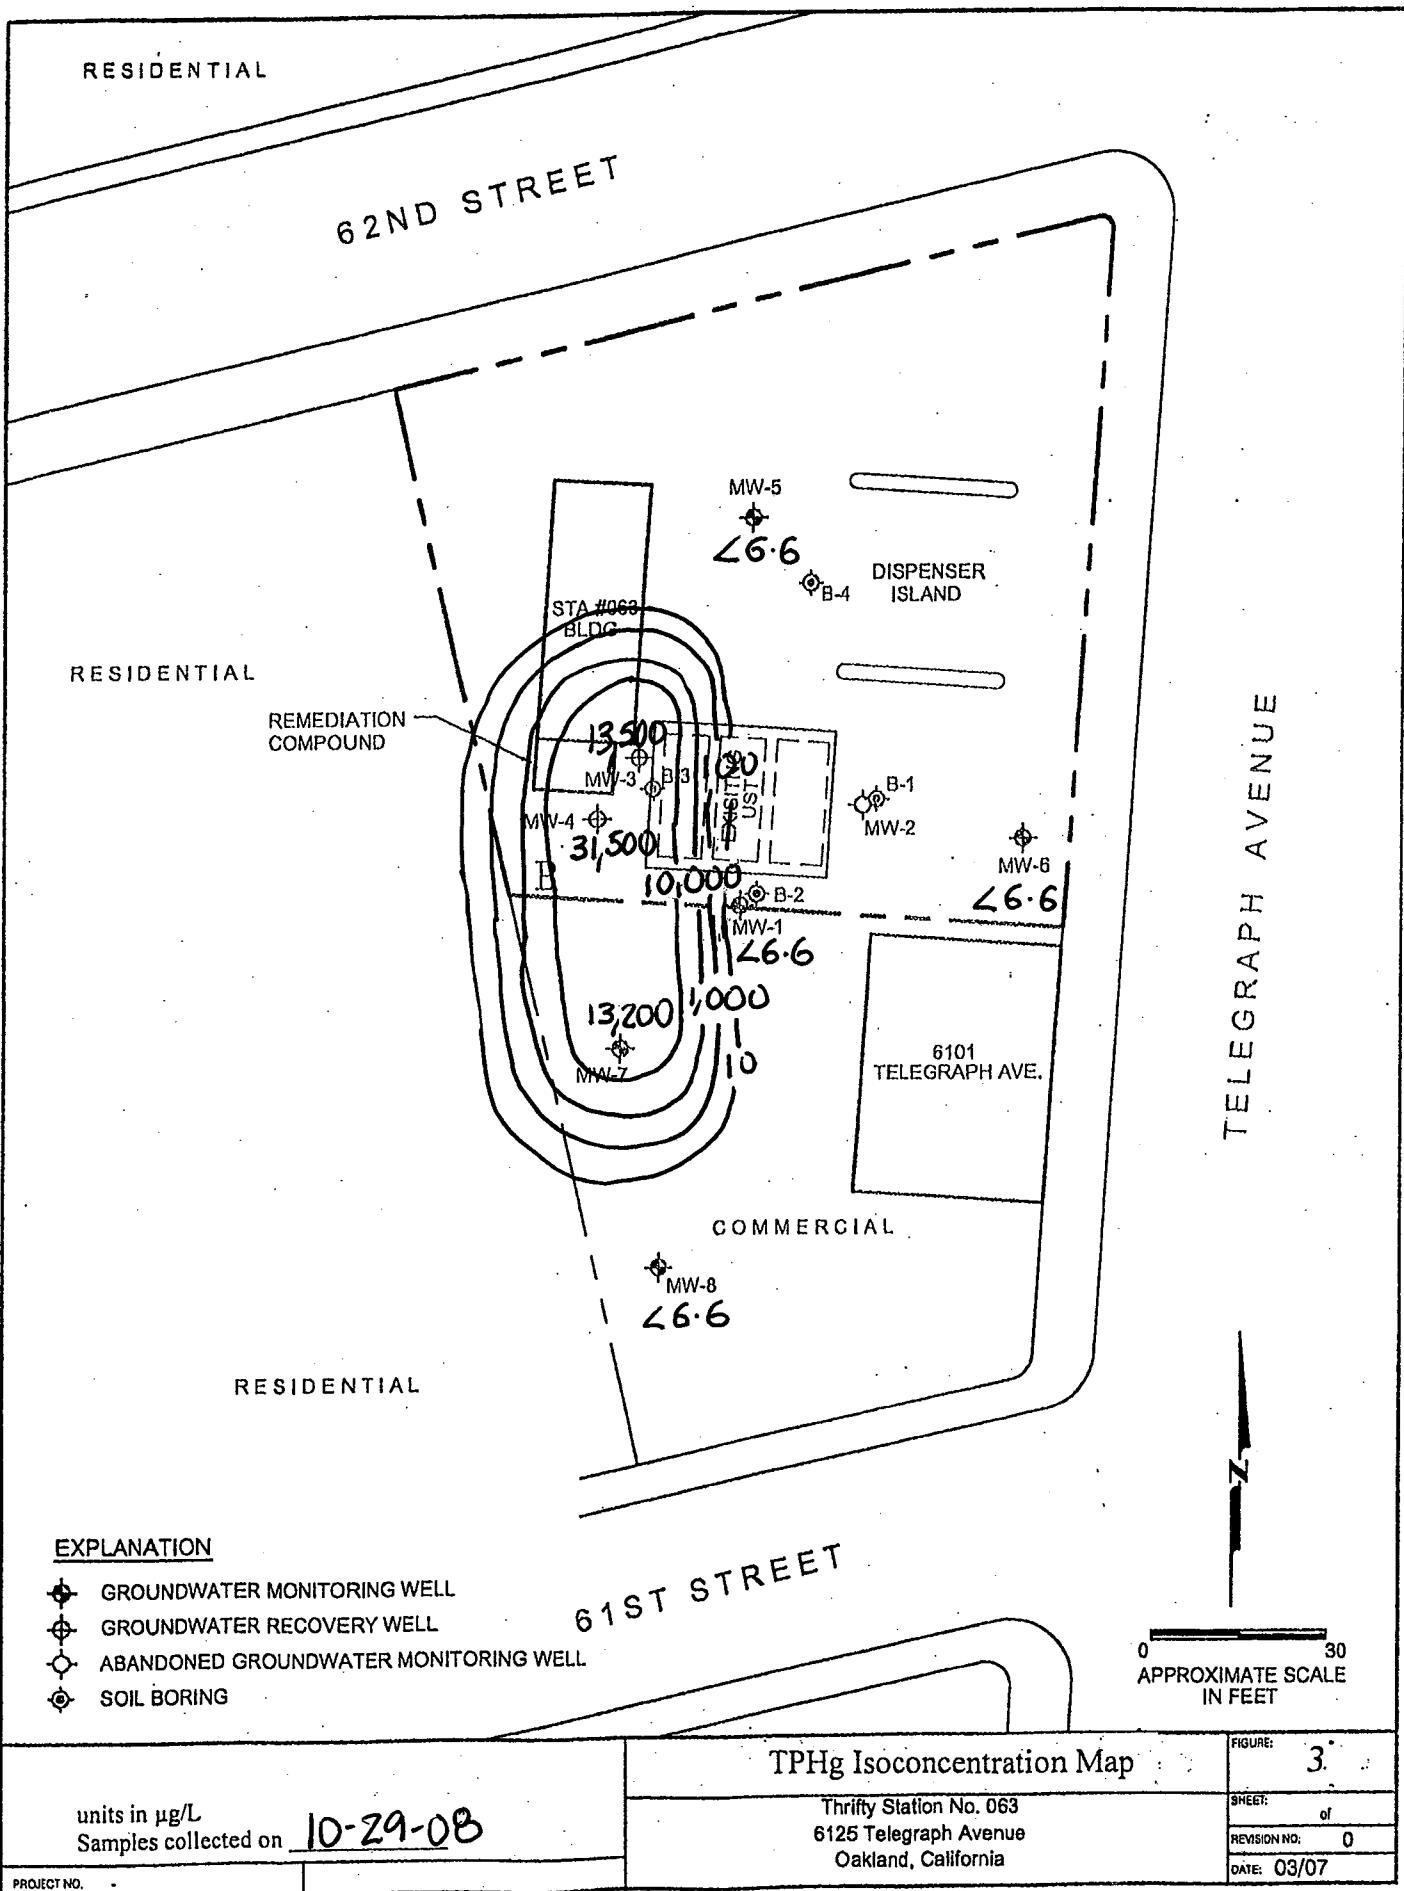

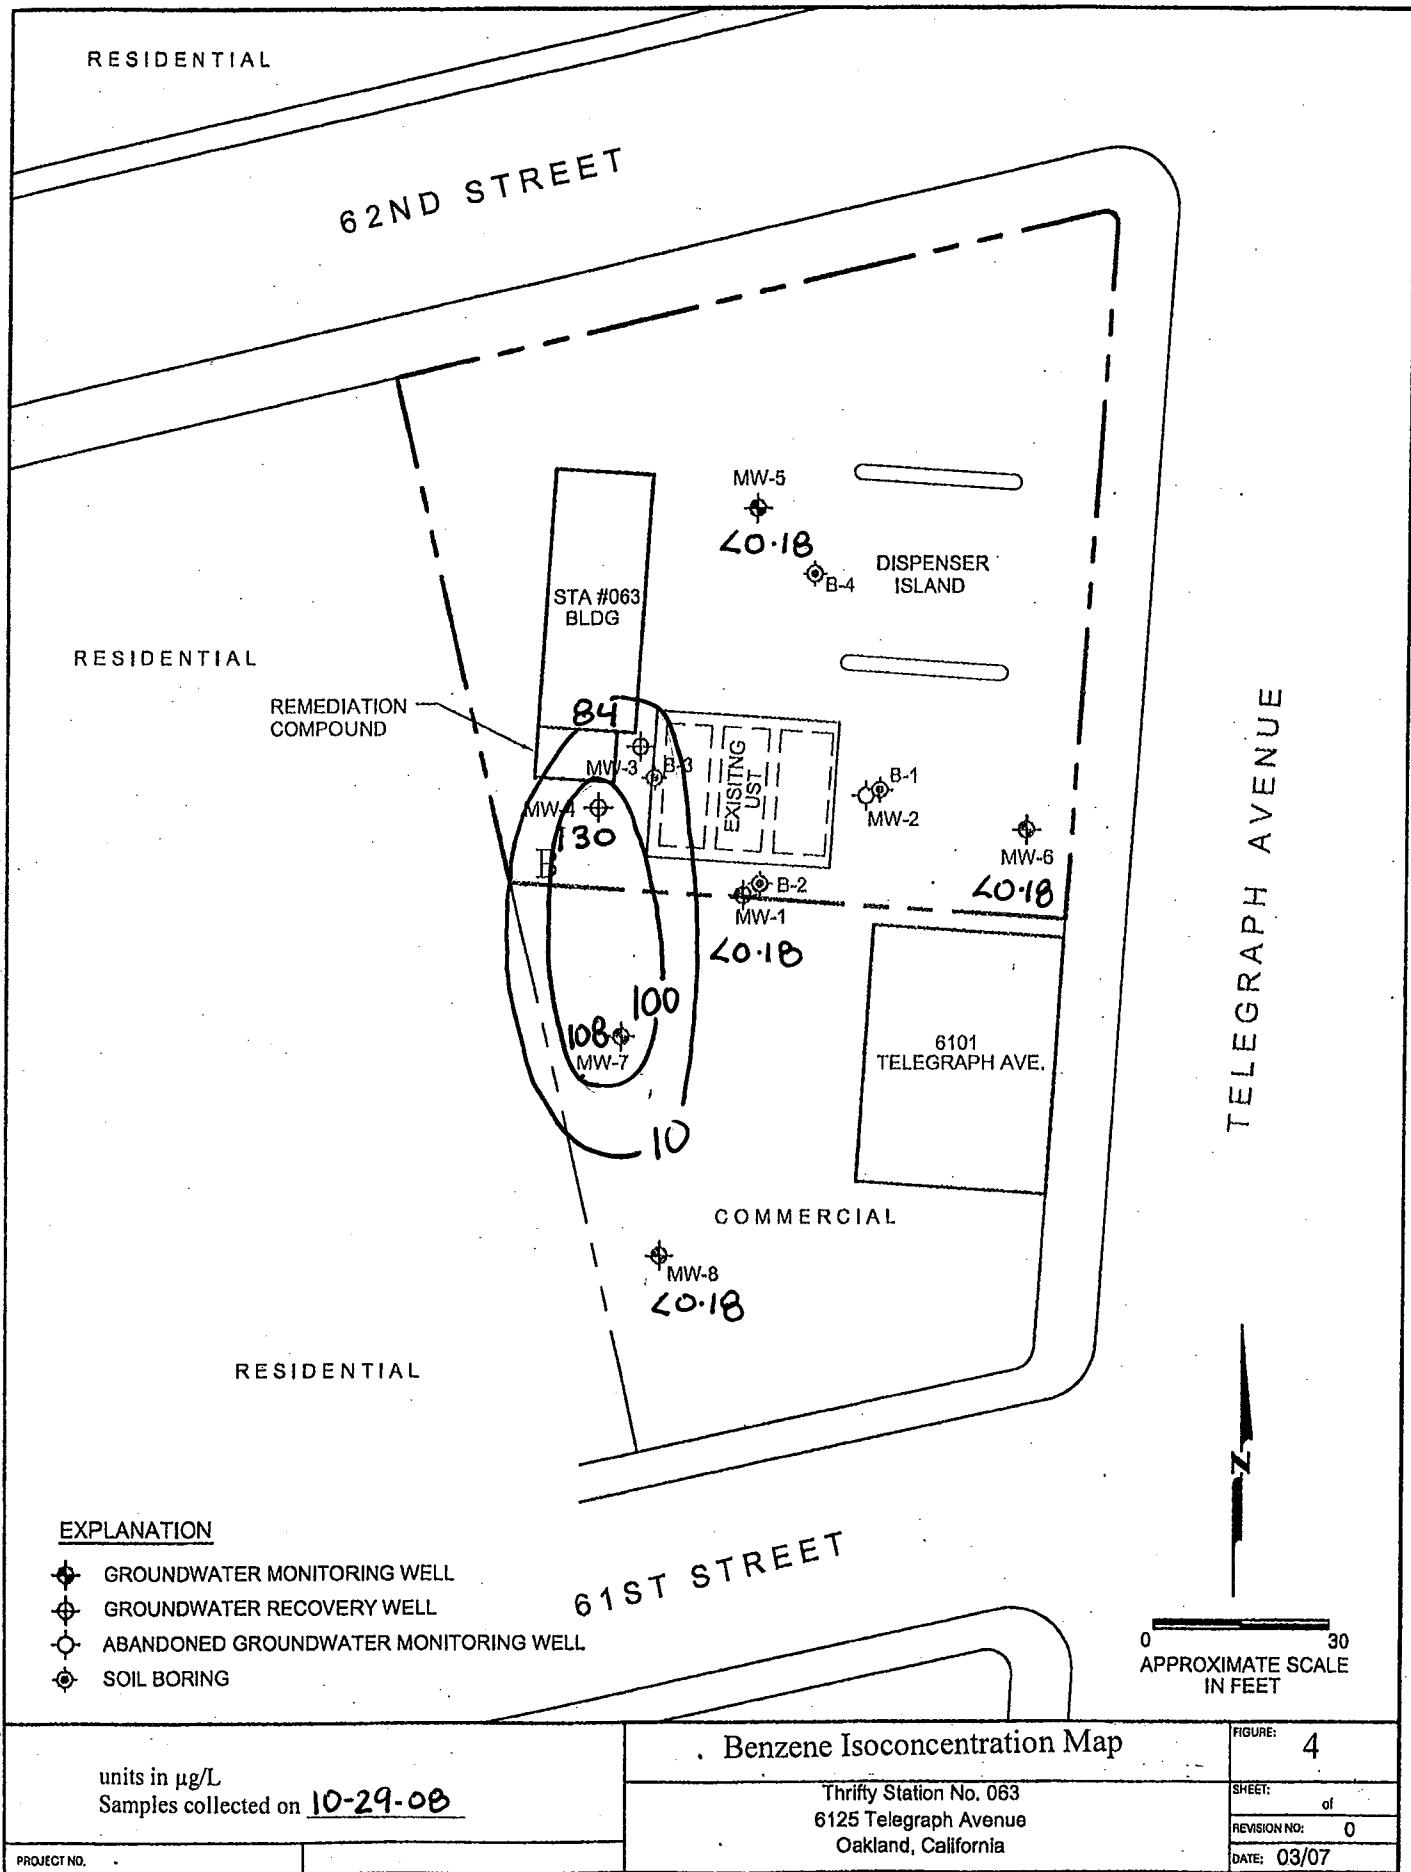

Groundwater gauging conducted on 10-29-08
 Elevations reported in feet above mean sea level
 * = not used to determine groundwater contour lines

SAMPLE ACCEPTANCE CHECKLIST

Section 1

Client: TDC

Date Received: 10/31/08

Sample(s) received in cooler: Yes

Shipping Information:

Project: _____

Sampler's Name: Yes No

No (Skip Section 2)

Section 2

Was the cooler packed with: Ice Ice Packs Bubble Wrap Styrofoam
 Paper None Other _____

Cooler or box temperature: 20 C

(Acceptance range is 2 to 6 Deg. C.)

Section 3

	YES	NO	N/A
Was a COC received?	X		
Is it properly completed? (IDs, sampling date and time, signature, test)	X		
Were custody seals present?	X		
If Yes - were they intact?	X		
Were all samples sealed in plastic bags?	X		
Did all samples arrive intact? If no, indicate below.	X		
Did all bottle labels agree with COC? (ID, dates and times)	X		
Were correct containers used for the tests required?	X		
Was a sufficient amount of sample sent for tests indicated?	X		
Was there headspace in VOA vials?		X	
Were the containers labeled with correct preservatives?			X
Was total residual chlorine measured (Fish Bioassay samples only)? *			X

*: If the answer is no, please inform Fish Bioassay Dept. immediately.

CLIENT	Thrifty Oil Company	(8871)	LAB REQUEST	222550
ATTN:	Jeff Suryakusuma			
13116 Imperial Hwy.			REPORTED	11/12/2008
P.O. Box 2128				
Santa Fe Springs, CA 90670			RECEIVED	10/31/2008
PROJECT	Station #063 6125 Telegraph Ave., Oakland			
SUBMITTER	Client			
COMMENTS	REVISED REPORT 12/15/08.			

This laboratory request covers the following listed samples which were analyzed for the parameters indicated on the attached Analytical Result Report. All analyses were conducted using the appropriate methods as indicated on the report. This cover letter is an integral part of the final report.

<u>Order No.</u>	<u>Client Sample Identification</u>
942733	TOC #063 INT-1

Date Received: 10/31/08
Sample(s) received in cooler: Yes
Shipping Information:

Project: _____

Sampler's Name: Yes No

No (Skip Section 2)

Section 2

Was the cooler packed with: Ice Ice Packs Bubble Wrap Styrofoam
 Paper None Other _____

Cooler or box temperature: 20 C

(Acceptance range is 2 to 6 Deg. C.)

Section 3

	YES	NO	N/A
Was a COC received?	<input checked="" type="checkbox"/>		
Is it properly completed? (IDs, sampling date and time, signature, test)	<input checked="" type="checkbox"/>		
Were custody seals present?	<input checked="" type="checkbox"/>		
If Yes - were they intact?	<input checked="" type="checkbox"/>		
Were all samples sealed in plastic bags?	<input checked="" type="checkbox"/>		
Did all samples arrive intact? If no, indicate below.	<input checked="" type="checkbox"/>		
Did all bottle labels agree with COC? (ID, dates and times)	<input checked="" type="checkbox"/>		
Were correct containers used for the tests required?	<input checked="" type="checkbox"/>		
Was a sufficient amount of sample sent for tests indicated?	<input checked="" type="checkbox"/>		
Was there headspace in VOA vials?		<input checked="" type="checkbox"/>	
Were the containers labeled with correct preservatives?			<input checked="" type="checkbox"/>
Was total residual chlorine measured (Fish Bioassay samples only)? *			<input checked="" type="checkbox"/>

*: If the answer is no, please inform Fish Bioassay Dept. immediately.
